MADEIRA, an island, N.W. coast of Africa, discovered, it is said, in 1344, by Mr. Macham, an English gentleman, or mariner, who fled from France for an illicit amour. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Aragon, which occasioned the report that the island was discovered by a Portuguese, 1345. It is asserted that the Portuguese did not visit this island until 1419 or 1420, or colonise it until 1431. It was taken by the British in July, 1801; and again by admiral Hood and general Beresford, 24 Dec. 1807, and retained in trust for the royal family of Portugal, who had emigrated to the Brazils. It was restored to the Portuguese in 1814. Since 1852 the renowned vintages here have been almost totally ruined by the vine disease (oidium). MAGDALA, a very strong place in Abyssinia (*which see*). On Good Friday, 10 April, 1868, the troops of the emperor Theodore attacked the first brigade of the British army under sir Robert Napier, and were repulsed with great slaughter. On the next day all the European prisoners were given up, but Theodore himself refused to surrender; and on Easter Monday, 13 April, Magdala was stormed, and Theodore himself killed—it is said by his own hand.—British loss, 2 killed; 20 wounded: Abyssinian loss, about 500 killed and wounded out of about 5000. Magdala was burnt to the ground by the British, 17 April, 1868.

MAGDALENS AND MAGDALENETTES, communities of nuns. The order of penitents of St. Magdalen was founded 1272, at Marseilles. The convent of Naples was endowed by queen Sancha, 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Leo X., in 1515, and favoured by Clement VIII. in 1594. The Magdalen hospital, London, was founded in 1758, under the direction of Dr. Dodd. The asylum in Dublin was opened in June, 1766.

MAGDEBURG (Prussia). The archbishopric was founded about 967. The city suffered much during the religious wars in Germany. It was besieged and taken by the elector Maurice, Nov. 1550, and Nov. 1551; blockaded for seven months by the imperialists, under Wallenstein, in 1629; and barbarously sacked by Tilly on 10 May, 1631. It was given to Brandenburg in 1648; was taken

by the French, 8 Nov. 1806; annexed to the kingdom of Westphalia, 9 July, 1807; restored to Prussia, May, 1813. Valuable fine art collection burnt 6 April, 1891. Population, 1900, 229,663; 1910 (est.), 268,000.

The *Magdeburg Experiment* is shown by means of a hollow sphere, composed of two hemispheres, fitting air-tight. When the air is exhausted by the air-pump, the hemispheres are held together by the pressure of the atmosphere, and require great force to separate them. The apparatus was suggested by Otto von Guericke, the inventor of the air-pump. He died in 1686. *Brande*.

MAGELLAN, STRAITS OF (connecting the Atlantic and Pacific oceans), was passed by Fernando de Magelhaens (Magellan), a Portuguese, on 27 Nov. 1520. He gave the latter ocean its name on account of its calmness. Magellan completed the first voyage round the world, with a fleet of discovery fitted out by the emperor Charles V., but was killed in 1521. The Spaniards had a fort here, called Cape Famine, because the garrison perished from want.

MAGENTA, a small town in Lombardy, near which the French and Sardinians defeated the Austrians, 4 June, 1859. The emperor Louis Napoleon commanded, and he and the king of Sardinia were in the thickest of the fight. It is said that 55,000 French and Sardinians, and 75,000 Austrians were engaged. The former are asserted to have lost 4000 killed and wounded, and the Austrians 10,000, besides 7000 prisoners. The French generals Espinasse and Clerc were killed. The arrival of general MacMahon during a deadly struggle between the Austrians and the French, greatly contributed to the victory. The contest near the bridge of Buffalora was very severe. The Austrians fought well, but were badly commanded. The emperor and king entered Milan on 8 June following; MacMahon and Regnault d'Angely were created marshals of France. A monument erected here in memory of the slain was solemnly inaugurated 4 June, 1872.—The red dye, rosaniline, obtained by chemists from gas-tar, is termed *magenta*; see *Aniline*.

MAGI, an order of priests and teachers among the ancient Medes and Persians, with much political power. One of them who on the death of Cambyses asserted that he was Smerdis, a son of Cyrus, and claimed the throne of Persia, was deposed by Darius Hystaspes, 521 B.C., and a massacre of the Magi followed. They retained their religious position till the later Roman empire. The constitution of the order is traditionally assigned to Zoroaster, the Zarathustra of the Zendavesta, whose time and very existence are uncertain, the 6th century B.C. being mentioned. He is said to have taught the knowledge of Ormuzt, the supreme good principle, to the Magi, whom he classified as learners, masters, and perfect scholars, the possessors of all spiritual power, and the science of the age, see *Parsees*. The name Magi has been applied to the "wise men" of *Matt. ii.*, and the Parsees at Bombay are descendants of the Guebres or fire-worshippers.

MAGIC, see *Alchemy*, *Witchcraft*, &c. The invention of the **MAGIC LANTERN** is ascribed to Roger Bacon, about 1260, but more correctly to Athanasius Kircher, who died 1680. Sir David Salomons, in a discourse at the Royal Institution on "Optical Projection," exhibited an arrangement of the magic lantern, in which by the use of lenses magnifying up to 4,500 diameters, he stated that he was enabled to magnify a postage stamp to the size of 2½ acres, 26 Feb. 1892.

MAGISTRATES, see *Justices*. Stipendiary borough magistrates may be appointed by 5 & 6 Will. IV. c. 76, 1853; and by 26 & 27 Vict. c. 97, 1863. Henry Fielding, the novelist, was acting magistrate for Westminster and at Bow-street. There are 14 metropolitan police courts and 2 city courts, June, 1910.

MAGNA CHARTA. Its fundamental parts were derived from Saxon charters, continued by Henry I. and his successors. On 20 Nov. 1214, the archbishop of Canterbury and the barons met at St. Edmondsbury. On 6 Jan. 1215, they presented their demands to king John, who deferred his answer. On 19 May they were censured by the pope. On 24 May they marched to London, and the king was compelled to yield. The charter was sealed by John at Runnymede, near Windsor, 15 June, 1215. It was many times confirmed, by Henry III. and his successors. This last king's grand charter was granted in 1224, and was assured by Edward I.; see *Forests*. The original MS. charter is lost. The finest MS. copy, which is at Lincoln, was reproduced by photographs in the "National MSS." published by government, 1865.

MAGNA GRÆCIA, the independent states founded by Greek colonists in South Italy, Sicily, &c. Cumæ, in Campania, is said to have been founded in 1034 B.C., Pandosia and Metapontum in 774 B.C. These states were ruined through siding with Hannibal when he invaded Italy, 216 B.C.

MAGNANO (N. Italy). Here Scherer and a French army were defeated by the Austrians under Kray, 5 April, 1799.

MAGNESIA (Asia Minor). Here Antiochus the great, king of Syria, was defeated by the Scipios, 190 B.C.—*Magnesia alba*, the white alkaline earth used in medicine, was in use in the beginning of the 18th century. Its properties were developed by Dr. Black in 1755.

MAGNESIUM, a metal first obtained from magnesia by sir Humphry Davy in 1808, and since produced in larger quantities by Bussy, Deville, and especially by Mr. E. Sonstadt, in 1862-4. Its light when burnt is very brilliant, and is so rich in chemical rays that it may be used in photography. Lamps made for burning magnesium wire were employed by the excavators of the tunnel through Mount Cenis. By its light photographs of the interior of the Pyramids were taken in 1865. Larkin's magnesium lamp (in which the metal is burnt in the form of a powder) was exhibited at the Royal Institution on 1 June, 1866, and before the British Association at Nottingham in Aug. 1866.

MAGNETISM. The attractive power of the loadstone or magnet was early known, and is referred to by Homer, Aristotle, and Pliny; it was also known to the Chinese and Arabians. The Greeks are said to have obtained the loadstone from Magnesia in Asia, 1000 B.C. Roger Bacon is said to have been acquainted with its property of pointing to the north (1294). The invention of the mariner's compass is ascribed to Flavio Gioia, a

Neapolitan, about 1310; but it was known in Norway previous to 1266; and is mentioned in a French poem, 1150. See under *Electricity*.

MAGNETO-ELECTRICITY, the discovery of professor Faraday; see under *Electricity*. Magneto-electricity has been applied to telegraphic and to lighthouse purposes. The South Foreland lighthouse, near Dover, was illuminated by the magneto-electric light in the winter of 1858-9 and 1859-60 (the light removed to Dungeness in 1861), the Lizards, by Dr. C. William Siemens' magneto-electric light, 1878. See *Faradisation*.

MAGNOLIA. *Magnolia glauca* was brought here from N. America, 1688. The laurel-leaved Magnolia, *Magnolia grandiflora*, from N. America, about 1734. The dwarf Magnolia, *Magnolia pumila*, from China, in 1789; and (also from China) the brown stalked, 1789; the purple, 1790; and the slender, 1804.

MAHARAJPOOR (India). Here sir Hugh Gough severely defeated the Mahratta army of Gwalior, 29 Dec. 1843. Lord Ellenborough was present.

MAHDI (Guided by God), a name assumed by several Mahometan fanatics claiming to be divinely sent reformers and liberators. An eminent example is found in Ibn Tumert, the Almohade Mahdi in the 12th century. See *Babysm*, and for the latest Mahdis see *Soudan*, 1881, *et seq.* A Mahdi rose in Bokhara, named Mahomed Abdallah Ben Oman, May, 1884. See *Dervishes*. "Ten Years' Captivity in the Mahdi's Camp" by Father Ohrwalder, published 1892. Total defeat of the Khalifa at Omdurman, 2 Sept. 1898; again at Omdebrikat, when he and his chief emirs were killed (see *Soudan*, 24 Nov. 1899), and consequent end of Mahdism.

MAHEDPORE, see *Mehedpore*.

MAHOGANY, the wood of the *Suietenia mahogoni*, a tree some 100 ft. high, native to the West Indies and S. America. The earliest notice of mahogany is in connection with the repairing of some of sir Walter Raleigh's ships at Trinidad, 1597. Said to have been brought to England at the end of the 17th century as ballast from the W. Indies. First used for cabinet-work by a cabinet-maker named Woolaston, and employed as a new material for furniture in the beginning of the 18th century.

MAHOMETANISM embodied in the Koran, includes—the unity of God, the immortality of the soul, predestination, a last judgment, and a sensual paradise. Mahomet asserted that the Koran was revealed to him by the angel Gabriel during a period of twenty-three years. He enjoined on his disciples circumcision, prayer, alms, frequent ablution, and fasting, and permitted polygamy and concubinage.

The Mahometan year, 1319–1320. Months; Shawall (begins 11 Jan. 1902); Dulkaada (9 Feb.); Dulheggia (11 March); Muharram (10 April); Saphar (10 May); Rabia I. (8 June); Rabia II. (8 July); Jomada I. (6 Aug.); Jomada II. (4 Sept.); Rajab (2 Oct.); Shaaban (5 Nov.); Ramadan (2 Dec.).

The Mahometans are divided into several sects, the two chief being the *Sunnites*, or the Orthodox (who recognised as caliph Abubeker, the father-in-law of Mahomet, in preference to Omar and Ali), and the *Shiites* (Sectaries), or *Fatimites*, the followers of Ali, who married Fatima, the prophet's daughter.

The former (also called Sunnites) recognise the "Sunna" (traditions) sayings of Mahomet (supplementary to the Koran) which the Shiites reject. Husan and other sons of Ali were murdered A.D. 680, and a miracle play and a festival in their honour are still observed.

The Ottoman empire is the chief seat of the Sunnites, the sultan being considered the representative of the caliphs; Persia has been for centuries the stronghold of the Shiites.

Their progress in France was stopped by their defeat at Tours by Charles Martel, in . . . 732

The Mahometan Arabs termed Saracens, conquered Arabia, North Africa, and part of Asia, in the

7th century; in the 8th they invaded Europe, conquering Spain, where they founded the califat of Cordova, which lasted from 756 to 1031, when it was broken up into smaller governments, the last of which, the kingdom of Grenada, endured till its subjugation by Ferdinand in 1492; but the Moorish Mahometans were not finally expelled from Spain till . . . 1609

MAHRATTAS, a people of Hindostan, who originally dwelt north-west of the Deccan, which they overran about 1676. They endeavoured to overcome the Mogul, but were restrained by the Afghans. They entered into alliance with the East India company in 1767, made war against it in 1774, again made peace in 1782, and were finally subdued in 1818. See *India* 1803, *et seq.*, *Gwalior* and *Indore*.

MAID, see *Holy Maid*, Elizabeth Barton, and *Joan of Arc*, maid of Orleans.

MAIDA (Calabria) where the French, commanded by general Regnier, were signally defeated by the British under major-general sir John Stuart, 4 July, 1806.

MAIDEN, see *Guillotine*.

MAIDS OF HONOUR. Anne, daughter of Francis II. duke of Brittany, and queen of Charles VIII. and Louis XII. of France (1483-98), had young and beautiful ladies about her person, called maids of honour. The queen of Edward I. of England is said to have had four maids of honour (1272-1307); queen Victoria had eight; queen Alexandra has four.

MAIDSTONE, Kent, a British town, anciently termed the city of the Medway (Caer Meguaid), a possession of the archbishops of Canterbury in 1086-7. It was chartered by several kings, from Edward VI. to George II. The royalist Kentish men were here defeated by Fairfax, 1648. The

archbishop's palace was built in 1348. All Saints' college, now in ruins, was founded in 1260 as a hospital for pilgrims travelling to Canterbury; it was suppressed during the reign of Edward VI. Hazlitt, the essayist, Woollett, the engraver, and the rebel sir Thomas Wayatt were natives of the town. Maidstone, which previously sent two members to parliament, since 1885 sends one. Typhoid epidemic attributed to bad water; Farleigh water supply cut off, 2 Oct. 1897 (see *Mansion-house Fund*). Population, 1901, 34,000.

MAIL-COACHES, for the conveyance of letters, were first set up at Bristol by Mr. John Palmer, of Bath, 2 Aug. 1774. They were employed for other routes in 1785, and soon became general in England. The mails first sent by rail in 1838.

MAILLOTINS (small mallets), a name given to certain citizens of Paris, who, in March, 1382, violently opposed the collection of new taxes imposed by the duke of Anjou, the regent. They armed themselves with small iron mallets (taken from the arsenal), and killed the collectors; for which they were severely punished in Jan. 1383.

MAIMING AND WOUNDING, see *Coventry Act*.

MAIN PLOT, a name given to a conspiracy to make Arabella Stuart sovereign of England in place of James I. in 1603. Lord Cobham, sir Walter Raleigh, and lord Grey, were condemned to death for implication in it, but reprieved; others were executed. Raleigh was executed, 29 Oct. 1618.

MAINE, 1, a province, N.W. of France, seized by William I. of England in 1069. It acknowledged prince Arthur, 1199; was taken from John of England by Philip of France, 1204; was recovered by Edward III. in 1357; but given up, 1360. After various changes it was finally united to France by Louis XI. in 1481.—2. **MAINE** (N. America), was discovered by Cabot, 1497; and colonised by the English 1630 *et seq.*; it became a state of the union in 1820. Capital, Augusta. Population, 1900, 694,466; 1910 (est.), 810,200. The boundary line between the British and the United States territories in Maine was settled by the Ashburton treaty, concluded 9 Aug. 1842. The *Maine liquor law*, prohibiting the manufacture, sale, and use of intoxicating drinks, with certain exceptions, was enacted in 1851. In 1872, it was officially reported to have greatly decreased drunkenness and rendered the trade disreputable.

MAIWAND, Afghanistan, about 50 miles from Candahar. On 27 July, 1880, gen. J. Burrows marched from Kushk-i-Nakhud, and attacked the army of Ayoub Khan, about 20,000 men, and after four hours' severe conflict was compelled to retreat. About 300 of the British with many officers fell (including lieut.-col. Galbraith, major G. F. Blackwood, captains

Garratt, McMath, Cullen, Roberts, and others), especially officers of the 66th regiment; with about 700 of the native troops killed or missing. The British commanders were censured. Ayoub Khan did not improve his victory, and was totally defeated by gen. sir F. Roberts, 1 Sept. 1880. See *Mazra*.

MAJESTY. Among the Romans, the emperor and imperial family were thus addressed, and also the popes and the emperors of Germany. The style was given to Louis XI. of France in 1461. *Voltaire*. Upon Charles V. being chosen emperor of Germany in 1519, the kings of Spain took the style. Francis I. of France, at the interview with Henry VIII. of England, on the Field of the Cloth of Gold, addressed the latter as Your Majesty, 1520. James I. used the style "Sacred," and "Most Excellent Majesty."

MAJORCA, see *Balearic Isles*, and *Minorca*. Majorca opposed Philip V. of Spain in 1714; but submitted, 14 July, 1715. Its first railway, from Palma, capital of the Balearic isles, to Inca, 18 miles, opened, 24 Feb. 1875.

MAJUBA HILL (see *Transvaal*). On Saturday night, 26 Feb. 1881, above 600 men under sir George P. Colley marching from the camp at Mount Prospect, ascended Majuba hill overlooking Laing's Nek, where the Boers were encamped, to surprise them. The attack of the Boers began 10.30 a.m. of the 27th. Fierce conflicts ensued; eventually overwhelmed by numbers and deadly fire, the British were routed and fled. Sir George Colley fell with his face to the enemy. Boer loss unknown, some say only one man. About 350 British engaged. Loss: killed, 3 officers and about 82 men; many wounded, 122 prisoners, and some missing.

MAKALAKA, see *Mashona*.

MALABAR (S.W. coast of Hindostan). The Portuguese established factories here in 1505; the English did the same in 1601. A murderous attack on the Hindus by the Moplah Mussulmans, punished by the British, 8 April, 1894.

MALACCA, on the Malay peninsula, E. Indies, was made a Portuguese settlement in 1511. The Dutch factories were established in 1640. The Dutch government exchanged it for Bencoolen in Sumatra in 1824, when it was placed under the Bengal presidency. It is now part of the *Straits Settlements* (which see).

MALAGA (S. Spain), a Phœnician town, taken by the Arabs, 714; retaken by the Spaniards, after a long siege, 1487; see *Naval Battles*, 1704. An insurrection against the provisional government was put down with much slaughter, 31 Dec. 1868. Population in 1887, 134,106; 1900, 130,109; 1910 (est.), 151,750.

MALAKHOFF, a hill near Sebastopol, on which was situated an old tower, strongly fortified by the Russians during the siege of 1854-55. The allied French and English attacked it on 17, 18 June, 1855, and after a conflict of forty-eight hours were repulsed with severe loss; that of the English being 175 killed and 1126 wounded; that of the French 3338 killed and wounded. On 8 Sept. the French again attacked the Malakhoff; at eight o'clock the first mine was sprung, and at noon the French flag floated over the conquered redoubt; see *Sebastopol*. In the Malakhoff and Redan were found 3000 pieces of cannon of every calibre, and 120,000 lbs. of gunpowder.

MALARIA. The parasite of malaria—i.e., ague and yellow fever—discovered by Laveran in 1880. The theory that mosquitoes conveyed the disease held also by King, Bignami and Manson. Major Ronald Ross (K.C.B. 1902) began his researches on sir Patrick Manson's theory in India in 1895, and proved deductively and experimentally that mosquitoes of the genus called *Anopheles Claviger* conveyed the disease, 1897-98; confirmed by profs. Koch and Grassi and Drs. Bignami and Bastianelli, Dec. 1898. See *Sierra Leone*, Aug. 1899.

Elephantiasis, a tropical disease, also conveyed by the mosquito, reported 12 Aug. 1900

Major Ronald Ross proved that the prime source of mosquito infection is the native children, whose blood contains the parasites, Sept. 1900 (he received the Nobel prize, Dec. 1902).

Drs. Sambon and Low live perfectly free from fever in the worst malarial part of the Roman Campagna, near Ostia, without taking quinine or any other drug, by merely keeping within a mosquito-proof hut from an hour before sunset to an hour after sunrise, Aug.-Sept. 1900; successful experiments carried on with similar results by prof. Grassi and others.

Committee appointed jointly by Mr. Chamberlain, M.P., and the Royal Soc. in 1898 for the investigation of malaria and mosquitoes and allied insects in tropical countries; 3,000 specimens sent to the Nat. Hist. museum, Cromwell-rd., reported Sept. 1900 (researches continued 1903).

Drs. Stephens and Christopher report malaria to be an infectious fever present in nearly every native hut, and its suppression doubtful, *Times*, 4 Aug. 1903

See also under *Germ Theory of Disease*, 10 Nov. 1903. Outbreak in the Punjab; authorities issue quinine in affected districts 1 Oct. 1908

Anti-malaria campaign in India, British West Africa, Austria-Hungary, Egypt, Jamaica, &c. 1909

MALA VITA (evil life), the name of a secret society in south Italy; the highest of its three grades is the Camorristi. At Lucera, in Foggia, 68 men were sentenced to various terms of imprisonment (from 5 to 10 years), reported 2 Oct. 1894; see *Camorra*.

MALAY (Federated Malay States). Great improvement in the country through British protection, slavery abolished, railways constructed, &c., since 1875. Lieut.-col. sir Charles B. H. Mitchell appointed high commissioner, 1896; sir Frank A. Swettenham, 1901; sir John Anderson, K.C.M.G., 1904. Population, 1901, 676,138; 1910 (est.), 967,500. Messrs. Annandale and Robinson's expedition completed, good results reported, July, 1902; excellent progress and prosperity reported, 9 Sept. 1902, and 20 July, 1903. See *Moluccas*, *Philippines*, *Straits*, &c.

Floods in southern Malaya destroy 90 miles of the Johore state railway . . . mid-Feb. 1910

MALDON (Essex), built 28 B.C., is supposed to have been the first Roman colony in Britain. It was burnt by queen Boadicea, and rebuilt by the Romans; burnt by the Danes, A.D. 991, and rebuilt by the Saxons. Maldon was incorporated by Philip and Mary. Absorbed into the county, 1885. The singular custom of Borough-English is kept up here, by which the youngest son, and not the eldest, succeeds to the burghage tenure on his father's death; see *Borough-English*.

MALICIOUS DAMAGES. The law respecting them was consolidated and amended by 24 & 25 Vict. c. 97. This act protects works of art, electric telegraphs, &c., 1861.

MALINES, see *Mechlin*.

MALINS' ACT, 20 & 21 Vict. c. 57, relating to the powers of women in regard to property, was passed in 1857.

MALMESBURY, Wiltshire, an old market-town. The abbey, founded about 670, was several times destroyed by the Danes and restored. Its chief was made a mitred abbot by Edward III. Athelstan was buried in the abbey. Thomas Hobbes, the philosopher, was born here, 5 April, 1588. By the act of 1885, Malmesbury was disenfranchised and absorbed into the county. Population, 1901, 2,854.

MALO, ST. (N.-W. France). This port, as a great resort of privateers, sustained a tremendous bombardment by the English under admiral Benbow in 1693, and under lord Berkeley in July, 1695. In June, 1758, the British landed in considerable force in Cancale bay, and went up to the harbour, where they burnt upwards of a hundred ships, and did great damage to the town, making a number of prisoners. It is now defended by a very strong castle, and the harbour is very difficult of access.

Steamship *Hilda*, owned by London and South Western railway company, went ashore off harbour entrance in gale and snowstorm, 128 passengers and crew drowned . . . 18 Nov. 1905

MALO-JAROSLAVITZ, near Moscow, central Russia: the site of severe encounters between the Russians and the retreating French army, 24 Oct. 1812. The latter were victorious, but with great loss.

MALPLAQUET (N. France). Here the allies under the duke of Marlborough and prince Eugene defeated the French, commanded by marshal Villars, 11 Sept. 1709. Each army consisted of nearly 120,000 choice soldiers. There was great slaughter on both sides, the allies losing 18,000 men, but capturing Mons.

MALT, barley prepared for brewing and distillation. A duty was laid upon malt in 1667; repealed but reimposed 1697, *et seq.* Important acts for the regulation of malt duties were passed in 1830 and 1837. In March, 1858, there were 6157 licensed maltsters in the United Kingdom. The duty on malt in 1863 amounted to 6,273,727*l.* In 1864 the duty was remitted on malt used for cattle feeding; and in 1865, an act was passed allowing the excise duty to be charged according to the weight of the grain used. A parliamentary committee to consider repeal of malt tax was agreed to, 14 May, 1867, without success; a motion to repeal the tax was negatived (244-17), 23 April, 1874. Tax abolished, 1880 (when it was 2*s.* 8½*d.* a bushel). It ceased 1 Oct. 1880.

Revenue from the malt duties: in the year ending 31 March, 1850, 5,391,324*l.*;—1854, 5,418,181*l.*;—1856, 6,676,849*l.*;—1857 (tax reduced), 5,690,950*l.*;—1860, 6,648,881*l.*;—1871, 6,978,371*l.*;—1877, 8,040,378*l.*;—1878, 7,721,548*l.*

Malt made and retained in the United Kingdom: in 1825, 36,205,451 bushels; in 1835, 42,892,012; in 1847, 35,307,815; in 1857, 44,545,649; in 1861, 46,650,100; in 1870, 56,775,614; in 1875, 63,015,676; imported, 1895, 8,334 cwt.; 1900, 2,784 cwt.; 1905, 4,930 cwt.; 1908, 11,210 cwt.

MALTA (formerly Melita), an island in the Mediterranean, held successively by the Phœnicians, Carthaginians, and Romans, which last con-

quered it, 259 B.C. The apostle Paul was wrecked here, A.D. 62. (*Acts xxvii., xxviii.*) Malta was taken by the Vandals, 534; by the Arabs, 870; and by the Normans from Sicily, 1090. With Sicily it became successively part of the possessions of the houses of Hohenstaufen, of Anjou (1266), and of Aragon (1260). In 1530 Charles V. gave it to the Knights Hospitallers, who defended it most courageously and successfully, in 1551 and 1565, against the Turks, who were obliged to abandon the enterprise after the loss of 30,000 men. The island was taken by Bonaparte in the outset of his expedition to Egypt, 12 June, 1798. He found in it 1200 pieces of cannon, 200,000 lbs. of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets, besides an immense treasure collected by superstition; and 4500 Turkish prisoners, whom he set at liberty. Malta surrendered to the British under Pigot, 5 Sept. 1800. At the peace of Amiens it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations; but by the treaty of Paris, in 1814, the island was guaranteed to Great Britain. A legislative constitution was established in 1849; and after various changes was replaced by a more popular one proclaimed 22 Dec. 1887. *La Valetta*, the capital, was founded in 1557 by the grand master La Valetta, and completed and occupied by the knights, 18 Aug. 1571. The Protestant college was founded in 1846. A grand new naval dry dock was opened, May, 1871. Governor of Malta and Gozo, lieut.-gen. sir H. M. Rundle, 22 July, 1909. Great immigration of destitute Europeans from Alexandria (see *Egypt*) middle June, 1882; about 2200, 6 July, 1882. See *Cholera*. Population of Malta and adjacent isles 1909, 212,900. Revenue 1908, 457,520*l.*; expenditure, 445,014*l.*; imports, 1,273,049*l.*; exports, 120,336*l.* Public debt, 79,115*l.*

MALTA, KNIGHTS OF. A military religious order, called also Hospitallers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Malfi, trading to the Levant,

obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, 1048. They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitallers (Latin, *hospes*, a guest). The military order was founded about 1099; confirmed by the pope, 1113. In 1119 the knights defeated the Turks at Antioch. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1290. John, king of Cyprus, gave them Limisso in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand master De Vallaret, and the next year defended it under the duke of Savoy against an army of Saracens. The story that his successors have used (F. E. R. T. (*Fortitudo ejus Rhodum tenuit*, or his valour kept Rhodes) for their device is much doubted. From this they were also called *knights of Rhodes*; but Rhodes being taken by Solyman in 1522, they retired into Candia, then into Sicily. Pope Adrian VI. granted them a city of Viterbo for their retreat; and in 1536 emperor Charles V. gave them the isle of Malta. The order was suppressed in England in 1540; restored in 1557; and again suppressed in 1559. St. John's Gate, Clerkenwell, a relic of their possessions, still exists. The emperor Paul of Russia declared himself grand master of the order in June, 1799. After the death of the grand master, Tommasi di Contara, in 1805, the order was governed by a lieutenant and a college at Rome, till Pope Leo XIII. made count Ceschi à Santa Cice (lieutenant since 14 Feb. 1871) grand master, 28 March, 1879. The knights sent a hospital establishment into Bohemia during the war in 1866, which afforded great relief to the wounded and sick.

The grand priory of the order of the hospital of St. John of Jerusalem in England—sovereign head and patron, king Edward VII.; grand prior, prince of Wales; incorporated . . . 14 May, 1888

MAMELON, a hill, one of the defences of Sebastopol, captured by the French 7 June, 1855.

MAMELUKES, originally Turkish and Circassian slaves, established by the sultan of Egypt as a body-guard, about 1260. They advanced one of their own corps to the throne of Egypt, May, 1260, and continued to do so until it became a Turkish province, in 1517, when the beys took them into pay, and filled up their ranks with renegades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia; but, assisted by the Arnauts, reconquered Egypt from the Turkish government. In 1804, Napoleon embodied some of them in his guard. On 1 March, 1811, they were decoyed into the power of the Turkish pacha, Mehemet Ali, and slain at Cairo.

MAMERTINI, sons of Mamers or Mars, were Campanian soldiers of Agathocles. They seized Messina in Sicily, in 281, B.C., and when closely besieged by the Carthaginians, and Hiero of Syracuse, in 264, they implored the help of the Romans, which led to the first Punic war.

MAMMOTH, an extinct species of elephant (*Elephas primigenius*), the remains of which in the recent deposits of Northern Europe and Asia are sufficiently common to afford a valuable supply of fossil ivory. The first entire mammoth recorded is that recovered from the ice near the mouth of the Lena in 1806. Remains of this animal found at Harwich, in 1803, many disinterred or washed out in great thaws in more recent years at places in

Europe, Asia, and America. Mammoth, Mastodon, and Dinotherium are the three most prominent types of the fossil Proboscidea in the Tertiary deposits.

Storms having displaced the shingle at Selsey, south of Chichester, fossil remains were found exposed, which were declared by Dr. A. Smith Woodward, keeper of geology in the British museum, and other experts, to be those of a young mammoth about the size of a small Indian elephant, reported 26 Mar. 1909

MAMMOTH CAVE, Kentucky, 10 miles in length, consists of numerous grottoes, rivers, cata-racts, and avenues, some of the last being covered with the most beautiful crystals. The temperature of the cave is about 54° Fahr. "The Mammoth Cave of Kentucky," by H. C. Hovey and R. E. Call, published 1897.

MAN, ANTIQUITY OF. In 1836, M. Boucher de Perthes found some rude flint implements, which he believed to be of human manufacture, mingled with bones of extinct contemporary animals, in the old alluvium near Abbeville in Picardy, France, and also in 1847, near Amiens. Similar flints have since been found in Sicily by Dr. Falconer, at Brixham by Mr. Pengelly, and in various parts of the world, demonstrating the remote antiquity of the human race.

Some burnt bricks found in the Nile are considered to be 20,000 years old, and some bones found in lacustrine deposits in Florida, 30,000 years old.

Sir Charles Lyell's "Antiquity of Man" was published in 1863 (4th edition, 1873), and sir John Lubbock's "Prehistoric Times," 1865 (4th ed. 1878).

The skeleton of a man supposed to have been a contemporary of the mammoth and cave-bear was found with polished flint implements by M. Riviere in the Cavallin cavern, near Mentone, 26 March, 1872.

"In our day the quaternary man is a fact universally accepted; but the tertiary man is a problem under discussion."—*Virehow* 1877

Flint implements found in Egypt, probable date 3000 B.C. (termed the "paleolithic age") reported 1895 et seq.

Two skeletons (man and woman) in excellent preservation, found by Mr. W. Riley of Bridgend, Glamorganshire, in a tumulus in the sand dunes at Merthymawr, probably of the neolithic age, reported April, 1904

MAN, ISLE OF, was subdued by Edwin, king of Northumberland, about 620; by Magnus of Norway, 1098; by the Scots, 1266; occupied by Edward at the wish of the inhabitants 1290; recovered by the Scots in 1313; but taken from them by Montacute, afterwards earl of Salisbury, to whom Edward III. gave the title of king of Man, in 1343. It was afterwards subjected to the earl of Northumberland, on whose attainer Henry IV. granted it in fee to sir John Stanley, 1406. It was taken from this family by Elizabeth, but was restored in 1610 to the earl of Derby, through whom it fell by inheritance to the duke of Athol, 1735. He received 70,000*l.* from parliament for all his rights in 1765; and the nation was charged with the further sum of 132,944*l.* for the purchase of his remaining interest in the revenues of the island in Jan. 1829. The countess of Derby held the isle against the parliament forces for a time in 1651. The queen's landing pier (cost 46,400*l.*) inaugurated by the lieut. governor, H. B. Loch, 1 July, 1872.

Act relating to the harbours and coasts, passed June, 1872. The first railway (from Douglas to Peel) opened, 1 July, 1873. Population, 1871, 54,042; in 1901, 54,758; 1910 (est.), 63,875. Revenue, 1889-90, 63,824*l.*; expenditure, 57,947*l.*: 1903-4, revenue, 85,535*l.*; expenditure, 74,187*l.*: 1907-8, revenue, 86,335*l.*; expenditure, 76,158*l.*; debt 1908, 223,930*l.* The BISHOPRIC is said to have been presided over by Amphibalus about 360. Some assert that St. Patrick was the founder of the see, and that Germanus was the first bishop, about 447. It was united to Sodor in 1113. The bishop has no seat in the house of lords; but lord Auckland (bishop, 1847-54) sat by right of his barony. Present income 2,000*l.*

The Tynwald, an independent legislative body, consists of two branches—1. The governor and council; 2. The house of Keys; their acts receiving the royal assent. The house of Keys was formerly self-elective; election by the people every seventh year was established by act of parliament, 1866; the property qualification for members abolished; household suffrage was granted in towns and suffrage conferred on women by royal assent in 1881. New Customs Act passed in 1887

According to custom, five bills, which had received the royal assent, one for the re-distribution of seats in the house of Keys, were promulgated to the legislature, in the open air on the Tynwald hill, by the lieut.-governor, Spencer Walpole, 30 March, 1891; ceremony shortened by bill passed, 7 Nov. 1895

MANASSAS JUNCTION (Virginia, United States); an important military position, where the Alexandria and Manassas Gap railways meet, near a creek named BULL RUN. I. It was held by the confederates in 1861, when they were attacked by the federal general Irwin McDowell. He began his march from Washington on 16 July, and gained

some advantage on the 18th at Centreville. On the 21st was fought the *first* battle of Bull Run. The federals, who began the fight, had the advantage till about three o'clock p.m., when the confederate general Johnston brought up reinforcements, which at first the federals took for their own troops. After a brief resistance, the latter were seized with sudden panic, and, in spite of the utmost efforts of their officers, fled, abandoning a large quantity of arms, ammunition, and baggage. The confederate generals Johnston and Beauregard did not think it prudent to pursue the fugitives, who did not halt till they arrived at Washington. The federal army is said to have had 481 killed, 1011 wounded, 1216 missing. The loss of the confederates was stated to be about 1500.—In March, 1862, when the army of the Potomac, under general McClellan, marched into Virginia, they found that the confederates had quietly retreated from the camp at Manassas. 2. On 30 Aug. 1862, this place was the site of another great battle between the northern and southern armies. In August, general "Stonewall" Jackson, after compelling the federal general Pope to retreat, defeated him at Cedar mountain on the 9th, turned his flank on the 22nd, and arriving at Manassas repulsed his attacks on the 29th. On the 30th general R. E. Lee (who had defeated general McClellan and the invading northern army before Richmond, 26 June to 1 July) joined Jackson with his army, and Pope received reinforcements from Washington. A desperate conflict ensued, which ended in the confederates gaining a decisive victory, compelling the federals to a hasty retreat to Centreville, where they were once more routed, 1 Sept. The remains of their army took refuge behind the lines of Washington on 2 Sept. Pope was at once superseded, and McClellan resumed the command to march against the confederates, who had crossed the Potomac and entered Maryland; see *United States*.

MANCHESTER (Lancashire), in the time of the Druids, was one of their principal stations, and had the privilege of sanctuary attached to its altar, in the British language *Meyne*, a stone. It was one of the seats of the Brigantes, who had a castle, or stronghold, called *Mancenion*, or the place of tents, near the confluence of the rivers Medlock and Irwell. The site of this, still called the "Castle Field," was, about 79, selected by the Romans as the station of the *Cohors Prima Frisiorum*, and called by them *Mancunium*; hence its Saxon name *Manceastre*, from which its modern appellation is derived. *Lewis*. Manchester constituted a harbour and port, 22 Dec. 1893. Population 1903, 553,486; 1909 (*est.*), 655,435.

MANCHESTER, BISHOPRIC OF. An order in council in Oct. 1838, declared that the sees of St. Asaph and Bangor should be united on the next vacancy in either, and that the bishopric of Manchester should be immediately created within the jurisdiction of the archiepiscopal see of York; the county of Lancaster for that purpose to be detached from Chester. By act 10 Vict. (1847) the sees of St. Asaph and Bangor were to exist undisturbed, and that of Manchester was to be created.

MANCHURIA. N.E. division of the Chinese empire. Capital, Mukden. The Manchus conquered China in 1644, and founded the present Chin dynasty. The French (1838) and British (1861) have missionary stations there. Population about 21,000,000. The Japanese invaded Manchuria during the war of 1894-5. Prosperity increased by Russian immigration, 1897-8. See *Corea*. For the massacres here, see *China*, 14 Aug. 1901. Great mortality from cholera, July et seq. 1902. The occupation of the province by Russia caused strained relations with Japan, and resulted in the Russo-Japanese war (*which see*). MANERU, near Puente de la Reyna, Navarre. Here took place a conflict between the republicans, under Moriones, and the Carlists, under Otto; both claimed a victory; 6 Oct. 1873.

MANGANESE. Black oxide of manganese, long used to decolorise glass, and called *Magnesia nigra*, was formerly included among the ores of iron. Its distinctive character was proved by the re-

searches of Pott (1740), Kaim and Winterl (1770) and Scheele and Bergmann (1774); it was first eliminated by Gahn. Manganese combined with potassium is called mineral chameleon, from its rapid change of colour under certain circumstances. Forchhammer employed it as a test for the presence of organic matter in water; and Dr. Angus Smith successfully applied this test to air in 1858. The oxide is the important ingredient in Condy's "disinfecting fluid." Manganese bronze is a metal produced by Mr. P. M. Parsons, inventor of white brass, 1876. Manganese steel produced by Messrs Pfeil & Co. 1887.

MANICA, a territory in S. Africa in Mashonaland, near Mozambique, which on account of its mines, the Portuguese vainly endeavoured to acquire in the 16th century. See *Zambesi*.

The territory was acknowledged to be under the influence of Portugal by the convention of Aug. 1890. Dispute with Great Britain; delimitation referred to arbitration of Italy, March, 1894; boundary settled 30 Jan. 1897; further concessions, 22 Feb. 1899.

MANICHEANS, a sect founded by Manes in Persia, about 261. It spread into Egypt, Arabia and Africa. A rich widow, whose servant Manes had been, left him much wealth, after which he assumed the title of Apostle, or envoy of Jesus Christ, and announced that he was the paraclete, or comforter that Christ had promised to send. He maintained two principles, the one good he called light, the other bad he called darkness. He rejected the Old Testament, and composed a system of doctrine from Christianity and the dogmas of the ancient fire-worshippers. Sapor, king of Persia, believed in him at one time; but afterward banished him. He was burnt alive by Bahram of Varanes, king of Persia, in 277. His followers dispersed, and several sects sprang from them.

MANILLA (or **MANILA**) (built about 1573) capital of the Philippine isles, a great mart of Spanish commerce. Manilla was taken by the English, 6 Oct. 1762, when the archbishop engaged to ransom it for about a million sterling; never wholly paid. Manilla has suffered greatly by earthquakes. It is stated that nearly 3000 persons perished by one in 1645. In Sept. 1852, the city was nearly destroyed, and on 3 July, 1863, about a thousand lives were lost. See *Earthquakes* 1852, 1863, 1880. Destructive typhoon, 20, 21 Oct. 1882. Great fire; 4,000 houses burnt, many deaths 1 April, 1893. Great fire, 30,000 persons homeless, reported 5 April, 1896; another fire, 200 houses burnt, reported, 7 February 1898. See *Spanish-American War*.

MANIPUR (Manipore), a small native state N.E. India, adjoining Assam and Burmah; population, 1910 (est.), 225,000.

The state was for long protected by the British from the attacks of the Burmese. In 1834, Gunbheer Singh, the restored rajah, died, and was succeeded by his son, Chandra Kirti Singh, two years old. The regent, Nar Singh, a relative, usurped the government, and ruled till his death in 1850, when the young rajah was restored; a British resident being afterwards placed in the capital, with good effect. Much trouble was given by rival members of his family till 1866; he died in 1885 or 1886. He left eight sons, who formed opposing parties. The eldest, Sura Chandra Singh, became maharajah, and appointed his eldest brother, Kula Chandra Dhunya Singh, jুব্রা, or heir-apparent, after wards termed regent, a weak, incapable man. In Sept. 1890, his brother, Takendrajil Singh, the senaputti, o-

commander-in-chief, dethroned the maharajah and set up the jubraj in his place. The maharajah retired to Calcutta.

On 21 Feb. 1891, Mr. James W. Quinton, chief commissioner of Assam, was directed to proceed with a sufficient force to Manipur, to recognise the regent, and to remove the senaputti. He entered Manipur 22 March, with 470 men and officers, civil and military, and was well received by the regent and the senaputti, but could not succeed in getting the latter to attend a durbar or court. Mr. Quinton as an ultimatum required the surrender of the senaputti, the letter being taken by Mr. F. St. C. Grimwood, political agent, without any result, 23 March. On the 24th, colonel Skene proceeded with 250 men to arrest the senaputti at his house within the fort inclosure, of which they obtained possession after a sharp struggle, during which lieut. Brackenbury was mortally wounded. The senaputti had escaped. About 10 A.M., the Manipuris opened fire on the residency in front, and about noon on the rear, and shelled it. About 4 P.M. the troops were withdrawn from the senaputti's house, and all the force was posted in the residency, which was seriously damaged by artillery about 5 P.M., and the ammunition began to fall short. About 7 P.M. negotiations were re-opened by letter from Mr. Quinton, and the firing ceased, but the conditions offered by the regent could not be accepted. Having been invited by the senaputti halfway between the residency and the palace, Mr. Quinton took with him colonel Skene, Mr. F. St. C. Grimwood, Mr. H. Cossins, and lieut. Simpson, unarmed, and without escort. After a long parley, the party entered the fort and were seen no more, and it was afterwards discovered that they were all killed (beheaded or otherwise). The firing re-commenced about midnight. The ammunition having been greatly reduced, it was decided to retire from the residency, and to march across the country to meet captain Cowley's advancing party. This was done about 2 A.M. on the 25th, the party taking with them 17 wounded, and Mrs. Grimwood. There was no serious resistance during the march, but a few skirmishes occurred. About 10 A.M. they met captain Cowley's party, who supplied them with food and other assistance. They continued their march, arriving, on 30 March, at Lakhipur on the Cachar frontier. Lieut. C. J. W. Grant hearing, on 27 March, of the disaster at Manipur, volunteered to attempt the relief of the British captives, and marched with 80 native soldiers from Tannu in Burmah, 28 March; entrenched himself near Thobal, 31 March; held out against the attacks of the Manipuri army (about 3,000) till 7 April; and resisted negotiations judiciously; only 1 killed. About 2,000 Manipuris, entrenched near Tannu, attacked and dispersed by general Graham's party, captain Drury being especially successful, 25 April; three columns under gen. Graham and others from different directions converge at Manipur, which they find totally deserted, the regent, senaputti, and other princes having fled, 26 April; the palace had been blown up; the heads of Mr. Quinton and his companions were found in the enclosure.

Funeral ceremony was held over the exhumed bodies of Mr. Quinton and his companions, 30 April; general Collett was left in command at Manipur, some of the troops left. The Manipuris returned to their homes, May; the regent, his minister and the senaputti, were captured. May, 1891

The regent, the senaputti, and prince Angao Sena, a younger brother, were tried for rebellion and abetting to murder, and sentenced to death (all appealed). 9-20 June, "

The sentences of death on the senaputti and the Tongal general, as implicated in the murders, were confirmed. The sentences on the regent and his younger brother commuted to transportation for life to the Andaman Islands; forfeiture of property, announced 10 Aug. The senaputti and the Tongal general hanged at Manipur, 13 Aug. "

It was decided that Manipur should still be ruled by a native prince, 23 Aug.; and Chura Chand, aged 5, great-grandson of Nar Singh, was appointed rajah, 13 Sept.; dignity to be hereditary, subject to the government of India; an annual tribute to be paid; declaration communicated. Oct. "

MANITOBA, see *Rupert's Land and Hudson's Bay* (N. America). Manitoba was made a part of the confederation in 1870. Capital, Winnipeg. Population, 1886, 108,640; 1891, 154,442; 1901, 254,947; 1906, 365,688. Lieut.-gov., John C. Schultz; succeeded by J. C. Patterson, June, 1895; Hon. Sir D. H. McMillan, 1900. A Fenian attack on the colony was suppressed by American troops about 12 Oct. 1871. For insurrection in the neighbouring provinces in March, 1885, see *Canada*. For the Red River Railway disputes see *Canada*, Oct. 1888. Disputes with the Dominion government respecting the privileges of the Catholic schools, March *et seq.* 1895; negotiations closed, the difficulty settled by compromise, 17 Oct. 1896; bill passed, 25 March, 1897. Catholic schools of Winnipeg taken over by the school board by agreement, Sept. 1901.

Bill by Mr. Campbell, attorney-general, introduced into the Manitoba legislature providing that children under 14 cannot marry, and that when they are under 18, the consent of the parents is necessary. 24 Jan. 1906
49,252,540 bushels of wheat, 44,686,045 oats, 18,15,760 barley and 74,700 flax, peas and rye produced in 1908.

MANNHEIM (S. Germany), founded in 1606, became the court residence of the palatine of the Rhine in 1719; but his becoming elector of Bavaria in 1777 caused the removal of the court to Munich. Mannheim surrendered to the French, under command of general Pichegru, 20 Sept. 1795. On 31 Oct. the Austrians under general Wurmsier defeated the French near the city. Several battles were fought with various success in the neighbourhood during the wars of Napoleon I. Kotzebue, the popular dramatist, was assassinated at Mannheim, by Sand, a student of Wurtzburg, 2 April, 1819. Population, 1905, 163,693.

MANOMETER (Greek, *manos*, thin), an instrument for measuring the rarity of the atmosphere, gases, and vapours. One is said to have been made by Otto von Guericke about 1660, and the "statical barometer" of Robert Boyle was a simple manometer. Various forms of the apparatus were devised by Ramsden (about 1773), by Roy (1777), by Cazalet (1789), and by Bourdon and others. A manometer was constructed for the investigation respecting the elasticity of steam conducted by Prony, Arago, Dulong, and Girard, 1830.

MANORS are as ancient as the Saxon times, and imply a territorial district with its jurisdiction, rights, and perquisites. They were formerly called baronies, and still are lordships. Each lord was empowered to hold a court called the court-baron for redressing misdemeanours, and settling disputes between the tenants. *Cabinet Lawyer*.

MANSFIELD COLLEGE, Oxford, for the study of Nonconformist theology, opened in temporary rooms 19 Oct. 1886. The new college solemnly opened, 14 Oct. 1889. A settlement connected with the college, called *Mansfield house*, at Canning town, E. London.

MANSOURAH (Lower Egypt). Here Louis IX. was defeated by the Saracens and taken prisoner, 5 April, 1250. He gave Damietta and 400,000 *livres* for his ransom. Mansourah suffered much by cholera, summer, 1883.

MANTES, a town in the department of Seine-et-Oise, France, is situated on the river Seine, about 36 miles from Paris. It possesses a handsome Gothic church, and contains other objects of antiquarian interest. Here, while besieging the town, William the Conqueror received the wound that caused his death, 1039.

MANTINEA (Arcadia, Greece). Here—(1) Athenians and Argives were defeated by Agis II. of Sparta, 418 B.C. (2) And here Epaminondas and the Thebans defeated the combined forces of Lacedæmon, Achaia, Elis, Athens, and Arcadia, 362 B.C. Epaminondas was killed in the engagement, and Thebes lost its power among the Grecian states. The emperor Adrian built a temple at Mantinea in honour of his favourite Alcinous. The town was also called Antigonia. Other battles were fought near it.

MANTIS, a genus of remarkable insects, whose forms and colours of their bodies and wings imitate the leaves and twigs that environ them. The praying mantis (*mantis religiosa*) derives its name from the peculiar position of its anterior pair of legs.

MANTUA (N. Italy), an Etruscan city, near which Virgil was born, 70 B.C. Mantua was ruled by the Gonzagas, lords of Mantua, from 1328 to 1708, when it was seized by the emperor Joseph I. It surrendered to the French, 2 Feb. 1797, after a siege of eight months; retaken by the Austrians and Russians, 30 July, 1799, after a short siege. After the battle of Marengo (14 June, 1800), the French again obtained possession of it. It was included in the kingdom of Italy till 1814, when it was restored to the Austrians, who surrendered it to the Italians, 11 Oct. 1866, after the peace.

MAORIS, see *New Zealand*.

MAPLE-TREE. The *Acer rubrum*, or scarlet maple, was brought here from N. America, before 1656. The *Acer Negundo*, or ash-leaved maple, before 1688. From the *Acer saccharinum* (introduced here in 1735) the Americans make good sugar.

MAPS, see *Charts*, and *Mercator*.

MARANON, see *Amazon*.

MARATHON (in Attica). Here, on 28 or 29 Sept. 490 B.C., the Greeks, only 11,000 strong, defeated the Persian army amounting to about 110,000. The former were commanded by Miltiades, Aristides, and Themistocles. Among the slain (about 6400) is said to have been Hippas, who had been expelled from Athens, and was the instigator of the war. The Persian army was forced to retreat to Asia; see *Greece*.

Investigations in 1890 on the presumed site of this battle

led to the discovery of vases, and the probable grave of the 192 Athenians who fell.

Marathon races, see *Olympic games*.

MARBLE. Diponcus and Scyllis, statues of Crete, were the first artists who sculptured marble, and polished their works; all statues previously being of wood, about 568 B.C. *Pliny*. The edifices or monuments of Rome were constructed of, or ornamented with, fine marble. The ruins of Palmyra are chiefly of white marble. The marble arch, London, erected at Buckingham palace, 1830, was removed to Hyde-park, March, 1851.

MARBURG (W. Germany). The cathedral was founded, 1231; and the first Protestant university in 1527. It suffered much during the Seven years' war, 1753-60.

MARCH, the first month of the Roman year, until Numa added January and February, 713 B.C. It is said that Romulus gave to this month the name of his supposed father, Mars; though Ovid observes, that the people of Italy had the month of March before the time of Romulus, but placed it differently in the calendar. The year commenced on the 25th of this month till 1753; see *Year*.

MARCHES. The old boundaries between England and Wales, and England and Scotland. The Lords Marchers of the Welsh borders had vice-regal authority; the wardens of the Scotch marches were subordinate officers. These powers were abolished, 1536 and 1689.

MARCHFELD (Austria). Here Ottocar II. of Bohemia was defeated and slain by his rival, the emperor Rodolph of Hapsburg, 26 Aug. 1278; see *Bohemia*.

MARCIONITES, followers of Marcion, a heretic, about 150, who preceded the Manichees, and taught similar doctrines. *Cave*.

MARCOMANNI, a people of Southern Germany, expelled the Boii from Bohemia, and, united with other tribes, invaded Italy about 167, but were repelled by the emperors Antoninus and Verus. They were defeated by the legion called, from a fabled miracle, the Thundering Legion, 179; and finally driven beyond the Danube by Aurelian, 271.

MARENGO (N. Italy). Here the French army, commanded by Bonaparte, after crossing the Alps into Piedmont, attacked the Austrians, 14 June, 1800; his army was retreating, when the arrival of general Dessaix turned the fortunes of the day. The slaughter on both sides was dreadful. By a treaty between the Austrian general Melas and Bonaparte, signed 15 June, the latter obtained twelve strong fortresses, and became master of Italy.

MARESCHALS or **MARSHALS**, in France, were the esquires of the king, and originally had the command of the vanguard to observe the enemy and to choose proper places for its encampment. Till the time of Francis I., in 1515, there were but two marshals, who had 500 *livres* per annum in war, but no stipend in time of peace. The number was afterwards greatly increased. Napoleon's marshals were renowned for skill and courage; see *Marshal*.

MARGARINE, see under *Butter*.

MARGATE, Kent, Royal sea-bathing infirmary founded 1792, enlarged 1882. The town-hall was erected in 1820. Population, 1901, 23,057; 1910 (est.), 30,000. New park, presented by Mr. J. Wood-

ward, opened by the lord mayor, 1 June, 1808. Mr. C. A. Swinburne leaves 45,000*l.* to the Royal seabathing infirmary, April, 1904.

MARIAN PERSECUTION, see *Protestants*.

MARIGNANO (now **MALEGNANO**), N. Italy, near Milan. Three battles have been fought near here—1. Francis I. of France defeated the duke of Milan and the Swiss, 13 Sept. 1515; above 20,000 men were slain. This conflict has been called the Battle of the Giants.—2. Near here was fought the battle of Pavia (*which see*), 24 February, 1525.—3. After the battle of Magenta, 4 June, 1859, the Austrians entrenched themselves at Malegnano. The emperor sent marshal Baraguay d'Hilliers with 16,000 men to dislodge them, which he did with a loss of about 850 killed and wounded, on 8 June. The Austrians are said to have lost 1400 killed and wounded, and 900 prisoners, out of 18,000 engaged.

MARINE BIOLOGICAL ASSOCIATION. See *Biology*.

MARINER'S COMPASS, see *Compass*, and *Magnetism*.

MARINES, soldiers serving on ship-board, were first established with the object of forming a nursery to man the fleet. An order in council, dated 16 Oct. 1664, authorised 1200 soldiers to be raised and formed into one regiment. In 1684, the third regiment of the line was called the Marine Regiment; but the system of having soldiers exclusively for sea service was not carried into effect until 1698, when two marine regiments were formed. More regiments were embodied in subsequent years; and in 1741 the corps consisted of ten regiments, each 1000 strong. In 1759 they numbered 18,000 men. In the latter years of the French war, ending in 1815, they amounted to 31,400, but there were frequently more than 3000 supernumeraries. The *jollies*, as they are called, frequently distinguished themselves. The "Royal Marine Forces" (so named 1 May, 1802), now comprehend artillery and light infantry. Several of the present regiments of the line (infantry were originally employed as marines). The vote for 1857 was for 16,000 marines, inclusive of 1500 artillery. *P. H. Nicolas*. Strength 1910, 17,603. Marine Engineers' Institution, founded in 1872. Officers of the marines made equal in rank with those in the army and navy, Dec. 1882.

MARINE SOCIETY (for the maintenance and instruction of boys for the navy), was founded by Jonas Hanway, 1756, and incorporated, 1772. It instituted the first training ship on the Thames, 1786. H.M.S. *Warspite* burnt, no deaths, 3 Jan. 1876; and the boys were removed to the *Conqueror*.

MARINO, SAN, a republic in central Italy. Its origin is ascribed to St. Marinus, a hermit, who resided here in the 5th century. Its independence lost for a short time, to Caesar Borgia, 1503, and to the pope, 1739; was confirmed by pope Pius VII. in 1817. A convention with Italy, 27 March, 1872. New extradition treaty with Great Britain ratified, 1 Oct. 1900. Population, in 1869, 7303; in 1874, 7816; in 1891, about 8000; 1909, 10,310.

MARIOLATRY, worship of the virgin Mary, began in the 4th century, greatly increased in the 10th.

MARIONETTES, puppet plays. The *fantoccini*, popular in Italy in the 15th century; in the 18th in England and Germany.

MARITIME EXHIBITION at Havre opened by representatives of the government 1 June, 1868; another at Havre, 7 May, 1887; a similar exhibition was opened at Naples by the prince of Piedmont, 17 April, 1871; at Paris, 10 July, 1875; at Liverpool, 11 May, 1886.

MARITIME LAWS, see *Navigation Laws*.

New international code of signals based on the English, introduced 1 Jan. 1901.

MARK, a silver coin of the northern nations, and the name *mark-lubs* is still retained in Denmark. In England, the mark was two-thirds of 1*l.* sterling or 13*s.* 4*d.* The German mark is nearly equivalent to 1*s.* in English.

MARKET, see *Smithfield*, *Metropolitan Cattle Market*, *Billingsgate*, *Leadenhall*, *Farringdon*, *Columbia*, and *Covent Garden Markets*. There are also the Borough and Spitalfields markets (vegetables), Cumberland market, Hampstead-road (hay), and Shadwell (fish). New market constructed by Great Eastern Railway Co. at Bishopsgate street; opened, 1 July, 1882. Wholesale fish and poultry market opened, 19 Oct. 1882.

Royal Commission on Market Rights and Tolls appointed in 1888; issued first report . March, 1889
Final report Jan. 1891, recommending reforms.
The Market and Fairs act, 1887, amended . 1891

MARK'S, ST. (Venice). The church was erected between 977 and 1043. The Campanile (bell tower), 323 ft. high, 42 ft. wide at base, fell to the ground, 14 July, 1902; some art treasures damaged, but the church saved.

The restorations of the Palace of the Doges were completed and exposed to view . Nov. 1889

MARLBOROUGH, a town in Wiltshire; a royal manor mentioned in Domesday book. King Henry III. passed the "*Statutes of Marlbridge*" in the ancient castle in 1267. Marlborough returned two members to parliament since Edward I. Absorbed into the county, 1885. The grammar school was founded by Edward VI. Population, 1901, 4,000.—**MARLBOROUGH HOUSE**, Pall Mall, London, was built by Wren for the duke of Marlborough, 1709-10; was let to the princess Charlotte and prince Leopold in 1824; held by queen Adelaide, 1837-49, and became the residence of the prince of Wales, 1863.

MARLOWE MEMORIAL, a committee determine to erect a memorial to Christopher Marlowe, the dramatist (1564-93), in Canterbury, Dec. 1888. The statue unveiled by Mr. H. Irving, 16 Sept. 1891.

MARONITES, Christians in the East, followers of one Maron in the 5th century; they are said to have embraced the errors of the Jacobites, Nestorians, and Monothelites. About 1180 they numbered 40,000, living in the neighbourhood of mount Libanus, and were of service to the Christian kings of Jerusalem. They were reconciled to the church of Rome soon after. For an account of the massacres of the Maronites in 1860, see *Druses*.

MAROONS, a name given in Jamaica to runaway negroes. When the island was conquered from the Spaniards, a number of their negroes fled to the hills and became very troublesome to the colonists. A war of eight years' duration ensued, when the Maroons capitulated on being permitted to retain their free settlements, about 1730. In 1795 they again took arms, but were speedily put down and many were transported. *Brande*.

MARPINGER, village, near Saarbruck. The Virgin and Satan said to have been seen by children; and miracles wrought, 3 July, 1876. The priest, Neureuter, acquitted of the charge of imposture, April, 1879.

MAR-PRELATE TRACTS, virulently attacking episcopacy, were mostly written, it is believed, by John Penry, who was cruelly executed, 29 May, 1593, for writing seditious words against the queen (found about his person when seized). The tracts appeared about 1586. Some had very singular titles: such as "An Almand for a Parrot," "Hay any Worke for Cooper?" &c. They were collected and reprinted in 1843.

MARQUE, LETTERS OF, see *Privateer*.

MARQUESAS ISLANDS (Polynesia) were discovered in 1595 by Mendana, who named them after the viceroy of Peru, Marquesa de Mendoza. They were visited by Cook in 1774, and were taken possession of by the French admiral Dupetit Thouars, 1 May, 1842.

MARQUIS, a dignity, called by the Saxons markin-reve, by the Germans markgrave, took its original from mark or March, a limit or bound (see *Marches*); the office being to guard or govern the frontiers of a province. Marquis is next in honour to a duke. The first Englishman on whom the title was conferred was the favourite of king Richard II., Robert de Vere, earl of Oxford, created marquis of Dublin, and placed in parliament between the dukes and earls, 1385. James Stewart, second son of James III. of Scotland, was made marquis of Ormond, in 1476, without territories, afterwards earl of Ross.

MARRIAGE was instituted by God (*Gen. ii.*), and confirmed by Christ (*Mark x.*), who performed a miracle at the celebration of one (*John ii.*). Matrimonial ceremonies among the Greeks are ascribed to Cecrops, king of Athens, 1554 B.C. See *Age, Affinity*.

ROYAL MARRIAGE ACT, 12 GEO. III. c. 11, was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Ingham. [By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of 25, without the consent of the king; at and after that age, after twelve months' notice given to the privy council, they may contract such marriage, which shall be good unless both houses of parliament disapprove. The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced illegal, 1794, and the claims of their son, sir Augustus d'Este, declared invalid, by the house of lords, 5 July, 1844. He married lady Cecilia Underwood (afterwards duchess of Inverness), 1831.

HALF MARRIAGE. *Semi-Matrimonium*. Among the Romans concubinage was a legitimate union, not merely tolerated but authorised. The concubine had the name of *semi-conjux*. Men might have either a wife or a concubine, provided they had not both together. Constantine the Great checked concubinage, but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country. Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1500. The women bore the name of "wives of the second order." *Hénault*. See *Morganatic Marriages*.

DOUBLE MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz.: Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C. It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D. 1237, to marry and live with two wives. The Mormons practise and encourage polygamy.

FORCED MARRIAGES. The stat. 3 Henry VII. (1487) made the principal and abettors in marriages with heiresses, &c., contrary to their will, equally guilty as felons. By 39 Eliz. (1596) such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. (1820). The remarkable case of Miss Wharton, heiress of the house of Wharton, whom

captain Campbell married by force, occurred in William III.'s reign. Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried at Lancaster, and found guilty of the felonious abduction of Miss Turner, 24 March, 1827; and his marriage with her was immediately dissolved by act of parliament.

MARRIAGES BY SALE. Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder. This custom is said to have originated with Atossa, daughter of Belochos, about 1433 B.C.

MAR'S INSURRECTION. John, earl of Mar, proclaimed James III. at Braemar, Aberdeenshire, 6 September, 1715. He was defeated at Sheriffmuir, 13 Nov., and escaped from Montrose with the Pretender, 4 Feb. 1716.

MARS, a planet, next to the earth in order of distance from the sun; the spots on its surface were first observed by Fontana, in 1636. Two satellites named Phobos and Deimos, were discovered by professor Asaph Hall, at Washington, U.S., 11 Aug. 1877.

M. Duobis of Paris suggests that these satellites may be planetoids attracted by Mars, Aethra and another of these bodies having disappeared about the time of the discovery.

M. Schiaparelli, of Milan, describes configurations like canals, 1882, and M. Perrotin since has mapped them and asserts that Mars has an atmosphere and clouds (1887).

Lowell (of Flagstaff observatory, Arizona) and others of late years have given great attention to Mars, the former succeeding in photographing some of the markings called "canals" (1905).

Prof. Percival Lowell stated that two canals, new to Mars, had been discovered by observations taken at the Flagstaff observatory, Arizona (31 Dec. 1905).

MARSAGLIA (Piedmont, N. Italy). Here the imperialists under prince Eugene and the duke of Savoy were defeated by the French under Catinat, 4 Oct. 1693.

MARSEILLAISE HYMN. The words and music are ascribed to Rouget de Lisle, or L'Isle, a French engineer officer, who, it is said, composed it by request, 1792, to cheer the conscripts at Strasburg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. This account is doubted by some (1879). The author was pensioned by Louis Philippe, 1830, and died in 1836.

MARSEILLES. The ancient *Massilia* (S. France), a maritime city, founded by the Phœacians about 600 B.C.; an ally of Rome, 218 B.C. Cicero staid at the Athens of Gaul, on account of its excellent schools. Population, 1906, 517,498.

 Poniatowski, prince Josef Anton, wounded at Leipsic, and drowned 10 Oct. 1813.
 Serrurier, Jean Mathieu Philibert, comte; died 21 Dec. 1819.

Soult, duke of Dalmatia; died 26 Nov. 1851.
 Suchet, duke of Albufera; died 3 Jan. 1826.
 Victor, duke of Belluno; died 1 March, 1841.
 It is asserted that Arrighi, duc de Padoue (died 21 March, 1853), H. J. W. Clarke, duc de Feltre (died 28 Oct. 1818), and Andoche Junot, duc d'Abrantes (suicide 29 July, 1813), were only titular marshals, and that G. Christophe Michel Duroc (killed at the battle of Mackerstorff, 23 April, 1813), was only marshal of the palace.

Appointed since 1814: Bertrand, comte de Clausel (died 21 April, 1842); J. Baptiste Drouet, comte d'Erlon (died 25 Jan. 1844); Etienne Maurice Gerard (died 17 April, 1852); Jacques A. B. L. Lauriston (died 12 June, 1828); Nicolas J. Maison (died 13 Feb. 1840); François A. Bazaine (died 23 Sept., 1888), and Marie E. P. M. MacMahon, duc de Magenta (died 17 Oct. 1893).

François Canrobert, the last surviving marshal, died 28 Jan. 1895.

MARSHALSEA COURT, having jurisdiction in the royal palace, was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the Marshalsea (see *lord Coke's 10 Rep.* 68) no business has been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. These courts were removed from Southwark to Scotland-yard in 1801, were abolished by parliament, and discontinued 31 Dec. 1849; see *Prisons*.

MARSI, a brave people of Southern Italy, who after several contests, yielded to the Romans, about 301 B.C. During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being *Socii* of the Romans, this was called the *Social war*.

MARSTON-MOOR (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquiss of Newcastle, determined to raise the siege. Both sides drew up on Marston-moor, on 2 July, 1644, and the contest was long undecided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious; he drove his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's artillery was taken, and the royalists never recovered the blow.

MARTELLO TOWERS, said to have been erected by Charles V. on the coasts of Italy. Similar circular buildings were erected in the beginning of the last century, on the southern and eastern coasts of England, and other parts of the empire, as defences against invasion. The towers were said by some to be named from Cape Martello, or Mortella in Corsica. Many have been destroyed as obsolete.

MARTIAL LAW, see *Courts-Martial*, and *Military Law*.

MARTINESTI, see *Rimnik*.

MARTINIQUE (French West Indies), discovered in 1493 or 1502; settled by France, 1635. This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in Feb. 1762. They were restored to France at the peace of the following year. They were again taken, 16 March, 1794; restored at the peace of Amiens in 1802; again captured 23 Feb. 1809. A revolution in this island in favour of Napoleon was finally suppressed by the British, 1 June, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1766 and 1839; at other times; 200 shocks in 1843.

Great destruction of life and property was caused by a cyclone and earthquake about 18 Aug. 1891; estimated deaths 378, besides losses by shipwrecks. Estimated loss 2,000,000*l*.

Strike riots, incendiary fires in La François, troops fire on the mob, 9 men killed, 5-13 Feb.; dispute referred so arbitration . . . 14 Feb. 1900

DESTRUCTION OF ST. PIERRE, about 40,000 persons perished . . . 8 May, 1902

Mont Pelée, a volcano 4,428 ft. high, about 4½ miles behind the town, caused some loss of life and property in 1760 and 1851, and began again to show signs of activity at the end of April, 1902; masses of steam were thrown out, and St. Pierre was covered with ashes, 3, 4 May; a stream of lava (20 ft. high) swept everything away before it to the sea, the Guérin factory and over 150 lives destroyed; the sea receded 300 ft., and, returning, flooded St. Pierre, 5 May; reassuring reports were issued by the government, 6 May, but the eruptions increased in force, and finally, a little before 8 a.m., "with a terrific roar a huge column of white-hot sand, burning cinders and stones was shot up, and poured down a terrible volcanic torrent (spreading out for miles round even as far as Fort de France), and within ten minutes St. Pierre became a city of the dead," and the whole (about 50 sq. m.) district a desolation, 8 May; reported . . . 24 May "

The governor, M. Mouttet, his wife, the British and American consuls and their families, and about 40,000 were killed. The *Grappler*, a cable ship, with men, and about 18 other vessels were totally lost; the *Suchet*, French gun-boat, picked up in the afternoon eight men belonging to the British s.s. *Koraima*, and 10 others drifting about on wreckage; the British s.s. *Rodam* was saved by the pluck and fortitude of capt. Ed. Wm. Freeman, who, though burnt in the face and disabled, managed to steer it to a place of safety; but out of 44 on board only 18 survived, and most of these were injured; many reports issued; estimated damage, 200,000,000*l*. . . 20 July, "

Seven craters active, 15 May; the work of search parties interrupted, 19 and 20 May; a torrent of ashes and mud destroyed what remained of Basse Pointe, 24 May; new crater active, . . . 27-31 May, "

Active aid and general sympathy (king Edward, 1,000*l*); total fund 8,107,167*l*. . . 3 Sept. "

Special American, British and French expeditions were sent to Martinique and St. Vincent to investigate the volcanic conditions of the West Indies, May; one sent by the royal society returned about . . . 2 Aug. "

Fresh outbreaks, June, and 9, 12 July; again, 15 Aug. *et seq.*; two of great violence, 25 and 28 Aug.; finally a terrible outburst destroyed Morne Rouge and Ajoupa Bouillon, Morne Boudon and three villages; 800 killed and about 200 hopelessly injured (a wave swept Carbet and about 200 were drowned). On the east, a portion of land over a mile long sunk into the sea, and the interior of the island laid waste; about 1,500 killed and more injured . . . 30, 31 Aug. "

Fresh eruption reported . . . 27 Dec. "

Mont Pelée reported active; many houses demolished at Fort de France, 16 and 24 Feb.; another violent eruption . . . 11 Oct. 1906

Municipal election riots, the mayor of the French colony killed . . . 29 April, 1908

MARTINMAS, 11 Nov., the feast of St. Martin, bishop of Tours, in the 4th century, is quarter day in parts of the north of England and in Scotland. The high sheriffs of England and Wales are nominated on the morrow of St. Martin, 12 Nov.

MARTIN'S HALL, ST. (Long Acre, London), was opened as a concert-room for Mr. John Hullah, on 11 Feb. 1850; burnt down 26 Aug. 1860; rebuilt, 1861; opened as the New Queen's theatre, by Mr. Alfred Wigan, 24 Oct. 1867. See *Westminster*, 1890.

MARTYRS. Stephen, the first Christian martyr, was stoned, 33. The festivals of the martyrs, of very ancient date, took their rise about the time of Polycarp, who suffered martyrdom about 169. St. Alban is the English protomartyr, 286; see *Persecutions*, *Protestants*, and *Diocletian Era*. The Martyrs' Memorial, Smithfield, erected by the Protestant Alliance, was inaugurated 11 March, 1870. The Martyrs' memorial church, St. John's-street, Clerkenwell, was consecrated 2 June, 1871.

MARY-ANNE. Secret republican associations, especially in France. The name was given to the republic of 1792, to the guillotine, and to little statues of Liberty.

MARYLAND, named after queen Henrietta Maria, one of the first thirteen United States of North America, was granted in 1632 to lord Baltimore, and settled by a company of English Romanists in 1634. It contains the district of Columbia, in which Washington is situate. It continued in the Union when the other slave states seceded in 1860 and 1861. The confederate army, under general Lee, after their victory at Bull Run, 30 Aug. 1862, crossed the Potomac and entered Maryland. They were followed by the federal army under McClellan. Severe conflicts ensued, especially on 17 Sept., at Antietam Creek, with great loss on both sides, each claiming the victory. The confederates retired into Virginia in good order, and it is said with much booty. Capital, Annapolis; population, 1900, 1,188,044; 1910 (est.), 1,386,000.

MARY-LE-BONE, a large parish, N.-W. London. The name is corrupted from St. Mary at the Bourne, or brook,—Tyebourne. It was chiefly pasture land in 1760. The manor was acquired by the duke of Portland in 1813. The hunting-grounds now form Regent's park (*which see*). The parishes of Marylebone, St. Pancras, and Paddington were made a parliamentary borough in 1832. By act of 1885 Marylebone alone returns two M.P.'s. Constituted a municipal borough by act of 1899 (10 aldermen, 60 councillors). St. Marylebone Churches Bill passed, 1898. Population, 1909 (est.), 126,027.

Mary-le-bone gardens—attached to the "Rose of Normandy"—a place of public entertainment, opened in the middle of the 17th century; mentioned by Pepys; closed 23 Sept. 1776; a music hall erected here, 1855. *The Marylebone Murder*.—Miss Lucy Clark, dressmaker, aged 49, living at George-st., Portman-sq., found murdered 23 Jan. 1888.

New higher grade and technical schools presented by ladies Howard de Walden and Ossington opened 30 July, 1890.

New baths and washhouses opened by the duke of York, 6 March, 1897.

MASANIELLO, see *Naples*, 1647. Auber's opera, "La Muette de Portici" (1828), was produced in London as "Masaniello," 4 May, 1829.

MASCAT, see *Muscat*.

MASHONA, Makalaland and Matabele lands, territories in south Africa. The country is rich in minerals, the Mashonas generally peaceful, the Matabeles described as warlike, aggressive and cruel. Lobengula entered into agreement with the British government, 11 Feb. 1888.

A deputation of two head men from him was received by queen Victoria, 2 March, 1889, requesting protection against a syndicate, to which he had inconsiderately conceded lands. The concession was afterwards legally withdrawn. See *Zambesi*, 1889.

The Imperial Mission conveying queen Victoria's letter to Lobengula, recommending the British South Africa chartered company, favourably received by him at Bulawayo, the Matabele capital, 29 Jan. 1890.

Successful progress of colonization, reported May, 1892.

Explorations of Mr. J. Theodore Bent; he discovers at Zimbabwe, an ancient fortress (probably Phœnician), a temple with ornamented walls, monoliths, specimens of good pottery, relics of gold-mining, etc., June-Aug. 1891. Mr. Bent gave an account of his exploration at a meeting of the Royal Geographical Society, 22 Feb. 1892.

About 400 oz. of Mashona gold exhibited at Cape Town, Nov. 1892.

Dr. Knight Bruce, first bishop, 1892.

Murderous raids of Matabeles on the Mashonas; invasion on British settlement near fort Victoria, unauthorised by Lobengula; repulsed with slaughter, 9 July, *et seq.* 1893; Dr. Jameson, administrator at fort Victoria, and Mr. C. J. Rhodes, prepare for war; angry message from Lobengula, reported 1 Aug.; intervention of sir H. B. Loch, Aug.; the chartered company directed to avoid aggression, 7 Sept.; reinforcements and volunteers from Cape Colony sent by the company to fort Victoria, against which 2 impis (native contingents) are advancing, 21 Sept.; capt. White's defensive force fired at by a Matabele impi, about 1 Oct.; the company's troops well armed, 500 men at forts Salisbury, Victoria, and Charter, 3 Oct.; an attack on the Bechuanaland border police (major Goolt Adams, commander) by the Matabele on the Shasi river, near Macloutsie, 5 Oct.; the company's forces advancing to Matabele border; a free hand given to Dr. Jameson, 7 Oct.; junction of all the forces, joined by volunteers from Cape Town regiments, 16 Oct.; major Forbes commander; skirmish at Intaba Zimbi (the iron mountain), 15 Oct.; 22 Matabele killed; capt. Campbell wounded, died 16 Oct.; two envoys from Lobengula shot by mistake at Tati, about 23 Oct.; Lobengula's army (about 5,000 strong) severely repulsed, with heavy loss, near the Shangani river, 24-26 Oct. [British loss, Walters, Burnett, capt. Gwynidd Williams, and others]. British advance on Bulawayo attacked by Lobengula's picked regiments; the enemy defeated, with heavy loss, by deadly fire of Maxim guns, near the M'Benbezu river; British loss, 3, 1 Nov. 1893.

Major Forbes and Dr. Jameson occupy Bulawayo, 4 Nov. 1893.

Lobengula retreats towards Zambesi; ultimatum sent to Lobengula, 9 Nov. 1893.

Major Forbes starts in pursuit of Lobengula, 14 Nov. sends forward major Allan Wilson, 3 Dec., who is encountered by an ambush and cut off from the main force, 4 Dec. 1893.

Major Forbes' advance attacked by the Matabele, and checked by the rising of the Shangani river, retreats; arrives at Inyati, 15 Dec. 1893.

Major Allan Wilson and all his party killed, after severe fighting, 4 Dec. 1893; capt. Fitzgerald, Judd, H. Greenfield, Kirton, H. J. Borrow, lieuts. G. Hughes and Hofmeyer, and 22 others, died singing "God save the Queen," reported, 3, 6 Jan. 1894.

Submission of the Matabele; end of the campaign; success attributed to the energy and foresight of Dr. Jameson and Mr. Cecil Rhodes.

Mr. A. R. Colquhoun 1st administrator of Mashonaland, Jan. 1894.

Submission of Matabele chiefs, 14 Jan. 1894.

Death of Lobengula by fever, 23 Jan., 40 m. S. of the Zambesi; most of his army surrenders, reported 9 Feb. 1894.

Settlement of the country proceeding, 27 Feb. 1894.

The officers and men of the Bechuanaland police exonerated from blame by the government respecting the shooting of Lobengula's envoys at Tati in Oct. 1893, reported 5 March, 1894.

Some anonymous charges of cruelty made against the officers and men of the company's forces engaged in the war, which appeared in *Truth*, 15 Feb. 1894, a paper published in London by Mr. Labouchere, M.P., and which he justified in the *Times*, 21 Feb. and 2 March, were repelled, especially by the African explorer, Mr. F. C. Selous, in the *Times*, 19 Feb., and in a lecture at the Royal colonial institute, 13 March, 1894.

MASKS. Masks of painted papyrus are said to have been occasionally worn by kings and priests of ancient Egypt. Horace attributes them to Æschylus; yet Aristotle says the inventor and time of their introduction were unknown.—Modern masks, and muffs, fans, and false hair for the women, were devised in Italy, and brought to England from France in 1572. *Stow*; *see Iron Mask*.

MASORAH (Hebrew, *tradition*), a collection of conjectural readings (Keris) of the Hebrew text of the Old Testament, with critical, grammatical, and exegetical remarks by various Jewish doctors, written between the 6th and 10th centuries, who also furnished the *Masoretic vowel points*.

The first Rabbinical Hebrew Bible, containing the Masorah, Targums, and comments, printed by Bomberg at Venice, 1518. The "Book of the Masorah, the Hedge of the Law," first printed at Florence, 1750.

MASQUERADES were in fashion in the court of Edward III., 1340; and in the reign of Charles II. 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo. I. 1724. They were revived and carried to a shameful excess in violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776. *Mortimer*. At the close of a bal masqué, given by Anderson, the

Wizard, 5 March, 1856, Covent-garden theatre was destroyed by fire.

MASQUES, precursors of the opera, introduced into England in the latter part of the 16th century; many were written by Ben Jonson, Beaumont and others; Inigo Jones designed the costumes, &c.; Wm. and H. Lawes, Banister, Locke and others composed the music. A very costly one was held at the Middle Temple on the marriage of princess Elizabeth, Feb. 1613. Milton's "Comus," the music by Henry Lawes, was represented at Ludlow castle in 1634. "Beauty's Awakening," arranged by Mr. Walter Crane and Mr. C. R. Ashbee, presented by the members of the Art Workers' Guild at the Guildhall, 27 June, 1899.

MASS, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low; the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon; low masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394; it was introduced into England in the 7th century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the 12th century. The English communion service was adopted in 1549; see *Missal*, and *Ritualism*.

MASSACHUSETTS, the mother state of New England, North America, founded in 1628 by the English puritans who settled at Plymouth-rock in 1620. It abolished slavery 1783, and adopted the constitution of the United States, 1788. Capital, Boston. Population, 1905, 3,003,680. See *Pilgrim Fathers* and *Boston*.

Great fire at Lynn, a large shoe-making town. 296 buildings destroyed, and about 8,000 persons destitute, estimated loss 5,000,000 dollars, 26 Nov. 1889.

MASSACRES. The following are among the most remarkable, probably exaggerated:—

BEFORE CHRIST.

Of all the Carthaginians in Sicily, 397.
2000 Tyrians crucified and 8000 put to the sword for not surrendering Tyre to Alexander, 331.
Of 2000 Capuans, friends of Hannibal, by Gracchus, 211.
A dreadful slaughter of the Teutones and Ambrones, near Aix, by Marius, the Roman general, 200,000 being left dead on the spot, 102.
The Romans throughout Asia, women and children not excepted, massacred in one day, by order of Mithridates, king of Pontus, 88.
A great number of Roman senators massacred by Cinna, Marius, and Sertorius, 87.
Again, under Sylla and Catiline, his minister of vengeance, 82.
At Perugia, Octavianus Cæsar ordered 300 Roman senators and other persons of distinction to be sacrificed to the manes of Julius Cæsar, 40.

AFTER CHRIST.

At the destruction of Jerusalem, 1,100,000 Jews are said to have been put to the sword, 70.
The Jews, headed by one Andræ, put to death many Greeks and Romans, in and near Cyrene, 115.
Cassius, a Roman general, under the emperor M. Aurelius, put to death 300,000 of the inhabitants of Seleucia, 165.
At Alexandria, many thousands of citizens were massacred by order of Caracalla, 215.

The emperor Probus is said to have put to death 400,000 of the barbarian invaders of Gaul, 277.

MASSACRES IN BRITISH HISTORY.

- Of 300 British nobles, on Salisbury Plain, by Hengist, about 450.
- Of the monks of Bangor, to the number of 1200, by Ethelfrid, king of Bernicia, 607 or 612.
- Of the Danes in the southern counties of England, in the night of 13 Nov. 1002, by order of Ethelred II. At London it was most bloody, the churches being no sanctuary. Amongst the rest was Gunilda, sister of Swein, king of Denmark, left in hostage for the performance of a treaty but newly concluded. *Baker.*
- Of the Jews, in England. Some few pressing into Westminster hall at Richard I.'s coronation, were put to death by the people; and a false alarm being given that the king had ordered a general massacre of them, the people in many parts of England slew all they met. In York 500, who had taken shelter in a castle, killed themselves, rather than fall into the hands of the multitude, 1189.
- Of the Bristol colonists, at Cullen's Wood, Ireland (see *Cullen's Wood*), 1209.
- Of the English factory at Amboyna, in order to dispossess its members of the Spice Islands, Feb. 1624.
- Massacre of the Protestants in Ireland, in O'Neill's rebellion, which began 23 Oct. 1641. Upwards of 30,000 British were killed in the commencement of this rebellion. *Sir William Petty.* In the first three or four days of it, forty or fifty thousand of the Protestants were destroyed. *Lord Clarendon.* Before the rebellion was entirely suppressed, 154,000 Protestants were massacred. *Sir W. Temple.*
- Of the Macdonalds of Glencoe (see *Glencoe*), 13 Feb. 1692.
- Of 184 men, women, and children, chiefly Protestants, burnt, shot, or pierced to death by pikes; perpetrated by the insurgent Irish, at the barn of Scullabogue, Ireland, in 1798. *Musgrave.*
- Of Europeans at Meerut, Delhi, Cawnpore, &c., by mutineers of the native Indian army (see *India*), May and June, 1857.
- Of Europeans at Kalangan, Borneo, 1 May, 1859.

MASTER OF THE CEREMONIES, see *Ceremonies*.

MASTER AND SERVANT ACT (amending the statute respecting them) was passed 20 Aug. 1867; another act repealing parts of preceding acts was passed 26 July, 1889. See *Servants*.
Royal commission to examine into its working, reported 31 July; published evidence . . . Oct. 1874

MASTER OF THE GREAT WARDROBE, an ancient office abolished in 1782; duties transferred to the lord chamberlain.

MASTER OF THE REVELS, an officer of the court. Solomon Dayrolle was the last appointed. Part of the duties were transferred to the licenser of plays, 1737.

MASTER OF THE ROLLS, an equity judge. derives his title from having the custody of all charters, patents, commissions, deeds, and recognizances, entered upon rolls of parchment; his decrees are appealable to the court of chancery. The repository of public papers, called the Rolls, was in Chancery-lane. The rolls were formerly kept in a chapel founded for the converted Jews; but after the Jews were expelled the kingdom in 1290 it was annexed for ever afterwards to the office of the mastership of the rolls. Here were kept all the records since the beginning of the reign of king Richard III., 1483; all prior to that period being kept in the Tower of London; see *Records*. The first recorded master of the rolls was either John de Langton, appointed 1286, or Adam de Osgodeby, appointed 1 Oct. 1295; but it is clear that the office was in existence long before. *Hardy*. The duties were defined in 1833; the salary regulated in 1837. Changes by the judicature act of 1881. By the supreme court of judicature act, the master of the rolls was made a judge of appeal only.

Sir Richard Henn Collins	Oct. "
Rt. hon. sir Herbert H. Cozens-Hardy, born 1838, appointed	3 March, 1907

MASTERS IN CHANCERY, chosen from the equity bar, were first appointed, it is said, to assist the ignorance of sir Christopher Hatton, lord chancellor of England, in 1587. The office was abolished in 1852. The offices of the masters in the queen's bench, common pleas, and exchequer divisions of the high court of justice were amalgamated into one central office in the high court of justice in 1879.

MASTODON, see *Mammoth*.

MATABELE LAND. See *Mashona*.

MATACÃO, a small island near Sierra Leone; secured to the British by treaty, 18 April, 1826. It was occupied by the French, March, 1879; and after some discussion was left by them June following.

MATCHES, see *Lucifers*.

MATERIALISM, the doctrine held by those who maintain that the soul of man is not a spiritual substance distinct from matter, but is the result of a particular organisation of matter in the body. The term is rather loosely applied to the system of Epicurus, about 310 B.C.; Hobbes, about A.D. 1642; Priestley, about 1772; and many eminent men in the present day. It is not necessarily identical with atheism, see *Animism*.

MATERNITY CHARITY, ROYAL, Finsbury; founded 1757.

MATHEMATICS formerly signified all kinds of learning; but the term is now applied to the sciences relating to numbers and quantity; see *Arithmetic*. Among the most eminent mathematicians were Euclid, 300 B.C.; Archimedes, 287 B.C.; Descartes, died 1650 A.D.; Barrow, died 1677; Leibnitz, died 1716; sir Isaac Newton, died 1727; Euler, died 1783; Lagrange, died 1813; Laplace, died 1827; and Dr. Peacock, died 1858; sir G. B. Airy, Bartholomew Price (died, aged 79, 29 Dec. 1898); J. J. Sylvester (died 15 March, 1897), I. Todhunter (died 1884), and prof. Arthur Cayley, born 16 Aug. 1821, barrister, 1849-63; wrote above 800 papers, 1852-94; much honoured abroad (died 26 Jan. 1895); prof. Sophus Lie (born 12 Dec. 1842, died, 18 Feb. 1899), are eminent mathematicians. Mary Somerville, born 1790, author of the "Mechanism of the Heavens," died 1873.

The London Mathematical Society was founded, 16 Jan. 1865.

John Thomas Crossley, author of the popular "Intellectual Calculator," died 20 April, 1889, aged 89. Mathematical congress at Zurich, mid. Aug. 1897, one at Paris in 1900.

MATHURINS, see under *Trinity*.

MATINS. The service or prayers first performed in the morning or beginning of the day in the Roman Catholic church. The *French Matins* were the massacre of St. Bartholomew, 24 Aug. 1572. The *Matins of Moscow* were the massacre of prince Demetrius, and the Poles his adherents, in the morning of 27 May, 1606.

MATRIMONIAL CAUSES ACT, passed 1859. By the act passed 27 May, 1878, a magistrate may grant judicial separation with maintenance to a wife suffering from a husband's violent usage. The act was amended in 1884.

MATTER is held to exist in three states: gaseous, liquid, and solid. Mr. William Crookes (knt. 1897), considers that there is a fourth state, "radiant matter," subtler than any of these, 1879-80. See *Light*.

MATTERHORN, a part of the main ridge of the Alps, about 14,836 feet high, S. Switzerland. After various fruitless attempts by professor Tyndall and other eminent climbers, in 1860, the summit was reached on 14 July, 1865, by Mr. Edward Whymper and others. During their descent, four of the party were killed. Mr. Hadow fell; the

connecting rope broke, and he himself, lord Francis Douglas, the rev. Mr. Hudson, and Michael Croz, a guide, slipped down, and fell from a precipice nearly 4000 feet high. Miss Walker, with her father, ascended the Matterhorn, 22 July, 1871. Three gentlemen ascended without a guide, 21 July, 1876. Dr. W. O. Moseley, an American, was killed here, 14 Aug. 1879. Three persons attempting the ascent perished 12 Sept. 1890; Dr. Black and Miss Bell killed here, 23 July, 1901.

MAUNDY-THURSDAY (derived by Spelman from *mande*, a hand-basket, in which the king was accustomed to give alms to the poor; by others from *dies mandati*, the day on which Christ gave his grand mandate, that we should love one another), the Thursday before Good Friday. *Wheatly*. On this day it was the custom of our sovereigns or their almoners to give alms, food, and clothing to as many poor persons as they were years old. It was begun in England by Edward III., when he was fifty years of age, 1363, and is still continued. There is a picturesque ceremony every year on the Thursday before Good Friday in Westminster abbey. Money is now given in lieu of clothing and provisions. For the former, 1*l.* 15*s.* to each woman; 2*l.* 5*s.* to each man; and for the latter, 1*l.* 10*s.* to each. In addition there is the Maundy money, 1*l.*, and as many pence as the sovereign is years of age, in silver pieces—one penny, twopence, threepence, and fourpence.

MAUR, ST., see *Benedictions*.

MAURITANIA (N. Africa), with Numidia, became a Roman province, 33 B.C. Augustus created (30 B.C.) a kingdom formed of Mauritania and part of Getulia, for Juba II., a descendant of the ancient African princes. Suetonius Paulinus suppressed a revolt here, A.D. 42, when it was made a province, divided into parts. The country was subjugated by the Vandals, 429, and Greeks, 533, and fell into the hands of the Arabs, about 680. See *Morocco*, and *Moors*.

The *Mauritania* steamship of the Cunard line, 790 ft. by 88 ft. by 77 ft., of 32,000 tons register, launched at Wallsend, 20 Sept. 1906; eastern passage record, 4 days 17 hrs. 21 min.; average speed, 25.88 knots; arriving at Queenstown from New York 21 June, 1909; shortest time for westward passage, 4 days 10 hrs. 51 min., arriving at New York 30 Sept. 1909

MAURITIUS, or ISLE OF FRANCE (in the Indian Ocean), was discovered by the Portuguese, 1505; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadtholder, but on the acquisition of the Cape of Good Hope, they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France, 1715. This island was taken by the British, 2 Dec. 1810, and confirmed to them by the treaty of Paris in 1814. The bishopric was founded 1854. Sir Henry Barkly, governor, in 1863, succeeded by sir Arthur H. Gordon, 1870; sir Arthur Purves Phayre, 1874; sir George F. Bowen, 1879; sir J. Pope Hennessy, Dec. 1882; sir Charles C. Lees, Sept. 1889; Sir Herbert E. H. Jerminingham, April, 1893; sir C. Bruce, Jan. 1897; sir C. Boyle, 1904. Population, 1910 (est.), 443,350. Capital, Port Louis; population, 62,975. MAUSOLEUM. Artemisia married her own brother, Mausolus, king of Caria, Asia Minor, 377 B.C. At his death, 353, it is said she drank in liquor his ashes after his body had been burned, and erected to his memory at Halicarnassus a monument, one of the seven wonders of the world (350 B.C.), termed *Mausoleum*. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B.C. She died 352 B.C. The statue of Mausolus is among the antiquities brought from Halicarnassus by Mr. (aft. sir) C. T. Newton in 1857, and placed in the British Museum. A mausoleum for the royal family of England was founded by queen Victoria at Frogmore, 15 March, 1862. Queen Victoria and her Prince Consort buried there.

MAUVE (French for *malva*, mallow), a dye produced by Dr. Stenhouse from lichens in 1848; now produced from *Aniline* (*which see*).

MAY, the fifth month of the year, received its name, some say, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *maiores*; others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day. The ancient Romans used to go in procession to the grotto of Egeria on May-day; see *Evil May-day*.

MAYNOOTH COLLEGE (Ireland), founded by parliament, 1795, and endowed by a yearly grant voted for the education of students designed for the Roman Catholic priesthood in Ireland. An act for its government was passed in 1800. It contains about 500 students. Permanent endowment of this college (30,000*l.* for the enlargement of the buildings and 26,000*l.* annually) was granted by parliament, June, 1845. This occasioned

much controversy in England, a motion being made for its abolition almost every session. The college was repaired and enlarged in 1860. By the Irish Church act, passed 26 July, 1869, the annual parliamentary grant was to cease after 1 Jan. 1871; a compensation being made. The buildings were much injured by fire, 31 Oct. 1878; damage estimated at 10,000*l*. The pictures and books were saved. The centenary celebrated, an international assembly of ecclesiastics present, 25-27 June, 1895. The king and queen visit the college (see *Ireland*, 1903), Mgr. Gargan, president since 1894, died, aged 84, 27 Aug. 1903.

MAYO ASSASSINATION. Richard Southwell Bourke, earl of Mayo, was born 21 Feb. 1822. As lord Naas he was chief secretary for Ireland, in the Derby and Disraeli administrations, 1852, 1858-9, 1866-8. In Sept. 1868, he was appointed viceroy of India, and energetically fulfilled the duties. He was assassinated at Port Blair in the Andaman islands, on a visit of inspection, by Shere Ali, a convict, 8 Feb. 1872. The Indian government granted an annual pension of 1000*l*. to the countess, and 20,000*l*. for the children; and 1000*l*. a year was added to lady Mayo's pension by parliament, voted unanimously, 22 July, 1872.

MAYORS OF THE PALACE, high officers in France, who had great influence during the later Merovingian kings, termed "*fainçants*," do-nothings:—Pepin the Old (or de Landen), 622 *et seq.*; Pepin Héristal, 687-714; Charles Martel, despotic, 714-741; Pepin le Bref, 741, who shut up Childeric III. in a monastery, and himself took the kingdom, 752.

MAYORS OF CORPORATIONS. At the time of the Norman conquest, 1066, the chief officer of London was called *port-grave*, afterwards softened into *port-reeve*, from Saxon words signifying chief governor of a harbour. He was afterwards called provost; but in Henry II.'s reign the Norman title of *maire* (soon after *mayor*) was brought into use. At first the mayor was chosen for life, but afterwards for periods of irregular duration; now he is chosen annually, but is eligible for re-election. In the City of London he must be an alderman, and have been sheriff. His duties commence on 9 Nov. In early times the mayor was always an M.P. for the city. The prefix *LORD* is peculiar to the mayors of London, Dublin, York, Belfast, Liverpool, Manchester, Leeds, Birmingham, Sheffield, Bristol (1899), Cork (1900), Sydney and Melbourne (1902), Cardiff (1905), and to the provosts of Edinburgh, Glasgow, Dundee, Aberdeen and Perth. The dukes of Norfolk and Sutherland, the marquises of Ripon, and the earls of Derby and Lonsdale, and 6 other peers were elected mayors, Nov. 1895. Many other peers elected since then.

The first mayor of London, Henry Fitz-Ailwin, held office for 24 years, appointed 1189 (Some say Thomas Legge, created lord mayor by Edw. III., 1354).

Sir Henry Pickard, who had been lord mayor of London in 1357, sumptuously entertained in one day four monarchs: Edward, king of England; John, king of France; the king of Cyprus; and David, king of Scotland; the Black Prince and many of the nobility being present. *Stow*. . . 1363

MAZARIN BIBLE, see *Printing*, 1450-5.

MAZRA (or Baba Wali), near Candahar, Afghanistan. Here gen. sir Frederick Sleigh (afterwards lord) Roberts totally defeated Sirdar Mahomed Ayoub Khan, and captured his camp and all his cannon, 1 Sept. 1880. Amongst the killed were colonel F. Brownlow, capt. St. John F. Frome, and capt. E. Straton; lieut. Hector MacLaine (made prisoner 27 July) was found recently murdered. Ayoub Khan with some followers fled towards Herat.

MAZURKA, a Polish dance of the 16th century, introduced into England about 1845; Chopin's music for the mazurka is much admired.

MEAL TUB PLOT, against the duke of York, afterwards James II., contrived by one

Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Maunsell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct. 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a *meal-tub* at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, who were against the duke of York's succession, of treason,—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, 1 June, 1685, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assailant was hanged.

MEASURES, see *Weights*, and *Micrometer*. "Not men, but measures," a phrase used in parliament by Brougham, 2 Nov. 1830.

MEAT, see *Provisions*.

MEATH (Ireland). Many epi-copal sees in Meath (as Clonard, Duleek, and others of less note) were fixed at Clonard, before 1151-2, when the division of the bishoprics in Ireland was made by John Paparo, then legate from Pope Eugene III. Eugene was the first styled bishop of Meath, about 1174. Meath was valued, 30 Henry VIII., at 373*l.* 12*s.* per annum.

MECCA (in Arabia), the birth-place of Mahomet, about 571, whence he was compelled to flee, 15 July, 622 (the Hégira). On one of the neighbouring hills is a cave, where it is asserted he retired to perform his devotions, and where the greatest part of the Koran was brought to him by the angel Gabriel, 604. Mecca, after being vainly besieged by Hosen for the caliph Yezid, 682, was taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. They were expelled by the pacha of Egypt in 1818, who retired in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859. The grand shereef was assassinated by a fanatic, 21 March, 1880. Pilgrimage to Mecca still continues; annual average, about 300,000 in 1910.

MECHANICS' INSTITUTIONS. An institute for journeyman mechanics was founded by Dr. Birkbeck in Glasgow, 1800; the first mechanics' institute, properly so called, was organised by Dr. Birkbeck in London, 1824; and many others since on a wider basis, the original idea having been to teach mechanics the principles of their various trades. From the mechanics' institutes have sprung numerous workmen's social and recreative clubs, and technical and other educational organisations.

MECHANICS' MAGAZINE, weekly; established 30 Aug. 1823; was incorporated with *Iron*, Jan. 1873.

MECHLIN or **MALINES** (Belgium), renowned for its lace manufacture, was founded in the 6th century; destroyed by the Normans in 884; sacked by the Spaniards, 1572; taken by the prince of Orange, 1578, and by the English, 1580; and frequently captured in the 17th and 18th centuries, partaking in the evil fortunes of the country. A Roman Catholic congress was held here Sept. 1867. Population 1908, 59,218.

MECKLENBURG (N. Germany), formerly a principality in Lower Saxony; now independent as the two grand duchies of Mecklenburg-Schwerin (population in 1905, 625,045), and Mecklenburg-Strelitz (population in 1905, 103,451). The house of Mecklenburg claims to be descended from Genserich the Vandal, who ravaged the western empire in the 5th century, and died 477. During the Thirty years' war Mecklenburg was conquered by Wallenstein, who became its duke, 1628; it was restored to its own duke, 1630. After several changes the government was settled in 1701 as it now exists in the two branches of Schwerin and Strelitz. In 1815 the dukes were made grand dukes. The dukes joined the new North German confederation by treaty, 21 Aug. 1866.

1897. Fred. Francis IV., born 9 April, 1882; mar. princess Alexandra of Brunswick and Luneberg, 7 June, 1904.

GRAND-DUKES OF MECKLENBURG-STRELITZ.

1815. Charles; died 6 Nov. 1816.

1816. George, born 12 Aug. 1779; died 6 Sept. 1860.

1860. Frederic William, born 17 Oct. 1819; died May 30, 1904.

1904. Adolphus Frederic, born 22 July, 1848; married princess Elizabeth of Anhalt, 17 April, 1877. *Heir*: Adolphus Frederic, born 17 June, 1882.

The royal family of England is intimately allied with the house of *Mecklenburg-Strelitz*. King George III. married Charlotte, a daughter of the duke, in 1761; their son, the duke of Cumberland (afterwards king of Hanover) married princess Frederica Caroline, a daughter of the duke, in 1815.

MEDALS, see *Numismatics*. The ancient medals resembled medallions. Modern medals began about 1453 in the 15th century with the works of Vittore Pisano, of Verona, who died 1456, and his followers. Charles I. authorized the presentation of a badge or medal for "forlorn hopes" soldiers, May, 1643. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty, William IV. for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to Lord Howe's victory, 1 June, 1794, it was thought expedient to institute a naval medal. Medals were struck for the victory of Waterloo; a general war medal (for the war 1793-1814) was ordered in 1847; and special medals were given after the Kafir and Chinese wars. Medals were presented by the queen to persons distinguished in the war in the Crimea, 18 May, 1855. Medals were given to arctic voyagers of 1875-6, in 1877; after Egyptian war, 1882, distributed by the queen at Windsor, 21 Nov. 1882; medals for the Soudan war, 1885; a Burmah medal was given for the war, 1885-7; for the South African war, 1902. Col. Eaton exhibited 1000 medals in New Bond-street, May, 1880. See *Victoria Cross*.

MEDICI FAMILY, the restorers of literature and the fine arts in Italy, were chiefs or *signori* of the republic of Florence from 1434, in

which year Cosmo de' Medici, who had been banished from the republic, was recalled and made its chief; he ruled for thirty years. Lorenzo de' Medici, styled "the Magnificent," and the "Father of Letters," ruled Florence from 1469 to 1492. Giovanni de' Medici (pope Leo X.) was the son of Lorenzo. *Roscoe*. From 1569 to 1737 the Medici family were hereditary grand dukes of Tuscany (*which see*). *Cattarina de' Medici* became queen of France in 1547, and regent in 1550. She plotted with the duke of Alva to destroy the Protestants in 1565. The Medici family became extinct 1737 on the death of Gian Gastone, 7th grand duke. In 1743 the electress palatine, the only sister of the above, died; the last of the Medici.

MELBOURNE ADMINISTRATIONS.

On the retirement of earl Grey, 9 July, 1834, viscount Melbourne* became first minister of the crown, 16 July. When viscount Althorp became earl Spencer, on his father's decease, Nov. same year, lord Melbourne waited on the king to receive his majesty's command as to the appointment of a new chancellor of the Exchequer, when his majesty said he considered the administration at an end. Sir Robert Peel succeeded, but was compelled to resign in 1835, and lord Melbourne returned to office. His administration finally terminated, 30 Aug. 1841, sir Robert Peel again coming into power; see *Administrations.*

FIRST ADMINISTRATION, July, 1834; resigned Nov. 1834.

Viscount Melbourne, *first lord of the treasury*.
Marquis of Lansdowne, *lord president*.

Earl Mulgrave, *privy seal*.
Viscount Althorp, *chancellor of the exchequer*.

Viscount Duncannon, viscount Palmerston, and T. Spring-Rice (afterwards lord Monteagle), *home, foreign, and colonial secretaries*.

Lord Auckland, *admiralty*.
Mr. Charles Grant (afterwards lord Glenelg), and Mr. C. P. Thomson (afterwards lord Sydenham), *boards of control and trade*.

Lord John Russell, *paymaster of the forces*.
Lord Brougham, *lord chancellor*.

Sir John Hobhouse, Mr. Ellice, marquis of Conyngham, Mr. Littleton, &c.

SECOND ADMINISTRATION, April, 1835.

Viscount Melbourne, *first lord of the treasury*.
Marquis of Lansdowne, *lord president*.

Viscount Duncannon, *privy seal, and woods and forests* (succeeded by earl of Clarendon, Jan. 1840).

T. Spring Rice, *chancellor of the exchequer* (succeeded by Francis T. Baring, Aug. 1840).

Lord John Russell, *home secretary* (succeeded by marquis of Normanby, Aug. 1839).

Viscount Palmerston, *foreign secretary*.
Lord Glenelg, *colonial secretary* (succeeded by marquis of Normanby, Feb. 1839; lord John Russell, Aug. 1839).

Viscount Howick, *secretary-at-war* (succeeded by T. B. Macaulay, Sept. 1839).

Lord Auckland, *admiralty* (succeeded by earl of Minto, Sept. 1835).

* Wm. Lamb, born in 1779; became M.P. for Westminster, 1812; secretary for Ireland, 1827; succeeded his father as viscount Melbourne, 1828; died 24 Nov. 1848.

Sir John C. Hobhouse, *board of control*.
C. Poulett Thomson, *board of trade* (succeeded by Henry Labouchere, Aug. 1839).
Lord Holland, *chancellor of duchy of Lancaster* (succeeded by earl of Clarendon, Oct. 1840).
The chancellorship in commission; sir C. Pepys (afterwards lord Cottenham), became *lord chancellor*, Jan. 1836.

MELEGNANO, see *Marignano*.

MELÉNITE, an explosive invented by M. Turpin, a French chemist; approved by the French War Minister, Dec. 1886.

The *mélinite scandal*, notice by the chamber of deputies, May, June, 1891. M. Turpin and captain Triponé sentenced to imprisonment, exile and fines for receiving money for communications respecting mélinite to foreigners, 17 June, 1891.

MELFI (Apulia, S. Italy) was nearly destroyed by an earthquake, 14 Aug. 1851: about 600 persons perished.

MELODISTS' CLUB, founded in 1825 by admirers of Dibdin; prizes were offered.

MELODRAMA, in which dialogue was formerly interspersed with music, began in Germany in the 18th century, and was introduced here by Thomas Holcroft.

MELORA or **MELORIA**, a small isle in the Mediterranean, near which the Pisan fleet defeated the Genoese, in 1241, capturing many bishops going with much treasure to a council. The total destruction of the Pisan fleet on 6 Aug. 1284, by the Genoese near the same place, after a most sanguinary conflict, was considered to be the just punishment of their impiety.

MELOS (now Milo), one of the Cyclades in the Egean sea, early colonised by the Spartans. During the Peloponnesian war the Melians adhered to Sparta, till the island was captured, after seven months' siege, by the Athenians, who massacred all the men and sold the women and children as slaves, 416 B.C. A statue of Venus, found here in 1820, was placed in the Louvre, 1834. Many statues, etc., discovered by excavations, reported May, 1896.

MEMBERS OF PARLIAMENT (CHARGES AND ALLEGATIONS) ACT, passed 13 Aug., 1888. See under *Ireland* and *Parnellites*.

MEMEL, an important commercial port in Prussia, built about 1252 by the Livonian order. It was fortified by the Teutonic knights, 1404. It was almost totally destroyed by fire, 4 Oct. 1854.

MEMNONEIUM or **RAMESEION** (Thebes, Egypt), the first Egyptian monarch—4455, *Brugsch*, the tomb of Osmandyas, according to Diodorus, now considered to be that of Rameses III., about 1200, *Brugsch*.

MEMORIAL HALL, see *Independents*.

MEMORY, see *Mnemonics*.

MEMPHIS, an ancient city of Egypt ("of which the very ruins are stupendous"), is said to have been built by Menes. It included several grand temples with the tombs of the kings. The invasion of Cambyzes, 525 B.C., began the ruin of Memphis, and the founding of Alexandria, 332, completed it. It was restored by Septimius Severus, A.D. 202. In the 7th century, under the dominion of the Saracens, it fell into decay.—

MEMPHIS, Tennessee, U. S., on the Mississippi, was taken from the confederates by the federals after a severe conflict, 6 June, 1862.

The cyclorama of Memphis as it might have appeared at the departure of the Israelites from Egypt 1491 B.C., painted by Herr Edmund Beringer, was exhibited at Niagara-hall, Westminster, Jan. 1892.

MENAGERIE, see *Zoology*, *Tower*.

Mr. Phineas Taylor Barnum's great menagerie at Bridgeport, Connecticut, burnt; a great many animals perish; loss about 140,000*l.* 20 Nov. 1887. Mr. Barnum purchased the old Wombwell's collection Jan. 1888. See *Barnum*.

MENAI STRAIT (between the Welsh coast and the isle of Anglesey). Suetonius Paulinus, when he invaded Anglesey, transported his troops across this strait in flat-bottomed boats, 59. In crossing this strait, a ferry-boat was lost, with fifty persons, chiefly Irish, 4 Dec. 1785. The road from London to Holyhead was regarded as the highway from the British metropolis to Dublin; Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting beautiful suspension bridges over the river Conway and the Menai Strait, commenced in July, 1818, finished in July, 1825, opened 30 Jan. 1826. The Britannia tubular bridge over the Menai was constructed by Stephenson and Fairbairn in 1849-50; see *Tubular Bridges*.

MENDICANT FRIARS. Several religious orders commenced alms-begging in the 13th century, in the pontificate of Innocent III. They spread over Europe, and formed many communities; but at length by a general council, held by Gregory X. at Lyons, in 1272, were reduced to four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and others branched off. See *Franciscans*, &c.

MENDICITY SOCIETY (Red Lion-square, London), was established in 1818 for the suppression of public begging and other impositions. Tickets received from the society are given by subscribers to beggars, who obtain relief at the society's house, if deserving. (See *Poor*.) The society has been much aided by the action of the Charity Organization society (*which see*), established in 1870; they agree to co-operate together, June, 1897.

MENDOZA, in the Argentine republic, nearly destroyed by an earthquake, one of the most awful recorded, 20 March, 1861: above 7000 persons perished.

MENIPPEË, see *Satire*.

MENNONITES, four sects of Dutch, Flemish and German baptists; derive their name from Menno Symonis (1505-61), formerly a catholic priest, who became a teacher and leader of the anabaptists, about 1537, and published his "True Christian Belief" in 1556; subsequently divisions and changes ensued. The Mennonites, objecting to war, emigrated from Prussia to Odessa, to escape military service, and went thence to America, 1878.

MENSURATION. The properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, &c., about 218 B.C.; see *Arithmetic*. The *Mensurator*, a new machine for the solution of triangles, was explained by Mr. W. Marsham Adams, at the British Association meeting at Brighton, Aug. 1872.

MENTANA (near Monte Rotondo, in the old papal states). Here Garibaldi and his volunteers, after having intrenched his positions at Monte Rotondo and Mentana on their march towards Tivoli, on Sunday, 3 Nov. 1867, were totally defeated by the pontifical and French troops under generals Kanzlar and Polhès, after a severe conflict, in which general Faily said "the Chassepot rifles did wonders." There were about 5000 men on each side, but the Garibaldians were very badly armed. The loss of the papal and French troops was about 200 killed and wounded; that of Garibaldi about 800. Garibaldi crossed the Italian frontier, and was arrested at Correse, and eventually sent to Caprera (about 25 Nov.). See *Rome*. A monument to the Garibaldians who fell here was inaugurated 25 Nov. 1877.

MENTZ or **MAYENCE** (S.W. Germany), the Roman *Moguntiacum*, built about 13 B.C. The archbishopric was founded by Boniface, 745. Many diets have been held here; and here John Faust established a printing press, about 1440. A festival in honour of John Gutenberg was celebrated here in 1837, another June, 1890. See *Printing*. Mentz was given up to the Prussians, 26 Aug. 1866. 500th anniversary of the birth of Gutenberg, typographical exhibition opened by the grand duke of Hesse, 23 June, 1900. Population 1905, 91,179.

MENU, **INSTITUTES OF**, the very ancient code of India. Sir Wm. Jones, who translated them into English (1794), considers their date should be placed between Homer (about 962 B.C.) and the Roman Twelve Tables (about 449 B.C.).

MERCANTILE MARINE ACT was passed in Aug. 1850, and amended Aug. 1851.

MERCATOR'S CHARTS, said to have been constructed by Gerard Mercator or Kauffmann and published 1556, and applied to navigation by Edward Wright about 1599.

MERCHANDISE MARKS ACT, passed in 1862 to punish forgeries of trade-marks. Another act passed in 1887; reported effectual, 1890; amended 1891-94; reported partially effectual by a committee, July, 1897. See *Trade Marks*.

At an International Conference on the subject of fraudulent trade-marks, held at Madrid 7-14 April, 1890, an important convention was agreed to. Report of the select committee on the Trades Mark bill, issued 3 Aug. 1905.

MERCHANT ADVENTURERS' COMPANY, established by the duke of Brabant in 1296, was extended to England in Edward III.'s reign, and was formed into a corporation in 1564.—The **MERCHANT-TAYLORS**, a rich company of the city of London, of which many kings have been members, were so called after the admission of Henry VII. into their company, 1501, but were incorporated in 1466. Their school was founded in 1561. *Stow*.

MERCHANT SHIPPING ACT of 1854 was amended by acts passed in 1862, 1867, 1871, 1872, and 1873. The act suddenly passed 13 Aug. 1875, gave further power to the Board of Trade for stopping unseaworthy ships. Other Acts passed 1876, 1880, 1882, 1883, 1889, 1892, consolidated 1894; amended, 1897 and 1898; merchant shipping (liability of shipowners and others) act passed, 6 Aug. 1900; see *Courts of Survey*, and *Seamen*.

Loss of life at sea having greatly increased, a new bill brought in by Mr. Joseph Chamberlain, president of the Board of Trade, to prevent over-

loading, under-manning, and over-insurance, 19 May; withdrawn 3 July, 1884
Royal commission to inquire into merchant shipping (earl of Aberdeen, the duke of Edinburgh, Mr. J. Chamberlain, Mr. Burt, Mr. H. Green, Mr. T. C. Baring and eight others), gazetted 28 Oct. 1884; last meeting 31 July, 1885
First report issued 15 Nov. "
Royal commission on loss of life at sea appointed 4 March, 1886

MERCHANTS were protected by Magna Charta, 1215, and by many statutes. See *Acton Burnel*. An attempt made by queen Anne's ministry to exclude merchants from sitting in the house of commons in 1711, failed.

MERCIA, see under *Britain*.

MERCURY, the planet nearest the sun, and the smallest known to the ancients. Schiaparelli asserts his rotation to be as long as his revolution in his orbit. The transit of Mercury over the sun's disk, of rare occurrence and first observed by Gassendi, 1631, was well observed 5 Nov. 1868; at Athens, 10 May, 1891; well observed by Prof. Barnard at Lick Observatory, California, 10 Nov. 1894. See *Calomet* and *Quicksilver*. The Greek god Hermes was the Roman Mercury.

MERCY, ORDER OF (in France), was established with the object of accomplishing the redemption of Christian captives among the Saracens, by John de Matha in 1198. *Hénault*. Another order was formed by Pierre Nolasque in Spain, 1223. A League of Mercy (based on the plan of the guild founded by the late duchess of Teck), organized to further the objects of the prince of Wales's (now king Edward's) hospital fund for London; an "Order of Mercy," established in connection with the league, as a reward for free service to the sick and poor; the prince and princess of Wales, presidents, 1 March, 1899; succeeded by the present prince and princess of Wales, Nov. 1901. Order distributed yearly at Marlborough house by the prince of Wales.

City of London branch of the league of mercy—in-
augural meeting at the Mansion-house, 21 Oct. 1909

MERIDA (Spain), a town in Estremadura (built by the Romans), was taken by the French, Jan. 1811. Near this town, at Arroy dos Molinos, the British army under general (afterwards lord) Hill defeated the French under general Girard, after a severe engagement, 28 Oct. 1811. The British took Merida from the French in 1812, general Hill leading the combined forces of English and Spanish troops.

MERIDIAN, see under *Geodesy*.

MERINO SHEEP, imported into England from Spain, 1788, are thought to be descendants of English sheep taken to Spain as part of the dowry of John of Gaunt's daughter Katherine, 1390.

MERIT, ORDER OF (British), created by king Edward VII. for those who have won distinction in the army, navy, literature, art and science, 26 June, 1902. First members: earl Roberts, viscount Wolseley, viscount Kitchener, adm. sir H. Keppel (died Jan. 17, 1904), adm. sir E. H. Seymour, lord

Kelvin, lord Lister, lord Rayleigh, sir W. Huggins, rt. hon. John Morley, Mr. G. F. Watts, R.A. (died 1 July, 1904), the rt. hon. W. E. H. Lecky (died 23 Oct. 1903). The following additional members, F.M. sir Geo. White, adm. sir J. Fisher, sir R. C. Jebb (died Dec. 9, 1905), sir L. Alma-Tadema, R.A.; Mr. Geo. Mere ith, Mr. Holman Hunt, appointed 30 June, 1905; Marshal Oyama, Admiral Togo, and Marshal Yamagata, Feb. 1906; lord Cromer, June, 1906; Miss Florence Nightingale, Nov. 1907; Prof. H. Jackson, June, 1908; Mr. A. R. Wallace, Nov. 1908.

MEROE, an ancient city and country of Africa, near the sources of the Nile, said to have flourished under sacerdotal government in the time of Herodotus, about 450 B.C.

The priest-king Ergamenes massacred the priests and became absolute, about 300 B.C.
The ruins of the ancient capital were discovered by Caillaud between 1819 and 1822.
Site of the ancient city discovered by Prof. Sayce, Jan. 1909.

MEROVINGIANS, the first race of French kings, 418-752; see *France* and *Mayors*.

MERRIMAC, see *United States*, 1862.

MERRY-ANDREW. The name is said to have been first given to Andrew Borde, a physician, who lived in the reign of Henry VIII., and who, on some occasions, on account of his facetious manners, appeared at court, 1547.

MERSEY TUNNEL, see *Tunnel*.

MERSTHAM TUNNEL MYSTERY. Late on Sunday night, 24 Sept. 1905, the body of Mary Sophia Money, aged 21, a book-keeper employed at a dairy at Lavender-hill, Clapham Junction, was discovered in Merstham tunnel (S. E. & C. and L.B. & S.C. railways). The verdict returned at the inquest was "that Miss Money met her death by severe injuries brought about by a train, but the evidence was insufficient to show whether she fell or was thrown from a train," 16 Oct. 1905. The mystery is still unsolved.

MERTHYR-TYDVIL (Glamorganshire). Riots commenced here, 3 June, 1831, and continued for several days; many persons were killed and wounded. Population, 1909 (est), 78,365. Incorporated 1905. See *Coal (Accidents)*.

MERTON (Surrey). At an abbey here, the barons under Henry III., 23 Jan. 1236, held a parliament which enacted the Provisions of Merton, the most ancient body of laws next after Magna Charta. They were repealed in 1863; see *Bastards*. The statute of Merton also provides for the inclosure of common lands.

MERV, or Meru (the ancient *Antiochia Margiana*), a town of independent Turkestan, Central Asia. It flourished under the Seljuk Turks, especially under Sultan Alp Arslan; it was sacked by the Monguls in 1221; it became subject to Persia in 1510; to the emir of Bokhara in 1787; to the Turkomans in 1856, and to Russia 1883-4. Nearly 10,000 Turkomans die of malignant fever, March-Oct. 1896. See *Russia* and *Turkestan*.

MESMERISM. Frederick Anthony Mesmer, a German physician, of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous

proselytes and much money by experiments with and without metallic plates, producing effects termed then "animal magnetism," now "hypnotism." A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carlisle and Mr. Monckton Milnes (afterwards lord Houghton) among the vice-presidents. See *Animal Magnetism* and *Hypnotism*.

The "New Mesmerism" exhibited in Paris by Dr. Luys and others, which included the alleged externalization of sensations and transference of sensibility to inanimate objects, such as dolls, was well described in the *Times*, 28 Dec. 1892, and 5, 11 Jan. 1893, and by Mr. Ernest Hart in the *British Medical Journal* Jan. 1893
See *Trials*, 1910.

MESOPOTAMIA, the district between the rivers Tigris and Euphrates (*which see*, and *Aram*) successively held by Assyrians, Babylonians, Persians, Greeks, Romans, Arabs and Turks. Mesopotamia is mentioned in Gen. xxiv. 10; Acts ii. 9, and other places.

MESSALIANS, a sect professing to adhere to the letter of the gospel, about 310, refused to work, quoting this passage, "Labour not for the food that perisheth."

MESSENIA (now *Maura-Matra*), in the Peloponnesus, an ancient kingdom. It had long sanguinary wars with Sparta. It was at first governed by kings; after its restoration to power in the Peloponnesus it formed an inferior republic, under the protection first of the Thebans, and afterwards of the Macedonians.

The first Messenian war began 743 B.C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually, Ithome was taken, and the Messenians became slaves to the conquerors B.C. 724
The second war, to throw off the Spartan yoke, commenced about 685, ending in the defeat of the Messenians, who fled to Sicily 668
The third war (the Messenians emigrate) 464-455

MESSIAH, synonymous with Christ "the anointed," foretold by *Daniel* ix. 25, about 538 B.C. "We have found the Messias, which is, being interpreted, the Christ." *John* i. 41. "The Messias," Handel's greatest oratorio, composed by him in twenty-three days (22 Aug.-14 Sept. 1741), was first performed at Dublin, 13 April, 1742, the receipts being given by him to the charities of that city.

MESSINA (Sicily), so named by the Samians, who seized this city, then called Zancle, 671 B.C. It was seized by the Mamertini (*which see*), about 281 B.C. It belonged for many ages to the Roman empire; was taken by the Saracens, about A.D. 829. *Priestley*. Roger the Norman took it from them by surprise, about 1072.

METALS. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." (*Gen. iv.*) The Phœnicians had great skill in working metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cesium, rubidium, thallium, indium, gallium, and others to the known metals. See *Elements, Mines, Iron*, and the other metals.

METAMORPHISTS in the 15th century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Macintosh*. Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy*.

METAURUS, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B.C., when marching with abundant reinforcements. The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. The victory saved Rome.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead. See *Buddhism*.

METEOROGRAPH, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867. It is self-acting, and registers the various changes of the atmosphere in the form of a diagram.

METEOROLOGY (from the Greek *meteōros*, aerial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c. The writings of Theophrastus, on meteorology, 3rd century B.C., were translated by Jas. G. Wood, edited by G. J. Symons, published 1894. Aristotle, Bacon, Boyle, and Franklin wrote on the subject.

Meteorological Society of the Palatinate, established 1780.

Meteorological Society of London, first met, 15 Oct. 1823.

John Dalton's essay on meteorology appeared in 1793.

Luke Howard's work on the clouds appeared in 1802, and his "Barometrographia" in 1848. See *Clouds*.

Sir W. Reed published his work on the "law of storms" in 1838. The works of Daniell (1845), Kametz (1845), Müller (1847), and Buchan (1867) are esteemed.

The "British" Meteorological Society, established in 1850, chartered in 1866, became Royal, Oct. 1883. By the exertions of Mr. James Glaisher, long the secretary, the apparatus at Greenwich was erected; and meteorology has appeared in the "Greenwich Observations" since 1848. See *Balloon—Scientific Ascents*. The Royal Meteorological Society's annual exhibition began in 1880.

Meteorological observatories have been erected in all parts of the globe.

The Meteorological department of the Board of Trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather-Book" in 1863. His exertions are said to have overworked his brain; and on 30 April, 1865, he died by his own hand. The Meteorological office issues apparatus and instruction books to captains of ships and established observatories in many places in the empire. It was handed over to the Royal Society in 1871, and endowed by Mr. J. P. Cassiot. Annual reports on ocean meteorology, weather telegraphy and climatology issued.

The Kew meteorological observatory given to the British Association in April, 1860. It was placed under the Meteorological council nominated by the Royal Society, but appointed by the treasury. R. H. Scott, secretary, July, 1877.

At the recommendation of M. Le Verrier and admiral Fitzroy, meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe since 1 Sept. 1860.

Storm-warnings first issued in Holland through M. Buys Ballot, 1860. His "law of the winds" points out the relation between the direction of the wind, and the atmospheric pressure.

Storm-warnings first sent to the coast by the Board of Trade, 6 Feb.; and first published 31 July, 1861; suspended, 7 Dec. 1866; reissued at Christmas, 1867, and have been since continued.

Daily international bulletin of the imperial observatory at Paris, under the direction of M. Le Verrier, first published in MS. 1 Jan. 1858, first issued to subscribers, 4 Nov. 1863. (This was the first chart with united maps.)

"Daily weather charts" first issued by the Meteorological Office, 1 Oct. (first prepared in MS. 3 Sept. 1860), 1872; "Weekly Weather Report" first published, 11 Feb. 1878.

"Weather Charts and Storm Warnings," by R. H. Scott, published, 1876 *et seq.*

Observatory erected on Ben Nevis; Mr. R. T. Omond appointed director, 6 Sept.; opened 17 Oct. 1883. Closed through lack of funds, 1905.

A French academy of meteorology organised a successful balloon ascent, 9 Aug. 1879.

An observatory on Sonnblick Salzburg (10,177 feet high), opened about 1 Sept. 1886.

Daily forecasts for midland counties, 1886, 310. Absolute successes 247, absolute failures 26, and partial successes 36, announced *Times*, 7 Feb. 1887.

Weather plant (*Abrus precatorius*) exhibited by professor Nowack at Vienna; changes in the weather said to be foretold by alteration in the leaves attributed to electromagnetism in 24 to 48 hours previously, Aug.-Sept. 1888. The plant is grown in the Botanical society's gardens, London. Many other plants possess this property (*W. Sowerby*), Sept. 1888. During the experiments made at the Jodrell laboratory, Kew, by Dr. Oliver and Herr Joseph Nowack in October, 1889, when many weather changes occurred, only one forecast was given by the weather plant, which therefore cannot be relied upon for meteorological purposes. Mr. J. F. Nowack maintains the success of his new system of forecasting atmospheric, etc., disturbances, by it, *Times*, 13 Dec. 1897. In 1906 the plant was tested at Denmark-hill, London, as to its being influenced by earthquakes.

The 13th annual exhibition of meteorological apparatus, London, opened 15 March, 1892.

State observatory established by prof. Assmann of Berlin on the Brocken, 1 Oct. 1895.

METEORS, LUMINOUS, include shooting stars, fire-balls, and falling stones or aérolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herick in 1837. The following are remarkable epochs for their annual return:—2 Jan.; 29 July; 3 and 9-12 Aug.; 14-16 Nov.; 11 Dec. *R. P. Greg.* See *August*.

The magnificent continuous star-shower of 14 Nov. 1866, had been predicted by professor Newton some time previously. A fine display occurred on the night of 23 Nov. 1868, in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S.A.), 12 Nov. 1799; and by Dr. D. Olmsted, at New-haven (U.S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1872; and in Southern and Western Europe, 27 Nov. 1885.

AÉROLITES, falling-stones, accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

METHUEN TREATY, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. It greatly favoured the importation of port wine into this country by lowering the duty, to the discouragement of French wines. It was abrogated in 1834.

METHYL, a colourless inodorous gas, a compound of hydrogen and carbon, obtained in the free state first by Frankland and Kolbe separately, in 1849.

METHYLATED SPIRITS. By an act passed in 1855 a mixture of spirits of wine with 10 per cent. of its bulk of wood-naphtha, or methylic

alcohol, is allowed to be made duty free for use in the arts and manufactures, not less than 450 gallons being made at one time. In 1861 an act was passed permitting the methylated spirits to be retailed by licence.

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days; see *Calippic Period*, *Golden Number*.

METRIC SYSTEM. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the equator (3'2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after 1 Jan. 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, but not yet by Great Britain.

Unit of SURFACE, *centiare*=a square *mètre*=1'1960 English yard (a square *décimètre* or *are*=100 square *mètres*).

Unit of VOLUME of SOLIDITY, *stère*=a cubit *mètre*.

Unit of CAPACITY, *litre*=a cubic *décimètre* (or 10th of a *mètre*)=1'76077 English pint.

Unit of WEIGHT, *gramme*=weight of a cubic centimètre (the 100th part of a *mètre*) of distilled water=0'56438 English drachm.

Unit of MONEY, the *franc*, a piece of silver weighing 5 grammes.

The multiples of these units are expressed by Greek numerals (*deca*-, 10; *hecto*-, 100; *kilo*-, 1000; *myria*-, 10,000). The divisors are expressed by Latin numerals (*deci*-, 10; *centi*-, 100; *milli*-, 1000).

METROPOLIS OF GREAT BRITAIN includes the cities of London and Westminster, and the old boroughs of Southwark, Finsbury, Marylebone, Tower-Hamlets, Hackney, Lambeth, and Chelsea; great changes made by the re-distribution of seats act, 1885, 59 constituencies in all. The Metropolis Management Act, 18 & 19 Vict. c. 122, was passed in 1855; amended (by-laws) act passed, 1 Aug. 1899, 28 boroughs created; rateable value of the county of London, 1909, 41,609,935*l.*; of the city, 5,451,836*l.*; see *London, London, County of, and City's Cash*.

METROPOLIS ROADS ACT (passed in 1863) transferred the management of certain roads north of the Thames from the commissioners to the parishes, and abolished certain turnpikes and toll-bars.

METROPOLIS WATER ACT 1852, amended, 1871; another, royal assent 18 Dec. 1902, establishes the *Metropolitan Water Board* to acquire, manage, and carry on the undertakings of the Metropolitan water companies. Board consists of 66 members appointed by county councils and other authorities; 1st election, 1903; 1st chairman, sir R. Melville Beachcroft. Court of arbitration sat to decide the amount of purchase-money to be paid to the various companies for their undertakings. Companies claimed 60,000,000*l.*; arbitration committee awarded a total of 34,281,547*l.*

METROPOLITAN (from the Greek *metropolis*), a title given at the council of Nice, 325, to certain bishops who had jurisdiction over others in a province.

METROPOLITAN ASSOCIATION FOR IMPROVING THE DWELLINGS OF THE INDUSTRIOUS CLASSES. Founded 15 Sept. 1841; incorporated 16 Oct. 1845.

METROPOLITAN ASYLUMS BOARD is composed of 73 members, 55 elected by the Metropolitan Boards of Guardians and 18 nominated by the Local Government Board. The board was formed in May, 1867, by an order of the Poor Law board (now the Local Government board), made pursuant to the provisions of the

Metropolitan Poor act, 1867. That order empowered the Asylums board to provide accommodation for poor persons suffering from fever, small-pox, or those who might be insane. By the Public Health (London) act, 1891, the board was empowered to receive into its hospitals *any* person suffering from fever, small-pox, or diphtheria; to provide an ambulance service, and to undertake the removal of patients from their homes to the hospitals. The provision of a training ship for the training of poor boys for sea service was sanctioned by an order of the Local Government board in 1875, made under the provisions of the Metropolitan Poor Amendment act, 1869; and under later orders, dating from 1897, the board has been constituted as the central metropolitan authority for dealing with various classes of poor law children. The board has (in 1910) provided accommodation for—

Infectious diseases—fifteen hospitals and bacteriological establishments.

Accommodation, 9,128 patients, 3,000 staff.

Imbeciles—four asylums, including infirmary for aged patients, training school, and industrial colony.

Accommodation, 7,347 patients, 1,300 staff.

Poor Law children—347 ringworm school, two ophthalmia schools, one infirmary, three seaside sanatoria or homes, seven homes and working colonies for mentally deficient, and one training ship.

Accommodation, 3,533 inmates, 850 staff.

Ambulance service—eight ambulance stations and 150 ambulances, and three riverside wharves, with 5 ambulance steamers.

The first asylum was opened in 1870, and the first fever hospital the same year.

The numbers of patients received by the board since its formation, and the numbers received in 1909, are as follows:—

	Total received since 1867.	Total received during 1909.
Imbeciles	29,818	784
Fever	464,187	22,646
Small-pox	75,123	15
Training ship	10,280	311
Children	41,115	8,609

The expenditure in 1909 was as follows:—

Imbecile Asylums	199,242 <i>l.</i>
Infectious hospitals and ambulance service	434,698 <i>l.</i>
Training ship	18,086 <i>l.</i>
Schools and homes for children	99,795 <i>l.</i>
Repayment of, and interest on, loans and general expenses	325,957 <i>l.</i>

Total 1,077,778*l.*

This expenditure is met by precepts levied on the several Metropolitan boards of guardians, and is eventually charged to the rates.

METROPOLITAN BOARD OF WORKS was established by 18 & 19 Vict. c. 120 (1855) ("For the management of public works in which the metropolis has a common interest"), amended in 1862. It held its first meeting and elected Mr. (aftds. sir) John Thwaites as chairman, 22 Dec. 1855. In 1858, its powers were extended in order to effect the purification of the Thames by constructing a new main drainage for the metropolis. The board was authorised to raise a loan and levy 3*d.* in the pound on the property in the metropolis. It was also authorised to construct the Thames Embankment. In 1861 the board received nearly a million pounds, and expended 900,000*l.*; see *Sewage, and Thames*. Sir John Thwaites, the chairman, died 8 Aug. 1870, aged 55. Much discussion ensued respecting the appointment of his successor; Mr. Bruce, the home secretary, having intimated the probability of the office being abolished by parliament, with other changes, 11 Aug., col. (aftds. sir) James Macnaghten McGarel Hogg (created baron Maghera-morne, June, 1887), a member of the board, was

elected chairman for one year, 18 Nov. 1870; annually till 1889 (he died 27 June, 1890). The board was empowered to borrow money by acts passed 1860-87. Its powers extended over 117 square miles, and 3,266,287 persons in 1873. It was composed of delegates from various local boards, &c.

METZ, a fortified city in Lorraine, annexed to the empire of Germany, 10 May, 1871. Population, 1905, 60,419. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the 6th century. It was made a free imperial city, 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins; was captured by Henry II., 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men, 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Woerth and Forbach, on 6 Aug. the whole French army (except the corps of MacMahon, De Failly, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

Battle of Pange or Courcelles, gained by the first German army under Von Steinmetz, after several hours' fighting, with great German loss, 14 Aug. 1870

Bazaine was censured for not advancing on 15 Aug. "

Battle of Vionville or Mars-la-Tour, gained by the 2nd German army under prince Frederick Charles, "

after twelve hours' fighting. By the unexpected unmasking of a mitrailleuse battery, Henry, prince of Reuss, and many German nobles were killed. The victory was at first claimed by the French. (This battle, the most sanguinary in the war hitherto, included a Balaclava charge of a German regiment of cavalry upon a French battery, by which it was decimated, but to which the victory was greatly due. Twice as many Germans were killed as at Königgratz, the killed and wounded being estimated at 17,000. The French loss was said to have been equally great), 16 Aug. "

Bazaine masses his troops for a decisive conflict, 17 Aug. "

Battle of Rézonville or Gravelotte, gained by the combined 1st and 2nd German armies, commanded by the king in person, after twelve hours' fighting. "The most desperate struggle took place on the slopes over Gravelotte, which the Germans gained by nightfall, after repeated fatal charges; the fortune of the day being long in suspense. But the right of the French had been outflanked, they fell back fighting to the last, and retired under cover of Metz. The French are said to have lost 19,000; and the Germans 25,000." (The carnage is considered to have been unexampled; a large number of French prisoners were made. The German army included Saxons and Hessians) 18 Aug. "

Bazaine repulsed in a sortie at Courcelles, near Metz (he claimed a victory) 26 Aug. "

His whole army defeated by gen. Manteuffel of the army of prince Frederick Charles, in a battle lasting from the morning of 31 Aug. to noon, 1 Sept. "

Von Steinmetz sent to govern Posen; prince Frederick Charles sole commander before Metz, 21 Sept. "

Vigorous but ineffective sallies . . . 23, 24, 27 Sept. "

About 100,000 soldiers estimated in Metz, 30 Sept. "

Great sortie; the Germans surprised; about 40,000 French engaged; they are repulsed after a severe engagement from 3 p.m. till dark; loss about 2000 French and 600 Germans . . . 7 Oct. "

About 600 oxen and 500 sheep captured during a sortie. . . . 8 Oct. "

 This order of knighthood, founded for the Ionian Isles and Malta, 27 April, 1818, was reorganised in March, 1869, in order to admit servants of the crown connected with the colonies. Among the first of the new knights were the earl of Derby, earl Russell, and earl Grey. Order enlarged 30 Oct. 1902. Knights grand cross increased to 100, knights commanders to 300, companions to 600. See *Knights*.

- MICHAELMAS, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.
 The custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588, at the house of sir Neville Umfreville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent. *Clavis Calendaria*.

MICHAEL'S MOUNT, St. (Cornwall), is considered by some to be the Iktis of Diodorus Siculus, and an ancient resort of the tin merchants. St. Michael was said to have appeared on the mount, 495 or 710; and the place, thus reputed holy, became the seat of a body of monks, who received a charter from Edward the Confessor, 1044, and many privileges from pope Gregory VII., 1079.

MICROBES, see *Germ*.

MICROMETER, an astronomical instrument used to measure any small distances and the minuter objects in the heavens, such as the apparent diameters of the planets, &c., was invented by Wm. Gascoigne, who was killed at the battle of Marston-moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch, about 1858; the measurement of the 30,000th of an inch is now common. Dr. Carpenter measured a filament, the breadth being the 200,000th part of an inch, 1879.

Dr. P. E. Shaw explains to the Royal society an electrical micrometer which, it is stated, can be made to measure the two-millionth of a millimetre, or the fifty-millionth of an inch. This measurement, the smallest yet made, was in connection with the movements of a telephone diaphragm. The measurement was effected by means of an electric current connected with the micrometer and telephone . . . July, 1905

MICROPHITE, a microscopic plant, especially parasitic; some physiologists consider bacteria and bacilli to be microphites, 1890.

MICROPHONE (Greek, *mikros*, little; *phone*, sound), a name given by Wheatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (inventor of the type-writing telegraph, born in London 16 May, 1831, died 22 Jan. 1900), and shown to the Royal Society, 9 May, 1878.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1590; by Galileo, about 1610; by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by

Henry Baker, F.R.S., about 1763, and still greater during the 19th century by Wollaston, Ross, Jackson, Varley, Hugh Powell, and others. *Diamond microscopes* were made by Andrew Pritchard in 1824; and the properties of "test objects" to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (i.e., for two eyes) was constructed by professor Riddell in 1851, and Wenham's binocular prism was made known in 1861. Nache's *stereoscopic microscope*, 1867; Abbe's *orthoscopic* and *pseudoscopic*, 1881. Treatises on the microscope by J. Quekett (1848), by Dr. W. B. Carpenter (1856 *et seq.*; 8th edition, reconstructed and enlarged by Dr. Dallinger, 1901), and Griffith and Henfrey's "Micrographic Dictionary" (1856, 1875, and 1883), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his *spectrum microscope*, by which the millionth of a grain of blood was detected.

The new Ashe-Finlayson *comparator*, an apparatus by means of which any two slides can be used simultaneously, the images of the slides being projected on to the eye-piece at the same moment, exhibited at the Royal Microscopical Society . . . 15 Feb. 1905

MICROTOME, an instrument for cutting minute sections of organic tissue for the microscope, invented, 1885, by prof. Wm. Rutherford (who died, 21 Feb. 1899); improved by Dr. Paul Meyer and others.

MIDDLESEX, the metropolitan county of England, was the seat of the Trinobantes in the Roman province, Flavia Caesariensis, and the Mid-del-Sexe, or Middle Saxons, in the kingdom of East-Sexne, or Essex. Lionel Cranfield was created earl of Middlesex, 16 Sept. 1622; succeeded by his sons, James, 1645-51; Lionel, 1651-74, when the title became extinct. Charles Sackville was

made earl in 1675; and his son became duke of Dorset in 1720. Area of the county formerly 181,301 acres; population, 1891, 560,012. By the Local Government Act, 1888, which came into force in 1902, 31,484 acres (including South Hornsey) were given over to London, and 771 to Hertfordshire. Middlesex now has an area of 178,754 acres; population, 1901, 810,213.

MIDDLESEX HOSPITAL, London, patrons, H. M. queen Mary and H. M. queen Alexandra; founded, 1745; incorporated, 1836. Foundation-stone of present building laid by the duke of Northumberland, 1755. The hospital (containing with its branches 406 beds) at one time formed an asylum for the French clergy and other refugees during the Huguenot persecution. It was the first hospital to make a speciality of cancer, a wing being built for the special treatment of cancer patients in 1897. The research laboratories, devoted entirely to the investigation of cancer, were opened in 1900. Since the foundation of the hospital the following additions have been made:—

Cancer charity, 1792; enlarged 1815, 1854, 1886, 1897.
Medical school, 1835; enlarged 1875, 1880, 1885, 1898.

Convalescent home (Clacton-on-Sea), 1896.
Research and bacteriological laboratories, 1900; enlarged 1903 and 1904.
Electric and light department, 1901.

MIDIAN, now **ARZ MADIAN**, N. W. Arabia; anciently held by the descendants of Midian, a son of Abraham. Having enticed the Israelites to idolatry, they were severely chastised, 1452 B.C. They invaded Canaan about 1249 B.C., and were thoroughly defeated by Gideon.

Capt. Richard F. Burton explored the ruined cities of Midian in 1877, and found the remains of ancient mines, many relics, and gold. An expedition, equipped by the khedive of Egypt, and placed under his command, started from Suez, 10 Dec. 1877, and returned 20 April, 1878. He brought home 25 tons of geological specimens, specimens of silver and copper ore, many coins and other antiquities, and photographs of the remains of ruined cities, &c.

MIDLAND INSTITUTE, BIRMINGHAM, incorporated 1854.

MIDLAND RAILWAY STATION, St. Pancras, N. London, possessing one of the largest roofs in the world (245 feet 6 inches wide, and 698 feet long), was opened for traffic 1 Oct. 1868. The engineer was Mr. H. W. Barlow. The architect of the Gothic hotel was sir G. Gilbert Scott.

MIDWIFERY. Women were the only practitioners among the Hebrews and Egyptians. Hippocrates, in Greece, 460 B.C., is styled the father of midwifery, as well as of physic. It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. Dr. Harvey engaged in the practice of it, about 1603; Astruc affirms that madame de la Vallière, mistress of Louis XIV., in 1663, employed Julian Clement,

a surgeon, with great secrecy. Midwives Act, royal assent, 31 July, 1902, enacts that any woman not certified under the act who, after 1 April, 1905, uses the name or title of midwife, shall be liable to a penalty not exceeding 5*l.*; and that after 1 April, 1910, no woman shall habitually and for gain attend women in childbirth otherwise than under the direction of a qualified medical practitioner, unless she be certified under this act; penalty 10*l.*

MILAN, Mediolanum, capital of the ancient Liguria, now Lombardy, is reputed to have been built by the Gauls, about 408 B.C. The cathedral, termed *duomo*, was built about 1385. Population, 1890, 414,551; 1900, 498,681; 1908, 584,000.

MILETUS, a Greek city of Ionia, Asia Minor, founded about 1043 B.C. The Milesians defended themselves successfully, 623-612 B.C. During the war with Persia it was taken, 494, but restored, 449. Here Paul delivered his celebrated charge to the elders of the church of Ephesus, A.D. 60 (*Acts* xx.).

MILFORD HAVEN (S.W. Pembroke). The finest natural harbour in the kingdom. Here the earl of Richmond, afterwards Henry VII., landed on his way to encounter Richard III., whom he defeated at Bosworth, 1485. The packets from this port to Ireland, sailing to Waterford, were established in 1787. The dock-yard, established here in 1790, was removed higher up the haven to Pembroke in 1814. Milford made a bid for the American trade, which proved abortive. Now does an extensive business in fish.

MILITARY LANDS ACT, passed 27 June, 1892; amended, 1897. See *Commons*.

MILITARY or MARTIAL LAW is built on no settled principle, but is entirely arbitrary, and, in truth, no law; but sometimes indulged, rather than allowed, as law. *Sir Matthew Hale*. It has been several times proclaimed in parts of these kingdoms, and in 1798 was almost general in Ireland, where it was also proclaimed in 1803. Military manœuvres act passed, 1897. Military works act passed, 1897; another, 1899. The king's regulations and orders promulgated, 1901.

MILITIA, the standing national force of these realms, is traced to king Alfred, who made all his subjects soldiers, 872-901. See *Army Defence*.

MILITIA OF JESUS, a society of Roman Catholic youth of France and Italy, formed to support the papal cause by moral agencies, became known in 1877.

MILK. The type of food as containing all things needful for the development of the animal body. A process for its condensation was invented by Mr. Gail Borden, near New York, in 1849, for which he was awarded a medal at the Great Exhibition in 1851, when he erected factories. He invented meat biscuit, 1850. The Anglo-Swiss condensed milk company was established in 1866; and since then many other companies.

MILKY WAY (Galaxy) in the heavens. Juno is said by the Greek poets to have spilt the milk in the heavens after suckling Mercury or Hercules. Democritus (about 428 B.C.) taught that the *via lactea* consisted of stars, which Galileo (1610-42) proved by the telescope. See *Stars*, 1892.

MILLBANK PENITENTIARY, Westminster. The very unhealthy site was purchased of the Grosvenor family. The building, a modification of Jeremy Bentham's Panopticon (*which see*), first received convicts 27 June, 1816.

In consequence of many deaths during a great epidemic the convicts were placed in Woolwich hulks, 1822-3. On 16 June, 1843, a committee reported the penitentiary a failure. The system was abolished in parliament, and the building styled Millbank prison; made a military prison, 1870.

The buildings ordered to be pulled down and site sold, 1888.

It was finally closed 6 Nov. 1890.

Management of the site transferred to metropolitan board of works, by act passed in 1892.

Building taken down and blocks of artisans' dwellings erected by the London County Council, 1893.

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act gave powers to raise a force not exceeding 80,000 men, of which number 50,000 were to be raised in 1852, and 30,000 in 1885; the quotas for each county or riding to be fixed by an order in council.

The National Gallery of British Art, the Tate Gallery, built and presented to the nation by Sir Henry Tate (died 1899), 1897; enlarged 1899.

MILLENARIANS (or Chiliasts) suppose that the world will end at the expiration of the seven thousandth year from the creation; and that during a thousand years (millennium) Christ and the saints will reign upon the earth; see *Rev. xx*. The doctrine was very generally inculcated in the 2nd and 3rd centuries, by Papias, Justin Martyr and others.

MILLENNARY PETITION, presented to King James on his accession, 1603, on behalf of nearly a thousand Puritan ministers against the "human rites and ceremonies" of the church of England.

MILLS. Moses forbade mill-stones to be taken in pawn, because it would be like taking a man's life to pledge. *Deut. xxiv. 6*. The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. Cotton mills moved by water were erected by sir Richard Arkwright, at Cromford, Derbyshire. He died in 1792. See *Mechanics*.

MILWAUKEE. A town in Wisconsin, North America, founded 1835. The New Hall hotel was burnt 4 A.M. 10 Jan. 1883, when about 100 persons perished. Great fire at the Union oil works; 600 buildings destroyed; estimated loss about 5,826,000 dollars, 28 Oct. 1892. Population, 1906, 317,903.

MINCIO, a river of Lombardy. Here the Austrians were repulsed by the French under Brune, 25-27 Dec. 1800; and by Eugène Beauharnais, 8 Feb. 1814, near Valeggio.

MIND-CURE. A sect termed Christian Scientists in Boston, U.S., led by Mrs. M. B. G. Eddy, professes to cure bodily diseases by acting on the mind through the body, &c., 1866, *et seq.* See *Trials*, Dec. 1898. The sect increasing in Germany; 1,000,000 cases said to be cured in the United States within 25 years, reported, 6 May, 1902.

MINDEN (Prussia), **BATTLE OF**, 1 Aug. 1759, between the English, Hessians, and Hanoverians (under prince Ferdinand of Brunswick), and the French (under marshal De Contades), who were beaten and driven to the ramparts of Minden. Lord George Sackville (afterwards lord George Germain), who commanded the British and Hanoverian horse, for some disobedience of orders was tried by a court-martial on his return to England, found guilty, and dismissed, 22 April, 1760. He was afterwards restored to favour, and became secretary of state, 1776.

MINERALOGY, the science of minerals, is a branch of geology; see *Geology, Mines, and Crystallography*. It was not much studied by the ancients. George Agricola in the 16th century made the first attempt to treat it scientifically. The study of mineralogy was advanced by Becker, Kircher, and Woodward in the 17th century. A British Mineralogical Society established in 1800. Haüy's "Traité de Minéralogie" appeared in 1801. Mineralogical society of Great Britain held first meeting in London, 3 Feb. 1876, and others since. Another society termed itself *h, k, l*, Miller's symbol for the face of a crystal . . . 1876

MINERVA, see *Parthenon* and *Athens*.

MINES. Strabo and Tacitus enumerate gold and silver as among the products of Britain. The

earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire. In Edward I.'s reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead mines of Cardiganshire, from which silver has ever since been extracted, were discovered by sir Hugh Middleton in the reign of James I.; see *Coal*, and the various metals. Average depth of mines (1891) 400 yards. Deep mines: Ashton Moss colliery, near Manchester, 2,850 ft.; part 3,000 ft.; copper mine, Calumet, near lake Superior, U.S., 3,900 ft. (1890); silver-lead mine, Przibram in Bohemia, 3,432 ft. *Chambers' Encyclopædia*, 1891.

MINGRELIA, the ancient Colchis, mentioned in the legend of "Jason, the Argonauts, and the Golden Fleece." A province of Asiatic Russia, prince Nicolas having ceded his rights to the Czar in 1867. In 1887 the prince was spoken of as a candidate for the Bulgarian throne.

MINIATURE PAINTING was practised in England by Holbein, Isaac, and Peter Oliver, and others in the 16th century; by other eminent artists since. The new Society of Miniature Painters, president, Mr. Alyn-Williams, opened its first exhibition at 175, New Bond-street, London, 23 Sept. 1896. "The Society of Miniaturists," president, lord Ronald Gower, 1st exhibition, at the Grafton Galleries, London, 14 Nov. 1896. Sir Wm. Ross, 1794-1860, may be said to be the last miniaturist.

MINIE RIFLE, invented at Vincennes, about 1833, by M. Minié (born 1810). From a common soldier he raised himself to the rank of chef d'escadron. His rifle, considered to surpass all made previous to it, was adopted by the French, and, with modifications, by the British, 1852.

MINIMIZERS. A name given to certain writers who advocate the limitation of the sovereign power of the state as much as possible to the protection of life and property, which is styled by professor Huxley "administrative nihilism." They included W. von Humboldt, J. S. Mill (died 1873) (in his "Essay on Liberty"), and Mr. Herbert Spencer (died 1903) (in his "Political Institutions"), 1882.

MINIMS (from *minimi*, the least), an order of monks, founded by S. Francisco di Paolo (1416-1507), in Calabria, received their name, as professing themselves inferior to the Minorites (from *minor*, less); see *Franciscans*. St. Francis died in France in 1507; where he had established houses of his order.

MINISTERS, see *Administrations*.

MINISTERS in Scotland: church patronage was abolished in 1874.

MINNESINGERS, lyric German poets, of the 12th and 13th centuries, who sang of love and war to entertain knights and barons of the time. The *Meistersingers*, their successors, an incorporated fraternity in the 14th century, composed satirical ballads for the amusement of the citizens and lower classes. Hans Sachs, a shoemaker (1494-1576), a poet of the reformation, was for a time their dean. His works were published at Nuremberg, 1560. "Owleglass" and "Reynard the Fox," are attributed to the Meistersingers.

MINNESOTA, a western state of N. America, was organised as a territory, 3 March, 1849, and admitted into the union in 1858. On 17 Aug. 1862, the Sioux Indians commenced a series of outrages at Acton in Messler county, desolating the country and massacring above 500 persons, of both sexes, and of all ages. General Sibley beat the Indians in two battles and rescued many captives. Thirty-eight Indians were executed as assassins. Capital, St. Paul. Area, 83,365 square miles; population, 1830, 780,773; 1900, 1,751,395; 1906, 2,025,615.

The great Tribune buildings at Minneapolis were burnt, about 20 persons perished, 30 Nov. 1839; another fire, 3 deaths; estimated loss, 2,000,000 dollars, 13 Aug. 1893

 Fire at the West End Hotel, Minneapolis; 9 lives lost, 10 Jan. 1905

MINORCA AND MAJORCA, the Balearic Isles (*which see*). Port Mahon in Minorca was captured by lieutenant-general Stanhope and sir John Leake in 1708, and was ceded to the British by the treaty of Utrecht in 1713. It was retaken by the Spanish and French in July, 1756, and admiral Byng fell a victim to public indignation for not relieving it; see *Byng*. It was restored to the British at the peace in 1763; taken 5 Feb. 1782; again captured by the British under general Stuart, without the loss of a man, 15 Nov. 1798; given up at the peace of Amiens, 25 March, 1802.

MINORITIES. In the new reform bill, passed 15 Aug. 1867, provision was made for the representation of minorities in constituencies with three members by limiting each elector to two votes. It was introduced as an amendment by lord Cairns in the lords, 30 July, and accepted by the commons, Aug. 1867. The principle was adopted in a new constitution by the state of Illinois, U.S., July, 1870. See *Proportional Representation*.

MINSTER, or **MONASTERIUM**, a place occupied by monks; see *Westminster* and *York*.

MINSTRELS, originally pipers appointed by lords of manors to divert their copyholders while at work, owed their origin to the glee men or harpers of the Saxons, and continued till about 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even

at the houses of the nobility; but in Elizabeth's reign they were adjudged rogues and vagabonds (1597).

MINT. Athelstan enacted regulations for the government of the mint about 928. There were several provincial mints under the control of that of London. Henry I. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edward III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James after his abdication. Sir Isaac Newton was warden, 1699-1727, during which time the debased coin was called in, and new issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present mint, which was completed in 1810; it was injured by fire, 31 Oct. 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817. Professor Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage Act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Sir C. W. Fremantle), K.C.B., 1 Jan. 1890; resigned, Sept. 1894; succeeded by Mr. Horace Seymour, made K.C.B. June, and died 25 June, 1902; rt. hon. W. E. Macartney appointed Jan. 1903. (Sir Wm. Roberts-Austen, chemist and assayer since 1870, died 22 Nov. 1902.) See *Coin*.

MINUET, a French dance, said to have been first danced by Louis XIV., 1653.

MINUS, see *Plus*.

MIRACLE PLAYS, see under *Drama*.

MIRIDITES, or **MIRDITES**, see *Turkey*, 1877.

MIRRORS. In ancient times mirrors were made of metal; those of the Jewish women of brass. Mirrors of silver were introduced by Praxiteles 4th century B.C. Mirrors or looking-glasses were made at Venice, A.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Petitjean in 1851; by M. Cimeg in 1861, and by Liebig and others.

MISCHNA, see *Talmud*.

MISERERE (*Psalm li.*) sung at Rome in the "*Tenebræ*," the service in Holy or Passion Week,

in a peculiarly effective manner, to old music. One arrangement is by Costanzo Festa, dated 1517.

MISSAL, or **MASS BOOK**, the Romanist ritual compiled by pope Gelasius I. 492-6; revised by Gregory I. 590-604. Various missals were in use till the Roman missal was adopted by the council of Trent, 1545-63. The missal was superseded in England by the book of common prayer, 1549.

MISSING WORD COMPETITION. See *Lotteries*, 1893, and *Trials*, 1899.

MISSIONARY BISHOPS, see under *Bishops*.

MISSIONS,* see *Mark xvi.* 15. Among the Romanists, the religious orders of St. Dominic, St. Francis, St. Augustin, &c., have missions to the Levant and to America. Marco Polo is said to have introduced missionaries into China, 1275. The Jesuits have missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederic IV. in 1706. The Society for the Propagation of the Gospel in foreign parts was established 1701, and the Moravian Brethren encouraged missions about 1732. The London Missionary Society held their first meeting, 4 Nov. 1794 (1st mission sent to the South Sea Islands in the *Duff*, 1796); centenary celebrated, 15 Jan. 1895. Most Christian sects now support missions. *British Contributions to Foreign Missions*: 1871, 855,742*l.*; 1909, 2,096,751*l.* Over 3,000,000*l.* spent in the world on missions in 1905; 5,071,225*l.* in 1909.

Commander Allan Gardner, R.N., who left England in the *Ocean Queen* in Sept. 1850, on the Patagonian mission, with Mr. Williams, surgeon, Mr. Maidment, catechist, and four others, died on Picton Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death; all his companions previously perished, 6 Sept. 1857.

M. Schoffer, a missionary to Cochín-China, was publicly executed at Son-Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, 4 May, 1851. Great congress of protestant missions in London; a large number of societies represented; the earl of Aberdeen president, 9-19 June, 1888.

MISSISSIPPI, a great river, N. America, explored by De Soto about 1541. Captain Glazier discovered its source, 1884. Its length 2,960 miles. The Mississippi trade was begun in England, in Nov. 1716. Law's Mississippi scheme in France, commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l.* The ruin of thousands soon followed. Population, 1910 (est.), 1,800,000. See *Law's Bubble*.

Population, 1880, 1,131,597; 1890, 1,289,600; 1900, 1,551,270; 1910 (est.) 1,800,750. The great Eads bridge at St. Louis opened, 4 July, 1874. About 85,000 persons made homeless through floods in the lower Mississippi valley early in March, 1882. By the explosion of the boiler of the *Corona* at Port Hudson on the Mississippi, 43 persons perished . . . 3 Oct. 1889. The North American state, MISSISSIPPI, was settled in 1716; admitted as a state of the union, 1817; seceded from it by ordinance, 8 Jan. 1861; submitted, 1865. Capital, Jackson.

* **MISSIONS**, "a series of sermons, generally by a 'missioner,' or special preacher, often followed by confessions and communions" (a species of revivalism), were authorised in the metropolis by the bishops of London, Winchester, and Rochester, held 1869 and since.

The Mississippi valley suffers much by frequent inundations; one was very disastrous in March, April, 1890, when thousands of square miles were submerged, many towns isolated, and communications cut off. Louisiana suffered much in April following. 150,000 dollars voted by congress to relieve the sufferers. . . . 25 April, 1890

 Destructive floods in central and southern Mississippi; towns isolated and many lives lost, reported, 21 April, 1900; great rising of the river and loss of life . . . June, 1903
 Governor E. F. Noel, 1908-12. Mississippi divided into 76 counties. State capital Jackson (pop. 1910 (est.) 9,125), 3,760 miles of railway and 92 miles of electric working . . . 1907

MISSOLOGHI, a town in Greece, taken from the Turks, 1 Nov. 1821, and heroically and successfully defended against the Turks by Marco Botzaris, Oct. 1822—27 Jan. 1823. It was taken 22 April, 1826, after a long siege. Here Lord Byron died, 19 April, 1824. A statue of Byron was unveiled here, 6 Nov. 1881. It was surrendered to the Greeks in 1829.

MISSOURI, a south-western state in N. America, was settled in 1763, and admitted into the union, 10 Aug. 1821. It decided on neutrality in the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. Capital, Jefferson city; population, 1880, 2,168,380; 1890, 2,679,184; 1900, 3,106,665; 1910 (est.) 3,624,450; see *United States*, 1861 *et seq.*—Great railway strike March, 1886. The university library, Columbia, burnt, 9 Jan. 1892. Railway collision, 33 killed, 30 injured, 10 Oct. 1904—For the **MISSOURI COMPROMISE**, see *Slavery in America*. The Missouri river is 3,047 miles long. See *Storms*, 28 April, 1899.

MITCHELSTOWN, Cork, see *Ireland*, 9 Sept. 1887.

MITHRIDATE, a medical preparation in the form of an electuary, supposed to be an antidote to poison and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

MITHRIDATIC WAR, caused by the massacre of 80,000 Romans, by Mithridates VI., king of Pontus, 88 B.C., and remarkable for its duration, its many sanguinary battles, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He is said to have killed him by causing melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and committed suicide, 63 B.C.

MITRAILLEUSE, or **MITRAILLEUR**, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Prusso-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the

mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness, 11 Aug. 1870.—It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage." An English mitrailleuse, a modification of the American gatling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; fifty of them were ordered to be made by Armstrong.

MITRE. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Exodus xxxix. 28*. The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the 10th century. *Fosbroke*. Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were directed to wear hats.

MITYLENE, or **LESBOS**, Ægean Sea. Near here the Greeks defeated and nearly destroyed the Turkish fleet, 7 Oct. 1824.

MNEMONICS, artificial memory, was introduced by Simonides the younger, 477 B.C. *Arund. Marbles*. "Mnemonica" was published by John Willis in 1618; and the "Memoria Technica" of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany in 1806-7.

MOABITES, descendants of Lot, a people living to the south-east of Judæa. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat, 895 B.C., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, relating to Mesha, king of Moab, referred to in 2 *Kings*, iii., was announced in Jan. 1870, and impressions were exhibited soon after.

MÖCKERN (Prussia). Here the French army under Eugène Beauharnais were defeated by the Prussians under Yorck, 5 April, 1813; and here Blücher defeated the French, 16 Oct. 1813.

MODELS. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.

A model was made of a bridge over the Neva, of uncommon strength as well as elegance; and of the mountains of Switzerland, by general Pfiffer (1766-85).

M. Choffin's model of Paris also was remarkable for its precision.

Fine models of Gibraltar, Quebec, and other fortified places, are deposited in the Rotunda at Woolwich. See *Warwork and Lodging-houses*.

MODENA (formerly Mutina), capital of the late duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were

incorporated with the Cisalpine republic, 1797, and with the kingdom of Italy, 1805. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population of the city, 1901, 64,941; 1910 (est.), 75,760; of the province, 1901, 322,617; 1910 (est.), 375,250.

GRAND DUKES.

1814. Francis IV. An invasion of his states by Murat was defeated, 11 April, 1815. He was expelled by his subjects in 1831, but was restored by the Austrians.
1846. Francis V. (born 11 June, 1819) succeeded 27 Jan. His subjects rose against him soon after the Italian war broke out, in April, 1859. He fled to Verona, establishing a regency, 11 June; which was abolished, 13 June; Farina was appointed dictator, 27 July; a constituent assembly was immediately elected, which offered the duchy to the king of Sardinia, 15 Sept., who incorporated it with his dominions, 18 March, 1860. Francis died, 20 Nov. 1875.

MODERADOS. A political party in Spain, long headed by Ramon Maria Narvaez, duke of Valencia (who died 23 April, 1868), who opposed the Progresistas headed by Espartero and Prim. The party was reinforced by the favourers of Don Carlos, after his total defeat in 1876.

MODERATES, opponents of the Progressives (*which see*).

MODOC INDIANS (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader captain Jack defeated the troops sent to expel them, 17 Jan. 1873. During negotiations for a peaceful settlement, they decoyed the United States commissioners into an ambush (11 April), and massacred general Canby and about 40 others. Fighting took place, 15, 16 April, and the Indians retreated to almost impregnable positions. The troops were fired on, and suffered much loss, 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June; tried, July, and executed 3 Oct. 1873.

MOESIA (now Bosnia, Servia, and Bulgaria), was finally subdued by Augustus, 29 B.C. It was successfully invaded by the Goths, A.D. 250, who eventually settled here; *see Goths*.

MOGULS, *see Tartary*.

MOHACZ (Lower Hungary). Here Louis king of Hungary, defeated by the Turks under Solymán II. with the loss of 22,000 men, was suffocated by the fall of his horse in a muddy brook, 29 Aug. 1526. Here also prince Charles of Lorraine defeated the Turks, 12 Aug. 1687.

MOHAMMEDAN, *see Mahometanism*.

MOHAMMERAH, a Persian town near the Euphrates, captured, after two hours' cannonading, by sir James Outram, during the Persian war, 26 March, 1857. News of the peace arrived 4 April.

MOHILEV, or **MOHILEF** (Russia). Here the Russian army, under prince Bagration, was signally defeated by the French under marshal Davoust, prince of Eckmühl, 23 July, 1812.

MOHOCKS, ruffians, who went about London at night, wounding and disfiguring the men, and indecently exposing the women. One hundred pounds were offered by royal proclamation in 1712, for apprehending any one of them. *Northouck*.

The "scourers" of the seventeenth century resemble the Mohocks.

MOHURRUM, a Mahometan festival in honour of the prophet's nephews: at its celebration in Bombay, Feb. 1874, the Mahometans fiercely attacked the Parsees, and were quelled by the military.

MOKANNA (Hakim ben Allah), "The Veiled," prophet, founder of a sect in Khorassan in the eighth century. He pretended to be an incarnation of God, and therefore veiled his face, but really to conceal the loss of an eye. He rebelled against the calif Almahdi, was for a time successful, but was subdued in 780, when he and the remains of his followers took poison. He is the subject of a poem by Thos. Moore in "Lalla Rookh," 1817.

MOLDAVIA, *see Danubian Principalities*.

MOLINISTS, a Roman Catholic sect, followers of Louis Molina, a Jesuit, born 1535. He maintained the reconcilability of the doctrines of predestination and free will, 1588.

MOLLY MAGUIRE, the name of a secret society in Ireland in 1843, and of another society (originally Buckshot, about 1853) in mining districts, United States (*which see*), 1877. It ceased about March, 1879.

MOLOKANI, a sect in West Russia, said to date from the 16th century, who maintain primitive Christian doctrines and practices; well described by Mr. D. Mackenzie Wallace in his "Russia," published 1877. Dassajeff, a peasant woman, one of the sect, received by the empress dowager for her kind assistance rendered to her son, the Csesarevitch, at his death at Abbas Tuman, 10 July, reported, 31 July, 1899.

General exodus of the Molokani reported to be taking place in the Caucasus, due to the petty vexations inflicted on them by the local authorities, July, 1905.

MOLUCCAS, an archipelago in the Indian Ocean (the chief island, Amboyna), discovered by the Portuguese, about 1511, and held by them secretly until the arrival of the Spaniards, who claimed them, till 1529, when Charles V. yielded them to John III. for a large sum of money. The Dutch conquered them in 1607, and have held them ever since,—except from 1796-1802 and 1810-1814, when they were subject to the English. Earthquake at Amboina, the capital almost destroyed and 50 persons killed, 5 Jan. 1898.

MOLWITZ (in Prussian Silesia). Here the Prussians, commanded by Frederick II., obtained a great victory over the Imperialists, 10 April (O. S. 30 March), 1741.

MOLYBDENUM, a whitish, brittle, almost infusible metal. Scheele, in 1778, discovered molybdic acid in a mineral hitherto confounded with graphite. Hjelm, 1822, prepared the metal from molybdic acid; and in 1825 Berzelius described most of its chemical characters. *Gmelin*.

MOMBASA, chief town of the British East Africa territories. Possesses the finest harbour on the coast. Terminus of Uganda railway. Population, 1910, (est.) 30,000. Kisawir, or Frere Town, is a thriving station of the Church Missionary society. *See Africa (British East)*.

MONACHISM (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarites mentioned in *Numbers*, ch. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, &c. About the time of Constantine (306-22) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchorites*;* of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylitæ (or pillar saints), died 451. He is said to have lived on a pillar thirty years. St. Benedict, the great reformer of western monachism, published his rules and established his monastery at Monte Casino, about 529. The Carthusians, Cistercians, &c., are varieties of Benedictines. In 964, by decree of king Edgar, all married priests were ineffectually ordered to be replaced by monks. Religious orders expelled from France, by decree, 29 March, 1880. Relieved of their vows by the Pope, 1881. See *Abbeys*, and *Benedictines*.

MONACO, a principality, N. Italy, held by the Genoise family Grimaldi since 968. By treaty on 2 Feb. 1861, the prince ceded the communes of Roquebrune and Mentone, the chief part of his dominions, to France, for 4,000,000 francs. The prince, Charles III., born 8 Dec. 1818, succeeded his father Florestan, 20 June 1856; died 10 Sept. 1889; was succeeded by Albert, born 13 Nov. 1848. He married, 1st, lady Mary Douglas-Hamilton, daughter of 11th duke of Hamilton; and 2nd, Oct. 1889, the duchesse de Richelieu. Heir, Prince Louis, born 12 July, 1870. A commercial convention between the prince and France, signed 9 Nov. 1865, was much discussed as tending towards the abolition of the French navigation laws. Petitions against Monte Carlo, the great gaming establishment, 1880-4; a 50 years' concession granted, reported, March, 1896. International sporting club opened, autumn 1903. Population, 1901, 15,180; 1910 (est.), 18,750.

MONARCHY. Historians reckon various grand monarchies—the Chaldean, Assyrian, Babylonian, Median, Persian, Grecian, Parthian, and Roman (*which see*).

MONASTERIES, see *Abbeys*.

MONCONTOUR (near Poitiers, France). Here the admiral Coligny and the French Protestants were defeated with great loss by the duke of Anjou (afterwards Henry III.), 3 Oct. 1569.

MONCRIEFF SYSTEM, see *Cannon*.

MOND BEQUESTS. Dr. Ludwig Mond bequeathed, subject to the life interest of his wife, the sum of 50,000*l.* to the Royal Society of London, to be employed in the endowment of research in natural science, and 50,000*l.* to the university of Heidelberg to be employed for similar objects. To the National Gallery, London, Dr. Mond left, on certain conditions as to housing and exhibition, 56 pictures of Italian works of art. Reported 3 Jan. 1910.

MONDOVI (Piedmont). Here the Sardinian army, commanded by Colli, was defeated by Napoleon Bonaparte, 22 April, 1796.

* The anchorites of the 12th, 13th, and 14th centuries must not be confounded with the anachorets and anchorites, or hermits. The former were confined to solitary cells; the latter permitted to go where they pleased.

MONETARY CONFERENCES, International, opened at Paris, 16 Aug. 1878; and 19 April, 1881; Cologne, 11-13 Oct. 1882; Paris, 21 July, adjourned, 5 Aug. 1885; the union continued till 1 Jan. 1887: conventions signed, 6 Nov., and 8 Dec. 1885. A congress was held at Paris 11 Sept. *et seq.*, 1889. See *Latin Union*. International monetary conference at Brussels, respecting bimetallicism (*which see*), proposed by the United States, N.A.; 18 nations represented; opened 22 Nov. 1892; conference adjourned to 13 May, 1893, 17 Dec. 1892. Report published, Aug. 1898.

MONEY is mentioned as a medium of commerce in *Genesis* xxiii., 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B.C. Money was made of different metals, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574. The czar Nicholas struck coins in platinum. Parliamentary committee on money lending, meetings, T. W. Russell, chairman, July, 1897; Mr. John Kirkwood refused to answer certain questions, admonished at the bar of the commons, 16 July. Money-lending act (regulating the business of money-lenders) passed 8 Aug. 1900. See *Coin*; *Gold*; *Copper*; *Mint*; *Banks*, *Latin Union*, &c. For *Money Orders*, see *Post Office*.

MONEYERS travelled with our early kings, and coined money as required; see *Mint*.

MONGOLS, see *Tartary*.

MONITEUR UNIVERSEL, a newspaper, established in Paris by C. J. Panckoucke, 5 May, 1789; daily paper, 24 Nov. 1789; the organ of the government, 28 Dec. 1799. It was superseded by the *Journal Officiel*, 1 Jan. 1869; resumed its official position about 23 Sept. 1870; and was again superseded by the *Journal Officiel*, Feb. 1871. It became the organ of MacMahon's government in 1875.

MONITORIAL SYSTEM (in education), in which pupils are employed as teachers, was used by Dr. Bell in the Orphan Asylum at Madras in 1795, and was also adopted by Joseph Lancaster, in London; see *Education*.

MONITOR SHIPS, see *United States*. The American monitor, *Miantonomah*, arrived at Plymouth in June, 1866, and excited much attention.

MONK, see *Monachism*.

MONMOUTH, Monmouthshire, was a Roman station, afterwards a Saxon fortress. The ancient castle rebuilt by John, lord of Monmouth, 1257, became the property of John of Gaunt, and in it his grandson, Henry V., was born, 9 Aug., 1388. Monmouth was first incorporated in 1550. Visit of the duke and duchess of York, 29 Oct. 1900. Population, 1901, 5,095.

MONMOUTH'S REBELLION. James, duke of Monmouth (born at Rotterdam, 9 April, 1649), a natural son of Charles II. by Lucy Waters, was banished England for his connection with the Rye-house plot, in 1683. He invaded England at Lyme, 11 June, 1685; was proclaimed king at

Taunton, 20 June; was defeated at Sedgmoor, near Bridgewater, 6 July; and beheaded on Tower-hill, 15 July.

MONOCHORD, a box of thin wood, with a bridge, over which is stretched a wire or chord, said to have been invented by Pythagoras, about 600 B.C.

MONOLITH, Greek for single stone; see *Obelisk*.

MONOPHYSITES, see *Eutychians*.

MONOPOLIES were formerly so numerous in England that parliament petitioned against them, and many were abolished, about 1601-2. They were further suppressed by 21 Jas. I., 1624. Sir Giles Mompesson and sir Francis Mitchell were punished for their abuse of monopolies, 1621. In 1630, Charles I. established monopolies of soap, salt, leather, and other common things, to supply a revenue without the help of parliament. It was decreed that none should be in future created by royal patent, 16 Chas. I. 1640.

MONO-RAIL SYSTEM, see under *Railways*.

MONOTHELITES, heretics who affirmed that Jesus Christ had but one will, were favoured by the emperor Heraclius, 630; they merged into the Eutychians (*which* see).

MONROE DOCTRINE, a term applied to the determination expressed by James Monroe, president of the United States, in his message to the congress, 2 Dec. 1823, not to permit any European power to interfere with the concerns of any independent states of North or South America. This doctrine was referred to in 1859, 1865, 1895-96. A resolution strongly affirming the doctrine proposed by senator Davis to the senate, 20 Jan. 1896. The action of Great Britain and Germany in their dispute with Venezuela 1902-3 (see *Venezuela*) aroused considerable excitement in the United States as being contrary to the Monroe doctrine. See Capt. Mahan's article on the Monroe doctrine, *National Review*, Feb. 1903, and *Times*, 30 Jan. 1903.

President Roosevelt, speaking on the Monroe doctrine at Chautauqua (N.Y.), says: "The Monroe doctrine was meeting with an increasing recognition abroad because it had not been allowed to become fossilised, but had been adapted to meet the growing and changeful needs of America, which had shown that it was no less ready to recognise the obligations to foreign peoples than to insist upon its own rights" 11 Aug. 1905

MONTANA, a territory of the United States, north America, formed out of Idaho; became a territory in 1864, and a state in 1889. Capital, Helena. Population 1900, 243,329; 1910 (est.), 325,750.

MONTANISTS, followers of Montanus, of Ardaba, in Mysia, about 171, who was reputed to have the gift of prophecy, and proclaimed himself the Comforter promised by Christ. He condemned second marriages as fornication, permitted the dissolution of marriage, forbade avoiding martyrdom, and ordered a severe fast of three lents. The eloquent father, Tertullian, joined the sect, 204.

MONT BLANC, in the French Alps, is the highest mountain in Europe, being 15,781 feet

above the level of the sea. The summit was first reached by Jacques Balmat in June, 1786, and afterwards by H. B. Saussure, aided by Balmat on 2 Aug. 1787. The summit was attained by Dr. Hamel (when three of his guides perished) in 1820 and by many other persons before and since. Accounts of the ascents of Mr. John Auldjo, Charles Fellows (1827), and of professor Tyndall (1857-8) have been published; see *Alps*.

Herr Rothe and a guide killed by an avalanche 20 Aug. 1891. Accidents frequent.

Erection of an observatory on the summit proposed; work proceeding, July; stopped about 28 Aug.; 3 deaths. Favourable report by M. Janssen to the Academy of Sciences, 2 Nov. 1891. Preparations for a renewal of the work, with precautions June, 1892

By the torrents consequent on the fall of a glacier, the "Etablissement des Bains" at St. Gervais and two villages were destroyed, and about 130 persons perished 11, 12 July, "

An association was formed, and by its means, a wooden observatory was constructed at Meudon and sent to Chamounix to be conveyed to the summit of the mountain Sept. "

MONUMENT OF LONDON, built by sir
Christopher Wren, 1671-7. The pedestal is forty
feet high, and the edifice altogether 202 feet, that
being the distance of its base from the spot where
the fire which it commemorates commenced. It is
the loftiest isolated column in the world. Its
erection cost about 14,500*l*. The staircase is of
black marble, consisting of 345 steps. Fall of
part of the stone coping, no one injured, 25 Sept.
1888; examined and repaired; re-opened 14 Jan.
1889. Of the four original inscriptions, three
were Latin, and the following in English,—cut
in 1681, obliterated by James II.; re-cut in the
reign of William III.; and finally erased by order
of the common council, 26 Jan. 1831. They pro-
duced Pope's indignant lines:—

"Where London's column, pointing at the skies,
Like a tall bully, lifts the head, and lies."

William Green, a weaver, fell from this monument,
25 June, 1750. A man named Thomas Craddock, a baker,
precipitated himself from its summit, 7 July, 1780. Mr.
Lyon Levy, a Jewish diamond merchant, of considerable
respectability, threw himself from it, 18 Jan. 1870; as
did subsequently three other persons: in consequence
of which a fence was placed round the railing of the
gallery in 1839.

51,604 sightseers ascended the monument during
the year ending Sept. 1908

MOORS, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighbourhood. They frequently rebelled against the Roman emperors, and assisted Genseric and the Vandals in their invasion of Africa, 429. They resisted for a time the progress of the Saracens or Arab Mahometans, but were overcome in 707, and in 1019 were by them introduced into Spain, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Grenada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed by Charles V., but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

MOPLAHS, industrious fanatical Mahometans in Malabar, E. Indies, gave trouble by their attacks on Hindoos and the British, especially in 1845; an outbreak was suppressed about 15 Sept. 1873.

MORAL EDUCATION LEAGUE, formally instituted at a meeting in St. Martin's town hall, London, 7 Dec. 1897, under the presidency of the late Mr. J. Allanson Picton, a member of the first school board for London. Members' first general meeting held 26 Jan. 1898, when a constitution was adopted. The object of the league is "to urge the introduction of systematic moral and civic instruction into all schools, and to make the formation of character the chief aim in education." Some 60 local education authorities have provision now in their schools for more or less systematic moral instruction, and all these, with one or two exceptions, have taken action as a result of the propaganda of the league. Many authorities, including those of five counties, have adopted the graduated syllabus of moral and civic instruction for elementary schools drawn up by the league. The league has also issued a number of graduated text-books of moral lessons which have a wide circulation in elementary schools. It has also awakened a wide interest in the cause of moral education in schools in various parts of the world. President of the league, professor J. S. Mackenzie.

MORAL PHILOSOPHY, the science of ethics, defined as the knowledge of our duty, and the art of being virtuous and happy. Socrates (about 430 B.C.) is regarded as the father of ancient, and Grotius (about 1623) the father of modern moral philosophy; see *Ethics* and *Philosophy*.

MORAT (Switzerland), where Charles the Bold of Burgundy was completely defeated by the Swiss, 22 June, 1476. A monument, constructed of the bones of the vanquished, was destroyed by the French in 1798, and a stone column erected. 400th anniversary kept, 1876.

MORAVIA, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulrich of Bohemia in 1030. After various changes, Moravia and Bohemia were amalgamated into the Austrian dominions in 1526. Moravia was invaded by the Prussians in

1866, and they established their head-quarters at Brünn, the capital, 13 July. The demand of the Moravians for home rule was resisted Oct. 1871. Strike of 30,000 coal miners at Ostrau, and rioting suppressed by military, 16, 17 April, 1890. Population in 1900, 2,435,081; 1910 (est.), 2,831,000.

MORAVIANS, or **UNITED BRETHREN**, said to have been part of the Hussites, who withdrew into Moravia in the 15th century; but the brethren assert that their sect was derived from the Greek church in the 9th century. In 1722 they formed a settlement (called *Herrnhut*, the watch of the Lord) on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1738; he died at Chelsea in June, 1760. In 1851 they had thirty-two chapels in England. They are zealous missionaries, and founded settlements in foreign parts, about 1732. London Association founded, 1817. Mr. Thos. Morton, a British merchant, who died 11 Sept. 1897, bequeathed a large sum, conditionally, to the Moravians.

Membership throughout the world, 143,228; 46 places of worship in Great Britain, 6,457 members, reported 26 Jan. 1909

MORGANATIC * MARRIAGES, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. Such marriages are frequently contracted in Germany by royalty and the higher nobility. It has been asserted that George I. was thus married to the duchess of Kendal; George IV., when prince of Wales, to Mrs. Fitzherbert, "the lass of Richmond-hill"; the duke of Sussex to lady Cecilia Underwood; Frederic VI. of Denmark to the countess of Danner, 7 Aug. 1850; prince Alexander of Hesse to the countess Julie von Hauke, 1851, from which sprang the Battenberg family, and several Austrian princes; more recently the grand duke Paul of Russia with Mme. Pistolkors, reported, 2 Dec. 1902. The Royal Marriage Act, 12 Geo. III., chap. ii., "reduces to a position somewhat like that of morganatic unions every marriage in the royal family of Great Britain not previously approved by the sovereign under the great seal, provided the prince entering upon it is under 25 years of age, and every such marriage of a prince above 25 years of age which is disapproved by parliament." The family of the late duke of Cambridge (died 17 Mar. 1904), who married Miss Farebrother, an actress (died 1900), bear the name of FitzGeorge.

MORGARTEN (Switzerland). 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated, 15 Nov. 1315, upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug.

* Said to be derived from *Morgengabe*, the gift of a husband of a limited part of his property to such a bride on the morning after the marriage.

MORICE DANCE, an ancient dance peculiar to some of the country parts of England, and, it is said, also to Scotland: it was performed before James I. in Herefordshire.

MORIER INCIDENT, see *Prussia*, 1889.

MORMONS (calling themselves the Church of Jesus Christ of the LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, born at Sharon, Vermont, 23 Dec. 1805, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he announced that he found the book of Mormon, written on gold plates in hieroglyphics. This book was said, by the opponents of the Mormons, to have been written, about 1812, by a clergyman named Solomon Spaulding, as a religious romance in imitation of the scripture style; this is denied by the Mormons, and the discovery of the MS. of that romance by president Fairchild, of Oberlin college, in 1884, supports the Mormons' contention. The distinguishing characteristics of the sect are its belief in a continuous divine revelation through the inspired medium of the prophet at the head of their church, and a complete hierarchal organization, which comprises two priesthoods, the "Melchizedek," or high priesthood, and the "Aaronic or Levitical," the lesser priesthood which ministers in temporal matters. Polygamy was formerly the chief feature of the sect, but since July, 1894, it has been forbidden. The "First Presidency," composed of the president of the whole church and two counsellors, is the supreme authority. The Mormons command the payment of tithes, and encourage labour. Missionaries are propagating these doctrines in Europe, Australasia, Africa, China, Japan, South America, and other countries.

The Mormonites organise a church at Kirkland, Ohio, 1831. They found Zion, in Jackson county, Missouri 1831-2. The 12 apostles of the church chosen 14 Feb. 1835. From 1833 to 1839 the sect endured much persecution, and, driven from place to place, was compelled to travel westwards; till the city Nauvoo, on the Mississippi, was laid out and a temple was built 1840-1.

MORPHIA, an alkaloid, discovered in opium by Sertürner, in 1803. Importation into China, except for medicinal purposes, prohibited by law enforced, 1 Jan. 1909.

MORPHOLOGY (Greek, *morphe*, form), the science of form and structure, as distinguished from physiology, studied in the 19th century, by Goethe, Gegenbaur, Haeckel, Huxley, and others.

MORTALITY TABLES have been frequently compiled. The first by Halley, astronomer-royal, 1693; the Northampton tables (for 1735-80), by Dr. Price; the Carlisle tables (for 1780-87), by Dr. Hailsham; the Equitable table by Davies, 1825; the Institute of Actuaries' table, 1869; Dr. Sprague's tables, 1882; by many advertising insurance companies since; see *Insurance, Annuities, and Bills of Mortality*.

MORTARS, a short gun with a large bore, and close chamber, for throwing bombs; said to have been used at Naples in 1435, and first made in England in 1543. The mortar left by Soult at Cadiz in Spain was fixed in St. James's-park in Aug. 1816. On 19 Oct. 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich; with a charge of 70 lbs. it threw a shell weighing 2550 lbs. $1\frac{1}{2}$ mile horizontally, and about $\frac{3}{4}$ mile in height.

MORTIMER'S CROSS (Herefordshire)

The earl of Pembroke and the Lancastrians were here severely defeated by the young duke of York, afterwards Edward IV., 2 Feb. 1461. He assumed the throne as Edward IV. in March following.

MORTMAIN ACTS (*mort main*, dead hand).

When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I., 1279, when the statute of mortmain was passed, from a fear that the estates of the church might grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay-fraternities, or corporations, in the 15th of Richard II., 1391. Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand. Several statutes have been passed on this subject; legacies by mortmain were especially restricted by the 9th Geo. II., c. 36 (1736). Law consolidated and amended 1888, 1891, 1892.

MOSAIC WORK (the Roman *opus tessellatum*), is of Asiatic origin, and is probably referred to in *Esther*, ch. i. 6, about 519 B.C. It had attained to great excellence in Greece, in the time of Alexander and his successors, when Sosos of Pergamus, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in Mosaic work, as evidenced by the innumerable specimens preserved. Byzantine Mosaics date from the 4th century after Christ. The art was revived in Italy by Tafi, Gaddi, Cimabue, and Giotto, who designed Mosaics, and introduced a higher style in the 13th century. In the 16th century Titian and Veronese also designed subjects for this art. The practice of copying paintings in Mosaics came into vogue in the 17th century; and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept. In 1861, Dr. Salviati of Venice had established his manufacture of "Enamel-mosaics," and in July, 1864, he fixed a large enamel Mosaic picture in one of the spandrels under the dome of St. Paul's cathedral, London. He also executed commissions for queen Victoria and other persons.

MOSANDRIUM. See *Philippium*.

MOSCOW, the ancient capital of Russia, was founded, it is said, by Dolgorouki, about 1147. The occupation of the south of Russia by the Mongols, in 1235, led to Moscow becoming the capital, and beginning with Jaroslav II., 1238, its princes became the reigning dynasty. In 1235, the metropolitan of Central Russia moved his seat to Moscow, which is regarded as a holy city by the Russians.

The city continued to grow in area and political influence, and Ivan III. (1462-1505) assumed the title of Czar of all Russia. Peter the Great, in 1703, founded St. Petersburg, which became the capital of the empire, but Moscow is still regarded by the peasantry as the real capital. The city has suffered greatly from fire, it having been burned nearly to the ground, 1547; it was taken and burned by the khan of the Crimea, 1571; other disastrous fires, 1739, 1748, 1753, and 1812 (see *infra*). Since the last date Moscow has been largely rebuilt. The centre of the city is the Kremlin or Kreml "citadel," which stands on a height, 100 ft. above the river Moskwa, on which Moscow is situated, and is surrounded by a stone wall. Among the notable buildings within the Kremlin are the old palaces of the czars, the imperial palace, built 1849, the new palace, Orushenaya, containing the most valuable Russian antiquities; the cathedral of the Assumption, founded 1326, rebuilt 1475-79; the cathedral of St. Michael, built 1333, restored 1505, in which are interred the czars to the Ivan Alexievitch, brother of Peter the Great; the cathedral of the Annunciation, founded 1489, rebuilt 1554, formerly the private chapel of the czars; the Voznesenski monastery, dating from 1393, where all the czarinæ are buried; the Ivan Veliki tower, 209 ft. high, with a gilded dome, and having at its foot the Kolokoi "king of bells," weighing over 192 tons, the largest bell in the world; the Hall of the Synod; the arsenal, and other buildings. Outside the Kremlin are the cathedral of St. Basil, 1554; the imperial university, founded by the empress Catherine, 1755, with a library of some 200,000 volumes, and a museum; the public museum, 1861; the foundling hospital, erected 1764; the Goltzyn museum, 1865; the observatory, and many monasteries, educational and scientific institutions for which Moscow is noted. The city ranks next to St. Petersburg as an industrial centre, and is the first commercial mart in Russia. Population, 1900, 1,023,817; 1910, about 1,200,000.

MÖSKIRCH (Baden). Here the Austrians were defeated by Moreau and the French, 5 May, 1800.

MOSQUE, a Mahometan house of prayer. Fine examples exist in Spain, India, and other countries. The dome and porticoes are leading features. After the capture of Constantinople in 1453 by Mahomet II., the church of St. Sophia was transformed into a mosque, see *Sophia, St.* A mosque was erected in England in 1889; see under *Mahometanism*.

MOSQUITO COAST (Central America). Part included in republic of Nicaragua. The Indians inhabiting this coast were long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy, or fortify, or colonise, or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras with some reservation.* The matter was finally settled in 1859.

MOSQUITOS, see *Malaria*.

MOSS-TROOPERS, desperate plunderers, and lawless soldiers, secreting themselves in the mosses on the borders of Scotland. Many severe laws were enacted against them, but they were not extirpated till the 18th century.

MOTETTS, short pieces of church music, some of which are dated about the end of the 13th century. Good motetts were written between 1430 and 1480; and very fine ones in the 16th and 17th centuries. The "Motett Society," for the publication of these works, was founded in 1847, by Wm. Dyce.

MOTION. On 13 Nov. 1873, professor Sylvester described to the London Mathematical Society a machine for converting spherical into rectilinear, and other motions, and for producing perfectly parallel motion, the discovery of M. Peaucellier, a French engineer officer, about 1867. See *Kinematics*.

* St. Juan del Norte (Greytown) was held by the British on behalf of the Mosquitoes till the American adventurers, under col. Kinney, took possession of it in Sept. 1855. He joined Walker; and on 10 Feb. 1856, their associate, Rivas, the president, claimed and annexed the Mosquito territory to Nicaragua.

MOTOR-BOATS. The construction of motor-boats, initiated by the builders of motor-cars, has recently been brought to a high state of perfection. Specially constructed hulls are built and furnished with powerful engines. International races are now held annually.

Successful experiment carried out with the *Pioneer*, one of the largest of the Scotch type of fishing boats, 75 ft. long, 22 ft. beam, 80 tons displacement, equipped with a motor of the "Daw" type, burning ordinary paraffin, and developing 24 h.p. . . . 3 July, 1904

MOTTOES, ROYAL. *Dieu et mon Droit*, first used by Richard I., 1198. *Ich dien*, "I serve," adopted by Edward the Black Prince, at the battle of Cressy, 1346. *Honi soit qui mal y pense*, the motto of the Garter, 1349. *Je maintiendrai*, "I will maintain," adopted by William III., to which he added, in 1688, "the liberties of England and the Protestant religion." *Semper eadem*, was assumed by queen Elizabeth, 1558, and adopted by queen Anne, 1702. See them severally.

MOUND BUILDERS, the name given to a long-vanished race of N. America, who raised the remarkable earth mounds which exist in great numbers in the United States, especially in Ohio, Indiana, Illinois, and Missouri. The "serpent" mound near Bush Creek, Ohio, is described in *The Century*, April, 1890.

 Dr. Bullock Workman, who had been mountaineering in Kashmir, ascended a peak in the Numkum range, 23,000 ft. high, reported . . . 16 Aug. "

Dr. T. Longstaff in his ascent of Trisul in the Gashwal Himalayas reached a height of 23,406 ft., 10-12 June, 1907
 The duke of Abruzzi, returning from India, claims the record for height climbing—his expedition reached 7,600 metres. (The Norwegians Muradas and Robertson crossed Kabru at 7,300 metres). Full account see *Times* . . . 13 Sept. 1909
 The Fairbanks expedition reached the summit of mount McKinley . . . 3 April, 1910

MOURNING FOR THE DEAD. The Israelites neither washed nor anointed themselves during the time of mourning, which for a friend lasted seven days; upon extraordinary occasions a month or more. The Greeks and Romans fasted. White was used in mourning for the imperial family at Constantinople, 323. The ordinary colour for mourning in Europe is black; in China, white; in Turkey, violet; in Ethiopia, brown; it was white in Spain until 1498. Anne of Brittany, the queen of two successive kings of France, mourned in black, instead of the then practice of wearing white, on the death of her first husband, Charles VIII., 7 April, 1488. *Hénault*.

MOUSQUETAIRES or MUSKETEERS, horse-soldiers under the old French régime, raised by Louis XIII., 1622. This corps was considered a military school for the French nobility. It was disbanded in 1646, but was restored in 1657. A second company was created in 1660, and formed cardinal Mazarin's guard. *Hénault*. The Mousquetaires were abolished in 1775. Dumas, in his well-known "Three Musketeers," gives an interesting description of these corps.

MOZAMBIQUE, chief of the Portuguese territories, E. Africa, was visited by Vasco da Gama, 1498; conquered by the Portuguese under Tristan da Cunha and Albuquerque, 1506; a settlement was established, 1508. Capital, Mozambique, on an islet.

Great rising of the natives against the Portuguese; the rebellion quelled Dec. 1886; temporary revival 2-4 March, 1887.

Territorial disputes with the sultan of Zanzibar led to war. The Portuguese stormed Tungi 16 Feb.; the war ended early March, 1887. Fresh insurrection; Bonga defeated by the governor after a severe conflict, announced 12 Jan. 1889.

Autonomy granted by the king of Portugal, 23 May, 1907

MUGGLETONIANS, so called from Ludovic Muggleton, a tailor, known about 1641, prominent about 1650; convicted of blasphemy, Jan. 1676; died, 1697. He and John Reeve affirmed that God the Father, leaving the government of heaven to Elias, came down and suffered death in a

human form. They asserted that they were the two last witnesses of God which should appear before the end of the world, *Rev.* xi. 3. This sect existed, 1850.

MÜHLBERG, on the Elbe, Prussia. Here the German protestants were defeated by the emperor Charles V., 24 April, 1547, and John Frederick, elector of Saxony, was taken prisoner.

MÜHLDORF (Bavaria). Near this place Frederick, duke of Austria, was defeated and taken prisoner by Louis of Bavaria, 28 Sept. 1322.

MULE, a spinning machine invented in 1779, by Samuel Crompton, born at Bolton, Lancashire, in 1753; named, from Crompton's residence, *Hall-in-the-wood-wheel*; and *muslin-wheel*, from its giving birth to the British muslin and cambric manufacture; and *mule*, from its combining the advantages of Hargreave's spinning jenny, and Arkwright's adaptation. It is stated that Crompton at the time knew nothing of the latter. He did not patent his invention, but gave it up in 1780 to the public. It produced yarn treble the fineness and very much softer than any ever before produced in England. Parliament voted him 5000*l.* in 1812. Mr. Roberts invented the *self-acting mule* in 1825.

MÜLHAUSEN (in Alsace-Lorraine), an imperial city, under Rodolph of Hapsburg; joined the Swiss confederation in 1515; annexed to France in 1798; conquered and annexed to Germany, 1870-1. The calico manufacture was introduced in 1746. Population, 1890, 76,968; 1900, 89,012; 1905, 94,500.

MUMMIES (from the Coptic *mum*, bitumen, gum, resin); see *Embalming*. The mummies in the British Museum, with other Egyptian antiquities, were placed there about 1803 and since. Mr. Alex. Gordon, in 1737, published an essay on three Egyptian mummies, one of which was brought to England in 1722 by capt. Wm. Lethieullier; two others came in 1734, one of which was retained by Dr. Mead, the other was given to the College of Physicians. In 1834, Mr. T. J. Pettigrew published a "History of Egyptian Mummies." The discovery of about 39 mummies of kings, priests, and other eminent persons in sarcophagi at Renneh, near Thebes, Upper Egypt, was announced in Aug. 1881, supposed to be of the 21st dynasty, about 1100 B.C. See *Thebes*, 1904-5.

The mummies of Rameses II. and III. were uncovered by MM. Gaston Maspero and E. Brugsch in the presence of the khedive of Egypt and others 1 June, 1886

A mummy, dated about 800 B.C., unrolled by Dr. E. A. Wallis Budge at University college, London 18 Dec. 1889

Discovery of a large burial place of mummified cats, sacred animals, in central Egypt, sold as manure; 28 tons brought to Liverpool 1 Feb. 1890

Discovery by M. Grébaut, director-general of the excavations, of a vast tomb of the high priests of Amen, on the Libyan mountains west of Thebes, near Dêrel-Bahari, containing many sarcophagi, some dating from the xviiith dynasty, statuettes, papyri, votive offerings, &c. Three galleries opened, one empty; the others contained 152 mummies intact, 149 of the 21st dynasty, about 1100 B.C., and 2 of the 19th, the whole conveyed in barges to Cairo Feb. 1891

Four mummy coffins presented by the Khedive to the British Museum; reported 1 Nov. 1893

The British Museum possesses about 44 human mummies, 80 coffins, well arranged, commencing with Mycerinus (4th dynasty), builder of the third pyramid of Gizeh, about 3640 B.C., and ending with a lady and 3 children, about 400 A.D., see *Egypt* . . . April, 1898

The oldest mummified remains in the British Museum are those of a man, who was buried with pots of food, flint knives, etc., in the latter part of the Neolithic period, sometime before 8,000 B.C.

MÜNCHENGRATZ (Bohemia) was taken by the Prussians under prince Frederick Charles, after a severe action, 28 June, 1866. The Austrians lost about 300 killed and 1000 prisoners, and the prince gained about 12 miles of country.

MUNDA (now Monda, S. Spain). Here Cneius Scipio defeated the Carthaginians, B.C. 216; and here Julius Cæsar defeated the sons of Pompey, 17 March, 45, after a severe conflict.

MUNDANE ERAS. That of Alexandria fixed the creation at 5502 B.C. This computation continued till A.D. 284, Alex. era, 5786; but in A.D. 285 ten years were subtracted, and 5787 became 5777. This coincided with the Mundane era of Antioch (which dated the creation 5492 B.C.). *Nicolas.*

MUNICH, the capital of Bavaria, said to have been founded by duke Henry of Saxony, 962, on a site previously occupied by monks (*München*). It was taken by Gustavus Adolphus of Sweden in 1632; by the Austrians, in 1704, 1741, and 1743; and by the French under Moreau, 2 July, 1800. It abounds in schools, institutions, and manufactories. The university was founded by king Louis in 1826. A Bavarian art-exhibition was opened here by prince Adalbert, 20 July, 1869. A congress of "Old Catholics" (*which see*) met here, 23 Sept. 1871. International exhibition opened, 19 July, 1879. International art exhibition opened 1 July, 1883; others, 1 June, 1888, and 1892. Centenary of King Louis I., 30-31 July, 1888. Visit of the emperor William II., 7 Sept. 1891; again, 24 Nov. 1898. The new National museum opened by the prince-regent, 29 September, 1900. Population, 1905, 538,983.

MÜNSTER (capital of Westphalia, Prussia). The bishopric, said to have been founded by Charlemagne, 780, was secularised in 1802; seized by the French, 1806; part of the duchy of Berg, 1809; annexed to France, 1810; ceded to Prussia, 1815. The Anabaptists, under John of Leyden, the king of Münster, held the city in 1534-5. Here were signed the preliminaries of the treaty of Westphalia (*which see*), or Münster, Jan. 1647; definitively signed 24 Oct. 1648. The academy of Münster raised to the *status* of a university, July, 1902. Population, 1890, 49,344; 1905, 81,468.—**MUNSTER**, the southern province of Ireland, an ancient kingdom. *See Ireland*, 1014. In 1568 a commission was issued for its government by a president and council, and new colonies were founded in 1588.

MURCIA, a province, formerly a kingdom, N. E. Spain, was subdued by the Moors, 713; by Ferdinand of Castile, 1240; and divided between Castile and Arragon, 1305. Population, 1887: province, 491,436; city, 98,538; 1900, 577,985; city, 111,540; 1910 (est.), 674,300; city, 130,125. Murcia, the capital, was sacked by the French under Sebastiani, 23 April, 1810. It was inundated by the Segura, after a violent storm, 15-17 Oct., 1879, when about 1000 persons perished.

MURDER, the highest offence against the law of God. (*Genesis ix. 6*, 2348 B.C.) A court of Ephete was established by Demophoon of Athens for the trial of murder, 1179 B.C. The Persians did not punish the first offence. In England, during a period of the heptarchy, murder was punished by fines only. So late as Henry VIII.'s time the

crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder, or *petit treason* (a distinction now abolished), happened in three ways: by a servant killing his master, a wife her husband, and an ecclesiastical person his superior, stat. 25 Edw. III. 1350. The enactments relating to this crime are very numerous, and its wilful commission has been rarely pardoned by our sovereigns. The act whereby the murderer should be executed on the day next but one after his conviction, was repealed, 1836; see *Assassinations, Executions, Trials*; also various headings.

MUSEUM, originally a quarter of the palace of Alexandria, like the Prytaneum of Athens, where eminent learned men were maintained by the public. The foundation is attributed to Ptolemy Philadelphus, who here placed his library about 280 B.C. Besides the British Museum, Soane's Museum, and the Museum of Geology (*which see*), there are very many others in London. The opening of public museums and galleries on Sunday was long advocated in parliament (see *Sunday*); agreed to by resolution for London (178-97), 10 March, 1896. Urban authorities authorised to provide museums and gymnasiums, by act passed 3 July, 1891.

Museum Sunday, 6 Nov. 1892, when by the agency of the Sunday Society (*which see*), the Mansion house and various exhibitions and galleries in London were opened, and sermons were preached to support the movement at several churches; supporting meeting at the Mansion house, 8 March, 1893. *Museum Sunday*, 26 Nov. 1893; 2 Dec. 1894; annual.

MUSEUMS ASSOCIATION formed in 1890 to promote the efficacy of museums, first London meeting, sir W. H. Flower, president, many country delegates present, 3 July, 1893.

MUSIC.* The origin of music is lost in anti-

* Pythagoras (about 555 B.C.) maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortal ears, which he called "the music of the spheres." St. Cecilia, said to have enticed an angel from the celestial regions by her melody, is termed the patroness of music. She died in the second century.

quity; among civilised peoples it is probably to be traced to the ancient Egyptian priests, who employed this art in their religious rites and ceremonies. From the Egyptians the Greeks and Romans derived their knowledge of music. The ancient Hebrews probably took with them into Palestine some of the songs they had learned in Egypt. The hymns used in the temple formed the basis of the melodies of the early Christian church, and from these hymns was formulated the first authoritative musical system. St. Ambrose, abp. of Milan, 374, and Gregory the Great (pope, 590), may be regarded as the fathers of western church music. Isidore, bp. of Seville, 601, mentions harmony, in the modern sense of the word, in his "Sententiæ de Musica." Guido Arentino (died 1050), gave the names *ut (do)*, *re*, *mi*, *fa*, *sol*, *la*, to the notes now universally used; *si* was subsequently added by Le Maire. The foundation of counterpoint was laid by Johannes Ockenheim, or Okeghem (1420-1513), and his pupil, Josquin des Prés (1450-1521); this art attained its perfection under Orlando di Lasso and Palestrina (the pupil of Claude Goudimel (1510-72), the founder of the Roman school), at the end of the 16th century. The compositions of Monteverde (1568-1643) mark the rise of the new school of harmony, which gradually spread throughout Europe, including among its masters Bach and Handel. The aria was introduced by Alessandro Scarlatti (1659-1725), the founder of the Neapolitan school. Opera seria had its inception about 1580 by the Florence Academy, a group of amateurs living in Florence, who met at the house of count Bardi, a Florentine nobleman, with the object of promoting the closer union of poetry and music by the revival of the musical declamation of the ancient Greeks. The French grand opera school was founded, late in the 17th century, by J. B. Zully (1633-87), who composed many operas, ballets, occasional pieces and some church music. Since the middle of the 18th century Germany has held the highest place in music; its many exponents including Beethoven, Weber, Spohr, and Mendelssohn. The later German school had its origin in the 19th century, and claims as its starting-point Beethoven's ninth symphony, in which music and poetry form a perfect whole; Wagner and Liszt, "tone poets," have been the chief exponents of this school, "the music of the future." Among the composers of sonatas and allied works are Beethoven, Mozart, Haydn, Schubert, Chopin, Schumann, Mendelssohn, Brahms, Liszt, and Dvorák. Constanzo Festa, whose *Te Deum* has been sung on the election of every pope since his time, was one of the creators of the madrigal. Prior to 1600, the chief music in England was masses, ballads, and madrigals, but dramatic music was much cultivated from that time. About the end of James I.'s reign, a music professorship was founded in the university of Oxford by Dr. Wm. Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825.

MUSICAL NOTES, &c. See *Gamut*. The first six are said to have been invented by Guy Aretino, a Benedictine monk of Arezzo, about 1025. *Blair*. The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1555. Gafforio of Lodi read lectures on musical composition in the 15th century, and they effected great improve-

ment in the science. The Italian style of composition was introduced into these countries about 1616.

The **MUSICAL PITCH** was settled in France in 1859. The middle A to be 870 simple or 435 double vibrations in a second; but through error of measurement the fork made gave (A) 439 double vibrations (C, 522). At a meeting on the subject, held at the Society of Arts, on 23 Nov. 1860, the concert pitch of C was recommended to be 528 vibrations in a second; but the fork made by Mr. J. H. Griesbach gives 539½ vibrations. Mr. Hullah adopted 512 vibrations.

A lower pitch was adopted at concerts in London in Jan. 1869. 528 vibrations for C adopted for performances at the international exhibition of 1872, at a meeting, 20 Jan. 1872.

[Handel's tuning-fork, 1740, was 495; the Philharmonic Society's, 1813-43, was 515.]

Mr. A. J. Ellis's elaborate "History of Musical Pitch" is published in "Journal of the Society of Arts," 5 March, 1880, and separately.

MUSICAL FESTIVALS IN ENGLAND. Dr. Byssie, chancellor of Hereford, about 1724, proposed to the members of the choir a collection at the cathedral door after morning service, when forty guineas were collected and appropriated to charitable purposes. It was then agreed to hold festivals at Hereford, Gloucester, and Worcester, in rotation annually. Until the year 1753, the festival lasted only two days; it was then extended at Hereford to three evenings; and at Gloucester, in 1757, to three *parties*, for the purpose of introducing Handel's "Messiah," which was warmly received, and has been performed annually ever since. Musical festivals on a great scale are now annually held at various cathedrals in England; Chester, 21 July, 1897; see *Handel and Crystal Palace*.

"*Sons of the Clergy*," annual musical performances at St. Paul's began 1709.

MUSICAL FESTIVALS. Several were held on the continent in the 18th century; for Haydn at Vienna, 1808-1811; others at Erfurt 1811, Cologne 1821, and frequently since.

MUSICAL PIRACY first commenced in 1806, when popular copyright songs were printed by unauthorised persons, and sold in the streets at twopence per sheet. Music publishers sustained heavy losses, and in 1902 piracy having assumed such enormous proportions the Musical Copyright Association was formed by the publishers. As a result of their efforts a bill was passed in the 1902 session of parliament—the Musical Copyright (summary proceedings) Act, 1902. This bill was, to an extent, inoperative, because whilst it enabled publishers to seize pirated music it was shorn of its two most important provisions—the penalty and the search warrant clauses. In 1903 a bill to amend the 1902 act passed the lords, but was blocked in the commons by Mr. Caldwell, and on December 15, 1903, a committee was appointed by the home secretary to inquire into the subject of music piracy. As a result another bill was drafted, but was "talked out" of the house of commons by Mr. Caldwell, who was a member of the committee. A further effort to legislate on the subject was made in 1905, but again it met with failure. At the end of that year a man named Willetts, known as the "King of the Pirates," and others, were arrested and charged with conspiracy to print and publish copyright music. It was given in evidence that millions of copies of pirated music had been seized by the police, and in the end Willetts was convicted and sentenced to nine months' imprisonment. Others received lighter sentences.

MUSIC HALLS AND VARIETY THEATRES.

The modern music hall is a development of the song and supper-rooms of London, and of the free-and-easy concert halls attached to provincial public-houses. Notable forerunners of variety halls in the metropolis were the Coal Hole, now merged into the site of the Savoy hotel, and the Cyder Cellars, in Maiden-lane, also Collins's, Islington-green. The music-hall did not begin to attract general attention until Mr. Charles Morton opened the Canterbury in Westminster-bridge-road, in 1849. Just as Mr. Morton was called the father of the modern music-hall, so was the Canterbury the beginning of a movement which has become a great national institution, and in which several millions of pounds are invested.

MUSKETRY SCHOOLS at Hythe and Fleetwood were established in 1854 under major-general C. C. Hay. He resigned in 1867. The school at Fleetwood was closed the same year.

MUSKETS, see *Firearms*.

MUSLIN, a fine cotton cloth, so called, it is said, from having a downy nap on its surface, resembling moss (French, *mousse*); according to others, because it was first brought from Moussol, in India. Muslins were first worn in England in 1670. *Anderson*. By means of the *Mule* (which see), British much superseded India muslins.

MUTA (Syria). Here Mahomet and his followers defeated the Christians in his first conflict with them, 629.

MUTE. A prisoner is said to *stand mute*, when being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Until 1741, persons refusing to plead were subjected to torture by pressure.

Walter Calverly, esq., of Calverly in Yorkshire, having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle, a large iron weight being placed upon his breast, 5 Aug. 1605. *Stow*.

Major Strangeway suffered death in a similar manner at Newgate for the murder of his brother-in-law, Mr. Fussell, 1657.

Judgment was awarded against mutes, as if they were convicted or had confessed, by 12 Geo. III. 1772.

A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778, and another on a charge of burglary at Wells, 1792.

An act passed by which the court is directed to enter a plea of "not guilty" when the prisoner will not plead, 1827.

MUTINA (now Modena), N. Italy. Here Mark Antony, after defeating the consul Pansa, was himself beaten with great loss by Hirtius the other consul, and fled to Gaul, 27 April, 43 B.C.

MUTINIES, BRITISH. The mutiny throughout the fleet at Portsmouth for an advance of wages, April, 1797. It subsided on a promise from the Admiralty, which not being quickly fulfilled, occasioned a second mutiny on board the *London* man-of-war; admiral Colpoys and his captain were put into confinement for ordering the marines to fire

whereby some lives were lost. The mutiny subsided 10 May, 1797, when an act was passed to raise the wages, and the king pardoned the mutineers.

Mutiny of the *Bounty*, 28 April, 1789; see *Bounty*.

Mutiny at the Nore, which blocked up the trade of the Thames, broke out on 27 May, 1797, and subsided 13 June, 1797, when the principal mutineers were put in irons, and several executed (including the ringleader, who had assumed the name of rear-admiral Richard Parker), 30 June, at Sheerness.

Mutiny of the *Danaë* frigate; the crew carried the ship into Brest harbour, 27 March, 1800.

Mutiny on board admiral Mitchell's fleet at Bantry Bay, Dec. 1801, and January following (see *Bantry Bay*).

Mutiny at Malta, began 4 April, 1807, and ended on the 12th, when the mutineers (chiefly Greeks and Corsicans) blew themselves up by setting fire to a large magazine, consisting of between 400 and 500 barrels of gunpowder.

Mutiny on the *Flowerly Land*, bound from London to Singapore; John Lyons and six foreign sailors murdered the captain and others, 10 Sept. 1863; Tiffin, a sailor, separated from the rest, gave information; seven were tried and five executed, 14-22 Feb. 1864.

Mutiny on the *Lennie*, British ship, bound for America, captain and two mates murdered by foreign seamen, 31 Oct. 1875. Van Hoydek, steward, managed to get the vessel to the Isle of Rhé; 11 men seized and conveyed to London, tried, 4 convicted, 4 May; executed, 23 May, 1876.

Mutiny on the *Caswell*, Glasgow barque, capt. G. Best, 4 Jan., on way home from Valparaiso; captain and 3 men killed; mutineers overcome by others, some killed; vessel brought to Queenstown, 13 May; Christos Bambos sentenced to death, 31 July; executed at Cork, 25 Aug. 1876. Giuseppe Pistoria executed at Cork, 25 Aug. 1879.

Mutiny in 19th Hussars, Curragh camp, Dublin; through discontent with officers on account of extra duty, 8 Sept.; 75 arrested; court martial; sentenced to penal servitude, 2 for 5 years, 2 for 6 years, 1 for 7 years, 1 for 8 years, 14 Nov. 1877.

Mutiny of 3 American sailors on the *Leicester Castle*, British ship, 30 mi. off Pitcairn island, capt. Peattie wounded, and Mr. Nixon, mate, killed; the mutineers escaped on a raft, unheard of since, 2 Sept. 1902; 7 men murdered on the *Veronica*, 7 Dec. 1902; see *Trials*, May, 1903.

For *Indian Mutinies*, see *Madras*, 1806, and *India*, 1857. See also *Russia*, 1905.

MUTINY ACT (1 & 2 Will. and Mary, c. 5), for the discipline, regulation, and payment of the army, &c., was passed 12 April, 1689, and has since been re-enacted annually.

A parliamentary commission reported in favour of consolidating and simplifying military law, by combining the mutiny act and articles of war in a new act to be passed annually, &c., July, 1878, called the *Army (Annual) Act*. See under *Army*, 1879 and 1881.

MYCALE (Ionia, Asia Minor), **BATTLE OF**, fought between the Greeks (under Leotychides, the king of Sparta, and Xantippos the Athenian) and the Persians, 22 Sept. 479 B.C.; the day on which Mardonius was defeated and slain at Platea by Pausanias. The Persians (about 100,000 men), who had just returned from the unsuccessful expedition of Xerxes in Greece, were completely defeated, thousands of them slaughtered, and their camp burnt. The Greeks sailed back to Samos with an immense booty.

MYCENÆ, a division of the kingdom of Argives, in the Peloponnesus. It stood about fifty stadia from Argos, and flourished till the invasion of the Heraclidæ. Early history mythical. Perseus removes from Argos, and founds Mycenæ,

MYLÆ, a bay of Sicily, where the Romans, under their consul Dilius, gained their first naval victory over the Carthaginians, and took fifty of their ships, 260 B.C. Here also Agrippa defeated the fleet of Sextus Pompeius, 36 B.C.

MYSORE (S. India), was made a flourishing kingdom by Hyder Ali, who dethroned the reigning sovereign in 1761, and by his son, Tippoo Sahib, who considerably harassed the English. Tippoo was chastised by them in 1792, and on 4 May, 1799, his capital, Seringapatam, was taken by assault, and himself slain. Tippoo's last surviving son, Gholam Mahomet, a British pensioner, died at Calcutta, 11 Aug. 1872. The English established a prince of the old royal family as maharajah of part of Mysore in 1799; being without an heir he was permitted to adopt a child of four years of age, maharajah Chamarajendra Wodeyar Bahadur, in Aug. 1867; who succeeded him at his death, 27 March, 1868, and assumed the government in May, 1881; an able, beneficent ruler; died, 27 Dec. 1894; succeeded by his son, Krishnaraja Wodeyar Bahadur, aged nine (his mother regent), 1 Feb. 1895; formally installed by lord Curzon, viceroy, 8 Aug. 1902. Population, in 1901, 5,538,482; 1910 (est.), 6,461,500. Agricultural banks formed in 1895.

MYSTERIES, derived from the Greek *mysterion*, a mystery or revealed secret. The *Sacred mysteries* is a term applied to the doctrines of Christianity, called the "mystery of godliness," 1 Tim. iii. 16, as opposed to the "mystery of iniquity," 2 Thess. ii. 7. The Holy Eucharist is also termed the sacred mysteries. The *Profane mysteries* were the secret ceremonies performed by a select few in honour of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B.C.—**MYSTERY PLAYS**; see *Drama*.

MYSTICS, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, 2nd and 3rd centuries.

Much promoted by the works of the pseudo-Dionysius ("The Mystic Theology," &c), 6th century.

Introduced into the Western empire, 9th century.

Eminent mediæval mystics (opposed by the schoolmen), Master Eckhart (1251-1329); John Tauler of Strasburg, where he acted heroically during the plague, termed the "black death" (1290-1361); Henry Suso (1300-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, pantheism, communism, and maintaining private inspiration.

Jacob Böhme or Behmen, the German mystic, published his "Aurora" (an alleged divine revelation) 1612; died, 18 Nov. 1624.

For modern mystics, see *Quakers*, *Quietists*, *Hutchinsonians*, and *Swedenborgians*.

MYTHOLOGY (Greek *mythos*, fable), the traditions respecting the gods and early history of any people. For the Egyptian mythology, see *Egypt*.

NAAS (E. Ireland). Here a desperate engagement took place between a body of royal forces and the insurgent Irish, 24 May, 1798, during the rebellion. The latter were defeated with the loss of 300 killed and many wounded.

NABONASSAR, ERA OF, received its name from the prince of Babylon, under whose reign astronomical studies were much advanced in Chaldaea. The years contain 365 days each, without intercalation. The first day of the era was Wednesday (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), 26 Feb. 747 B.C.—3967, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

NACHOD (Bohemia). At this place the Prussians, under their crown prince, defeated the Austrians, after a severe conflict, 27 June, 1866. The Prussian Uhlans vanquished the Austrian cavalry.

NACOLEA (Phrygia). Near here the usurper Procopius was defeated, and soon afterwards slain by the emperor Valens, 366.

NAFELS (Switzerland). Here an Austrian army was defeated by a small body of Swiss, 1388.

NĀGA, the name in Hindu mythology of deified serpents, whose king, Sesha, is the sacred serpent of the god Vishnu.

NAGA HILLS MASSACRE, see *India*, 1875.

NAGASAKI, a city and port of Japan, on the west coast of the island of Kiusiu, with an excellent harbour famous for its beauty. For over 200 years Nagasaki was the only port of Japan in communication with other countries. From 1637 to 1859 Dutch traders were compelled to reside in their factory at Deshima, near the head of the inlet forming the harbour. Nagasaki was one of the 5 ports opened 1859 to the British and Americans. In 1869 it, with 7 other ports, was opened to foreign nations. There is a fine dockyard at Nagasaki, and 8 miles seaward, on an island, is situated the great Takashima coal mine, which gives importance to Nagasaki as a coaling station. Roman Catholic and Protestant missions are strongly represented in the city and its neighbourhood.

NAG'S HEAD STORY. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bishops Barlow, Coverdale, Scory, and Hodgkin. For forty-five years after, the Romish writers asserted that Parker and others had been ordained in an abnormal fashion by Scory at the Nag's Head Tavern, Cheapside. This fiction was refuted by Burnet, and is rejected by Roman Catholic authorities, such as Lingard.

NAHUM, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is kept by the Eastern church on 1 December.

NAISSUS (Moesia). The Goths were defeated near here with great slaughter by the emperor Claudius II., 269.

NAJARA or **NAVARRETE** (N. Spain). At Logroño, near these places, Edward the Black Prince defeated Henry de Trastamara, and re-established Peter the Cruel on the throne of Castile, 3 April, 1367.

NAMES. A Roman citizen had generally three names; *prænomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan: sometimes he had the *agnomen* (e.g., Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687. *Platina*. Onuphrius (followed by most of the modern authorities), refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names. See *Surnames*. Miss Yonge's "History of Christian Names," published 1863 (new edition 1884). M. A. Lower's "Patronymica Britannica," 1860. The Century Cyclopedia of names, edited by Benjamin E. Smith, published 1894, last edition, 1905.

NAMUR, in Belgium, was made a county in 932; taken by the French, 1 July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo. Population, 1900, 32,223; 1909 (est.), 35, 445.

NANCY (N.E. France), an ancient city, capital of Lorraine, in the 13th century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477; see *Lorraine*. Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and during the Franco-Prussian War, on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace. Population in 1909 (est.) 112,709.

NANKIN, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Peking in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel Tae-pings took it on 19, 20 March, 1853. It was recaptured by the Imperialists, 19 July, 1864, and found to be in a very desolate condition. Estimated population in 1909, 1,100,000.

Nankin exhibition opened . . . 5 June, 1910

NANTES (W. France), formerly capital of the Namnetes. The edict in favour of the Protestants issued here by Henry IV., 13 April, 1598, was revoked by Louis XIV., 22 Oct. 1685 (bicentenary celebration, 22 Oct. 1885). Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see *Drowning*. Population in 1886, 127,482; 1909 (est.), 141,183.

NAPHTHA, a clear combustible rock oil, known to the Greeks, called "oil of Media," and thought to have been an ingredient in the Greek fire (*which see*). A rich spring struck near Berdiansk, Russia, Oct. 1899; wells found in cis-Caucasia, Aug. 1903. See *Petroleum*.

NAPIER'S BONES, see *Logarithms*.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Palæopolis (the *old*) and Neapolis (the *new city*); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes, and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. The eldest son of the king of Italy is styled prince of Naples. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy. Population of the province in 1909 (est.), 1,249,496 and of the city 620,126.

NATIONAL ASSEMBLY, FRENCH. Upon the proposition of the abbé Siéyès, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *tiers état* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into departments, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851.

NATIONAL ASSEMBLY, GERMAN, see *Germany*, 1848.

NATIONAL ASSOCIATIONS. One was formed in 1584, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another was proposed in the house of commons, in Feb. 1696, by sir Rowland Gwyn, for the defence of the person and government of William III. soon after the discovery of the assassination plot (*which see*). The members of both houses of parliament and the majority of the male population joined it immediately; all persons holding office under govern-

ment were required to be members; see *Aid to Sick and Wounded, Artillery, Arts, Colonies, Education, Employers, Farmers, Social Science, Tuberculosis, and Volunteers*.

NATIONAL ASSOCIATION FOR THE EMPLOYMENT OF RESERVE AND DISCHARGED SOLDIERS. 15,106 men registered, 7,605 permanently employed, and 4,409 temporarily employed; June 1910. Headquarters—119, Victoria-street, S.W.

NATIONAL BENEVOLENT INSTITUTION, established 1812, incorporated 1859. Pensions are granted to decayed gentry, and to professional people, teachers, and others in reduced circumstances.

NATIONAL CONVENTION OF FRANCE, constituted in the hall of the Tuileries 17 Sept., and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organised, and the executive directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The chartists (*which see*) in England formed a national convention in 1839.

NATIONAL COUNCIL OF THE EVANGELICAL FREE CHURCHES, popularly known as "The Free Church Council," originated in an article by dr. Guinness Rogers to the *Methodist Times*, 20 Feb. 1890. The idea of the article, for the federation of the nonconformist bodies to promote their common interests, took practical shape, and the first free church congress was held at Manchester, 7 Nov. 1892. The second congress took place at Leeds, March, 1894, when it was determined that each congress should have an official president, dr. Berry being the first elected to hold that office. Since that date the congress has been held annually. The objects of the national council are "to facilitate intercourse and co-operation among the evangelical free churches; to assist in the organization of local councils; to encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the churches; to advocate the New Testament doctrine of the church, and to defend the rights of the associated churches; to promote the application of the law of Christ in every relation of human life." Among prominent past and present leaders of the movement have been and are dr. Clifford, rev. F. B. Meyer, the late dr. Guinness Rogers, the late rev. H. Price Hughes, dr. Munro Gibson, dr. Fairbairn, rev. J. Scott Lidgett (president 1906-7), the late rev. T. Law (the secretary), found dead in the sea at Brighton, 3 April, 1910, the late dr. Dale, the late dr. Parker, the late dr. Berry, dr. Townsend, dr. A. McLaren, Messrs. G. Cadbury, R. W. Perks, M.P., Evan Spicer, J. Rutherford, and other prominent nonconformists. In addition to social organizations, "free church lectures" on the history and principles of nonconformity are given. The free church council has taken of recent years a very active part in the nonconformist agitation over the education question, and also in the passive resistance movement (*which see*). NATIONAL DEBT. In 1693 an excise act was passed, granting duties for carrying on the war with France; the act also secured certain recompenses and advantages to such persons as should collectively advance 1,000,000*l.* for the same purpose; this sum was speedily subscribed. The permanent debt began by the establishment of the Bank of England in 1694, mainly through the exertions of Charles Montague, afterwards earl of Halifax, under the condition of its lending money to the government on interest, the repayment of the principal not to be demanded. The rapid growth of the debt was mainly caused by foreign wars, and its reduction was continually demanded. See *Stocks, Sinking Fund, and Local Loans.*

NATIONAL GALLERY, LONDON, began with the purchase, by the British government, of the Angerstein collection of 38 pictures, for 57,000*l.*, in 1824. The first exhibition of them took place in Pall-mall, on 10 May, 1824. Sir G. Beaumont (1826), Mr. Holwell Carr (1831), and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar-square, designed by Mr. Wilkins, was completed and opened 9 April, 1838. In July, 1857, a commission appointed to consider the propriety of removing the pictures reported in favour of their remaining in their present locality; and in 1860, 15,000*l.* were voted to be expended in adapting the central part

of the building to exhibition purposes. On 11 May, 1861, the National Gallery was reopened after having been closed eight months, during which time great improvements were made in the internal arrangements. On 19 June, 1865, the house of commons voted 20,000*l.* to buy land to enlarge the building, and an act for this purpose was passed 15 July, 1866. Visitors in 1866, 775,901; in 1871, 911,658; in 1883, 849,604; in 1909, 607,952, sum voted for year 1867-8, 15,895*l.*, for 1876, 20,098*l.*, for 1909, 21,726*l.* Legacy from Francis Wm. NATIONAL GUARD OF FRANCE was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing its own officers, &c. In consequence of the defection of part of the National Guard and the incompetency of the rest during the outbreak in Paris in 1871, its gradual

abolition was decreed by the national assembly at Versailles (488-154), 24 Aug. 1871. The peaceful disarmament began in September. National guards established in Spain, Naples, and other countries, during the nineteenth century.

NATIONALITY; a word much used since 1848. In Poland, Hungary, Italy, and Germany, the struggle for nationality has been long and severe. In 1866 agitation for this principle began in Bohemia, Slavonia, and other parts of the Austrian empire. The nationality of Ireland is the alleged basis of the Fenian agitation; see *Ireland*, 1870, and *Home Government*.

NATIVITY. There are three festivals in the Roman and Greek churches, under this name. The Nativity of Christ, also observed by the protestants, on 25 Dec. (see *Christmas*); the Nativity of the Virgin Mary, not observed by the protestants at all. Pope Sergius I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the 12th century. The festival of the nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

NATURAL HISTORY was studied by Solomon, 1014 B.C. (1 *Kings* iv. 33); Aristotle (384-322 B.C.); by Theophrastus (304-297 B.C.); and by Pliny (23-79 A.D.); see *Botany, Zoology, British Museum*, &c.

NATURALISM, a realistic style in literature, mainly introduced by Balzac, 1829 *et seq.* "Naturalism" is now defined as the knowledge of phenomena, and the laws by which they are connected, but nothing more. Some writers combine with naturalism, agnosticism, positivism, and empiricism (*which see*).

"Naturalism and Agnosticism," the Gifford lectures, 1895-8, 2 vols., by prof. James Ward, published 1899, in which he opposes the mechanical view of nature, viz. *naturalism*, and insists upon the recognition of mind as the animating principle.

Emile Zola, in his "Rougon-Macquart" series, 1871 *et seq.*, portrayed deformed and diseased rather than true nature. A dramatised form of his "Assommoir," entitled "Drink" had a long run in London in 1879, and is (1910) still played at intervals.

NATURALIZATION is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalization passed in 1437; and various similar enactments were made in most of the reigns from that time; several of them special acts relating to individuals. An act for the naturalization of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England; see *Jews*, for the privileges since granted them. The act for the naturalization of prince Albert passed 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalization laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on birth. Naturalization (abroad) act passed, 6 July, 1895.

Committee on naturalization's report issued, with suggestions, see *Times* leader, 3 Oct. 1901.

Number of aliens naturalized in the United Kingdom during 1905 was 684, reported, April, 1906.

In 1909, 874 aliens were naturalized in the United Kingdom, Mar. 1910.

NATURAL SELECTION, see *Species*.

NATURE, a weekly illustrated journal of science, first appeared 4 Nov. 1869; editor, Mr.

(afterwards sir) Joseph Norman Lockyer, F.R.S. Mr. Alex. Macmillan, one of the founders, born 1818, died 25 Jan. 1896.

La Nature (founded and edited by M. Gaston Tissandier, died Sept. 1899; see *Balloons*) appeared in 1892.

NATURE PRINTING. This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphoff, of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt, of Vienna, by the able assistance of Mr. Andrew Worrington, obtained impressions of agates and fossils. The first practical application of this process is in Von Heufler's work on the mosses of Arpasch, in Transylvania; the second (the first in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the illustrations to which were prepared under the superintendence of Mr. Henry Bradbury in 1855-56, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. Johnston and Alex. Croall. The process was applied to butterflies by Joseph Merrin of Gloucester, in 1864.

NAUTICAL ALMANAC, first published in 1767, edited by Dr. Neville Maskelyne, astronomer royal; the new and improved series began in 1834. Dr. John Russell Hind (died 1895), for many years superintendent, was succeeded by Dr. A. M. W. Downing, Jan. 1892.

NAUVOO, Illinois, N. America, a city of the Mormonites (*which see*); founded 1840; left 1848.

NAVAL AND MILITARY ADMINISTRATION, royal commission appointed consisting of lord Hartington, lord R. Churchill, lord Revelstoke, Mr. (afterwards sir) Campbell-Bannerman, Mr. Ismay, general Brackenbury, admiral sir F. Richards, sir R. Temple, and Mr. W. H. Smith, 7 June, 1888.

First report, containing various recommendations with evidence, issued 20 March, 1890.

Mr. E. Stanhope, the war secretary, reports the proposal for the establishment of a council within the cabinet, for naval and military affairs, to decide on questions between the two departments, also to establish a war office council and a promotion board, 3 July, 1890.

The "Naval and military council," the duke of Devonshire president (cabinet ministers), established in 1895.

NAVAL ANNUAL, begun by lord Brassey in 1886; continued by his son, Mr. T. A. Brassey, in 1896; Mr. John Leyland, 1900; Mr. T. A. Brassey, 1910.

NAVAL ARCHITECTS' INSTITUTION was established in Jan. 1860. Annual international sessions are held; a meeting at Paris, lord Brassey, president, 11 June, 1895; at Hamburg, 9 June; Berlin, 10 June *et seq.* (the emperor

present 11 June), 1896; London, 6 July, 1897; a German society, founded in 1898, met in Berlin, the emperor present; 18, 19 Nov. 1901.

NAVAL ARCHITECTURE. A scientific committee of fifteen appointed to consider the state of naval architecture and the requirements of naval warfare; 6 naval officers, 9 scientific men; lord Dufferin chairman; about 19 Dec. 1870. A royal school of naval architecture, established at South Kensington in 1864, merged into the Royal Naval College, Greenwich.

NAVAL ARTILLERY VOLUNTEER FORCE, ROYAL, established by act passed 5 Aug. 1873.

On March 22, 1889, a proposal to utilise these volunteers who are stationed at various ports was made in the house of lords.

NAVAL ASYLUM, ROYAL, begun at Paddington in 1801, was transferred to Greenwich in 1807. The interior of the central portion of the building was commenced in 1613 by Anne, queen of James I., and completed in 1635 by queen Henrietta-Maria, whose arms still adorn the ceiling of the room in which her son Charles II. was born, 1630.

NAVAL WORKS ACT (at home and abroad), relating to docks, ports, passed 31 March, 1896; estimated cost, docks, 3,979,000*l.* 1896. Other acts passed 1897 1899, and 1903.

NAVARINO (S. W. Greece), settled by the Arabs 6th century; taken by the Turks, 1500; by Venetians, 1686; by Turks, 1718; by Greeks, 1821; by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised by the duke of Wellington as an "untoward event." The port is also called Navarine.

NAVARRÉ, now a province of Spain, formed a part of the Roman dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed governors, one of whom, Garcias Ximenes, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramirez of Aragon seized Navarre. In 1134, Navarre became again independent under Garcias Ramirez IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

SOVEREIGNS OF NAVARRÉ.

1274. Jane I. and (1284) Philip-le-Bel of France.
1305. Louis X. Hutin of France.
1316. Philip V. the Long, of France.
1322. Charles I. the Fair, IV. of France.
1328. Jane II. (daughter of Jane I.), and her husband Philip d'Evreux.
1349. Charles II., the Bad.
1387. Charles III., the Noble.
1425. Blanche, his daughter, and her husband, John of Aragon.
1441. John II., alone, who became king of Aragon, in 1458. He endeavoured to obtain the crown of Castile also.
1479. Eleanor de Foix, his daughter.
1483. Catherine (his sister) and her husband John d'Albret. Ferdinand of Aragon conquers and annexes all Navarre south of the Pyrenees, 1512.

LOWER NAVARRÉ (in France).

1516. Henry d'Albret.
1555. Jane d'Albret and her husband Anthony de Bourbon, who died 1562.
1572. Henry III. who became in 1589 king of France (Henry IV.), to which Lower Navarre was formally united in 1609.

NAVIGATION began with the Egyptians and Phœnicians. The first laws of navigation originated with the Rhodians. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa.

NAVIGATION LAWS. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the isle of Oleron, 1194, and further enactments were made by Richard II. in 1381.—In Oct. 1651, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the encouraging and increasing of shipping and navigation" (1660). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The steam navigation act passed 14 & 15 Vict. c. 79, 1851, same into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.

NAVIGATORS (or *Navvies*). These helpers in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lincolnshire, &c., and are doubtfully said to be descendants of the original Dutch canal labourers. Navy Mission Society (new) met at Lambeth palace, 7 May, 1880. A "steam navy" suitable for working in sand, gravel, or heavy clay, made by Messrs. Ruston, Proctor & Co., of Lincoln, 1878.

NAVAL SALUTE TO THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1673. The honour of the flag salute at sea was also formally assented to by France in 1704, although it had been long previously exacted by England; see *Flag and Salutes at Sea*.

NAVAL UNIFORMS. The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Jacobite's Journal* of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dockyards for their inspection." This is corroborated by the *Gazette* of 13 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6 April, 1609, to six of his principal masters of the navy, "liverie coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red liverie is supposed to have been soon discontinued.—*Quarterly Review*. An act respecting them was passed in 1864.

NAVY PAY OFFICE, organised in 1644, was abolished in 1836, when the army and navy pay departments were consolidated in the Paymaster General's office.

NAVY LIST was first officially compiled by John Finlaison, the celebrated actuary, and published monthly in 1814 *et seq.*; Lean's "Royal Navy List" is published quarterly.

CORONATION REVIEW, Spithead, 16 Aug. 1902. The fleet assembled on 28 June, but owing to the illness of the king the review was postponed. There were present 20 battle-ships, 24 cruisers, 15 torpedo-gunboats, 32 torpedo-destroyers, 5 training-ships, and 7 brigs, in all 103 vessels, exclusive of yachts, torpedo-boats, and special-service vessels. For the review on 28 June the following foreign men-of-war assembled:—Germany, 1 vessel; Russia, 1; France, 1; Spain, 1; Portugal, 1;

Sweden and Norway, 2; Denmark, 1; Holland, 1; Greece, 1; Italy, 1; United States, 1; Japan, 2; Chili, 1; and the Argentine Republic, 1; only those belonging to Japan, Italy, and Portugal remained for the review on the 16 Aug. The review by the king passed off successfully.

NAVAL VOLUNTEERS (or *Reserve*). By 16 & 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of sea-faring men to be called the "Naval Coast Volunteers," not to exceed 10,000, for the defence of the coast, and for actual service if required. In 1859, acts were passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following, the admiralty issued a statement of the "qualifications, advantages, and obligations" of this reserve. The enrolment commenced on 1 Jan. 1860. The engagement is for five years, and the volunteers are entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c., offered their services. About 24,000 men, in 1896; 29,500 in 1905; 24,641 in 1908. Naval Reserve act passed, 14 Aug. 1896. Naval Forces act, 1903, increased the number of men of the reserve, and authorised short service in the navy and the completion of 7 years in the reserve. Royal Naval Reserve, total 20,848, 1909. Naval Volunteers Reserve act, 22 July, 1902. By this act the naval volunteers are subject to all regulations made with regard to them by the admiralty; if called out for active service they are liable to serve either ashore or afloat. Strength in 1910, 4,241.

First enrolled body of Royal Naval Volunteers inspected, about 18 Jan. 1873.

THE NAVY RECORDS SOCIETY, established to promote the writing of a new adequate naval history of England, and the publication of books relating to the subject; first general meeting at the R. United Service Institution, 4 July, 1893; annual meetings.

THE NAVY LEAGUE, established in 1894, to secure, as a primary object of the national policy, "the command of the sea," and to spread valuable information by means of publications, lectures, &c.; the late adm. sir Geoffrey Hornby, first president. No. 1 of the journal published July, 1895; appeal to the colonies for support responded to by the Cape, *Times* leader, 12 Oct. 1895; Mr. Wyatt, envoy, leaves for Canada, Sept. 1902; annual meetings.

NAVY OF FRANCE. It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in its splendour about 1781; became greatly reduced in the wars with England; see *Naval Battles*. It was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 393 other vessels, in all 449; including vessels building, converting, or ordered to be built. Strength, 1909, 32 battleships, 22 armoured cruisers, 7 armoured coast defence vessels, 28 protected cruisers, 1 unprotected, 13 torpedo vessels, 11 gunboats, 77 destroyers, 260 torpedo boats, 104 submarines, including vessels building and ordered; 2,879 officers and 53,906 men. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875. The *Devastation*, a great iron-clad, launched at Lorient, 19 Aug. 1879. The Supreme Navy Council was created by decree, 6 Dec. 1889. Navy league, founded 12 May, 1899. See *Navies (Foreign)*.

NAZARENE, a name given to Jesus Christ and His disciples; but afterwards to a sect who rejected the doctrine of Christ's divinity in the first century. A sect named Nazarenes, resembling the Society of Friends in Britain, became prominent in Hungary in the autumn of 1867.

NEAPOLIS, *see Naples.*

NEBRASKA, one of the central states of the United States (admitted 1867), previously a N.W. territory of North America (part of Louisiana), organised 30 May, 1854. Capital, Lincoln (est. pop. in 1909, 61,050); Omaha city (est. pop. in 1909, 153,478). Bradshaw destroyed by a tornado, 3 June, 1890. Great prairie fire above 15 miles in North Platt county; several villages destroyed; loss above 150,000 dollars, 30 March, *et seq.* 1893. Train wrecked at Lincoln, through suspected removal of rail on a trestle bridge; about 24 persons killed, 9 Aug. 1894. Population, 1900, 1,063,901; 1909 (est.), 1,175,791.

NEBULÆ, the luminous cloudlike mist visible to the naked eye in some constellations, such as Orion, in others only by powerful telescope; much studied by astronomers, and formerly considered to be clusters of stars. Halley gave a list of 6 nebulae, with a theory, in 1716. Messier, in 1784, gave 103. Sir Wm. Herschel discovered more than 2,500, and sir John Herschel more than 2,000; 7,840 known up to 1887; Dr. Dreyer's index catalogue gives 1,529, published total, 9,369, 1895. Nebulae proper are classified as annular, elliptic, spiral, planetary, and nebulous. Their spectrum consists usually of a few bright lines indicative of their gaseous structure.

The *Nebular Hypothesis* put forth by Laplace in his "Système du Monde," 1796, supposed that the solar system was evolved mechanically from a vast diffused revolving nebula, and that nebulae were the early stages in the formation of planets and their satellites, by cooling, condensation, and contraction. This theory was adopted by sir William Herschel, and though at first opposed, is now generally accepted in a modified form. Mr. Lassell scrutinized the dumb-bell nebula in Orion, and reported that the bright parts did not appear to be stars, Oct. 1860. Dr. Wm. Huggins reported his analyses of certain nebulae by their spectra, and believed them to be gaseous, 1865.

For sir Norman Lockyer's theory see under *Meteors*, 17 Nov. 1887.

Prof. Max Wolf, of Heidelberg, discovered a fine cluster in *Coma Berenices*, April, 1901.

NECROMANCERS, *see Magic.*

NECTARINE, the *Amygdalus Persica*, originally came from Persia about 1562. Previously, presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

NEEDLE-GUN (*Zündnadelgewehr*), a musket invented by J. N. Dreyse of Sommerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Mosar, 1831; and John Hanson, of Huddersfield, 1843.

NEEDLES. "The making of Spanish needles was first taught in England by Elias Crowe, a German, about the eighth year of queen Elizabeth, and in Queen Mary's time there was a negro who made fine Spanish needles in Cheapside, but would never teach his art to any."—*Stow*. The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire, and Hathersage, in Derbyshire. An exhibition of ancient needlework was formed at South Kensington Museum in 1873.

NEPAUL (N. India) was conquered by the Ghorkas, 1768, who made treaties with the British, 1791 and 1801; but frequently made incursions; and in consequence war with them commenced 1 Nov. 1814; terminated 27 April, 1815. A treaty of peace was signed between the parties, 2 Dec. 1815. War was renewed through an infraction of the treaty by the Nepaulese, Jan. 1816; and after several contests, unfavourable to the Nepaulese, the former treaty was ratified, 15 March, 1816. An extraordinary embassy from the king of Nepal to the queen of Great Britain arrived in England, landing at Southampton, 25 May, and remained till Aug. 1850; it consisted of the Nepaulese prince, Jung Bahadoor, and his suite, to whom many honours were paid. He supported the English during the Indian mutiny in 1857. The prince of Wales was honourably received in Nepal, 12 Feb. 1876.

NEPHALIA, sacrifices of sobriety among the Greeks, when they offered mead instead of wine to the sun and moon, to the nymphs, to Aurora, and to Venus; and burnt any wood but that of the vine, fig-tree, and mulberry-tree, esteemed symbols of drunkenness, 613 B.C.

NEPHOSCOPE (*nephos*, Greek, a cloud). An apparatus for measuring the velocity of clouds, invented by Karl Braun, and reported to the Academy of Sciences, Paris, 27 July, 1868.

NEPTUNE, a primary planet, first observed on 23 Sept. 1846, by Dr. Galle, at Berlin, in consequence of a letter from M. Le Verrier, who had conjectured from the anomalous movements of Uranus that a distant planet might exist nearly in the position where Neptune was situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams, of Cambridge; but unfortunate delays occurred in their publication, and also of professor Challis's consequent discovery of the planet. The Royal Society of London awarded its gold medal to both astronomers as equals in the theoretical discovery. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalande, and thought to be a fixed star. The Greek god Poseidon became the Roman Neptune. Prof. J. C. Adams died 21 Jan. 1892; his "Papers" published March, 1897.

NEPTUNIUM, a metal discovered in tantalite, from Connecticut, by R. Herrmann in 1877; not generally admitted by chemists.

NERVES. Our knowledge of the nature and functions of the nervous system has been greatly enlarged by the researches and experiments of physiologists during the 19th century. NESTORIANS, the followers of Nestorius, bishop of Constantinople (428-431), who is represented as a heretic. He was opposed by Eutyches; see *Eutychians*.

1. He rejected the error of those who said Christ was a mere man, as Ebion, Paul of Samosata Photinus.
2. He maintained that the Word was united to the humanity in Christ Jesus, and that this union was most intimate and strict.
3. He held that these two natures made one Christ, one Son, one Person; only made up of two natures.
4. And this one Person may have either divine or human properties attributed to Him.

NETLEY HOSPITAL, near Southampton, for invalid soldiers. The foundation stone was laid by queen Victoria, 19 May, 1856.

NEUFCHATEL, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulric de Fenis, about 1032, whose descendants ruled till 1373, after which by marriages it frequently changed governors. On the death of the duchesse de Nemours, the last of the Longuevilles, in 1707, there were many claimants; among them our William III. He and the allies however gave it to Frederick I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation. Population: 1901, canton, 125,804; city, 20,916; 1909 (est.), canton, 138,384; city, 23,007.

After an unsuccessful attempt in 1831, the inhabitants repudiated their allegiance to Prussia, and proclaimed Neufchatel a free and independent member of the Swiss confederation 1848

The king of Prussia protested against this; and a protocol was signed between England, France, and Austria, recognising his claims. 1852

Some of his adherents, headed by the count de Pourtales, broke out into insurrection against the republican authorities, who, however, quickly subdued and imprisoned them, with the intention of bringing them to trial. Sept. 1856

War threatened by the king of Prussia, and great energy and determination manifested by the Swiss. On the intervention of the English and French governments, a treaty was signed by which the king of Prussia virtually renounced his claims, on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neuchâtel, without any political rights, 11 June, 1857

The prisoners of Sept. 1856 were released without trial, 18 Jan. "

NEUTRALITY LAWS. A commission, in a report issued in May, 1868, recommended changes. An act to make better provision for the preservation of neutrality was passed 9 Aug. 1870. John P. McDiarmid apprehended, for breach of neutrality laws, at Bow-street, 28 Oct. 1870.

NEUTRAL POWERS. By the treaty of Paris, signed by the representatives of Great Britain, France, Austria, Russia, Prussia, Turkey, and Sardinia, on 16 April, 1856, it was determined that privateering should be abolished; that neutrals might carry an enemy's goods not contraband of war; that neutral goods not contraband were free even under an enemy's flag; and that blockades to be binding must be effective. The president of the United States acceded to these provisions in 1861. Proclamation of neutrality in respect to the war between the United States and Spain by Great Britain, France and other powers, 26 April, *et seq.*, 1898, and also during Russian-Japanese war, 1904.—See *International Law*.

NEW COLLEGE (St. John's Wood, London), erected by the Independent dissenters for the education of their ministers, 1850-1, was formed by the union of Homerton, Highbury, and Coward colleges.

NEW DEPARTURE DEMOCRATS, see *United States*, 1871.

NEW ENGLAND (N. America). The first settlement made in 1607, was named New England by captain Smith, in 1614. A band of 102 Puritans, now termed the "Pilgrim Fathers" (with 28 women), arrived here in the *May Flower*, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts, from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the

Mosaic law, governed by a religious aristocracy, which lasted till 1693. Maine was made an independent state in 1820.

NEW FOREST (Hampshire), was made ("afforested") by William the Conqueror, 1079-85. It is said that the whole country, for thirty miles in compass, was laid waste. William Rufus was killed in this forest by an arrow shot by Walter Tyrrel, that accidentally glanced against a tree, 2 Aug. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer Removal act was passed 14 & 15 Vict. c. 76, 7 Aug. 1851. Agitation for the preservation of this forest, autumn, 1870. In accordance with an act passed in 1877, the forest is now managed by a court of Verderers as a public pleasure ground, and cattle farm. New Forest (sale of lands for public purposes) act passed, 24 July, 1902. See *Forests*.

NEWFOUNDLAND (N. America), said to have been discovered by John Cabot, who called it *Prima Vista*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—*Hakluyt*. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for France. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839. Population, 1884, 197,335; 1909 (est. 242,273). Capital, St. John's; population, 1909, (est.) 32,553. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000. sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland refused union with the dominion of Canada, March, 1869; a railway from St. John's to St. George's bay, proposed by the colonial government Aug. 1878. Governor, sir G. Wm. des Vœux, Feb. 1886; sir J. Terence N. O'Brien, Nov. 1888; sir H. H. Murray, Sept. 1895; sir Henry McCallum, 1899; sir Cavenish Boyle, Jan. 1901; sir Wm. MacGregor, July, 1904; sir Ralph Williams, 5 Sept. 1909. See *Canada*, Nov. 1877.

Fishery Dispute. At Fortune bay, U.S., fishers fixed nets on Sunday, 13 Jan. 1878; this being contrary to local regulations, they were forcibly removed; controversy ensued; Mr. Everts on part of U.S. government sent despatch, 24 Aug.; correspondence, Sept.-Oct.; the marquis of Salisbury refused compensation; but earl Granville granted it; 15,000*l.* were awarded by arbitration 28 May, 1881.

NEWGATE, LONDON. The PRISON derived its name from the gate, to which was attached a small prison, gradually enlarged. One was erected in 1086 by the bishop of London. It was used as a prison for persons of rank as early as 1218; but was rebuilt about two centuries afterwards by the executors of sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed; but becoming "an accumulation of misery and inconvenience," was pulled down and rebuilt between 1778 and 1780. During the riots in 1780, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. Newgate was disused as an ordinary prison, 31 Dec. 1881. Building demolished 1902-3. Sale of fittings and relics 4 Feb. 1903. During the pulling down of the building, part of an old Roman wall was discovered. Major Arthur Griffiths' "Chronicles of Newgate," published Jan. 1884. New court house in course of erection, 1905. NEW ORLEANS, capital of Louisiana, N. America (*which see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven-eighths of the city were destroyed by fire. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss by the Americans under general Jackson, 8 Jan. 1815; the British general, sir Edward Pakenham, was killed. New Orleans was surrendered to the Federals in April, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny, especially towards females, May to October, 1862. He was replaced by general Banks, 16 Dec. 1862. Sanguinary riots, due to agitators, begun 30 July, 1866, only suppressed by martial law—about 40 persons, white and coloured, were killed, and about 160 wounded; similar riots occurred, 24 Oct. 1868, and often since. Population in 1880, 216,090; 1910 (est.), 330,000.

New Orleans.—John McEnery elected governor of Louisiana by the southern whites, 4 Nov. 1872; but W. P. Kellogg, elected by the coloured people and their white friends, was recognised by the Federal government. To defend themselves against tyranny, the southern formed the "white league," and collected arms, which they refused to surrender on demand on 15 Sept. 1874. They deposed Kellogg at New Orleans after some resistance, and established McEnery as governor, but submitted to the president's proclamation; and Kellogg was restored 18 Sept.

CHARTIST RIOTS.—About 10,000 chartists (*which see*), from the neighbouring mines, armed with guns, pikes, &c., arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street; whilst the other, headed by his son, took the direction of Stow-hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards sir Thomas) Phillips, and several other persons were wounded. The soldiers returned the fire, and dispersed the mob, which fled, leaving about 20 dead, and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil.

Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and others were tried and sentenced to death (afterwards commuted to transportation) 1 Jan. 1840

An amnesty was granted them, 3 May, and they returned to England Sept. 1856

Frost died, aged 96 29 July, 1877

NEW RIVER, for the supply of London with water, was begun 1609, and finished in 1613, when the projector, Hugh Myddelton, a London goldsmith, was knighted by James I.—*Strype*. This artificial river, which rises in Hertfordshire,* and which, with its windings, then forty-eight miles long, was brought to London, and opened 29 Sept. 1613. So little was the benefit of it understood, that or above thirty years the seventy-two shares equally divided into *King's* and *Adventurers'*, letted only 5*l.* apiece. Charles I. sold his shares to Myddelton's representatives for an annuity of 500*l.* Each of these shares was sold originally for 100*l.* A part of a share sold at the rate of 94,050*l.* the share, Nov. 1876; part of a king's share at rate of 90,000*l.*; of an adventurer's share at rate of 93,200*l.* 15 May, 1878; king's share, rate 88,200*l.*; adventurer's, 91,000*l.*, Oct. 1878; king's share, rate 91,010*l.*; adventurer's, 94,500*l.*, Nov. 1880; king's share rate 85,800*l.*; adventurer's, 85,200*l.* Nov. 1887. NEWS-LETTERS. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent out to the country. The *London Gazette*, then the only authorised newspaper, contained little more than proclamations and advertisements.

NEW SOUTH WALES, the principal colony of Australia on the eastern coast, was explored and taken possession of and named by captain Cook 1770. At his recommendation a convict colony was first formed here. Captain Arthur Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of

Port Jackson, as a more eligible situation for the capital. Gold was discovered in 1851. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, &c. NEWSPAPER PROVINCIAL SOCIETY, established in 1836, became the Newspaper Society in 1889; see *Press Association*.

NEWSPAPERS. The Roman *Acta Diurna* were issued, it is said, 691 B.C. In modern times, a *Gazette*, which derived its name from its price, a small coin, was published in Venice (about 1536). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician. It was patronised by the king, Louis XIII., who wrote one article for it, and by Richelieu. The first real newspaper published in England* was established by sir Roger L'Estrange, in 1663: it was entitled the *Public Intelligencer*, and continued nearly three years, when it ceased, on the appearance of the *Gazette*. In the reign of James I., 1622, appeared the *London Weekly Courant*; and in the year 1642 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers. See *Fourth Estate*. The following are the titles of some of them:—

England's Memorable Accidents.
 The Kingdom's Intelligencer.
 The Journal of Certain Passages in Parliament.
 The Mercurius Aulicus.
 The Scotch Intelligencer.
 The Parliament's Scout.
 The Parliament's Scout's Discovery, or certain Information.

The Mercurius Civicus, or London's Intelligencer.
 The Country's Complaint, &c.
 The Weekly Accounts.
 Mercurius Britannicus.

A paper called the *London Gazette*,† published 22 Aug. 1642. The *London Gazette* of the existing series, published first at Oxford, the Court being there on account of the plague, 7 Nov. 1665, and afterwards at London, 5 Feb. 1666. A valuable index (1830–1883), compiled by Alex. Pulling for council of law reporting, published Nov. 1885.

Printing of newspapers and pamphlets prohibited, 31 Chas. II. 1680. *Salmon's Chron.*

The regular newspapers commenced on the abolition of the censorship of the press, in 1695.

Daily Courant said to have been first published in 1702.

The duty raised to 1½d. in 1776; to 2d. in 1789; to 2½d. in 1794; and to 3½d. in 1797; to 4d. in . . . 1815

Reduced to 1d., and 3d. for a supplement in . . . 1836

Abolished, the compulsory stamp being retained only for postal purposes . . . 1855

* Some copies of a publication are in existence called *The English Mercury*, professing to come out under the authority of queen Elizabeth, in 1588, the period of the Spanish Armada. The researches of Mr. T. Watts, of the British Museum proved these to be forgeries, executed about 1766. The full title of No. 50 is "The *English Mercurius*, published by authority, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the Spanish Armada, giving "A journal of what passed since the 21st of this month, between her majesty's fleet and that of Spayne, transmitted by the Lord High Admiral to the Lordes of council."

† On 22 May, 1787, a *London Gazette* Extraordinary was forged, with a view of affecting the funds.

This also ceased . . . 30 Sept. 1870

NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587; in Scotland in 1600, and in England in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days; after 1900, 13 days. In Russia, Greece, and throughout the East, the old style is still retained. 1 Jan. 1905, was O.S. 14 Jan. See *Calendar*.

NEW TESTAMENT, see *Bible*.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec., 1642; became master of the mint, 1699; president of the Royal Society, 1703; and died 20 March, 1727. A statue of him in marble by Koubiliac was set up at Trinity College, Cambridge, 14 July, 1755, and one in bronze by Theed, at Grantham, 21 Sept. 1858, when lord Brougham delivered a discourse on the life and works of Newton. The latter statue cost 1600*l.*, a sum obtained by public subscription.

NEWTOWNBARRY RIOT (S.E. Ireland). At a seizure of stock for tithes, a conflict ensued here between the yeomanry and the people, when thirty-five persons were killed or wounded, 18 June, 1831. The jury at the inquest were unable to agree on a verdict.

NEWTOWN-BUTLER (N. Ireland). On 30 July, 1689, the Enniskilleners under Gustavus Hamilton thoroughly defeated the adherents of James II. commanded by general Maccarty, taking him prisoner with his artillery, arms, and baggage.

NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1491 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of sifted meal, with salt, incense, and wine; and all the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. Nonius Marcellus refers the origin of **NEW-YEAR'S GIFTS** among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorised the custom afterwards, and gave these gifts the name of Strenæ, 747 B.C.

NEW YORK, the "empire state" of the United States of N. America, is said to have been discovered by Verrazano, a Florentine in the French service, about 1524, and rediscovered by Hudson, an Englishman in the Dutch service, in 1609, and settled by the Dutch in 1614, the city being named Manhattan and New Amsterdam; but the English under colonel Nichols dispossessed them and the Swedes, 27 Aug. 1664, and changed its name, the king, Charles II., having given the territory to his brother, the duke of York. Population of the city, in 1860, 805,651; in 1890, 1,515,301; in 1910 (est.), 1,666,831; of the state in 1880, 5,082,871; 1900, 7,268,894; 1910 (est.), 7,995,783; of Albany,

the state capital, in 1880, 90,758; in 1910 (est.), 104,415; of Brooklyn, in 1880, 566,663; in 1910 (est.), 886,977; of Buffalo, in 1880, 155,134; in 1910 (est.) 281,230. Brooklyn with other towns consolidated with New York to form a single city under one government; bill passed 27 Feb. 1894. Population, greater New York, in 1900, 3,444,675; in 1910 (est.), 3,789,142.

NEY'S EXECUTION. Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I., 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the fray, his clothes pierced with bullet-holes, five horses having been shot under him; night and defeat obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urtillac, and brought to trial before the Chamber of Peers, 4 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.

NEZIB, Syria. Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.

NIAGARA (N. America). At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 27 May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 18 feet on the Canadian, and 28 feet on the American side; superseded by a great new steel arch bridge, last panel fitted, 28, 29 March, 1897, a great engineering feat, constructed by the Pennsylvania steel company for the Canadian and New York incorporations. There are at present four bridges crossing the river.

About eighteen miles below Fort Erie are the remarkable falls. The river is here 740 yards wide; the half-mile immediately above the cataracts is a rapid, in which the water falls 58 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets; and, in a rapid that extends to the distance of

nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario, at Fort Niagara.

The falls visited by the prince of Wales, Sept. 1860. Blondin crossed the falls on a tight-rope, 30 June et seq. to 2 Sept. 1859; and again in 1860.

Mr. Dixon crosses Niagara river below the falls on a wire rope, 6 Sept. 1890.

An international commission (president, sir Wm. Thomson, afterwards lord Kelvin) was appointed to consider the best method for utilizing 125,000 horse-power of the force of the Niagara falls, which is computed to be about 4,500,000 horse-power. Prizes were given by the Cataract company to the authors of various projects 9 Feb. 1891.

In the *Times* of 8 June, 1892, professor George Forbes, who was engaged in the undertaking, reported that the engineering works were nearly completed, and that the electrical arrangements by which the vast force was to be transmitted, were begun.

The force is to be used in factories, in lighting Niagara Falls city, and in working railways. In 1892 the work was carried on by the Niagara Falls Power company. The great power house completed, 5,000 horse-power dynamos constructed by the Westinghouse company, reported Dec. 1894.

Receipt of 15,000 horse-power from the Niagara works at Buffalo, 26 miles distant, midnight, Sunday, 15 Nov. 1896.

NIBELUNGENOT or **NIBELUNGEN-LIED** a popular German epic of the 12th century, composed of various ancient mythical poems, termed sagas, which, according to the poet Wm. Morris, should be to our race what Homer was to the Greeks.

The first critical edition, by K. Lachmann, appeared 1826 and 1846. The best translation in modern German, by Simrock, 1827; a useful edition, with translation and glossary, by L. Braunfels, 1846; in English, by W. N. Lettson, 2nd ed. 1874.

Richard Wagner's musical dramas, "The Ring of the Nibelungen," are based on this poem: the persons include the great Northern gods and goddesses, the giants, the dwarfs, and the daughters of the Rhine (see under *Musie*).

NICÆA, see *Nice*.

NICARAGUA, a state in Central America (*which see*). The present constitution was established 19 Aug. 1858. At the commencement of 1855 it was greatly disturbed by two political parties: that of the president, Chamorro, who held Granada,

the capital, and that of the democratic chief, Castellon, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole dictator of the state.* By the united efforts of the confederated states the filibusters were all expelled in May, 1857. On 1 May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua railway, a transit route between the Pacific and Atlantic, proposed, and company formed Nov. 1866. President T. Martinez elected, 1859 and 1863; Fernando Guzman, elected 1 March, 1867; Vicente Quadra elected 1 Feb. 1871; Pedro Joaquin Chamorro, 1 Feb. 1875; Joaquin Zavala, 1 March, 1879; dr. Adam Cardenas, Jan. 1883; señor Carazo, 16 Dec. 1886 (died 1899), dr. Sacaza 1889; señor Zelaya, elected, 1893; re-elected (1902-6), 1901 and 1909; Dr. Jose Madriz (1910). Population 1906, about 600,000.

Louis Napoleon, afterwards emperor, proposed the making a ship canal by the lake Nicaragua from the Atlantic to the Pacific, between 1842-4; the government of Nicaragua proposed it in 1846; colonel Childs made a survey in 1851; a company was chartered for 35 years, and conventions were signed, but the capitalists declined their support.

The scheme was revived in Feb. 1875. See *Panama and Loans*.

Treaty by which the United States may construct a canal (Menscall's plan) from San Juan (Grey Town) on the Caribbean sea to Brito, on the Pacific, with equal powers; contrary to the Bulwer Clayton treaty, *which see*, about 16 Dec. 1884; rejected by the United States legislature, 30 Jan. 1885.

* William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castellon, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on 28 June landed at Realajo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and governed Grey Town, 6 Sept. On 13 Oct. Walker captured Granada by surprise when in a defenceless state, shot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, but shot him on 7 Nov., on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief; but on Rivas, whom he had made president, deserting him, he became sole dictator. On 14 May, 1856, his envoy Viljil was recognised by the president of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him, 28 Feb. 1856; the other states of central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On 25 Nov. 1856, Walker totally burnt Granada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen. Mora on 1 May, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U.S. Himself, his staff, and 260 men were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov., 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on 8 Dec. was compelled to surrender to capt. Paulding, U.S., and was conveyed to New York. He escaped punishment by *nolle prosequi* (2 June, 1858); but capt. Paulding was tried for exceeding orders, and blamed—yet excused by president Buchanan. On 5 Aug. 1860, Walker landed near Truxillo, Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his booty by capt. Salmoa, R.N., of the *Icarus*, he refused, and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (12 Sept.). His followers were dismissed. Grey Town was surrendered to Nicaragua in 1860.

NICE or **NICÆA**, a town in Bithynia, Asia Minor, N. W. Antigonus gave it the name Antigonia, which Lysimachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the **NICENE CREED** and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381; was rejected, 431. See *Filioque*. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople; see *Eastern Empire*. Nice was taken by the Ottoman Turks in 1330.

NICE (S.E. France) was the seat of a colony from Massilia, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and retaken by the imperialists and French. It was taken by the Austrians under Melas, 1800; seized and annexed to France 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860; the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation. Population, 1901, 125,099; 1910 (est.), 137,603.

NIGHTINGALE FUND. On 21 Oct. 1854, during the Crimean war, Miss Florence Nightingale left England with a staff of thirty-seven nurses, and arrived at Scutari, 5 Nov. She rendered invaluable services to the army, and returned to London, 8 Sept. 1856. In honour of this a meeting was held at Willis's rooms on 29 Nov. 1855, to raise funds to establish an institution for the training of nurses and other hospital attendants. Madame Jenny Lind-Goldschmidt sang at Exeter hall on 11 March, 1856, and gave the proceeds (1872*l.*) to the fund. The subscriptions closed 24 April, 1857, amounting to 44,039*l.* Queen Victoria gave Miss Nightingale a valuable jewel.

NIHILISM, a popular name for the school of philosophy which believes nothing without physical evidence, renounces all forms of Divine revelation, and gives nothing in their place.

NIHILISTS, ultra-reformers in Russia, said to propose the destruction of all government, and to begin society afresh. They became known and spread in 1872; their alleged leader, Zychareff. The government began to suppress them, Sept. 1875. One of the leaders, Michael Bakounin, died at Lugano, 1 July, 1876. For recent events, see *Russia*, 1877-87 *et seq.* The term *Nihilist* was invented by the Russian novelist Turgénief, who died 3 Sept. 1883.

NIKOLSBURG (Moravia). Here were signed, 26 July, 1866, the preliminaries of a peace between Austria and Prussia.

NIKSICH, a strong Turkish fortress in Montenegro, many times besieged. Having been left by the Turks with insufficient garrison, it was captured by Montenegrins, 7, 8 Sept. 1877, causing great rejoicings.

NIL DARPAN, see *India*, June, 1861.

NILE (Egypt). The longest river in Africa, formerly considered to have its rise in what were termed "the mountains of the moon." The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile in lake Tana, and returned home in 1773. The Nile overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. The first Nilometer (a pillar) is said to have been set up by Osirtasen III., a king of the XII. dynasty, 2,300 B.C. One was set up by Solymán the Caliph, 715 A.D. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. For other discoveries, see *Africa* 1863 *et seq.* A bridge over the Nile (above 1300 feet) at Cairo, was completed by a French company, Aug. 1872.

Mr. H. M. Stanley, in his book, "Darkest Africa," published June, 1890, expressed his opinion that the newly-discovered lake Albert Edward Nyanza, at the head of the Senkiki river which is fed by the snows of the mighty Ruwenzori range (possibly the mountains of the moon mentioned by Ptolemy the geographer in the 2nd century A.D.), is the real source of the Nile.

The *barrage* works of the Nile, consisting of two great dams or weirs for irrigation, and the conveyance of boats by means of locks, constructed under the direction of Mouget Bey, a Frenchman, 1843-61; were unsuccessful and eventually neglected.

In 1885 the great powers agreed to the expenditure of 1,000,000*l.* on irrigation works, and the renovation of the barrage was effected under the direction of sir Colin Scott Moncreiff, 1886-90; supplementary dams advised by sir W. E. Garstin in 1897.

NILE, BATTLE OF THE (or Aboukir), 1 Aug. 1798, near Rosetta, between the French fleet under Bruëys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken two were burnt, and two escaped. The French ship *L'Orient*, with Bruëys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

NINETEENTH CENTURY AND AFTER, a magazine open to writers of totally different opinions; first appeared, March, 1877; introductory sonnet written by lord Tennyson; editor, sir James Knowles (K.C.V.O.), 6 Dec. 1903.

NINEVEH, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. The empire fell when Nebuchadnezzar captured Nineveh 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manner disintegrated and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. (after sir, K.C.B.) Austen Henry Layard, published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. He was born 5 March, 1817, and died 5 July, 1894. See *Gladstone*, 1868, ambassador at Constantinople, 1877-80. Mr. Hormusd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum may be mentioned the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. 2 *Kings* xix. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named

olumbium, 1801. It was pronounced to be identical with tantalum (or tantalum) by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

NIRVANA. *see Buddhism.*

NISBET or NESBET (Northumberland). Here battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

NISI PRIUS ("unless before"), words in a writ summoning a person to be tried at Westminster, *unless* the judges should come to hold their sittings in the place where he is. Judges sit in Middlesex by virtue of 18 Eliz. c. 12 (1576).

NISMES (Nîmes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nismes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nismes (14 July, 1629) gave religious toleration for time to the Huguenots.

NITRE, *see Saltpetre.*

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *aqua fortis*, is said to have been first obtained in a separate state by Raymondully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. *Nitrous acid* was discovered by Scheele about 1774. *Nitrous gas* was accidentally discovered by Dr. Hales. *Nitrous oxide gas* (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic, recommended by H. Davy in 1800, was begun in America (by Mr. Wells, dentist), 1844; in Paris, 1866; in London, 18 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or AZOTE (from the Greek α , no, and $\alpha\alpha\omicron$ or $\alpha\delta$, I live), an irrespirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies. *see Air*, 1894. Prof. Hermann Helriegel (born 1831) demonstrated in 1886 the power of leguminous plants to fix free nitrogen through the agency of microbes in their root nodules whereby the soil is much enriched. Clover gives up to the soil that which wheat requires. He died 24 Sept. 1895.

NITRO-GLYCERINE (also called NITRO-GLYCEROL), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson,

town surveyor; *see Dynamite*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up; 15 persons killed, many injured, 10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869, and repealed by the Explosives act of 1875. Secret manufacture discovered, *see Birmingham*, 1883.

NIZAM, *see Hyderabad.*

NOBEL BEQUEST. Dr. Alfred Nobel, a Swede, died 1896 (*see Nitro-Glycerine, Blasting Gelatine, and Dynamite*), left a large sum of which the interest was to be awarded annually by a board of control at Stockholm in prizes each of the value of about 8,000*l.* to those who in the previous year should have rendered the greatest service to mankind, in inventions or discoveries in physical sciences, chemistry, physiology or medicine, literary work, and the cause of international brotherhood, in the suppression or reduction of standing armies, or the founding of Peace congresses. Regulations for the competition issued, Oct. 1900. The Peace prize of 150,000 kronen divided between M. Henri Dunant (Swiss) and M. Frédéric Passy (French); 200,000*fr.* each to M. Sully Prudhomme, French poet, for literature; to Dr. Behring, of Halle, for medicine; prof. van't Hoff of Berlin, for chemistry; and prof. Röntgen of Munich, for physics. The distribution took place at Stockholm, the crown prince and others present, 10 Dec. 1901. The Peace prize awarded to Mr. William Randall Cremer, M.P., for his work on behalf of international arbitration; the four Nobel prizes were given to prof. Henri Becquerel of Paris, divided with M. and Mme. Curie also of Paris, for physics; to prof. Arrhenius of Stockholm for chemistry; to prof. Finsen, of Copenhagen for medicine, and to M. Bjørnstjerne Bjørnson, of Christiania, for literature, 11 Dec. 1903. *Nobel Institutes* are in process of establishment to carry out scientific investigation on the lines of the above scheme of the founder.

The Nobel committee of the society of authors, formed for the purpose of recommending English candidates for the literature prize; first meeting held in London, Dr. Richard Garnett in the chair (Lord Avebury elected permanent chairman),

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montagu), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; *see Lords*, and the various orders of the nobility.

NOBILITY OF FRANCE preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others be abolished; that all citizens take

their family names; liveries and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

NOBLE, an English gold coin (value 6s. 8d.), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellence of the metal of which it was composed.

NOCTURNE, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died, 1849. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and colour, 1877-8.

NOMINALISTS (or **CONCEPTUALISTS**), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists; or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments," see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The *Nonconformist* newspaper (edited by Mr. Edward Miall, aft. M.P., who died 29 April, 1881) first appeared 14 April, 1841.

NONES, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

NON-JURORS considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop

of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

NON NOBIS, DOMINE! ("Not unto us, O Lord!") &c., *Psalm* cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Birde in 1618.

NON-RESISTANCE OATH (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

NOOTKA SOUND (Vancouver's Island), discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"NO-POPERY RIOTS," see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829. The Anti-popery association petitioned against the election of Mr. Alderman Knill, R.C., as lord mayor of London, Oct. 1892.

NORDLINGEN (Bavaria). Here the Swedes under count Horn were defeated by the Austrians, 27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

NORE MUTINY, see *Mutinies*.

NORFOLK ISLAND (Pacific Ocean), discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but re-occupied as a penal settlement in 1825, penal settlement removed in 1855. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (*which see*). Visited by lord Hampden, transferred to New South Wales and endowed with a new constitution, 1896. Population, 1909, 909.

NORMAL SCHOOLS (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Haüy, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries. See *Science and Art*.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually

devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose eruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William, the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was conquered by Philip Augustus and reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

NORTHALLERTON (Yorkshire). Near here was fought the "battle of the Standard," where the English totally defeated the Scotch armies, 22 Aug. 1138. The archbishop of York brought forth a consecrated standard on a carriage at the moment when they were hotly pressed by the invaders, headed by king David.

NORTH AMERICA, see *America, United States, Indians, Canada, &c.*

NORTH AMERICAN REVIEW began at Boston, U.S., in 1815, as a rival of the Edinburgh and Quarterly Reviews. It was published at first every second month; in 1818, quarterly; in 1879, monthly, at New York.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept. 1675. Riots here because Mr. C. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military. Population, 1901, 87,021; 1909, 97,752.

NORTH-EAST AND -WEST PASSAGES. The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, Richardson, McClure, Nares, and McClintock were knighted.

 Capt. Parry* again in the *Hecla*, sails from Deptford, and reaches a spot 435 miles from the North Pole, 22 June; returns 6 Oct. 1827
 Capt. Ross* arrived at Hull, on his return from his Arctic expedition, after an absence of four years, and when all hope of his return had been nearly abandoned† 18 Oct. 1833
 Capt. Back and his companions arrived at Liverpool from their perilous Arctic land expedition (1833), after having visited the Great Fish River and examined its course to the Polar Seas 8 Sept. 1835
 Capt. Back sailed from Chatham in command of his majesty's ship *Terror*, on an exploring adventure to Wager River 21 June, 1836
 [The Geographical Society awarded the king's annual premium to capt. Back for his polar discoveries and enterprise, Dec. 1835.]
 Sir John Franklin, and capts. Crozier and Fitzjames, in the ships *Erebus* and *Terror*, leave England, (see Franklin)‡ 19 May, 1845
 [THE NORTH-WEST PASSAGE was discovered by sir John Franklin and his companions, who sailed down Peel and Victoria Straits, since named Franklin Straits. On the monument in Waterloo place is inscribed—*To Franklin and his brave companions, who sacrificed their lives in completing*

* Sir John Franklin died 11 June, 1847 (see Franklin); Sir E. Parry died 8 July, 1855, aged 65; and sir John Ross died 30 Aug. 1856, aged 80.

† In 1830 he discovered Boothia Felix: on 1 June, 1831, his nephew, com. James Clark Ross, discovered the north magnetic pole, in 70° 5' 17" N. lat., and 96° 46' 45" W. long.

‡ Capt. M'Clure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 21 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73° 31' N. lat., 114° 14' W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Atlantic and Pacific Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's straits to Behring island. Intelligence of this discovery was brought to England by com. Ingfield, and the Admiralty chart was published 14 Oct. 1853. Capt. M'Clure returned to England, Sept. 1854. In 1855, 5000*l.* were paid to capt. (afterwards sir Robert) M'Clure, and 5000*l.* were distributed among the officers and crew. On 30 Jan. 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855.

NORTH SEA, INTERNATIONAL COMMISSION OF INQUIRY. The proposal of the tsar that the dispute between Great Britain and Russia arising out of the North Sea outrage (see *England*, 22 Oct., 1904, *et seq.*) should be submitted to an international commission of inquiry on the basis of The Hague convention, was accepted by the British government, 28 Oct. The members comprising the commission were: vice-adm. sir L. Beaumont (Gt. Britain), vice-adm. Dubessoff (Russia), rear-adm. Davis (United States), adm. baron von Spaun (Austria-Hungary), adm. Fournier (France). The first meeting of the commission was held in Paris, 22 Nov., when adm. Fournier was elected president. Final sitting held 25 Feb., 1905, report of the commission read by adm. Fournier. The majority of the commissioners were unable to determine on what object the ships fired, but the commissioners unanimously recognised that the trawlers committed no hostile act, and the majority were of opinion that as there was no torpedo boat either among the trawlers or on the spot, the fire opened by adm. Rozhdstvensky was not justifiable. The firing on the starboard side seemed to the majority of the commissioners to have lasted longer than appeared necessary. The commissioners recognised that there was at the close of the firing sufficient uncertainty as to the danger

incurred by the ships to decide the admiral to proceed on his way; but the majority regret that he did not inform the authorities, when passing through the Straits of Dover, that the trawlers required assistance. In closing their report the commissioners declared that their appreciations formulated therein were not in their spirit of a nature to cast any discredit either on the military value or the sentiments of humanity of admiral Rozhdestvensky and of the *personnel* of his squadron. Count Benckendorff, Russian ambassador, paid to lord Lansdowne, 9 March, 1905, the sum of 65,000*l.*, the amount of the indemnity due to the Hull fishermen, assessed by adm. sir Cyprian Bridge and Mr. Butler Aspinall, appointed by the Board of Trade to inquire into the matter of compensation. The amount claimed by the fishermen was 103,830*l.*

NORWICH, BISHOPRIC OF, originally East Anglia; the first bishop was Felix, a Burgundian sent to convert the East Anglians about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, inasmuch that after the death of St. Humbert, they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfastus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich, 1094. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l.* 18*s.* 7*d.* per annum. Present income 4500*l.*; see *Bishoprics*.

NOTABLES, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan; but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). The notables were dismissed by the king, 12 Dec. 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

NOTARIES PUBLIC, said to have been appointed by the primitive fathers of the Christian church, to collect the acts or memoirs of the lives of the martyrs in the 1st century.—*Du Fresnoy*: This office was afterwards changed to a legal employment, to attest deeds and writings, so as to establish their authenticity in any other country. A

NOVARA (N.W. Italy). Near this town the Austrian marshal Radetzky totally defeated the king Charles Albert and the Sardinian army, 23 March, 1849. The contest began at 10 A.M. and lasted till late in the evening; the Austrians lost 16 killed, and had about 1,850 wounded; the Sardinians lost between 3,000 and 4,000 men, 27 cannons, and 3,000 prisoners. The king soon after abdicated in favour of his son Victor Emmanuel.

NOVA SCOTIA (N. America), was discovered by Cabot, 1497; visited by Verrazzani, 1524, and named Acadia; settled in 1622, by the Scotch under Sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. Since its first settlement it has more than

once changed proprietors, and was not confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745 and 1758; but was again confirmed to England in 1763. Nova Scotia was divided into two provinces in 1784, and was erected into a bishopric in Aug. 1787. King's College, Windsor, was founded in 1788; see *Baronets*. Gold was found in Nova Scotia in 1861. By an act passed 29 March, 1867, Nova Scotia and New Brunswick were united with Canada for legislative purposes. On the agitation for secession Mr. John Bright presented a petition in the commons 15 May; his motion for a royal commission of inquiry negatived 16 June, 1868. The agitation soon subsided. Lieut.-governor, Sir Charles H. Doyle, 1867; Joseph Howe died soon after his appointment, 1 June, 1873; Adams George Archibald, 1873; Matthew Henry Richey, 1883; A. M. NOVATIANS, a sect which denied restoration to the church to those who had relapsed during persecution, began with Novatian, a Roman presbyter, in 250; see *Cathari*.

NOVELS (Novellæ), a part of Justinian's Code, published 535. See *Romances*.

NOVEMBER (*novem*, nine), anciently the ninth month of the year. When Numa added January and February, in 713 B.C., it became the eleventh as now. The Roman senators wished to name this month in which Tiberius was born, by his name, in imitation of Julius Cæsar, and August-

tus; but the emperor refused, saying, "What will you do, conscript fathers, if you have *thirteen* Cæsars?"

NOVGOROD (Central Russia), made the seat of his government by Ruric, a Varangian chief, in 862, is held to be the foundation of the Russian empire. In memory of the event the czar inaugurated a national monument at Novgorod, on 20 Sept. 1862. Novgorod became a republic about 1150. Visited by the duke of Edinburgh, 20-27 Aug. 1875. Pan-Russian exhibition opened, 9 June; visited by the czar, 29 July, 1896. Population, 1909, province, 1,760,334; 1909, city, 104,636.

NOVI (N. Italy). Here the French, commanded by Joubert, were defeated by the Russians under Suwarrow, with immense loss, 15 Aug. 1799. Among the French slain was their leader, Joubert, and other distinguished officers.

NUBIA, the ancient *Æthiopia supra Egyptum*, said to have been the seat of the kingdom of the Meroë, received its name from a tribe named Nubes or Nubates. The Christian kingdom, with Dongola, the capital, lasted till the 14th century, when it was broken up into Mahometan principalities. It is now subject to the viceroy of Egypt, having been conquered by Ibrahim Pacha in 1822.

NUISANCES REMOVAL ACT; passed 1848; amended 1849; see *Sanitary Legislation*.

NUITS. A small fortified town, near Dijon, in Burgundy, N.E. France, chartered in 1212; frequently captured and ravaged, specially in 1569, 1576, and 1636. It was taken by the Badenese under Von Werder, 18 Dec. 1870, after five hours' conflict, in which above 1,000 French are said to have been killed and wounded, and 700 prisoners taken. The German loss was also heavy. A dépôt of arms and ammunition was gained by the victors.

NUMANTINE WAR. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began, 143 B.C., on account of the latter having given refuge to their allies the Sigdians, who had been defeated by the Romans. Numantia, an unprotected city, withstood a long siege, in which the army of Scipio Africanus, 60,000 men, was opposed by no more than 4,000 men able to bear arms. The Numantines fed upon horse-flesh, and their own dead, and then drew lots to kill one another. At length they set fire to their houses, and destroyed themselves, so that not one remained to adorn the triumph of the conqueror, 133 B.C.

NUMIDIA (N. Africa), the seat of the war of the Romans with Jugurtha, which began 111 B.C., and ended with his subjugation and captivity, 106. The last king, Juba, joined Cato and was killed at the battle of Thapsus, 46 B.C., when Numidia became a Roman province; see *Mauritania*.

NUMISMATICS, the science of coins and medals, an important adjunct to the study of history. In this country Evelyn (1697), Addison (1726), and Pinkerton (1789), published works on medals. Pellerin's "*Recueil des Médailles*," 9 vols. 4to (1762). Ruding's *Annals* is the great work on British coinage (new edition, 1840).—The Numismatic Society in London was founded by Dr. John Lee in 1836. It publishes the *Numismatic Chronicle*. Mr. Yonge Akerman's *Numismatic Manual* (1844) is a useful introduction to the science. Foreign works are numerous.

NUNCIO, an envoy from the pope of Rome to catholic states. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II., July, 1687, is stated to have hastened the Revolution.

NUNNERY. The first founded is said to have been that to which the sister of St. Anthony retired at the close of the 3rd century. The first founded in France, near Poitiers, by St. Marcellina, sister to St. Martin, 360.—*Du Fresnoy*. The first in England was at Folkestone, in Kent, by Eadbald, or Edbald, king of Kent, 630.—*Dugdale*; see *Abbeys and Monachism*. The nuns were expelled from their convents in Germany, in July, 1785; in France, in Jan. 1790. In Feb. 1861, monastic establishments were abolished in Naples, compensation being made to the inmates. Owing to the French anti-congregation law many French nuns settled in England, 1902 *et seq.* For memorable instances of the fortitude of nuns, see *Acree*, and *Coldingham*.

NUREMBERG, a free imperial German city in 1219. In 1522, the diet here demanded ecclesiastical reforms and a general council, and in 1532 secured religious liberty to the Protestants. It was annexed to Bavaria in 1805. Albert Dürer was born here in 1471. Population, 1900, 261,022; 1909, 287,124.

NURSES, their qualifications were greatly raised during the 19th century by the influence of Florence Nightingale and the viscountess Strangford, who died 24 March, 1887; both ladies rendered eminent services to the sick and wounded in the Russo-Turkish wars. Institution of Nursing Sisters founded 1840, and many others since. See *Nightingale Fund and John, St.*

Mr. (afterwards sir) Henry C. Burdett in Oct. 1887, proposed a scheme for the establishment of the National Pension Fund Royal 1890, for nurses and hospital officials. In Jan. 1888 Messrs. Gibbs, Hambro, J.S. Morgan and Rothschild presented 20,000l. towards its foundation; incorporated Feb. 1888. 22,500l. presented about 27 Oct. 1895; 5,000l. raised by subscription, presented 1 Jan. 1897. Total invested funds, over 372,000l. reported 17 March, 1898.

Certificates of membership of the fund presented by the princess of Wales at Marlborough House, 4 July, 1890, to about 650 nurses, who represented the first 1,000 investors in the fund; again to 1,200 nurses, 21 July, 1899.

The family of the late Junius S. Morgan presented 7,731l. 15s. 5d. to the fund named after him, 18 Dec. 1890. Total amount of the fund, 17,000l. March, 1898. 70,000l. of the Women's Jubilee Offering was devoted to the benefit of nurses and nursing institutions for the sick poor by direction of queen Victoria 1887; 5,000l. presented by Mr. (aft. sir) Henry Tate, Feb. 1896 (died 1899); total, 135,888l. 2s. 7d. subscribed in 1897. (1,000l. from lady Tate, Dec. 1901.) See under *Jubilee*. About 400 of queen Victoria's Jubilee nurses received by queen Victoria at Windsor, 2 July, 1896; 770 received by queen Alexandra, London, 3 July, 1901.

British Nurses' Association, founded 1887, Royal 1891; charter, 1893; princess Christian, president; the duchess of Connaught vice-president, 1899. Annual meetings. Club room and offices, 10, Orchard-street, W. Membership 1910, about 5,000.

OAK, styled the monarch of the woods, and an emblem of strength, virtue, constancy, and long life. That produced in England is considered to be the best calculated for ship-building. In June, 403, the "*Synod of the oak*," was held at Chalcedon. The constellation Robur Caroli, the oak of Charles, was named by Dr. Halley in 1676, in memory of the oak in which Charles II. saved himself from his pursuers, after the battle of Worcester, 3 Sept. 1651; see *Boscobel*, and *Races*.

The evergreen oak, *Quercus Ilex*, brought from the south of Europe before 1581
The scarlet oak, *Quercus coccinea*, brought from North America before 1691
The chestnut-leaved oak, *Quercus Prinus*, from North America before 1730
The Turkey Oak, *Quercus Cerris*, from the south of Europe 1735
The agaric of the oak was known as a styptic in 1750
Herne's oak, Windsor Park, mentioned in Shakespeare's "*Merry Wives of Windsor*," finally destroyed by the wind 31 Aug. 1863
Existing Oaks, 1879. Cowthorpe, Yorkshire; girth at the ground, 55 feet 6 inches. Newland, Gloucester (mentioned in Domesday Book), 46 feet.

OTES'S PLOT. Titus Oates, at one time chaplain of a ship of war, was dismissed for immoral conduct, and became a lecturer in London. In conjunction with Dr. Tongue, he invented a plot against the Roman Catholics, who he asserted had conspired to assassinate Charles II., and extirpate the Protestant religion. He made it known 12 Aug. 1678, and in consequence about eighteen Roman Catholics were accused, and upon false testimony convicted and executed; among them the aged viscount Stafford, 29 Dec. 1680. Oates was afterwards tried for perjury (in the reign of James II.), and being found guilty, was fined, put in the pillory, publicly whipped from Newgate to Tyburn, and sentenced to imprisonment for life, May, 1685. Pardoned on the accession of William and Mary, and a pension of 3*l.* a week granted to him, 1689.

OATHS were taken by Abraham, B.C. 1892 (*Gen.* xxi. 24), and authorised (B.C. 1491) *Exod.* xxii. 11. The administration of an oath in judicial proceedings was introduced by the Saxons into England, 600.—*Rapin*. That administered to a judge was settled 1344.

Icelandic Oath. "Name I to witness that I take oath by the ring, law-oath, so help me Frey and Niördh, and almighty Thor, as I shall this suit follow or defend, or witness bear, or verdict or doom, as I wit rightest and soothe stand most lawfully," &c. 925

OF SUPREMACY, first administered to British subjects, and ratified by parliament, 26 Hen. VIII. (*Stow's Chron.*) 1535

Oaths were taken on the Gospels so early as 528; and the words "So help me God and all saints," concluded an oath until 1550

The ancient oath of allegiance, which contained a promise "to be true and faithful to the king and his heirs, and truth and faith to bear of life and limb and terrene honour; and not to know or hear of any ill or damage intended him without defending him therefrom," was modified by James I., a declaration against the pope's authority being added 1603; it was again altered 1689

The affirmation of a Quaker was made equivalent to an oath, by statute, in 1696 *et seq.*

Act abolishing oaths in the customs and excise departments, and in certain other cases, and substituting declarations in lieu thereof, 1 & 2 Will. IV. 1831

Affirmation, instead of oath, was permitted to Quakers and other dissenters by acts passed in 1833, 1837, 1838, and 1863 (see *Affirmation*).

In 1858 and 1860, Jews elected M.P. were relieved from part of the oath of allegiance (see *Jews*).

By 24 & 25 Vict. c. 66, a solemn declaration may be substituted for an oath by persons conscientiously objecting to be sworn in criminal prosecutions 1861

A bill for modifying the oath taken by Roman Catholics (passed by the commons), was rejected by the lords 26 June, 1865

The oath to be taken by members of parliament was modified by an act passed 30 April, 1866

New oath of allegiance provided by the 31st and 32nd Vict. c. 72 (1868), to be taken by the members of the new parliament:—"I do swear that I will be faithful and bear true allegiance to her majesty queen Victoria, her heirs and successors, according to law, so help me God."

New parliamentary oaths bill brought in; discharged 5 July, 1881

Affirmations ordered to be accepted for oaths in France, 2 Feb.; in Spain 4 April, 1883

Mr. Bradlaugh's Oaths Bill, substituting an affirmation for an oath, in all cases when required (by sec. 5 of this act the Scotch form of taking an oath is permitted when desired); royal assent, 24 Dec. 1883

The oaths act, 1909, dispensing with the procedure of "kissing the Book," and substituting the holding of the Book in the uplifted hand, received royal assent, 29 Nov. 1909, and came into force 1 Jan. 1910

The Royal Declaration Bill passed the third reading; the prime minister announced that the new version would involve a simple declaration of protestantism as follows:—"I do solemnly and sincerely, in the presence of God, profess, testify, and declare that I am a faithful protestant, and that I will, according to the true intent of the enactments to secure the protestant succession to the Throne of my realm, hold and maintain the said enactments to the best of my power." 30 July, 1910

OBELISK (Greek *obelos*, a spit, *monolithos*, a single stone). The Egyptian symbol of the supreme God. The first mentioned in history was that of Rameses II., king of Egypt, about 1322 B.C. The Arabians called them Pharaoh's needles, and the Egyptian priests the fingers of the sun. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was a horizontal dial that marked the hour, about 14 B.C. Of the obelisks brought to Rome by the emperors, several have been restored and set up by various popes. One was excavated and set up in the piazza of St. John Lateran, Rome, by Sixtus V. 1588.

Egyptian Obelisks.—42 are known, some broken: 12 at Rome; 1, from Luxor, set up in the Place de la Concorde, Paris, Oct. 1836; 5 in England (2 British museum; 1 Alnwick; 1 Soughton hall; 1 on Thames embankment).

The obelisks improperly named *Cleopatra's Needles* were erected by Thothmes III. at On (Heliopolis), about 1600

B.C. One was removed to Alexandria by Augustus, about 23 B.C. After being long imbedded in the shore, it was acquired for Great Britain by sir Ralph Abercromby, in 1801; but not removed. It was offered to the British government by Mehemet Ali, and again by the Khedive, 15 March, 1877.

fr. James Erasmus Wilson (knt. Nov. 1881) having offered to pay all expenses, Mr. John Dixon, the engineer, undertook to convey it to England. The vessel, *Cleopatra*, containing it sailed with the *Olga* 21 Sept. During a violent gale, the vessels were separated, 14-15 Oct.; six lives were lost in a fruitless attempt to recover it. The *Cleopatra*, which was abandoned, was found by the *Fitzmaurice* (capt. Carter), and towed to Ferrol, whence it was towed by the *Anglia*, and arrived in London, 20 Jan. 1878.

he salvage awarded was 2000*l.*, 6 April, 1878. After much discussion, the Thames embankment (between Charing cross and Waterloo bridges) was selected for its site; where, by much engineering skill, it was placed, 12 Sept. 1878.

he obelisk weighs 185 tons, 7 cwt., 2 stones, 11 lb. Height, from base to point, 68 feet 5½ inches.

It was placed under the care of the metropolitan board of works by act passed 22 July, 1878.

ir J. Erasmus Wilson died 8 Aug. 1884.

In London are three English obelisks: first in Fleet-street, at the top of Bridge-street, erected to John Wilkes, lord mayor of London in 1775 (see *North Briton*); and immediately opposite to it at the south end of Farringdon-street, stands another of granite to the memory of Robert Walthman, lord mayor in 1824, erected 25 June, 1833; the third, which stood at the south end of the Blackfriars-road, marked the distance of one mile and a fraction from Fleet-street. Taken down and re-erected in St. George's-road, at the side of Bethlehem hospital, 1905.

he *Washington Obelisk*, at Washington, U.S., 555 feet high, inaugurated, 21 Feb. 1885.

OBLIVION. In 1660 was passed an act of free general pardon, indemnity, and oblivion for treasons and state offences "committed between Jan. 1637, and 24 June, 1660. The regicides and certain Irish popish priests were excepted. A similar act was passed 20 May, 1690. See *Amnesty*.

OBSERVANCE, FATHERS OF THE (or OBSERVANTS), a name given to certain members of the Franciscan order, about 1363, who voluntarily undertook the observance of their rule in its pristine rigour. This reformation was after a time enforced by the pope.

OBSERVATORIES, ASTRONOMICAL. The first is said to have been erected on the top of the temple of Belus at Babylon about 2247 B.C. The first in authentic history was at Alexandria, about 300 B.C., erected by Ptolemy Soter. "Observatory, monthly review of astronomy," first appeared in 1777. Observatories of early date probably existed at Egypt, China, and India.

The prince of Monaco in 1885 explored, by means of floats, the Bay of Biscay and a portion of the Gulf-stream, and in subsequent years the coasts of France and Spain and the Mediterranean. Immense collections were made of forms of life of all kinds from every depth. Observations were made for temperature, salinity, currents and other phenomena. The deepest sounding obtained was in 1901, when 3,000 fathoms was reached. The prince opens the Oceanographical institute and museum at Monaco	29 March, 1910

OCTARCHY, see *Britain*.

OCTOBER, the eighth month in the year of Romulus, as its name imports, and the tenth in the year of Numa, 713 B.C. October still retained its first name, although the senate ordered it to be called *Faustinus*, in honour of Faustina, wife of Antoninus the emperor; Commodus called it *Invictus*, and *Domitianus*. October was sacred to Mars.

OCTOBER CLUB. A party of country gentlemen in the house of commons, about 1710, which professed high church principles, and favoured Bolingbroke and the Jacobite cause.

OCTROIS (from the low Latin *auctorium*, authority), a term applied to concessions from sovereigns, and to the taxes levied at the gates of towns in France on articles of food before entering the city. These octrois, of ancient origin, were suppressed in 1791; re-established, 1797, and reorganised in 1816, 1842, and 1852. The Belgian government became very popular in July, 1860, by abolishing the *Octrois*. The Coal and Wine dues of London were of this nature.

ODDFELLOWS, Unity of, the name of a large friendly society, originally of a convivial character, which took its present name in 1812. It has numerous branches, but its headquarters are in Manchester. In 1886, there were 617,587 members; 1895, 739,449 members, 8,420,452l. capital; 1901, 850,709 members, 10,750,954l. capital; 1910, 1,035,627 members in 5,037 lodges, capital (1909) 14,335,731l. Official organ, *Oddfellows' Magazine*.

ODD VOLUMES, SETTE OF. A literary society established in London; dined at Freemasons' Tavern, London, Jan. 1884. The society printed for private distribution, small out-of-the-way works.

ODES are very ancient; amongst the Greeks they were extempore compositions sung in honour of the gods. Anacreon's odes were composed about 532; Pindar's, 498 to 446; and Horace's from 24 to 13, all B.C. Anciently odes were divided into strophe, antistrophe, and epode; see *Poets Laureate*.

ODESSA, a port on the Black Sea, built by the empress Catharine of Russia, 1784-1792, after the peace of Jassy. In 1817 it was made a free port, since when its prosperity has rapidly increased. It was partially bombarded by the British, 21 April, 1854, in consequence of the Russian batteries having fired on a flag of truce, 6 April. On 12 May the English frigate *Tiger* stranded here, and was destroyed by Russian artillery. The captain, Giffard, and many of his crew were killed, and the rest made prisoners. Population, 1897, 404,651; 1909, 445,116.

ODOMETER (from the Greek *hodos*, way, and *metron*, measure), see *Pedometer*.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. The Odontological Society was established 1856.

ODRYSÆ, a people of Thrace. Their king Teres retained his independence of the Persians, 508 B.C. Sitalees, his son, enlarged his dominions, and in 429, aided Amyntas against Perdicas II., of Macedon, with an army of 150,000 men. Sitalees, killed in battle with the Triballi, 424, was succeeded by Seuthes, who reigned prosperously; Cotys, another king (382-353), disputed the possession of the Thracian Chersonesus with Athens. After 9 or 10 years' warfare, Philip II. of Macedon reduced the Odrysæ to tributaries, and founded Philippopolis and other colonies, 343. The Romans, after their conquest of Macedon, favoured the Odrysæ, and in 42 their king Sadales bequeathed his territories to the Romans. The Odrysæ, turbulent subjects, and often chastised, were finally incorporated into the empire by Vespasian, about A.D. 70.

ODYL, the name given in 1845 by baron von Reichenbach to a so-called new "imponderable, or influence," said to be developed by magnets, crystals, the human body, heat, electricity, chemical action, and the whole material universe. The odylic force is said to give rise to luminous phenomena, visible to certain sensitive persons only. The baron's "Researches on Magnetism, &c., in relation to the Vital Force," translated by Dr. Gregory, were published in 1850. Emanuel Swedenborg (died 1772) described similar phenomena.

ECUMENICAL BISHOP (from the Greek *oikoumenê*, the habitable, globe understood), "universal bishop;" a title assumed by John, bishop of Constantinople, 587.

OIL was used for burning in lamps as early as the epoch of Abraham, about 1921 B.C. It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings. *Psalm* cxxxiii. 2; *1 Sam.* x. 1; *xvi.* 13. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.—**OIL SPRINGS**; see *Petroleum*. **OIL FRESCOS**; see under *Painting*.

OLD AGE PENSIONS.

Royal commission appointed by the Australian government to inquire into the subject of old age pensions recommends that a federal pension, estimated to cost 1,500,000*l.* per annum, shall be paid to reputable persons of the age of 65, not as a charity, but as a right; the yearly income of a pensioner from all sources not to exceed 5*l.* a year; Newfoundland legislature unanimously adopt a resolution in favour of old age pensions, mid April, 1906

The old age pension act, 1908, provided that every man or woman, having attained the age of 70, and being a British subject with residence in the United Kingdom for 20 years, with income not exceeding 31*l.* 10*s.*, should be entitled to receive a pension varying in amount from 1*s.* to 5*s.* per week, according to his or her means. There are certain statutory disqualifications, including the receipt of poor relief. The act came into operation 1 Jan. 1909

The total number of claims received in the United Kingdom for the period from 1 Oct. 1908 to 31 March, 1909, was 837,831, and of these, 33,610 were subjected to a test examination; Buff-book issued 11 March, 1910

Pauper disqualification to cease from 1 Jan. 1911

OLD BAILEY SESSIONS COURT is held for the trial of criminals, and its jurisdiction comprehends the county of Middlesex as well as the city of London. It is held monthly by the royal commission of *oyer and terminer*. The judges are, the lord mayor, those aldermen who have passed the chair, the recorder and the common-serjeant, who are attended by both the sheriffs, and one or more of the national judges. The court-house, adjoining Newgate prison, was built in 1773, and enlarged in 1808; the lord mayor laid the first stone of the new session house here, 20 Dec. 1902; see *Central Criminal Court*.

OLD BELIEVERS, a Russian sect, said to number about 12,000,000, originated in a revolt against the cruelties of the patriarch Nikon, whom they named Anti-Christ, 1654. They profess to adhere to the old reading of the Slavonian sacred books, which have been superseded by the present Russian church. The czar Alexander II. granted liberty of worship to the sect in 1879.

OLD CATHOLICS, the name assumed in Germany by the members of the Roman Catholic church opposed to the dogma of papal infallibility, headed by professor Döllinger of Munich (see *Councils*, 18 July, 1870). After three days' conference at Munich, Sept. 1871, they decided to set up independent worship, first meeting in a church given them by the town council of Munich. The abbé Michaud began a similar movement in Paris in Feb. 1872. Dr. Döllinger preached in favour of union with the church of England, March, 1872. Père Hyacinthe (Charles Loyson), president of the party at Rome, issued a programme, respecting the Vatican decrees, recognising ecclesiastical authorities, demanding reform, yet opposing schism, about 5 May, 1872. The bishops of Lincoln (Wordsworth) and Ely (Browne) and the dean of Westminster (Dr. Stanley), by invitation, attended the conference at Cologne, and delivered addresses, 20-22 Sept. 1872. The Old Catholics elected their first bishop, Dr. Joseph Reinkens, 1 June, 1873, who was recognised by the emperor and other powers.

OLDHAM, Lancashire, a village in 1760, was incorporated in 1849, and has sent two members to parliament since 1832, when William Cobbett was elected one of the members. It has extensive cotton manufactories. The handsome town-hall was built in 1841, and enlarged in 1879. Alexandra park was opened in 1865. Population, 1901, 137,382; 1909 (est), 143,301.

OLEFIANT GAS, a combination of hydrogen and carbon, which burns with much brilliancy, In 1862, Berthelot formed it artificially by means of alcohol.

OLEOMETER, an instrument for determining the density of fixed oils at a standard temperature of 59° Fahr. The oleometers most in use are those of Gobby, Lefebvre, Fisher and Brix. This instrument is also called the *Elaiometer*.

OLERON, see *Navigation Laws*.

OLIBANUM, a kind of gum obtained from various species of *Boswellia* found growing on the limestone rocks of Somaliland and in Southern Arabia. It is identical with the *thus* of the Romans, and is largely used as incense, and a considerable trade in this product is carried on at Aden. Large quantities of olibanum are used in India.

OLIVES are named in the earliest accounts of Egypt and Greece. They were first planted in Italy about 562 B.C. The olive has been cultivated in England since 1648 A.D.; the Cape olive since 1730. From the olive is obtained *oleic acid*, a colourless, oily fluid, and in its combined forms is used in medicine, and in soap manufacture.

MOUNT OF OLIVES, also named *Mount Olivet*, a ridge of rocks situated east of Jerusalem, from which it is separated by the valley of Jehoshaphat. Here Titus encamped when he besieged Jerusalem 70 A.D. The Mount is chiefly associated with the life of our Lord; here, according to tradition, the angels appeared to the disciples after the resurrection. Christ taught His disciples the Lord's prayer; and here he wept over Jerusalem. On the summit of the central peak is built the Church of the Ascension, the site of an earlier church erected by St. Helena.

OLYMPIADS, the era of the Greeks, from 1 July, 776 B.C., the year in which Coræbus was successful at the Olympic games. This era was reckoned by periods of four years, each period being called an Olympiad, and in marking a date the year and Olympiad were both mentioned. The computation of Olympiads ceased with the 305th, A.D. 440.

OLYMPIC GAMES, so famous among the Greeks, traditionally said to have been instituted in honour of Jupiter by the Idæi Dactyli, 1453 B.C., or by Pelops, 1307 B.C., revived by Iphitus, 884 B.C., were held at intervals of four years, on the banks of the Alpheus, near Olympia, in the Peloponnesus, now the Morea, to exercise the youth in five kinds of combats; the conquerors being highly honoured. The prize contended for was a crown made of a kind of wild olive, appropriated to this use. The festival was abolished by Theodosius, A.D. 394. In 1858 M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece.

The revival of the games every four years at some European capital was decided on at an international congress at Paris in 1894. First to be at Athens in 1896; second at Paris in 1900. Preliminary contests to select champions held in the ancient stadium, capable of seating 50,000 persons, renovated by M. Averoff of Alexandria (died 27 July, 1890) (80,000*l.*), the king and family present (129 foreign athletes to compete), . . . 21, 22 March, 1896

S. Robertson, recited, several addresses presented, . . . 15 April, "

Close of the Olympic games held in Athens; prizes, consisting of branches of the classic wild olive, distributed to the successful competitors by king George of Greece: 75 prizes won by Americans, 30 by British, 28 by Greeks, 28 by Swedish athletes. The Marathon race, the chief event, 42 kilometres (about 26 miles), won by William Sherring, of the Irish athletic club, Hamilton, Canada. Sherring covered the distance in 2 hours 51 min.; he received a gold medal and a marble statuette of Athena . . . 2 May, 1906

OPTIMISM (from *optimus*, the best), the doctrine that everything which happens is for the best, in opposition to Pessimism (from *pessimus*, the worst). The germ of optimism is to be found in Plato, and in St. Augustin, and other fathers; and has been especially propounded by Malebranche and Leibnitz, and adopted by Pope, Bolingbroke, Rousseau, and others. Optimism as expressed in the term, "the best of all possible worlds," is ridiculed by Voltaire (1694-1778) in his "Candide." See *Pessimism*.

"**OPTION**" a term given at the time to the permission given to the inhabitants of Alsace and Lorraine by the German government to choose, before 30 Sept. 1872, whether they would quit their country or become German subjects. Great numbers emigrated into the French territories. The "option" of archbishops respecting their claims on a benefice becoming void on the creation or translation of a bishop, was abolished in 1845. A Stock Exchange term, meaning the liberty to sell or buy stock in a time bargain at a stated price.

ORACLES, a term applied to revelations made by God to man. They were given to the Jews at the Mercy-seat in the tabernacle; see *Exod. xxv. 18-22*. The Holy Scriptures are the Christian "oracles," *Rom. iii. 2*; *1 Pet. iv. 11*. King Ahaziah sent to consult the oracle of Baalzebub at Ekron about 896 B.C. The Greeks consulted especially the oracles of Jupiter and Apollo (see *Dodona* and *Delphi*); and the Italians those of Faunus, Fortune, and Mars.

ORANGE, a principality in S.E. France, formerly a lordship in the 9th or 10th century. It was ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalons (to 1530); and of Nassau (1530 to 1713); see *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalons, having been wronged by Francis I. of France, entered the service of the emperor Charles V., to whom he rendered great services by his military talents. He was killed at the siege of Florence, 3 Aug. 1530. He was succeeded by his nephew-in-law, René of Nassau; see *princes of Orange* under *Holland*. The eldest son of the king of Holland is styled the

prince of Orange, although the principality was ceded to France in 1713. See *Arausio*.

ORANGE RIVER COLONY, formerly the Orange Free State (annexed by Gt. Britain, 28 May, 1900). Previous to its annexation it was a republic in South Africa, founded by Boers from Cape Colony in 1836. The British government proclaimed its authority over this territory on 3 Feb. 1848, but declared it independent 23 Feb. 1854. A constitution proclaimed, 10 April, 1854; revised, 1866 and 1879. The able president, sir John Henry Brand, first elected, 1863, died, 14 July, 1888. President Reitz elected, 11 Jan. 1889; re-elected, 27 Nov. 1893; resigns 17 Nov. 1895; Judge Steyn, the last president (see *S. African War*), elected, 21 Feb. 1896. Defensive treaty with the Transvaal, about 13 March, ratified 25 May, 1889. Capital, Bloemfontein; principal towns, Kroonstaad, Ladybrand, and Harrismith. Concession granted to the Cape Government to construct a railway to Bloemfontein; May, 1889. Population, 1904, 387,315 (142,679 whites); 1909, 426,046 (whites 156,946). ORANGEMEN. The "Battle of the Diamond," 21 Sept. 1795 (*see Diamond*), and the treachery experienced by the Protestants on that occasion, convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and consequently the Orange Society was formed in 1795. The first Orange lodge was formed in Armagh; but the name of Orangemen already existed. An Orange lodge was formed in Dublin; the members published a declaration of their principles (the maintenance of church and state under the house of Brunswick) in Jan. 1798. After 1813 Orangemen declined; but revived again in 1827, when the duke of Cumberland became grand-master; and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons; but were revived in 1845-1889. In Oct. 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. Mr. Wm. Johnston, a grand-master, convicted of violating the Party Processions act, was elected M.P. for Belfast, Nov. 1869. *See Belfast.* The Orangemen vigorously oppose the home rule movement, *see Ulster*, 1892-3.

ORANGES. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been

planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel, in Newport-market, London, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

ORATORIANs (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, London, in 1848, and afterwards at Brompton.

Death of the rev. Chas. Hy. Bowden, one of the founders of the Oratory, aged 69 5 May, 1906

ORATORIO, a sacred musical composition, the subject of it being generally taken from the Scriptures. The origin of our oratorios (so named from having been first performed in an oratory) is ascribed to St. Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. Bach's "Passion Music," the "St. Matthew," was produced at Leipzig on Good Friday, 1729, *see Passion-Week.* Handel composed 17 English oratorios; his first, "Esther," was performed at the Haymarket theatre, 2 May, 1732. "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Beethoven's "Mount of Olives," 1803; Spohr's "Last Judgment" (properly "Last Things"), 1825; Mendelssohn's "St. Paul" in 1836, and "Elijah" in 1846; Costa's "Eli," 1865; "Naaman," 1864; S. Bennett's "Woman of Samaria," 1867; Macfarren's "John the Baptist," 1873; Sullivan's "Prodigal Son," 1869; "Light of the World," 1873; "Martyr of Antioch," 1880, &c. Latterly the name has been modified, e.g., *Dramatic Oratorio*, such as Mackenzie's "Rose of Sharon"; Hubert Parry's "Judith," "Job," "King Saul" (1894), &c. *Sacred Trilogy*, Gounod's "Redemption," Berlioz's "Childhood of Christ," Elgar's "The Apostles," Pts. I. and II., 1903; or, again, as a form of *Dramatic Cantata*, as Schumann's "Paradise and the Peri," Sullivan's "Golden Legend," Mackenzie's "Dream of Jubal."

ORCHIDS, a natural order of plants of a very peculiar organization, recently much cultivated. In 1880 a great establishment for their cultivation was set up at St. Albans by Mr. Sander, "the orchid king," patronised by the Rothschilds, who introduced him to queen Victoria at Waddesdon Manor, 14 May, 1890. The orchids at Blenheim sold for about 5,250 $\frac{1}{2}$ l., 19-23 Dec. 1892.

A specimen of *Odontoglossum crispum* Pittianum sold for 1,150 guineas 22 Mar. 1906

ORCHOMENUS, a small Greek state in Boeotia, was destroyed by the Thebans, 367 B.C.; restored by Philip II. of Macedon, 354; and given up by him to Thebes, 346.

ORDEAL was known among the Greeks and Jews (*Num. v. 2*). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

ORDER OF THE CORPORATE UNION, virtually a new episcopal church, said to arise out of the Christian Unity Association (*which see*). It proposed to form four stations, (Canterbury, York, Caerleon, and St. Andrews), with rectors and provincials; announced 11 Sept. 1877.

ORDERS IN COUNCIL were issued by the British government 7 Jan. and 11 Nov. 1807, prohibiting trade with the ports occupied by the French, being reprisals for Napoleon's *Berlin* and *Milan decrees* (see *Continental System*). They greatly checked the progress of manufactures in this country, and caused much distress and smuggling. They were repealed in regard to America, 18 June, 1812. The action under these orders led to the disastrous war with the United States in 1812-15.

ORDINANCES, see *Ordonnances, Self-Denying Ordinances*.

ORDINATION of ministers in the Christian church began with Christ and His apostles; see *Mark* iii. 14, and *Acts* vi. and xiv. 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDNANCE OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer, the cross-bowyer, the galeater, or purveyor of helmets, the armourer, and the keeper of the tents. Henry VIII. placed it under the management of a master-general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was formerly for life; but since the Restoration was held *durante bene placito*, and not infrequently by a cabinet minister.—*Beaton*. The letters patent for this office were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somers, afterwards lord Raglan. The revival of the office recommended by the Ordnance Commission (see under *Army*, 1886).

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen. Roy, in 1784, continued by col. Colby, and completed by col. (aft. sir Henry) James in 1856. The publication of the maps (scale 7 inches to a mile), commenced in 1819, under the direction of col. Mudge, and was completed in 1862; a large part of these maps have been coloured geologically. The survey of Ireland (6 inches to a mile) has been completed and published; that of Scotland, completed Nov. 1882. By the Survey act, passed 12 May, 1870, the Ordnance Survey was transferred to the Board of Works, and by an act passed in 1889, to the Board of Agriculture, beginning 1 April, 1890. Directors, lieut.-gen. John Cameron, succeeded sir Henry James in 1875, died 30 June, 1878; col. A. C. Cooke; col. R. H. Stodard, 1885; col. Farquharson (K.C.B. 1899); col. Duncan Johnston, 1901; col. R. C. Hellard, 1905; col. S. C. N. Grant, 1908. In 1892 several sets of maps were in course of publication or preparation. The

Ordnance Survey maps having been considered deficient, a departmental committee was appointed in April, 1892, and met during the year; sir John Dorington, M.P., chairman. Report, with recommendations, presented to the Board of Agriculture, 31 Dec. 1892; published, 6 March, 1893. New maps issued, May, 1902; survey sections sent to S. Africa spring, 1902; 4-inch and 1-inch maps revised, issued, Aug. 1902; others issued 1903. Pocket maps of many of the sections, scale 1 in. and $\frac{1}{2}$ in. to a mile, are published at a cheap rate (1905). The outline and hill editions, 1 in. scale, completed for the whole of the United Kingdom, and coloured edition completed for England and Wales, and begun for Scotland; about three-quarters of the coloured map of Ireland completed. The 2-mile map drawing of England and Wales completed. Drawing for Scotland begun. The 10-mile map, coloured edition, has been published for the whole of Great Britain, and will be issued for Ireland. The 1-1,000,000 scale map completed and published in colour for the whole of the United Kingdom. The maps to illustrate the official history of the South African war, and those to illustrate the report of the London Traffic Commission, in progress. Annual report to 31 March, 1910, states that:—

The Ordnance Survey is charged with the preparation and maintenance of general maps of Great Britain and Ireland on the following scales:— $\frac{1}{2}$ inch to a mile (spoken of as large-scale maps); 1 inch to 1 mile; 2 miles to 1 inch; 4 miles to 1 inch; 10 miles to 1 inch and 15 $\frac{1}{2}$ miles to 1 inch or $\frac{1}{100,000}$ map (spoken of as small-scale maps). *Large-scale Maps*.—Revision of the large-scale maps is being carried out, with the sanction of the Treasury, at a rate to ensure that no part of Great Britain will have been unrevised for more than 20 years, and there is now no area which has not been brought within this category. The re-survey of Ireland on the $\frac{1}{100,000}$ scale is proceeding rapidly, the out-turn of the surveyors in 1909-10 having been about 925,600 acres, including 5,120 acres of the county of Dublin previously surveyed on that scale in 1863-7, which has been revised in connection with the survey of adjoining counties. Maps on scales larger than the 25-inch are no longer made or revised in the ordinary course by the Ordnance Survey, except at the expense of the local authorities. *Small-scale Maps*.—With the exception of the coloured edition of the 1-inch map of Scotland and of the 2-mile map of Ireland, these maps are complete and are issued to the public in the various forms given in the catalogues of publications. New editions of these maps are issued from time to time as the normal revision of the 1-inch map in the field progresses. Maps on the scales smaller than 2 miles to an inch are now complete for the whole of the United Kingdom, viz.:—4 miles to 1 inch, 10 miles to 1 inch, and 15 $\frac{1}{2}$ miles to 1 inch, or $\frac{1}{100,000}$. They are published in the forms given in the catalogues of publications; 234,605l. expended for surveys of the United Kingdom 1900; 234,742l. 1904; 229,343l. 1906; 224,630l. 1908; 225,135l. 1909.

New departure made 1903-4, with consent of the treasury, to supply schools who desire it with specially printed Ordnance Survey maps at a very low price. A considerable number of such maps were supplied in 1904-5. Specimens of the principal maps were also prepared for hanging up in public buildings. These maps have been hung up at all post-offices at which they can be ordered, and at nearly 700 other post-offices.

ORDONNANCES, the laws enacted by the Capetian kings of France previous to 1789. They began with "in the name of the king," and ended with "such is our good pleasure." The first in French is dated 1287 (Philip IV.). The publication of these "ordonnances," ordered by Louis XIV., 1706, is still in progress. The "ordonnances" of Charles X., promulgated 26 July, 1830, led to the revolution.

OREGON TERRITORY (N. America) is said to have been visited by Drake in 1579. Lieut. Broughton took possession of part of it for Great Britain in 1792. In 1810 a settlement named Astoria was founded by a New York Company. Oregon was occupied by the English in 1814, but was claimed by the United States government, to whom the greater part was ceded, after much negotiation, by the treaty of 12 June, 1846. Oregon was made a territory in 1848, and admitted as a state, Feb. 1859. Capital, Salem. Population, 1900, 413,536; 1901, 454,889.

ORGAN, a development of the pandean pipes; the "*organ*" in *Gen. iv. 21* should be translated *pipe*. The invention is attributed to Ctesibius, a barber of Alexandria, about 250 B.C.; and to Archimedes, about 220 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 657.—*Bellarmino*. Organs were used in the western churches by pope Vitalianus, in 658.—*Ammosius*. It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was, perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was competed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. See *Westminster Abbey*, 1895.

Barrel organs are said to have been first made early in the 18th century. The finest was the *Apollonicon* (whence see).

ORGANIC SYNTHESIS, see *Chemistry*.

ORIEL COLLEGE (Oxford), founded, in 1326, by Adam de Brome, archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement called *l'Oriole*, on the site of which the building stands.

ORIENTAL INSTITUTE, Woking, Surrey, founded by dr. G. W. Leitner, the distinguished Orientalist (died, aged 63, 22 March, 1899; see *Punjaub*), for the training of young Indians, about 1884. A mosque was erected here, Aug. 1889.

ORIENTALISTS. The first International Congress of these scholars was held at Paris, 1 Sept. 1873, M. Léon de Kosny, the founder, president; the second Congress met at the Royal Institution, in London, 14-19 Sept. 1874, dr. S. Birch president; the third Congress met at St. Peters-

burg, 1 Sept. 1876; the fourth at Florence, Sept. 1878; the fifth met at Berlin, 12-17 Sept. 1881, M. Dittman president; the sixth at Leyden, 10 Sept. 1883; the seventh, Vienna, 27 Sept. 1886; eighth, Stockholm, president king Oscar II., 2-7 Sept. 1889; independent, London, 1-10 Sept. 1891; ninth in London, 5-12 Sept. 1892; tenth, Geneva, 4 Sept. 1894; eleventh, Paris, 6 Sept. 1897; twelfth, Rome, 4-15 Oct. 1899; thirteenth, Hamburg, 5 Sept. 1902; fourteenth, Algiers, 1905; fifteenth, Copenhagen, 14-20 August, 1908. See *Asiatic Societies*.

ORIENTAL STUDIES; Professor Max Müller, in the presence of the prince of Wales, at the Royal Institution, gave a discourse to inaugurate the establishment of a school for modern oriental studies by the Imperial Institute, in union with University College and King's College, London 11 Jan. 1890

ORIENTATION, the setting of the chancel of a church so that it points to the east. This custom is followed in the churches of England, and those of northern Europe, but is not strictly adhered to in Italy and the South. St. Peter's, at Rome, has its choir pointing to the west.

ORIFLAMME, see *Auriflamma*.

ORIGENISTS pretended to draw their opinions from the writings of Origen, who lived 185-253. They maintained that Christ was the son of God in no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, and the reading of Origen's work was forbidden.—*Burke*. These doctrines were condemned by the council of Constantinople in 553.

ORISSA, an ancient kingdom of India, now a province of N.W. Bengal, conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1770, and 1792-3, and more especially during Aug. to Nov. 1866, when it is said about 1,500,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned. Pop. 1901, 4,982,142; 1910 (est.), 5,254,740.

ORKNEY AND SHETLAND ISLES (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orkades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Servanus early in the 5th century, some affirm by St. Colm, ended with the abolition of episcopacy in Scotland, about 1689; see *Bishops in Scotland*. Orkney and Zetland small piers and harbours act passed, 14 Aug. 1896.

ORLEANS (a city in central France), formerly *Aurelianum*; gave title to a kingdom, 491, and afterwards to a duchy, usually held by one of the royal family. Attila the Hun, besieging it, was defeated by Aetius and his allies, 451. It was besieged by the English under earls of Salisbury and Suffolk, 12 Oct. 1428, bravely defended by Gaucour (as its fall would have ruined the cause of Charles VI. king of France), and relieved by the heroism of Jean of Arc, afterwards surnamed the Maid of

Orleans, 29 April, 1429, and the siege was raised 8 May; see *Joan of Arc*. (The 439th anniversary was celebrated 10 May, 1868; the emperor and empress being present.) During the siege of Orleans, Feb. 1563, the duke of Guise was assassinated.

After nine hours' severe fighting, Orleans captured by the Germans, under general Von der Tann. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged. The city was made to pay a war contribution of 60,000*l.* 11 Oct. 1870

Von der Tann and the Bavarians defeated by generals D'Aurelle de Paladines and Pallières, and Orleans re-taken. The Germans acknowledged the loss of about 700 men and 2000 prisoners, chiefly wounded. The French loss was heavy. The chief conflict took place between Coulmiers and Bacon or Baccon. 9, 10 Nov. "

Severe conflicts at Bazoches and Chevilley, near Orleans, between a part of the army of the Loire and German troops, prince Frederick Charles and the grand-duke of Mecklenburg. 2-4 Dec. "

A battle, during which the suburbs were stormed, and about 10,000 unwounded prisoners, 77 guns, and four gunboats taken by the Germans. The French retired; Orleans re-taken by the Germans, 5 Dec. "

DUKES.

Louis contended for the regency with John the Fearless, duke of Burgundy, by whose instigation he was assassinated in 1407.

Charles taken prisoner at Agincourt, 1415; released, 1440; died, 1465.

ORNITHOLOGY, see *Birds*.

ORNITHORHYNCHUS, the duck-billed platypus, or water-mole, a singular compound of the mammal and the bird, a native of Australia, was first described by Dr. Shaw, in 1819.

OROQUIETA, Navarre, N. Spain. Here don Carlos, calling himself king Carlos VII., grandson of don Carlos, brother of Ferdinand VII., commanding about 4000 men, was suddenly attacked by general Moriones with about 2000, and defeated after a short conflict, 4 May, 1872.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that he had caused 5000 free-born children to be sought out and educated, about A.D. 105. Orphan-houses properly so called are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanotrophos*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

The Orphanotropheon at Halle, established by August Francke. 1698-9

ORPHEONISTS, see *Crystal Palace*, 1860.

ORRERY, a planetary machine to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the clepsydra. Ptolemy devised the circles and epicycles that distinguish his system about 130. The planetary-clock of Finé was begun 1553. The planetarium of De Rheita was formed about 1650. The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Pearson, for the Royal Institution, London, about 1803. An excellent planetarium, constructed in London by signor N. Perini, was exhibited in Dec. 1879.

ORSINI'S PLOT against the emperor Napoleon III.; see *France*, Jan. 1858.

ORTHEZ or **ORTHEZ** (S. France), once capital of the principality of Bearn. Near it the British and Spanish armies, commanded by Wellington, defeated the French, under Soult, 27 Feb. 1814.

ORTHOPÆDIC HOSPITALS, for the cure of club-foot, spinal curvatures, &c.: in London, National, Great Portland street, founded, 1836; Royal, Hanover-square, 1838; City, 1851.

OSBORNE HOUSE (Isle of Wight), was purchased by queen Victoria in 1845, and rebuilt by Mr. Cubitt. She died here, 22 Jan. 1901, and left the house and estate under her will to the king, who gave it to the nation, to be used as an army and navy convalescent home (for officers), 9 Aug. 1902; Osborne estate bill passed, 15 Dec. 1902. Royal Naval College, opened by king Edward VII., 4 Aug. 1903. The training colleges at Osborne and Dartmouth made part of the Portsmouth command, 1 Sept. 1905.

OSMIUM, one of the heaviest known metals. Discovered in platinum ore by Tennant in 1803.

OSNABURG (N. Germany), made the seat of a bishopric, by Charlemagne, near the end of the 8th century. After the treaty of Westphalia in 1648, the bishop was a Roman Catholic and Protestant alternately, the latter being chosen from the house of Brunswick. Frederick, duke of York, the last bishop, resigned in 1803, when the lands were annexed to Hanover.

OSSORY (S.E. Ireland), **BISHOPRIC OF**, was first planted at Saiger, about 402; translated to Aghadoc, in Upper Ossory, in 1052; and to Kilkenny about the end of the reign of Henry II. It was united to Ferns and Leighlin in 1835.

OSTEND (Belgium). Now a fashionable summer resort. An important sea-port in the 11th century, was destroyed by the sea 1334, rebuilt and walled by Philip the Good, the duke of Burgundy, 1445; sustained a siege by the Spaniards, from July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramillies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, but regained in 1794. The English destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they surrendered to the French, 19 May, 1798. The Ostend East India company, established 1723, was dissolved 1731. Riotous attacks on British fishermen landing fish quelled with bloodshed; intervention of the king; peace restored 23-30 Aug. 1887. Population, 1900, 39,541; 1909, 43,495.

OSTIA, a Roman port, at the mouth of the Tiber, said to have been founded by Ancus Martius about 627 B.C.

OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippias; others ascribe it to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was oftenest written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades, for his victories, were thus ostracized. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 B.C.

OSTRICH (the *struthios* of the ancients), a native of Africa (see *Job* xxxix. 14). Ostriches were hatched and reared at San Donato, near Florence, 1859-60; and at Tresco abbey, the seat of Augustus Smith, in the Scilly isles, 1866.

OSTROGOTHS, or **EASTERN GOTHs**, were distinguished from the Visigoths (Western Goths) about 330. After ravaging eastern Europe, Thrace, &c., their great leader, Theodoric, established a kingdom in Italy, which lasted from 493 to 553; see *Italy*.

OSTROLENKA (Poland). Near here the French defeated the Prussians, 16 Feb. 1807. In another battle here between the Poles and Russians the slaughter was immense, but the Poles remained masters of the field, 26 May, 1831.

OTAGO, see *New Zealand*, 1848, 1861, 1866.

OTAHEITE or **TAHITI**, an island in the S. Pacific Ocean, seen by Byron in 1765, and visited in 1767 by captain Wallis, who called it George the Third Island. Captain Cook came hither in 1769 to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months; he visited it twice afterwards. See *Cook's Voyages*. Omai, a native, was brought to England by Cook, and carried back in his last voyage. In 1799, king Pomare ceded the district of Matavai to some English missionaries. Queen Pomare was compelled to put herself under the protection of France, 9 Sept. 1843. She retracted, and Otaheite

and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. The French imprisoned Mr. Prichard, the English consul, 5 March, 1844, but the act was censured in France.

Queen Pomare IV., born, 23 Feb. 1813; succeeded her brother, Pomare III., in Jan. 1827; died 17 Sept. 1877, having reigned 50 years. By consent of her successor the island was formally annexed to France, 29 June, 1880. The queen arrived at Paris, 27 Feb. 1884.

Long rebellion in Raiatea and Huahine islands put down; the queen exiled by the French, reported, 10 April, 1867.

Rurutu and Tubuai islands annexed to France, 21 Aug. 1900.

OTHEOSCOPE (from *ōtheō*, I propel), apparatus invented by Mr. W. Crookes (knt. 1897), for studying molecular motion, the effects of radiation; described by him, April, 1877.

OTOLOGY, the science of the ear. A congress of Otologists met at Brussels, Sept. 1888; another in London, 300 aurists present, 8 Aug. 1899.

OTTAWA (formerly **BYTOWN**), on the river Ottawa, was appointed to be the capital of Canada by queen Victoria, August, 1858. The executive council met here 22 Nov. 1865, and the Canadian parliament was, for the first time, opened here by the governor-general, lord Monck, on 8 June, 1866. Mr. Darcy McGee, M.P. for Montreal (once an Irish agitator, but afterwards exceedingly loyal), was assassinated on his return from parliament, 7 April, 1868. Fenians were suspected, and the town was put in a state of siege. Whelan, convicted of the murder, 15 Sept. 1868, was executed Feb. 1869. A dominion exhibition was opened here 24 Sept. 1879. The duke and duchess of Connaught warmly received 4 June, 1890. National monument to sir John Macdonald unveiled, 1 July, 1895. Destructive fire in public offices, records burnt, 11 Feb. 1897. Population in 1901, 59,902; 1909, 66,892.

OUDENARDE (Belgium). Here the English and allies under the duke of Marlborough and prince Eugene thoroughly defeated the French besiegers, 11 July, 1708.

OULART (S.E. Ireland). Here 5000 Irish insurgents attacked the king's troops, in small numbers, 27 May, 1798. The North Cork militia, after great feats of bravery, were cut to pieces, five men only escaping.—*Musgrave*.

OUNCE (from *uncia*), the sixteenth part of the pound avoirdupois, and twelfth of the pound troy. Its precise weight was fixed by Henry III., who decreed that an English ounce should be 640 dry grains of wheat; that twelve of these ounces should be a pound; and that eight pounds should be a gallon of wine, 1233.

OURIQUE (Portugal), where Alfonso, count or duke of Portugal, is said to have encountered five Saracen kings and a great army of Moors, 25 July, 1139, and signally defeated them; and then to have been hailed the first king. Lisbon, the capital, was taken, and he soon after was crowned.

OUTLAW, one deprived of the benefit of the law, and out of the sovereign's protection; a punishment for such as being called in law do contemptuously refuse to appear. In the reign of Edward III. all the judges agreed that none but the sheriff only having lawful warrant therefor, should put to death any man outlawed.—*Cowel*. Outlawry in civil proceedings was abolished by 42 & 43 Vict. c. 59, 15 Aug. 1879.

OUZEL GALLEY SOCIETY. In 1700, the case of the *Ouzel Galley*, a ship in the port of Dublin, excited great legal perplexity, and was referred to an arbitration of merchants, whose prompt decision was highly approved. This led to the foundation of the society in 1705.

OVATION, an inferior triumph which the Romans allowed those generals of their army whose victories were not considerable. Publius Posthumus Tubertus was the first who was decreed an ovation, 503 B.C. A sheep (*ovis*) was offered by the general instead of a bull.

OVERLAND MAIL, see *Waghorn*. The overland mail travelled first through the Cenis tunnel to Brindisi, saving 24 hours, 5 Jan. 1872.

Communication between the East and West has been greatly facilitated by the opening of the Suez Canal, 1869, and the railways between the Atlantic and Pacific oceans; by means of the Canadian Pacific railway the China and Japan mails were conveyed from Yokohama to London in 25 days, arriving in London . . . 13 May, 1891
Mr. H. de Windt travels 19,000 miles overland from Paris to New York . . . Dec. 1901–Sept. 1902
New overland route to China, *via* Siberian and Chinese Eastern railways, reduces transit to Peking to 23 days as against 39 days by sea route . . . 1904

OVERSEERS of the poor for parishes were appointed in 1601; see *Poor Laws*.

OWENS COLLEGE, Manchester, founded by means of a bequest of 100,000*l.* by John Owens, merchant, who died in 1846. A new constitution was obtained in 1870, and the duke of Devonshire, president, laid the first stone of the new building, 23 Sept. 1870; and opened it, 8 Oct. 1873. Mr. E. R. Langworthy bequeathed 10,000*l.* to develop the chair of experimental physics, 1874. In 1880 "Owens" became the first college of the new Victoria University, Manchester. The Beyer laboratories and natural history museums were created 1887 at a cost of 80,000*l.* Mr. R. C. Christie, formerly professor, gives 50,000*l.*, 5 Oct. 1897. New physical (research) laboratory (cost 40,000*l.*) opened by lord Rayleigh, 29 June, 1900. See *Victoria University*. Connected with the college are the "Hulme" and the "Dalton" halls of residence for male students, and "Ashburne House" for female students.

OWENS'S SCHOOL, Islington, founded 1613, by Dame Alice Owen, in gratitude for her escape from death by an arrow; free education to 30 children and maintenance to 14 pensioners: the benefits of the charity since its foundation have been greatly increased; high-class education now given to 700 children at a nominal fee; new buildings erected by the Brewers' company under the trust, opened, 14 April, 1896. (Her statue unveiled, 21 Oct. 1897.)

OWNERS OF LAND, see *Domesday*.

OXALIC ACID, which exists in several plants, especially in sorrel, is now abundantly obtained, for use in the arts, from sawdust acted upon by caustic potash or soda, according to dr. Dale's process, patented in 1862.

OXFORD'S ACT, BISHOP OF, see *District Churches*.

OXFORD'S ASSAULT ON THE QUEEN. Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from Buckingham palace, 10 June, 1840. He stood within a few yards of the carriage, but neither her majesty nor the prince was injured. Oxford was tried at the Old Bailey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor; and set at liberty in 1868, on condition of going abroad.

OXUS (the Persian and Turkish Djihoun, local name, Amou Daryá), a river of Central Asia; supposed to have changed its course before 1000 A.D., and to have resumed its ancient bed in 1878. The Oxus navigated as far as Faizabad Kali (Afghan frontier) by the Russians under adm. Baturin; reported, 11 Dec. 1894.

OXYGEN, a gas (named from the Greek *oxus*, sharp, as being generally found in acids), is the most abundant of all substances, constituting about nine-tenths of the solid earth, and forming about one-tenth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. It is now largely produced with about 5 per cent. of inert nitrogen by the Brin method from atmospheric air (1893). Oxygen was liquefied by Raoul Pictet at Geneva (pressure, 320 atmospheres, temp. 140° below zero Cent.), 22 Dec. 1877. See *Ozone*.

Professor Dewar obtained 2 cubic centimetres ($\frac{1}{16}$ of a fluid oz.) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas), temp. 140° below zero Cent. (by Wroblewski and Olzewski's method), at the Royal Institution, London, in the presence of the prince and princess of Wales, 26 June, 1884. He exhibited for the first time some solid oxygen in the form of snow (temperature -200° Cent. -400° Fahr.), produced by placing liquid oxygen in a partial vacuum, at the Royal Institution 27 May, 1886.

Professor Dewar exhibited between 300 to 400 centimetres liquid oxygen at the Faraday Centenary, 26 June, 1891. The feeble magnetism of oxygen, demonstrated by Faraday, was shown by Professor Dewar to be greatly increased when reduced to the liquid state by a temperature of 180° below zero centigrade; announced 10 Dec. 1891. Some liquid oxygen placed in the magnetic field sprang to the poles and adhered to them till evaporated; this was publicly exhibited by the professor at the Royal Institution, 10 June, 1892. Several pints of liquid oxygen and liquid air were then produced in the presence of the audience.

At a meeting of the Royal institution, 20 Jan. 1893, prof. Dewar exhibited some of the remarkable properties of liquid oxygen and air, and he showed how the liquid state could be maintained longer by surrounding it with a very high vacuum. Prof. Dewar reported to the Royal society that he had obtained solid air in the form of ice, a mysterious body, 9 March, 1893. Further researches reported, 22 Jan. 1897. Prof. Dewar was awarded the Rumford medal of the Royal society in 1894.

A statue of Priestley, by F. J. Williamson, at Birmingham, was unveiled by professor T. H. Huxley, 1 Aug. 1874, the centenary of the discovery of oxygen. This was also celebrated at Northumberland, Pennsylvania, where he was buried, Feb. 1804.

A method of obtaining oxygen from air, devised and patented by M. Margis, of Paris. The principle is that of dialysis, or diffusion under pressure, Sept. 1882. See *Gas* (liquefaction).

By the explosion of a cylinder of compressed oxygen the carrier was killed, 15 March, 1895.

OXYGEN HOME, 2, Fitzroy square, London; founded for the treatment of ulcers and wounds by oxygen gas, about 1866; the oxygen is supposed to turn the toxins or poisons secreted by certain micro-organisms into oxy-toxins or antidotes.

OYER AND TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to *hear and determine* treasons, felonies, &c., 1285.

O YES! A corruption of the French *oyez*, hear ye! The ancient term still used by a public crier and by the usher of courts of justice to enjoin silence and attention.

OYSTER (the Latin *Ostrea edulis*). British oysters are celebrated by the Roman satirist Juvenal (Sat. iv. 140) about 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1827). In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found successful.

An act for promoting the cultivation of oysters in the United Kingdom, passed Aug. 1866
One for the preservation of oyster fisheries 3 May, 1867
Certain restrictions of the Oyster Fisheries act, 1862, removed by the Fisheries act 1868

The fisheries (oyster, crab, and lobster) act forbids the sale of deep-sea oysters between 15 June and 4 August; and the sale of others, between 14 May and 4 August; passed 10 Aug. 1877

Professor Huxley at the Royal Institution asserts the uselessness of restrictions and a close time for oysters, and the uncertainty of culture, 11 May, 1883

Artificial breeding greatly promoted by professor Brooks of Baltimore (who discovered non-hermaphrodite), lieutenant Winslow, U.S., and M. Bouchen-Brandely, announced June, 1884

Act for the cultivation of oysters in Ireland passed Dec. 1877

Dean of Winchester and other guests at a banquet poisoned by eating oysters, contaminated by sewage. The dean subsequently died 22 Dec. 1902

Typhoid epidemic in Hampshire, occasioned by consumption of Emsworth oysters (see *Times*, 11 July, 1903) Dec. 1902-Jan. 1903

Committee representing the oyster trade to consider the contamination of oysters by sewage, pass various resolutions 5 Jan. "

At Colchester an oyster merchant was heavily fined for selling oysters which had been polluted with sewage 24 Aug. 1907

Oysters, about 1830 the commonest of food, are now becoming scarcer and scarcer, although their reproduction is about a million-fold. A committee recommend a close time for dredging, viz. 1 May to 1 Sept., deep-sea fishing to be restricted, as at present, from 15 June to 15 Aug.; no oyster to be sold under 2½ inches in diameter. The Whitstable beds in 1875 are said to have produced about 79,564,000 oysters; value about 55,140l.

American and Portuguese oysters are now largely imported.

Oysters successfully cultivated at Arcachon, near Bordeaux, 1889.

OZOKERIT, a mineral hydro-carbon found in Moldavia and Wallachia. From it is distilled a substance suitable for making candles, introduced in the autumn of 1871.

OZONE (from the Greek *ozein*, to yield an odour), was discovered by Schönbein, of Basel, in 1840, when experimenting with the then newly-invented battery of sir Wm. Grove, and was recognised by him successively as a minute constituent of the oxygen gas resulting from the electrolysis of water effected by a current of high tension; of air or oxygen through which electric discharges have taken place; and of air in which moist phosphorus has been undergoing slow oxidation.

Marignac determined the action of ozone on various substances to be due to their oxidation . . . 1845

Ozonometers constructed . . . 1858

M. Schönbein announced his discovery of another modification of oxygen, which he termed *antozone*, hitherto found only in the compound state (in peroxides of sodium, potassium, &c.) . . . 1859

The French Academy of Sciences appointed a committee of eminent philosophers to inquire into the nature and relations of ozone . . . 4 Dec. 1865

Andrews and Tait demonstrated ozone to be a condensed form of oxygen . . . 1860, "

This further established by Soret and Brodie, by quantitative reactions. (Odling suggested and Brodie proved ozone to be 3 parts of oxygen compressed into the space of 2) . . . 1872

Ozone, generated by a current produced by Wilde's magneto-electric machine, employed to bleach sugar, by Edward Beane's patent . . . Aug. 1866

Liquefied by Hautefeuille and Chappuis . . . Oct. 1880

Other properties since discovered . . . 1881-4

The inhalation of ozone recommended as a remedy for phthisis; the institution at St. Raphael on the Mediterranean opened for the purpose; reported . . . Dec. 1891

M. Emile Andreoli's system for the commercial production of ozone economically carried on by Messrs. Allen & Hanbury in London . . . July, 1893

M. Otto, in Paris, discovers the means of purifying water by ozone; reported . . . 6 Feb. 1902

Radium reported to possess the property of converting oxygen into ozone . . . 1903

P.

PACIFICATION, EDICTS OF, the name usually given to the edicts of toleration granted by the French kings to the protestants; see *Ghent*.

1st edict, by Charles IX., permitting the exercise of the reformed religion near all the cities and towns in the realm Jan. 1562

2d edict, the reformed worship permitted in the houses of lords justiciaries, and certain other persons, March, 1563

3d edict, these edicts revoked, and all Protestant ministers ordered to quit France in fifteen days 1568

4th edict, allowing lords and others to have service in their houses, and granting public service in certain towns 1570

5th edict, in Aug. 1572, the same monarch authorised the massacre of St. Bartholomew (see *Bartholomew*).]

6th edict, of Pacification by Henry III., April; revoked, Dec. 1576; renewed for six years . . . Oct. 1577

7th edict, several edicts were published against the protestants after the six years expired.]

8th edict, of Henry IV., renewing that of Oct. 1577 . . . 1591

10th edict, of Pacification of Nismes (*which see*) . . . 14 July, 1629

PACIFIC CABLE. See *Electric city*. Bill passed 6 Aug. 1901; amended, 7 Aug. 1902.

PACIFIC ISLANDERS. See *Kidnapping Acts*.

PACIFIC OCEAN, the largest of the five oceans of the globe. It was first discovered in 1513 by Vasco Núñez de Balboa, and received its name from Magellan in 1521. Sir Francis Drake was the first Englishman who sailed upon it in 1577. The Santa Cruz and Duff islands annexed by Gt. Britain, June, 1898; Wake island, by U.S.A., Dec. 1898; 4 others annexed by Gt. Britain, Dec. 1900; 3 more, May, 1903. See *Magellan*; *Steam*, 1851; *Weeks*, 1856; *Kidnapping Acts*; *Panamá*.

PACIFIC RAILWAY, North America, from Omaha city, Missouri, to Sacramento, California, 700 miles, opened 12 May, 1869. For new Pacific railway, see *Canada*, 1881 *et seq.* By means of this railway, the China and Japan mails were conveyed from Yokohama to London in 25 days; received 13 May, 1891.

PADDINGTON, a parliamentary borough, West London, returning two members; municipal borough by London Government act, 1899 (10 members, 60 councillors). Population, 1909, 50,574. St. Mary's Church, Paddington-green, the old parish church, erected on the site of an ancient church, consecrated 1791; St. James's Church erected 1845, and made the parish church. On Paddington-green, now with the old churchyard converted into a public garden, stands a statue of Mrs. Siddons, the famous actress, whose remains are interred in the churchyard of St. Mary's. In the same burial ground are interred Haydon, the artist; Collins, the painter; and Nollekens, the sculptor. The Paddington canal was opened 1 July, 1801. The Lock hospital, established in 1737, was removed to its present site from Grosvenor-lace in 1842.

PADLOCKS are said to have been invented by Beecher at Nuremberg, 1540, but are mentioned much earlier.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon

after the fall of Troy. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, and a member of the Lombard league, Padua was ruled by the Carrara family from 1318 with a short interruption till 1405, when it was seized by the Venetians. The university was founded about 1220. It was closed through disturbances, 1848-50.

PAGANS, the heathen, worshippers of idols, not agreeing in any set form or points of belief. See *Idols*. Constantine's nephew, Julian, attempted their restoration, 361; but Paganism was renounced by the Roman senate in 388, and finally overthrown in the reign of Theodosius the younger, about 391.

PALÆOGRAPHY, the science which deals with ancient manuscripts, their decipherment, date, origin, and authenticity; distinguished from *Epigraphy*, which treats of writings on hard substances as stone or metal. The oldest existing MSS., written on sheets of papyrus, have been found in the tombs of Egypt. The most important is the *Papyrus Prisse*, found in a tomb of the XIXth dynasty; stated to be the oldest book in the world. Papyrus rolls, chiefly parts of the Book of the Dead, are numerous. The chief ancient MSS. which have been preserved are those written on parchment or vellum. See *Diplomatics*, *Writing*. Palæographical society founded 1873, dissolved,

1 July, 1895. M. Léon Gautier, eminent palæographer, born 1832, died Aug. 1897.

PALÆOLOGI, a family which reigned as emperors of the east from 1260 to 1453. George Palæologus raised Alexius Comnenus to the throne in 1081, and thereby founded his own family. Andrew, the last Palæologus, son of Thomas, ruler of the Morea, after the overthrow of his father, became a Mahometan at Constantinople about 1533. A person who called himself John Anthony Palæologus Lascaris died at Turin, Sept. 1874. His claims were doubted.

PALÆONTOLOGY (from the Greek *palaios*, ancient, and *onta*, beings), treats of the evidences of organic beings in the earth's strata. It combines biology and geology (*which see*). Wm. Buckland, Cuvier, Mantell, Agassiz, Owen, Edward Forbes, Cope, Marsh, and Blainville, all of the 19th century, may be reckoned as fathers of this science. The Palæontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. The journal "Palæontographica" (German) began 1851. Professor Owen's "Palæontology" was published in 1860. "Nearly 40,000 species of animals and plants have been added to the *Systema Nature* by palæontological research." *Huxley*. PALAIS ROYAL, Paris, originally Palais Cardinal, built for cardinal Richelieu by Lemercier, 1620-36, received its present name when occupied by Louis XIII., to whom the cardinal gave it shortly before his death in 1642. Louis XIV., in 1692, gave it to his nephew Philippe, duke of Orleans, and it became the residence of his successors. It was confiscated by the republic in 1793, after the execution of Philippe Egalité. Louis Philippe resided in it, 1814-31. It suffered much injury at the revolution in 1848. Under the Second Empire it became the residence of prince Jerome and his son Napoleon. The buildings were much injured by fire by the communists, 24 May, 1871.

PALATINATE OF THE RHINE, one of the seven ancient electorates of Germany. It was long united to Bavaria, but was separated in 1294.—Frederic V., the elector palatine in 1610, married in 1613 Elizabeth, the daughter of James I. of England, and thus was an ancestor of queen Victoria; see *Hanover*. In 1619 he was elected king of Bohemia, but lost all by his defeat by the Austrians at Prague in 1620. The Palatinate was horribly ravaged by Tilly in 1622, and by the French in 1688. Several thousands of the ruined peasantry were sent to America by the British government and people. The elector palatine, Charles Theodore, inherited Bavaria in 1778; since when the two electorates have been united; see *Bavaria*.

PALATINE. William the Conqueror made his nephew, Hugh De Abrincis, count palatine of Chester with the title of earl, about 1070. Edward III. created the palatine of Lancaster, 1539; see *Lancaster*, *duchy of*. The bishopric of Durham also made county palatine. There is also mention made of the county palatine of Hexham, in 33 Henry VIII. c. 10, which then belonged to the archbishop of York, but by the 14th of Elizabeth it was dissolved, and made part of the county of Northumberland. The palatinate jurisdiction of Durham was separated from the diocese, and vested in the crown, 6 Will. IV. c. 19, 21 June, 1836.

PALE, the name given to the part of Ireland colonised by the English—viz., parts of the counties of Louth, Dublin, Meath, and Kildare. Anglo-Irish rulers were termed lords of the pale. Their arbitrary exactions led to a royal commission of inquiry in 1537. The defection of the lords of the pale in 1641 was followed by a general insurrection, and the royal cause was ruined in 1647. In 1652 Ireland was committed to the rule of four commissioners.

PALERMO (N. W. Sicily), the ancient Panormus. It has been held by the Carthaginians, 415 B.C.; taken by the Romans, 254 B.C.; by the Saracens, A.D. 832; and by the Normans, 1072. Here Roger II. was crowned king of Sicily, 1130. Palermo was the scene of the Sicilian Vespers (*which see*), 30 March, 1282. It suffered from earthquake in 1726 and 1740. The king Ferdinand resided at Palermo from 1806 to 1815, while Naples was ruled by Joseph Bonaparte and Joachim Murat. It revolted against the tyranny of Ferdinand II. 2 Jan. 1848. It was attacked by general Filangeri, 29 March, 1849, and surrendered on 14 May. It was taken by Garibaldi, 6 June, 1860. An insurrection against the abolition of the monastic establishments broke out in Palermo on 13 Sept. 1866, and was suppressed by the royal troops with much bloodshed; order was restored by 22 Sept. Population, 1901, 310,352; 1909, 341,387.

PALESTINE, the name given by Moses (*Exodus* xv., 14) and other ancient writers, to a broad strip of land on the east coast of the Mediterranean Sea, which originally included Philistia, but was afterwards limited to the part termed the land of Canaan or Israel, Judea, and the Holy Land; *the Jews*. After being several times conquered by the Saracens, and retaken from the 7th to the 10th century, and after being the scene of the wars of the Crusades (*which see*), and other conflicts, Palestine was united to the Ottoman empire by Selim I. in 1516. See *Bible* (note), *Holy Places*, and *Syria*.

PALIMPSEST (from the Greek, *palin*, again; and *psao*, I efface), parchments written on after the previous writing had been partially effaced. Cardinal Mai, by removing the second writing in some MSS., recovered the original. This was the case with Cicero's "De Republica," published by Mai in 1821. It had been covered by a treatise of Lactantius.

PALLADIUM, the statue of Pallas, said to have fallen from heaven near the tent of Ilus, as he was building Ilium, which the oracle of Apollo declared should never be taken so long as the Palladium was found within its walls. The Greeks are said to have obtained it by craft during the Trojan war, 1184 B.C.; but some writers assert, another statue was taken, and that the real Palladium was conveyed from Troy to Italy by Æneas, 1183 B.C., and preserved by the Romans with the greatest secrecy in the temple of Vesta.—**PALLADIUM** is a rare metal, discovered in platinum ore by Dr. Wolaston in 1803.

PALLAS, a minor planet, was discovered by Olbers, at Bremen, 28 March, 1802.

PALLISER'S CHILLED SHOT, see *Cannon*.

PALL MALL, a street near St. James's palace, London, is named from a French game at ball (*pale-mail*, being a wooden mallet), resembling the modern croquet, having been played there about 1600, and introduced into England about 1660. Among eminent inhabitants were Neil Gwyn and Dr. Thomas Sydenham. The **PALL MALL GAZETTE**, a daily (evening) independent political and literary journal, first appeared 7 Feb. 1865, and was edited by Mr. Frederick Greenwood till 1 May, 1880, when it became a liberal paper, edited by Mr. John Morley, who retired 25 Aug. 1883. Price *2d.* reduced to *1d.* 2 Jan. 1882. The paper became again conservative, Dec. 1892.

PALL, PALLIUM, in the Roman Church an ensign of dignity of a strictly personal character conferred by the pope upon archbishops. It consists of a narrow band of pure white wool, taken from two lambs, which annually, on the feast of St. Agnes, are brought to the church of St. John Lateran, and after being blessed are presented to

the pope; the wool is afterwards made up into pallia by a community of nuns. The pallium, which is worn around the shoulders, is ornamented with four purple crosses, and its form is indicated in the arms of the archbishop of Canterbury. By a decretal of pope Gregory XI. (about 1370), no archbishop could call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop, till he had received his pall from the see of Rome. The pall was first worn by an Irish archbishop in 1152, when Gelasius was recognised as primate of all Ireland. The late cardinal Vaughan was invested with the pallium in the pro-cathedral, Kensington—the first occasion of its investiture in England since the time of cardinal Pole. Archbishop Bourne, present archbishop of Westminster, received the pallium from pope Pius X. at Rome, 12 Nov. 1903.

PALMERSTON ADMINISTRATION.*

The resignation of the Aberdeen administration was announced 1 Feb. 1855, but nearly all its members returned to office soon after under lord Palmerston, lord Derby and lord John Russell having each in vain endeavoured to form an administration. On 22 Feb. Mr. Gladstone, sir James Graham, and Mr. Sidney Herbert resigned on account of the Sebastopol inquiry. Lord John Russell resigned 13 July. Lord Canning was appointed governor-general of India, 4 July, 1855. This cabinet resigned 22 Feb. 1858, in consequence of a vote of censure upon it for introducing the Foreign Conspiracy bill, and was succeeded by the Derby administration (*which see*).

First lord of the treasury, Henry viscount Palmerston.

Lord chancellor, lord Cranworth.

President of the council, earl Granville.

Lord privy seal, duke of Argyll; next, earl of Harrowby; afterwards the marquis of Clanricarde.

Secretaries—home, sir George Grey; *foreign*, earl of Clarendon; *colonial*, Sidney Herbert (resigned Feb. 22); afterwards lord J. Russell (resigned July 13); sir William Molesworth (died 22 Oct. 1855); next Henry Labouchere; *war*, lord Panmure.

Chancellor of the exchequer, W. E. Gladstone (resigned 22 Feb.); next, sir G. Cornewall Lewis.

First lord of the admiralty, sir James Graham (resigned 22 Feb.); next, sir Charles Wood.

Board of control, sir Charles Wood; next, R. Vernon Smith.

Public works, sir Wm. Molesworth; next, sir B. Hall (appointed 22 July, 1855).

Postmaster-general, viscount Canning (appointed governor-general of India, 4 July); next, duke of Argyll.

President of the board of trade, lord Stanley of Alderley.

Marquis of Lansdowne, without office.

Chancellor of the duchy of Lancaster, earl of Harrowby; next, M. T. Baines (appointed 24 Nov. 1855).

PALMERSTON-RUSSELL ADMINISTRATION. The second Derby administration (*which see*) resigned 11 June, 1859. Earl Granville was requested by queen Victoria to form an administration, and obtained the support of lord Palmerston, but not of lord John Russell: the two last then

agreed to form a cabinet, which came into office 18 June, 1859. On the decease of lord Palmerston, 18 Oct. 1865, earl Russell became premier; see *Russell*.

First lord of the treasury, Henry viscount Palmerston.

Lord high chancellor, John lord Campbell (died 23 June, 1861); succeeded by sir Richard Bethell, made Lord Westbury, who resigned 4 July, 1865; succeeded by lord Cranworth.

Lord president of the council, earl Granville.

Lord privy seal, duke of Argyll.

Secretaries—foreign affairs, lord John (afterwards earl Russell; colonies, duke of Newcastle; succeeded by Edward Cardwell, 8 April, 1864; *home*, sir G. Cornewall Lewis; succeeded by sir George Grey; *war*, Sidney (afterwards lord) Herbert; succeeded by sir G. C. Lewis (died 13 April, 1863), and by earl de Grey (1 May); *India*, sir Charles Wood.

Chancellor of the exchequer, Wm. Ewart Gladstone.

First lord of the admiralty, duke of Somerset.

President of the board of trade, Thos. Milner Gibson.

[This office was offered to Mr. R. Cobden, and declined by him.]

Secretary of state for Ireland, Edward Cardwell; succeeded by sir R. Peel (not in the cabinet).

Chancellor of the duchy of Lancaster, sir George Grey, bart.; succeeded by Edward Cardwell; and by earl Clarendon, 8 April, 1864.

Postmaster-general, earl of Elgin (proceeded to China in April, 1860); succeeded by lord Stanley of Alderley, appointed Sept. 1860.

Poor-law board, T. Milner Gibson; succeeded by Charles P. Villiers (9 July, 1860).

PALMERSTON'S ACT for abatement of smoke nuisance (16 & 17 Vict. c. 128), 20 Aug. 1853.

PALMISTRY, or **CHIROMANCY**, the art of studying the lines in the palm, to discover the character and fortunes of a person, practised in ancient India and Greece. The subject was noticed by Aristotle, Pliny, Paracelsus, Albertus Magnus, and Cardan. A work by Johann Hartlieb was published in Augsburg, 1475. M. le capitaine d'Arpentigny and M. Adrien Desbarrolles are chief modern authorities. A. R. Craig's "Book of the Hand" (1867), L. Cotton's "Palmistry" (1890). Dr. F. Galton published his study of "Finger Prints," 1893. See *Fortune Telling*.

PALM-SUNDAY. When Christ made his entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, 30. It is usual, in some countries, to carry palms on the Sunday before Easter, hence called Palm-Sunday. In many parts of Great Britain Palm-Sunday is known as "Flowering-Sunday" from the fact that the graves of departed relatives are decorated with flowers and wreaths on this day.

PALMYRA (Syria) was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. At the death of Odenatus, Zenobia assumed the title of queen of the East, in 267. Aurelian defeated her at Emesa, in 272, and made her captive, 273, and killed Longinus, the philosopher, her friend. Palmyra is now inhabited by a few Arab families.

PAMIRS, a lofty mountain ridge in Turkestan, Central Asia.

Col. Gromtchevski's Russian exploring expedition stopped by Afghan and British outposts in 1890. Capt. Yonoff, with a military force, excludes capt. Younghusband and lieut. Davison, travellers, from the little Pamir, on the frontiers of Afghanistan, &c. The Russians afterwards retire on the advance of a party of Goorkhas Aug. 1891. The Russian government declares the action of capt. Yonoff to be illegal, and apologises, Feb. 1892.

* Henry John Temple was born 20 Oct. 1784; was educated at Harrow, Edinburgh, and Cambridge; succeeded his father, viscount Palmerston, 1802; became M.P., and a junior lord of the admiralty, 1807; was secretary-at-war, 1809-28, and a secretary for foreign affairs, Nov. 1830-34, April, 1835 to Sept. 1841, and July, 1846 to Dec. 1851, and home secretary, Dec. 1852 to March, 1855, when he became first lord of the treasury. He was created lord warden of the cinque ports, 31 March, 1861; and master of the corporation of the Trinity house, 16 June, 1862. He sat for Tiverton, 1835-65. He died 18 Oct., and was buried in Westminster abbey, 27 Oct. 1865. His statue at Romsey, by M. Noble, was uncovered by earl Russell, 21 July 1868. Lady Palmerston died 11 Sept. 1869, aged 82.

Col. Yonoff, with a body of Russian troops, re-occupies the part which he quitted in 1891. A collision ensued with the Afghans, attributed by col. Yonoff to their offensive conduct; 1 Russian and about 15 Afghans killed, about 24 July; col. Yonoff's letter transmitted to the viceroy, 23 Aug. 1892.

Russians evacuate the Pamirs and return to Russian territory, 14 Sept.—7 Oct. 1892.

China resists the claims of Russia, about 8 March, 1893. A Russian expedition under col. Yonoff starts, 1 June, 1893.

The Russians (exploring) troops under col. Yonoff withdrawn, reported 13 Nov. 1894.

PAMPELUNA (N. E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, 27 and 29 July, 1813. It surrendered to the British, 31 Oct. in that year. Population, 1909, 29,329.

PAMPHLETS. Their first appearance amongst us is generally thought to have been in opposition to the church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, cheaply printed, and (what was then of great importance) easily concealed. Political pamphlets began in Edward VI.'s time, and were very numerous in the 17th and 18th centuries (by De Foe, Swift, Steele, and others).

Paul Louis Courier wrote "Simple Discours" and other pamphlets against the priests and nobles after the restoration of the Bourbons, 1815. His "Pamphlet des Pamphlets," defending the pamphleteer (published, 1824), probably led to his murder, 10 April, 1825.

Large collections are in the libraries of the British Museum and the Royal and London Institutions.

Certain enactments respecting pamphlets removed by an act passed July, 1869.

PANAMÁ, the isthmus which joins the two Americas; see *Darien*. Across this a ship canal was proposed by the *Bulwer-Clayton treaty*, 10 April, 1850. A treaty for the construction of a ship canal through the isthmus by the United States was signed by representatives of that government and that of Colombia 26 Jan. 1870. A railway was opened in 1855. In that year a new state, New Granada, was divided into eight federal states, one of which is named PANAMÁ. A revolution took place in Panamá, on 9 March, 1865; the government was deposed, and don Jil Colunje became president; succeeded by Vincent Olarte, 1 Oct. 1866. Panamá is now subject to Colombia (*which see*). Aspinwall, a town at the extremity of the Panama railway, named after its originator, Mr. Aspinwall, a New York merchant, was officially named Colon in 1870. The government overthrown by Colombian troops without bloodshed, about 12 Oct. 1875. Civil war between dr. Damaso Cervera and gen. B. Ruiz; sharp fights; the *Morro* beats the *Alajuela*, 14 Oct. 1884. General Santo Domingo Vila installed as president, 8 Jan. 1884. Rebellion; government steamer *Ecuadorian* captures the rebel ship *Buacho*; much slaughter announced, 24 Dec. 1884. Insurrection in Panamá; conflict with Colombian troops; about 20 people killed. Insurgents destroy Aspinwall railway terminus, &c.; the United States government intervenes with troops, &c. to protect colonists and restore buildings; rebels said to be totally defeated, 16 March-April. Railway reopened with protected trains, 13 April, 1885. Rebellion; severe fighting round Panamá, much

slaughter, 24 July; quiet restored, the liberals surrender, 26 July, 1900. Republic proclaimed, 3 Nov. 1903. Panamá is now (1910) divided into 7 provinces, each under a governor. Capital, Panamá. President, Dr. Manuel Amador Guerrero, elected 1904. José Domingo de Obaldia assumed office, 1 Oct. 1908, and Dr. C. A. Mendoza, 1 Mar. 1910. Various interchanges of visits between the different branches of the Celtic race have taken place since at the Welshisteddfod and the Breton fêtes. The picturesque ceremony of the "Marriage of the Sword" performed at these meetings.

PANDEAN PIPES (said to be the Greek *psaltria*, and the *ugab* or organ of the Bible, *Gen.* iv. and *Psalms* cl.), usually seven tubes, popular in Britain early in the 19th century. A "Preceptor" for Davies' "new invented syrinx" was published in 1807.

PANDECTS, a digest of the civil law, made by order of Justinian, 529. It is stated that a copy of these Pandects was discovered in the ruins of Amalfi, 137; removed from Pisa in 1415, and preserved in the library of the Medici at Florence, as the *Pandectæ Florentinæ*.

PANDOSIA (Bruttium, S. Italy). Here Alexander, king of Epirus, was defeated and slain by the Bruttians, 326 B.C. Lævinus, the Roman consul, was defeated between Heraclea and Pandosia, in Lucania, by Pyrrhus, king of Epirus, 280 B.C.

PANEAS or PANIUS (Syria). Here Antiochus the Great defeated Scopas, the Egyptian general, and his Greek allies, 108 B.C.

PANNONIA, part of Illyria, now Hungary. Was finally subdued by Tiberius, A.D. 7-9.

PANOPTICON OF SCIENCE AND ART, in Leicester-square, erected in 1852-3 for a chartered company, by Mr. T. H. Lewis, the architect; was opened in 1854 for lectures, musical performances, &c. It had a very large electrical machine, battery, &c. The speculation did not succeed; the building was sold in 1857, and in March, 1858, was opened for concerts and horsemanship, and called the *Alhambra* (which see).

Jeremy Bentham's book "Panopticon, or the Inspection House," an establishment in which persons may be kept under inspection, published 1791; see *Milbank*.

PANORAMAS, invented by Robert Barker, are bird's-eye views painted round the wall of a circular building. In 1788 he exhibited at Edinburgh a view of that city, the first picture of the kind. He then commenced similar exhibitions in

London in 1789, having adopted the name "*Panorama*," and was ultimately enabled to build commodious premises in Leicester-square for that purpose. Panoramas were exhibited on the continent by himself and his associate, Robt. Fulton. M. Thuyet, having bought the invention from Fulton, exhibited panoramas in Paris about 1796. See *Colosseum*. (Barker died in April, 1806.) J. P. Lautherbourg, a painter, termed the panoramist, invented the "*Eidophusikon*," natural phenomena represented by moving pictures, exhibited at Lisle-street, Leicester-square, 3 April, 1781. "This was certainly not a panorama." *Dr. Kimbault*.

PANORMUS, see *Palermo*.

PANTAGRAPH (from the Greek *panta*, all things, and *graphein*, to write, and incorrectly termed *Pentagraph*), an instrument for copying, reducing, or enlarging plans, &c., invented by Christopher Scheiner, about 1603; improved by professor Wallace, and called "*Eidograph*," about 1821.

PANTHAYS, Mahometans in the Chinese province, Yunan, became independent under a sultan, during the Tae-ping revolt, 1851-64. After its suppression, the Panthays, after a severe struggle, were also subdued. Their capital, Talioc, was captured, and its inhabitants cruelly massacred in Feb. 1873. The Panthays sent an embassy to England in 1872, without effect. Sultan Suleiman committed suicide.

PANTHEISM, the formula of which is "everything is God, and God is one," was especially taught by Xenophanes, who died 500 B.C. The doctrine is attributed to Spinoza, Kant, Fichte, and other philosophers. Amalric of Chartres, censured for holding the doctrine, recanted 13th century. He is said to have asserted that "all is God, and God is all."

PANTHEON, at Rome, a circular temple built by Agrippa, the son-in-law of Augustus, 27 B.C. It had niches in the wall, where the image or representation of a particular god was set up; the gates brass, the beams covered with gilt brass, and the roof covered with silver. Pope Boniface III. dedicated it to the Virgin Mary and all the saints, by the name of S. Maria della Rotunda, or "ad Martyres," A.D. 608.*—The **PANTHEON IN LONDON** was erected by subscription, and opened 27 Jan. 1772; formed into an opera house; burned down 14 Jan. 1792; rebuilt for masquerades in 1795; opened as theatre, 1812; made a bazaar in 1834. The bazaar was closed in 1867, and the premises are now occupied by a firm of wine merchants.

PANTHEON, Paris, a magnificent building founded by Louis XV. in pursuance of a vow, dedicated to Ste. Geneviève; built by Soufflot, 1757-90; named Pantheon, and decreed to be a mausoleum for eminent men, 1791; made a church, 1806; named Ste. Geneviève, 1821; re-named Pantheon, 1831; again a church, Nov. 1852; again secularised, 27 May, 1885; received the remains of Victor Hugo, 1 June, 1885. The remains of Voltaire and Rousseau found there by a commission, 18 Dec. 1897.

PANTOGEN, see *Atomic Theory*.

PANTOMIMES were representations by gestures and attitudes among the Greeks, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Comic masques were introduced here from Italy about 1700. The first regular

* Victor Emmanuel, first king of united Italy, was buried here, 17 Jan. 1878; also king Humbert, 9 Aug. 1900.

English pantomime is said to have been "Harlequin executed," produced by John Rich at the Lincoln's-inn-fields theatre, 26 Dec. 1717. See *Theatres*.

"PAPAL AGGRESSION." In a consistory holden in Rome, 30 Sept. 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among them was Dr. Nicholas Wiseman, vicar-apostolic of the London district, who was at the same time nominated lord archbishop of Westminster.

The answer of the bishop of London (Dr. Blomfield) to a memorial from the protestant clergy of Westminster, against a Romish hierarchy in this country, was followed by the "Durham" letter from lord John Russell, then chief minister of the crown, to the bishop of Durham, in which he severely censured, not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England. 4 Nov. 1850

Immediately from every quarter of England addresses poured in to queen Victoria, calling upon her and the government to resist the usurpation; 6700 addresses, it is said, had been voted from nearly as many meetings up to 31 Dec. "The Ecclesiastical Titles act, 14 & 15 Vict. c. 60, prohibited the constitution of bishops of pretended provinces under a penalty of 100*l*. Aug. 1851

It was not acted upon, and was repealed 24 July, 1871

PAPAL INFALLIBILITY. This dogma, maintained by one party in the Roman church, tolerated by another, and utterly rejected by a third, was adopted and promulgated at the general council at Rome 18 July, 1870, a great many bishops having withdrawn. The dogma was inculcated by the false decretals of Isidore and others, but not adopted by the council of Trent; see *Councils XXI*. Professor Döllinger, the historian, was excommunicated at Munich for rejecting this dogma, 18 April, 1871: he was made a D.C.L. at Oxford about 16 June following; see *Old Catholics*.

PAPAL STATES, see *Rome*, and *Popes*.

PAPER, see *Papyrus*. Paper was probably made in Egypt, and centuries before the Christian era. It was made of cotton about 600 A.D.; and of rags about 1300.* White coarse paper was made by sir John Spielman, a German, at Dartford, in England, 33 Eliz. 1580; and here paper mills were erected. *Stow*. Paper for writing and printing manufactured in England, and an act passed to encourage it, 2 Will. III. 1690; before this time we paid for these articles to France and Holland 100,000*l*. annually. The French refugees taught our people; we had made coarse brown paper almost exclusively, until they came among us; we made white paper first in 1690. *Anderson*. Paper-making by a machine was suggested by Louis Robert, who sold his model to Didot, the great printer, who brought it to England, and, conjointly with Fourdrinier, perfected the machinery. The latter obtained a patent for paper-making machinery in 1801; and for manufacturing paper of an indefinite length in 1807. The machinery was improved by Bryan Donkin. A sheet of paper,

13,800 feet long, and 4 feet wide, was made at Whitehall-mills, Derbyshire, in 1830; and one 21,000 feet long, and 6 feet 3 inches wide, was made at Colyton in Devon in 1860. Esparto, a Spanish grass, first imported in 1857, has been largely employed in the paper manufacture since 1864. In 1866 wood was largely manufactured into paper at Philadelphia; and at the Paris exhibition, 1867, fine specimens of wood-paper were shown; see *Parchment* (note). Wood pulp now principally used in the manufacture of paper for newspapers. The paper duty, imposed in 1694 (producing about 1,400,000*l*. annually), after having been the subject of agitation for several years, was repealed in 1861. Hop-stalks said to be used for paper-making in France, 1873.

Paper-exhibition at Berlin, Aug. 1878: contained not only great varieties of paper, but a paper house, tables, chairs, carpets, barrels, boats, &c.

Paper pianoforte exhibited, soft tone, July, 1885. Causes of the deterioration of paper, investigated by a committee of the Soc. of Arts, Sept. et seq. 1897, report in their journal, 20 May, 1898.

Materials for paper-making imported into the United Kingdom:—1895, 533,594 tons, value 2,776,896*l*.; 1900, 724,747 tons, value 3,078,729*l*.; 1905, 806,309 tons, value 3,802,501*l*.; 1908, 968,372 tons, value 4,610,997*l*. Output of manufactured paper for United Kingdom:—1909, 884,550 tons, value 13,328,000*l*.; materials for manufacture cost 8,816,000*l*., and nearly 40,000 people employed in the manufacture.

284 paper mills in the United Kingdom, 1908 (225 England and Wales, 59 Scotland and 7 Ireland).

PAPER-HANGINGS, &c. Stamped paper for this purpose was first made in Spain and Holland about 1555. Made of velvet and floss, for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country during the present century.—**PAPER BRICKS** have been made in America; and paper tubing for water and gas, made by M. Jaloureaux of Paris, was shown in 1860.

PAPER-MONEY, see *Banks* and *Greenbacks*.

PAPIER MACHÉ. This manufacture (of paper-pulp combined with gum and sometimes with china clay) has existed for above a century. Martin, a German snuff-box maker, is said to have learnt the art from one Lefevre about 1740. In 1745 it was taken up by Baskerville, the printer at Birmingham, and soon spread over that district. Papier maché is now largely employed in ornamenting the interior of buildings, &c.

PAPIN'S DIGESTER (see *Steam*), invented about 1681. Denis Papin, a French philosopher, assisted Boyle in his experiments about 1678.

PAPUA, see *New Guinea*.

PAPYRUS, the reed from which was made the paper of Egypt and India, used for writings until the discovery of parchment, about 190 B.C. The earliest known specimens of papyri were found in the monuments attributed to the third dynasty, 3966 B.C. Many papyri were discovered at Herculaneum in 1754; and many were collected by the French in Egypt, 1798. A manuscript of the *Antiquities of Josephus* on papyrus, among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris, was restored in 1815.

Fac-similes of the largest known papyrus, found in 1855, behind Modinet Habu on the Nile, and now in the British Museum, were published with translations by the trustees in 1876. Other important publications of papyri by the trustees of the B. M. which concerned the Egyptian "Book of the Dead" are:—The papyrus *f* Ani, 1894-5; facsimiles of the papyri of Hunefer, Anhai, Kerasher, and Netchemet, with

* Mr. Joseph Hunter (in the *Archæologia*, xxxvii.) states that the earliest paper which he had seen was a MS. account-book, dated 1302, probably of Bordeaux manufacture. He gives engravings of manufacturers' marks, French and English, the dates of which range from 1330 to 1431. He also gives an extract from a work by Bartholus, a writer of the middle of the 14th century, in which mention is made of a paper manufactory in the Marches of Ancona. At the end of Wynkin de Worde's edition of Bartholomæus De Proprietatibus Rerum, 1494, its thin paper, made by John Tate in England, is commended.

supplementary text from the papyrus of Nu., 1899. Other papyri of the ancient Egyptians have also been published with religious, magical, medical, and moral compositions from the collections in the British and foreign museums.

A papyrus MS. of the poems of Bacchylides acquired by the British Museum, announced, Dec. 1896; a facsimile, edited by Frederick G. Kenyon, Vol. II. published, Dec. 1898.

Greek papyri, "Logia" of our Lord, &c., found at Behnsa during excavations by Mr. F. B. Grenfell and Mr. A. S. Hunt, reported, 29 May, 1897. Fresh discoveries, 1903. Books published; see *Egyptian Exploration*, 1897.

PARABLE, see *Fable*.

PARACHUTE, see *Balloons*, 1785, 1802, 1837.

PARACLETE (Greek for comforter), a name given by Abélard to the convent which he founded in Champagne in 1122, of which Héloïse became the first abbess.

PARADISE LOST, the great English epic by John Milton, appeared first in ten books in 1667, in twelve books in 1674; the author received for the first three editions (1,500 copies) 5*l.* each. "Paradise Regained" was published in 1671.

MS. of Bk. I. of "Paradise Lost" offered for sale at Sotheby's, 4,750*l.* bid; reserve price, 5,000*l.* MS. a letter of the first Jacob Tonson's on Dr. Bentley's edition of Milton with it, not sold, 25 Jan. 1904. Subsequently bought by an American collector and taken to the United States, March, 1904.

PARADOX (Greek, *para*, beyond; and *doxa*, opinion), something contrary to common opinion.

PARAFFIN (from *parum affinis*, from its having little affinity with anything), also called photogen, a solid substance, somewhat like spermaceti, produced by distillation of coal, and first obtained by Reichenbach in 1830, and by Dr. Christison about the same time. It was procured from mineral oil by Mr. James Young about 1848 at Alfreton in Derbyshire. Soon after it was largely obtained from Boghead coal. It is also obtained from Irish peat. It makes excellent candles. Much litigation ensued through interference with Mr. Young's patent-right. In 1882, 120,508 cwts. were imported into the United Kingdom; 1894, 618,051 cwts.; 1898, 946,933 cwts.; 1902, 1,024,080 cwts.; 1906, 935,080 cwts.; 1908, 915,443 cwts.

PARAGUAY, a republic in S. America, discovered by Juan Diaz de Solis in 1515, and by Sebastian Cabot in 1526; conquered by Alvarez Nuñez in 1535, and civilized by the Jesuits, who in 1608 commenced their missions there and held it till their expulsion in 1768. Paraguay rose against the Spanish yoke in 1811. In 1814, Dr. José G. R. Francia was elected dictator; he ruled vigorously but tyrannically; he was succeeded on his death in 1840 by Vibal. From 1814 to 1844 the country was rigidly closed against foreigners. The president, C. A. Lopez, elected in 1844, was succeeded by his son, Francis S. Lopez, Sept. 1862 (see below). Paraguay was recognised as an independent state by the Argentine Confederation, 14 July, 1852, and by Great Britain in 1853. Capital, Asuncion. Population in 1909, 715,000 (88,000 Indians). PARALLEL MOTION, see *Motion*.

PARASOLS were used by the ancient Egyptians. A new form (said to have been devised by the duchess of Rutland) came into general use about 1820.

PARC AUX CERFS, a deer-park at Versailles, near Paris, made by Louis XII., and kept as such till 1694, when Louis XIV. took the land for building. The name was given to a house erected on it by madame Pompadour, popularly said to form a seraglio for Louis XV. in 1755. It was closed by madame Du Barry in 1771.

PARCEL POST (advised by Rowland Hill in 1842). Proposed in Parliament by Mr. H. Fawcett 27 March; act passed, 18 Aug. 1882; came into operation 1 Aug. 1883.

Maximum weight raised to 11 lbs. from 1 May, 1886.
Parcel Post extended to India, British Burmah, Aden, Gibraltar, and Egypt 1 July, 1885, and other countries since.

Coldbath fields prison was converted into offices for the Parcel Post, 1887.

Coaches started to convey parcels to various parts from London, 1892.

Parcels conveyed 1883-4, 21,000,000; 1891-2, 51,000,000; 1894-5, 56,668,161; 1898-9, 71,398,622; 1900-1, 79,780,427; 1902-3, 89,318,638; 1904-5, 97,200,000; 1906-7, 103,875,992; 1908-9, 113,000,000; an average number to each person in the United Kingdom of 25.

PARCHMENT. Invented for writing books by Eumenes (some say by Attalus), of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B.C. Parchment-books from this time became those most used, and the most valuable as well as oldest in the world are written on the skins of

goats. It should be mentioned that the Persians and others are said to have written all their records on skins long before Eumenes' time. Parchment superseded by paper of a special kind for grants of probate, Dec. 1900.

Parchment paper (or vegetable parchment) was invented and patented in 1857, by Mr. W. E. Gaine, C.E., who discovered, that when paper is exposed to a mixture of two parts of concentrated sulphuric acid and one part of water for no longer time than is required to draw it through the fluid, it is immediately converted into a strong tough skin-like material. It must be instantly washed with water. Its great strength points out many applications of this material, e.g., maps, school and account-books, and drawing-paper. In 1859 it appeared that a similar invention had been made in Paris by Figuiet and Pourmarède in 1846.

PARISHES. Their boundaries in England are said to have been fixed by Honorius, archbishop of Canterbury, 636, or by Alfred about 890. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000. Parish registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See *Registers*, and *Benefices*. Number of ecclesiastical parishes or districts in 1893, 1,400. By the Local Government act, passed 5 March, 1894, *Parish and District Councils* were appointed for rural parishes of 300 inhabitants or upwards, with suitable arrangements, to consist of from 5 to 15 members (women eligible) annually elected, on 15 April; 1st election in 7,142 parishes, 4 Dec. *et seq.* 1894. Parish councils were established in Scotland by the Local Government act of 1894. Parish registers of several counties are now published by the Parish Register Society, 1897. Parish councillors (tenure of office) act passed, 20 June, 1899.

PARKESEINE. A substance, composed of gun-cotton, obtained from various vegetable bodies, and oil. It can be formed with the properties of ivory, tortoiseshell, wood, india-rubber, gutta-percha, &c. It is the invention of Mr. Alexander Parkes, of Birmingham, and was shown by him at the Exhibition in 1862. In Dec. 1865, at the Society of Arts, parkesine was proved to be an excellent electric insulator, and therefore likely to be suitable for telegraphic purposes.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made

was that of Woodstock, formed by Henry I., 1125. Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. PARK'S TRAVELS. Mungo Park set sail on his first voyage to Africa, under the patronage of the African society, to trace the source of the river Niger, 22 May, 1795; and returned 22 Dec. 1797, after having fruitlessly encountered great danger. He again sailed from Portsmouth on his second voyage, 30 Jan. 1805, appointed to a new expedition by government. It is stated that his party fired on the natives when resisted, and that he was killed at Broussa on the Niger, Nov. 1805.

PARLIAMENT (from the French *parlement*, discourse) derives its origin from the Saxon general assemblies, called *Wittenagemot*. The name was applied to the assemblies of the state under Louis VII. of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw. I., 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (1592), that this name was used even in the time of Edward the Confessor, 1041. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Hen. III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Hen. III. 1265. *Dugdale's Summons to Parliament*, edit. 1685; see *Commons*

and *Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke*.* The ninth edition of May's "Practical Treatise on Parliament" was published in 1883; tenth edition, with many changes by sir Richard Palgrave, published Dec. 1893. Mr. G. Barnett Smith's elaborate "History of the English Parliament" was published Nov. 1892; see *Triennial* and *Septennial*. Return of the names of members of parliament from the earliest period to the present time, ordered by the house of commons, 4 May, 1876, and 9 March, 1877. Part I. (1213-1702), published 1879. * When the royal assent is given to a public bill, the clerk says "Le roi [or la reine] le veut." If the bill be a private bill, he says "Soit fait comme il est désiré." If the bill have subsidies for its object, he says, Le roi [or la reine] remercie ses loyaux sujets, accepte leur bénévolence, et aussi le veut." If the king do not think proper to assent to the bill, the clerk says, "Le roi [or la reine] s'avisera" which is a mild way of giving a refusal. It is singular that the French language should still be used.

* Termed the "Palace of Westminster." The first contract for the embankment of the river was taken in 1837, by Messrs. Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born 1795, died 1866) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building. The great clock in the clock tower was built 1859 by the firm of Dent from the designs of the late lord Grimthorpe. The cost was 4,080*l.*, the bells increasing the total to 11,934*l.* The dials are 22½ ft. in diameter; hour hands 11 ft. long; minute hands 14 ft.; distance between each minute on the dials 14 ins. The only larger dial in the world is at Mechlin church—40 ft. wide; but there is no minute-hand, which makes an enormous difference in the power required to wind the clock. The clock reports its own rate to Greenwich by electricity twice a day. The average error is under 2 seconds a day. In the recess of 1894-5 extensive alterations were made in the house and private rooms to promote the comfort of the members and public.

PARLIAMENT OF IRELAND, it is said, began with conferences of the English settlers on the hill of Tara, in 1173. Writs for knights of the shire were issued in 1295. The Irish parliament met last on 2 Aug. 1800; the bill for the union having passed.

PARLIAMENT OF SCOTLAND consisted of barons, prelates, and abbots, and occasionally of burgesses. A great national council was held at Scone by John Balliol, 9 Feb. 1292; and by Robert Bruce at Cambuskenneth, in 1326. A house of commons was never formed in Scotland. The parliament of Scotland sanctioned the act of union on 16 Jan. 1707, and met for the last time on 22 April, same year.

The parliament hall, Edinburgh castle, erected by James I., in 1434, was thoroughly and judiciously restored by M. Hippolyte Blanc, at the expense of the late Mr. Nelson and family. The hall was re-opened, Feb. 1891. The undertaking was greatly promoted by the investigations of lords Napier and Ettrick, major Gore Booth, and Mr. R. Chambers.

PARLIAMENT OF PARIS was instituted by Philip Augustus II., in 1190, and was made the chief court of justice in France by Philip IV.; at his suggestion it revoked a bull of pope Boniface VIII.,

PARNELLITE COMMISSION.

Sir James Hannen, president; Mr. justice Day and Mr. justice A. L. Smith, constituted by act passed 13 Aug. 1888. Preliminary meeting: sir C. Russell, Mr. Asquith, and others counsel for Mr. Parnell and other M.P.'s (65); attorney-general sir Richard Webster, Mr. W. Graham and others for the *Times*, 17 Sept. 1888; proceedings begin 22 Oct. 1888. Long examination of witnesses; examination of Mr. Parnell's alleged letters, 14 Feb. 1889; after the evidence and cross-examination of Mr. Soames, solicitor, and Mr. Macdonald, manager of the *Times*, and of Mr. Houston, from whom the alleged letters were obtained, Mr. Richard Pigott, Irish journalist, who had sold them to Mr. Houston, on cross-examination by sir Charles Russell, grossly prevaricated 20-22 Feb. "
 Mr. Pigott fled to Paris, and his confession that he forged some of the alleged letters, and had given false evidence, was read in the court, 27 Feb. (57th sitting); the attorney-general on behalf of the *Times* accepted the confession and expressed deep regret for the publication of the letters, 27 Feb., which was confirmed by the *Times*, 28 Feb.  18th to 128th sitting: Sir Henry James' address for the *Times*. 31 Oct.-22 Nov. "

The report of the commissioners was laid before parliament, 13 Feb. 1890. The following is an abridgment of their conclusions:—I. That the respondent members of parliament collectively were not guilty of conspiring for the absolute independence of Ireland as a separate nation, but that some of them (Messrs. M. Harris, Dillon, W. O'Brien, W. Redmond, O'Connor, J. Condon, and J. J. O'Kelly), together with Mr. Davitt, established the Land League mainly for that purpose. II. That the respondents [44] did conspire to promote agrarian agitation, the non-payment of rents, and the expulsion of the landlords (styled the English garrison). III. That they acquitted Mr. Parnell and others of the charge of insincerity in their denunciations of the Phoenix Park murders, and affirmed the fac-simile letter to be a forgery. IV. They found that the respondents did disseminate the *Irish World* and other

newspapers, intending to incite to sedition and other crimes. V. That the charges of incitement to crime, except by intimidation, and of payments for that purpose, were not proved. VI. They found that the respondents did not denounce the system of intimidation, though they knew its effects; and VII. That they defended persons charged with agrarian crime, and supported their families, but it was not proved that they subscribed for testimonials for, or were intimately associated with, notorious criminals, or aided their escape by payments. VIII. That they found that the respondents made payments to compensate persons injured in the commission of crime. IX. That the respondents did invite and obtain the assurance and co-operation of the Physical Force Party in America, including the Clan-na-Gael, and did not repudiate the action of that party.

[Certain allegations against Mr. Parnell were declared not proved.]

The report adopted with thanks, by the commons, after 7 days' debate, 3-11 March; by the lords (without a division), 21 March, 1890. Mr. Gladstone's amendment rejected by 339 to 268.

In consequence of the issue of the divorce suit, capt. O'Shea, Mrs. O'Shea, and Mr. C. S. Parnell, 15-17 Nov. 1890, Mr. Parnell was requested by Mr. W. E. Gladstone and other English liberals to retire from the chairmanship of the Irish party. He declined, and issued a manifesto to the people of Ireland, giving an account of private conferences with Mr. Gladstone and Mr. John Morley, 29 Nov. The Irish R.C. bishops demanded Mr. Parnell's retirement, 3 Dec. After a week's angry discussion in the commons' committee-room No. 15, the Irish party divided; Mr. Justin McCarthy, the vice-chairman, was elected chairman by 44 members; Mr. Parnell continuing chairman with 26 followers, 6 Dec. Manifestoes of the two parties issued 9, 10 Dec. "

PAROCHIAL CHARITIES COMMISSION, see *London*, 1878, and under *Charities*, 1883.

PARRICIDE. There was no law against it in Athens or Rome, such a crime not being supposed possible. About 172 B.C., L. Ostius having killed his father, the Romans scourged the parricide; sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752; see *Trials*, March, 1890.

PARSEES or **GUEBRES**, the followers of Zaradusht, called by the Greeks Zoroaster, who is doubtfully said to have lived before sixth century B.C. (see *Magi*), dwelt in Persia till 638, when, at the battle of Kadseah, their army was decimated by the Arabs, and the monarchy annihilated at the battle of Nâhâvend in 641. Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees). Sir Jamsetjee Jejeebhoy, the 3rd baronet, was elected president of the community there, July, 1877. Mr. Dadabhai Naoroji, a Parsee merchant, was for several years professor of Gujarati at University college, London. He was nominated as M.P. for the Holborn district, but not elected, 1886; elected 6 July, 1892, for Central Finsbury; visits Bombay, Dec. 1893. See *Bombay*. A Parsee fire temple at Bombay was consecrated, Nov. 1891.

Cooverbai, an eminent scholar, promoter of native female education, the mother of Mr. M. M. Bhow-nagree, M.P. for N.E. Bethnal-green (1895), died, aged 65, at Bombay, 6 Feb. 1896.

Death of Bai Motilal Wadia, great benefactress to Bombay, aged 87, 15 June, 1897.

Sir Dinshaw Manockjee Petit, a noble benefactor, died at Bombay, aged 78, 5 May, 1901.

"PARTANT POUR LA SYRIE," popular French song; words by comte Alexandre de Laborde; music by Hortense Beauharnais, wife of Louis Bonaparte, king of Holland, about 1800. The music became very popular after her son became emperor, in 1852, as Napoleon III.

PARTHENON (from Greek *parthenos*, virgin), a temple at Athens dedicated to Minerva, erected about 442 B.C. In it Phidias placed his renowned statue of that goddess, 438 B.C. The roof was destroyed by the Venetians in 1687. Ruinous state of the building through earthquakes, described *Times*, 14 Aug. 1897. See *Elgin Marbles*.

PARTHENOPEAN REPUBLIC was established by the French at Naples (anciently called Parthenope), 23 Jan. 1799, and overthrown in June same year.

PARTHIA (Asia). The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed, A.D. 226; and his territories were annexed to the new kingdom of Persia founded by Artaxerxes, who had revolted against Parthia.

PARTICULARISTS. The name given to those Germans who desire the maintenance of the independence of the German states, and oppose their absorption into the empire. M. Gasser, one

of them, failed in an attempt to form a ministry in Bavaria, Sept. 1872. Particularism revived during the election in 1893.

PARTITION ACT, relative to the division of property sold by direction of the court of chancery, passed 25 June, 1638.

PARTITION TREATIES. The first treaty between England and Holland for regulating the Spanish succession (declaring the elector of Bavaria next heir, and ceding provinces to France) was signed 19 Aug. 1698; and the second (between France, England, and Holland, declaring the archduke Charles presumptive heir of the Spanish monarchy; Joseph Ferdinand having died in 1699), 13 March, 1700. Treaty for the partition of Poland; the first was a secret convention between Russia and Prussia, 17 Feb. 1772; the second between the same powers and Austria, 5 Aug. same year; the third was between Russia, Austria, and Prussia, 24 Oct. 1795.

PARTNERSHIP. The laws respecting it were amended in 1863 and 1890; see *Limited Liability*.

PARTY, see *Processions*.

PASIGRAPHY (from Greek, *pasi*, for all): a system which professes to teach people to communicate with each other by means of numbers which convey the same ideas in all languages. A society for this purpose was established at Munich; and the president, Anton Bachmaier, published a dictionary and grammar for German, French, and English, 1868-71; 4334 mental conceptions may be thus communicated.

PASQUINADES. Small satirical poems obtained this name about 1533.

At the stall of a cobbler named Pasquin, at Rome, idle persons used to assemble to listen to his sallies, to relate anecdotes, and rail at the passers-by. After the cobbler's death, his name was given to a statue to which lampoons were affixed.

PASSAROWITZ TREATY, concluded 21 July, 1718, between Germany and Venice, and the Turks, by which the house of Austria ceded certain commercial rights, and obtained from Turkey the Temeswar, Belgrade, and part of Bosnia, Servia, and Wallachia. The Turks gained the Morea.

PASSAU (Germany), **TREATY OF**, whereby religious freedom was established, was ratified between the emperor Charles V. and the protestant princes of Germany, 29 July and 15 Aug., 1552. In 1662 the cathedral and great part of Passau were consumed by fire.

PASSENGERS—by public vehicles, are protected by 1 & 2 Will. IV. c. 22 (1831), 1 & 2 Vict. c. 79 (1838), and 16 & 17 Vict. c. 33 (1853); another act was passed in 1889. Mr. Cleghorn, under whom the front seat on the near side of one of the general omnibus company's carriages had given way, recovered 400*l.* damages against the company, in a verdict by consent, in the Queen's bench, 10 Dec. 1856. The Ships Passenger act, 18 & 19 Vict. c. 119, passed in 1855, was amended in 1863; see *Campbell's Act*, and under *Railways*.

PASSIONISTS, a congregation of clerks of the holy cross, founded by St. Paul of the Cross, who died 1775, and was canonized by the pope 1867. A home was set up in England in 1841, and

others since. The monastery, Highgate, London, N., solemnly blessed by cardinal Manning, and opened, 16 July, 1876.

PASSION PLAY, see *Drama*.

PASSION-WEEK, the name given since the Reformation to the week preceding Easter, was formerly applied to the fortnight. Archbishop Laud says the two weeks were so called "for a thousand years together," and refers to an epistle, by Ignatius, in the 1st century, in which the practice is said to have been "observed by all." The week preceding Easter is termed "Holy Week," the previous week "Passion Week."

PASSION MUSIC: Gregory Nazianzen (A.D. 330-390) is said to have first set forth the history of the Passion in a dramatic form.

Guidetti, in 1866, published music for this subject, which has been treated since by many composers.

J. S. Bach's great "Passion Musik," first performed on Good Friday, 1729, has been revived with great success in this country, beginning with that "according to St. Matthew," 6 April, 1854.

PASSIVE RESISTANCE, the term used by the opponents of the Education act, 1902, in justification of their action in refusing to pay the rate levied for education on the alleged ground that the act gives an unfair advantage to the schools of the established church, and to its doctrinal teaching in the supported schools. Early in the spring of 1903 many nonconformists in London and the provinces refusing, as they stated, on conscientious grounds to pay the rate their goods were seized and sold. Much agitation has resulted and still (1905) continues, see *Education Acts 1902, 1903*.

Summonses issued to end of 1905: in London, 3,939; in the provinces, 61,145; distress sales in London, 69; in the provinces, 2,163; leagues, 647; imprisonments, once, 168; twice, 42; thrice, 13; four times, 6; five times, 3.

The case of *Headland v. Coster and Lamb*, heard (1905) on appeal before the master of the rolls, and lords justices Stirling and Mathew, established that the scale of costs under the act 57 Geo. III., c. 93, still applied to a distress for rates, and had not been repealed by 12 & 13 Vict., c. 14, *Distress for Rates act*, 1849.

PASSMORE EDWARDS' SETTLEMENT, Tavistock-square, St. Pancras, founded by Mr. Passmore Edwards with a gift of 15,000*l.*, the duke of Bedford 1500*l.*, to promote education, &c., partially used since 9 Oct. 1897; opened by Mr. John Morley, 12 Feb. 1898. See *Libraries*.

The Passmore Edwards-hall, built for the London university school of economics (Mr. Passmore Edwards gave 11,000*l.*, lord Rothschild 5000*l.*; site granted by the London County Council) in Clare market, Strand; opened by Lord Rosebery 29 May, 1902

PASSOVER, the most solemn festival of the Jews, instituted 1491 B.C. (*Exodus* xii.) in commemoration of their coming out of Egypt; because the night before their departure the destroying angel, who put to death the firstborn of the Egyptians, passed over the houses of the Hebrews without entering them; the door posts being marked with the blood of the Paschal Lamb killed the evening before. The passover was celebrated in the new temple, 18 April, 515 B.C. *Usher*.

PASSPORT SYSTEM forbids subjects to quit one country or enter another without the consent of the sovereign thereof. In 1858 the system was somewhat changed in this country, and the stamp duty on passports was reduced from 5*s.* to 6*d.*

Passports were abolished in Norway in 1859; in Sweden in 1860; and (with regard to British subjects) in France, 16 Dec. 1860; in Italy, 26 June, 1862; in Portugal, 23 Jan. 1863; and are falling into disuse in other countries. The passport system was established in the United States on 19 Aug. 1861. The passport system, revived in France on account of the war, 1 Aug. 1870, was abolished by M. Thiers, 10 April, 1872, in compliance with the wish of the British government.

PASTEL, a roll of paste made of different colours ground with gum water, used as a crayon. Pastel painting has been recently much practised on the Continent. The Society of British Pastellists, president sir Coutts Lindsay, first exhibited at the Grosvenor gallery, 18 Oct. 1890. Its members included Mr. Watts, Mr. Orchardson, and other eminent artists. Another started, exhibition at the Royal Institute, Piccadilly, opened, 4 Feb. 1899.

PASTEUR INSTITUTE, Paris, see under *Hydrophobia*. The remains of M. Pasteur (died 28 Sept. 1895) transferred from Notre Dame to a crypt in the institute, 26 Dec. 1896.

Monument to the memory of M. Pasteur, erected in the Place Breteuil, unveiled by president Loubet 16 July, 1904
Mr. Daniel Oisiris left an income, producing 30,000*l.* to 40,000*l.*, to the institute Feb. 1907

PASTON LETTERS, the correspondence of a Norfolk family, 1422-83, giving a picture of social life in England, were edited by sir John Fenn, and published in five volumes, quarto, 1787-1823. Their authenticity was questioned Sept. 1865, but was satisfactorily vindicated by a committee of the Society of Antiquaries in May, 1866. Part of the MS. was soon after purchased by the trustees of the British Museum. The publication of a new edition, by James Gairdner, with additional letters, 1872-5. The MS. of the second series with other letters was found in 1875, by Mr. Frere, of Roydon Hall, near Diss, Norfolk. The MS. of the first series, long lost from the Royal Library, found in the library of col. Geo. Tomline at Orwell Park, who died 25 Aug. 1889; announced April, 1890.

PATAY (France), where Joan of Arc, the maid of Orleans, was present, when the earl of Richemonte signally defeated the English, 18 June, 1429. Talbot was taken prisoner, and the valiant Fastolfe was forced to flee. In consequence, Charles VII. of France entered Rheims in triumph, and was crowned 17 July, following year, Joan of Arc assisting in the ceremony in full armour, and holding the sword of state, see *Joan of Arc*.

PATENT MEDICINES: received for stamps, year 1883-4, 159,238*l.*; 1894-5, 234,880*l.*; 1904-5, 331,439*l.*; 1906-7, 327,106*l.*; 1908-9, 315,489*l.*

PATENTS (from *pateo*, I lie open), licences and authorities granted by the king. Patents are said to have been granted for titles of nobility in 1344, by Edward III. They were first granted for the exclusive privilege of printing books, in 1591. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83 (1835), and 15 & 16 Vict. c. 83 (1852). By the latter COMMISSIONERS OF PATENTS were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord

advocate, and the solicitors-general for England, Scotland, and Ireland. In 1853 a journal was published under their authority, and indexes of patents, from March, 1617, to the present time. Specifications of patents may be consulted by the public at the Patent office, 25, Southampton-buildings, where the library, free to all, affords every facility to readers, and contains all the official publications, specifications, &c., of British and foreign patents; also text-books and technological journals. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertions of Mr. Bennet Woodcroft. Official journal published weekly.

An international congress for the protection of patents met at Vienna, Aug. 1873; at Paris, 6 March, 1883. Patent Design and Trade Marks Act, 46 & 47 Vict. c. 57, passed 25 Aug. 1883, began 1 Jan. 1884; amended 24 Dec. 1888. It greatly relieved patentees by lessening fees, &c. Other acts, 1886, 1901, 1902, which amend the law relating to the examination of applications for patents, and also that relating to compulsory licences. Sect. 1, which came into effect 1 Jan. 1905, provides for an official investigation in respect of each application for a patent in connection with which a complete specification has been filed.

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of 800*l.*, which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr. Edmunds was non-suited, 21, 22 June, 1872; and he failed in actions against several newspapers for printing a treasury minute. His appeal to the house of lords failed 16 June, 1873.

17,110 applications for patents in 1884; 16,101 in 1885; 17,162 in 1886; 18,051 in 1887; 19,103 in 1888; 21,008, 1889; 22,888, 1891; 24,169, 1892; 25,123, 1893; 25,386, 1894; 30,194, 1896; 30,958, 1897; 27,649, 1898; 25,800, 1899; 23,924, 1900; 28,972, 1902; 29,678, 1904; 30,030, 1906; 28,598, 1908.

Royal commission to enquire into the law relating to letters patent appointed 1862; Mr. Hindmarch's report issued 1864. In pursuance of recommendations for the formation of a roll of patent agents, the Institute of Patent Agents was registered 1882, chartered 1891. It has given much attention to legislation respecting patents.

New Patent Office facing Staple-inn, completed in 1897. Patent Law Amendment bill passed 1 Dec. 1902. Mr. Lloyd George's bill for the reform of the laws relating to patents passed 26 Aug. 1907. Patents and designs act, 1907, concerning manufacture on British soil; time of grace under, expired 28 Aug. 1908.

PATHOLOGY, the science of disease, much studied with experiments in the 19th and present century, and said to be advanced by vivisection. Wilks and Moxon, Wagner, Cornil and Ranvier, Payne, Hamilton, Virchow ("Cellular Pathology," 1856; he died 5 Sept. 1902), Koch, Pasteur (died 1895), and Lister, eminent pathologists. The Pathological society in London was founded, 1846.

Pathological institute at the London hospital, opened by sir H. Roscoe, 10 July, 1901.

PATHOMETER, an instrument to record automatically the distance travelled by a vehicle, also the various directions followed, and the hills ascended or descended; reported, Jan. 1899.

PATNA (N. India). Near here the English, under major Carnac, defeated the emperor Shah Alum on 15 Jan. 1761. The town was acquired by the British by their defeat of the sanguinary Meer Cassim, 6 Nov. 1763. Population, 1909, 148,639.

PATRIARCHS (a name given to Abraham, Isaac, Jacob, and his sons). The ecclesiastical

historian Socrates gives this title to the chiefs of Christian dioceses, about 440. It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 6th century. The first founders or heads of religious orders are called patriarchs.

Nectarius, bishop of Constantinople, as *ex-officio* chief of the Eastern bishops, was nominated patriarch of Constantinople at the second general council of Constantinople, 9 July, 381. This led the way to the schism between the Eastern and Western churches.

PATRICIANS, the highest citizens or aristocracy of Rome; their authority began with the city itself; see *Rome*.

PATRICK'S CATHEDRAL, ST. (Dublin), was founded in 1190 by archbishop Comyn, on the site of an old church. The cathedral was desecrated in 1546, and used as a law court; restored 1553. After renovation by the munificence of the late sir Benjamin Lee Guinness, it was re-opened 29 Feb. 1865. Several persons killed by the falling of a flying buttress, 14 Sept. 1882. See *Dublin*.

Gen. Lord Grenfell unveils a memorial in the cathedral to the officers and men of the 5th royal Irish lancers who fell in the S. African war, 26 Aug. 1904.

PATRICK, ST., KNIGHTS OF, an order instituted by king George III., 5 Feb.; the statutes were signed 28 Feb. 1783. The number was originally fifteen.—St. Patrick's Benevolent Society, London, instituted 1784. It sprang from the Irish Charitable Society, founded in 1704. See *Shamrock*.

PATRIOTIC BROTHERHOOD, see *Ireland*, 1883.

PATRIOTIC FUNDS, established to encourage the army and navy in times of war.

1. Founded by the subscribers to Lloyd's, "to animate the efforts of our defenders by sea and land" by providing a fund for the relief of themselves when wounded, and of their widows and orphans, and for granting pecuniary rewards and badges of distinction for valour and merit, 20 July, 1803; 24 Aug. 1809, 424,832*l.* had been received, and 331,617*l.* expended. From 1803 to 1826 the total sum received was 629,823*l.* 14*s.* 1*d.*
2. A commission was appointed to raise and distribute a fund bearing this name, for the relief of the families of those who might fall in the Russo-Turkish war, June; a great meeting held Nov. 1854. Large sums were collected from this country and the colonies, amounting to 1,171,270*l.* in July, 1855; finally to 1,460,861*l.* In Jan. 1874, 1,303,386*l.* expended.

200,000*l.* appropriated to founding an asylum for 300 orphan girls (the Royal Victoria Patriotic Asylum) on Wandsworth common, the first stone of which was laid by queen Victoria, 11 July, 1857.

3. A large fund contributed for the relief of the sufferers by the Indian mutiny, Aug. 1857, 434,729*l.* collected up to Nov. 1858. An act for its administration was passed, 12 Aug. 1867, amended 1886; see *India*, 1857.

The alleged mal-administration of the Patriotic Fund was brought before the house of commons by baron de Worms 9 Aug. 1880, and in Jan. 1881.

PATRONAGE OF LIVINGS by Laymen in England is very ancient; in *Scotland* was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the disapprobation of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874. In England a church patronage bill (to check sales and give rights to parishioners, &c.), introduced by the archbishop of Canterbury, 13 May, 1886; a bill passed by the lords, 1 April, 1887; another bill read third time, 12 May, 1893; another bill passed committee in the lords, 1895; dropped. See *Benefices*.

PAULIANISTS or **PAULINIANS**, followers of Paul, bishop of Samosata, afterwards patriarch of Antioch, 260, who are said to have denied Christ's divinity and the trinity; he was excommunicated 269 by a council at Antioch.

PAULICIANS, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montford, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL JONES, a Scotsman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778. The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

His remains discovered in Paris and removed to the United States by a squadron of U.S. warships under the command of rear-admiral C. D. Sigbee (see *France*). 500 marines escort the body from Paris to Cherbourg, 7 July, 1905.

PAUL'S CATHEDRAL, ST. (London). For details of its history, see Dugdale's "History of St. Paul's," 1658 and 1716; Dean Milman's "Annals of St. Paul's," 1868; and Mr. Wm. Longman's "History of the Three Cathedrals dedicated to St. Paul," 1873. Many royal pageants have taken place in the cathedral.

PAUL'S CROSS, ST. (London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

Mr. Henry C. Richards, K.C., M.P. for East Finsbury, 1895-1905; died 1 June, 1905; left 3,000*l.* for the erection of a new cross on the site of the old cross.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory

of the number of fishes taken by Peter (*John* xxi. 11). The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and another building erected by George Smith. William Lilly was the first master. *Timbs*. The claim of the Mercers' company to be owners instead of trustees of Colet's estate was set aside by the vice-chancellor, 11 Feb. 1870. The school ordered to be removed to West Kensington; site bought, June, 1878. New building designed by Mr. Waterhouse opened by lord Selborne, 23 April, 1884. The number of scholars has been increased. New schemes for the management of the school were issued by the charity commissioners, 1876, 1879, and 1893; after much discussion and opposition a scheme was sent to the committee of council of education for approval, May, 1894; finally modified, July, 1894; new arrangement, Feb. 1899; further arrangement, 16 June, 1900, under which scheme it is now governed.

Organ erected by subscription in memory of the late prof. Jowett in large hall of the school, enclosed in new oak case with life-size bust of Dr. Jowett in centre; pitch pine boarding all round the walls and gallery of the hall replaced by oak panelling at the cost of 1,400*l.*, presented by the governors. Collection of engravings of distinguished old Paulines, presented by Dr. J. L. Collinson-Morley, and placed above the oak panelling. Organ-case unveiled by rev. P. Clementi-Smith, master of the Mercers' company, 5 Oct. 1904
St. Paul's Industrial School, Mile End, ordered to be closed by the home secretary in consequence of serious charges against the managers; brought forward by Mrs. Surr, member of the metropolitan School Board, Nov.; she is warmly commended in the home secretary's letter, 15 Nov.; who remitted the case to the public prosecutor . . . Nov. 1881
 Mr. T. Scrutton, manager, sued Miss Helen Taylor, and obtained 100*l.* for damages; the charges were withdrawn . . . 30 June, 1882

PAUPERS, see *Poor*.

PAVAN, Pavane, or Pavin, was a slow dance of the 16th and 17th centuries, sometimes accompanied by singing.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Apian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825; see *Wood Pavement*. Asphalt has been much used since 1869. Wood reported to be the best for road paving in London, May, 1876, and is now (1905) extensively used for paving the leading thoroughfares in London, and other cities and large towns.

PAVIA (N. Italy), the ancient *Ticinum* or *Papia*. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men

with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est sauvé*.

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (which see). Soon afterwards it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; in 1909 there were 5,278 in the United Kingdom (England and Wales 4,497, Scotland 468 and Ireland 313). In the metropolitan district 718. In 1860 an act was passed enabling pawnbrokers to charge for every ticket describing things pledged. The acts relating to pawnbrokers were amended in 1856, 1859, 1860. The law was consolidated in the pawnbrokers' act passed 10 Aug. 1872.

PAX, a small tablet, generally silver, termed, *tabula pacis* or *osculatorium*, kissed by the Roman Catholic priests and laity; substituted for the primitive kiss of peace in the early church. The pax is said to have been introduced about the 12th century.

PAYMASTER-GENERAL. In 1836 the army and navy pay departments were consolidated into the paymaster-general's-office, sometimes held by a cabinet minister.

PEACE. A temple was dedicated to peace by Vespasian, 75; see *Fireworks, Treaties, Justices, &c.*—"PEACE OF RELIGION" (between Catholics and protestants) was signed at Augsburg, 15 Sept. 1555.

A PEACE SOCIETY, founded 1816, for the promotion of universal peace; holds annual meetings; proposed amalgamation with the International Arbitration and Peace association (founded by Mr. Lewis Appleton in 1880), Dec. 1884. The association divided in May, 1886, when the British arbitration association was founded by Mr. Appleton. A congress of the friends of peace, from all parts of the world, commenced its sittings at Paris, 22 Aug. 1849. It met in London at Exeter hall, 30 Oct. following; and at Frankfurt, in St. Paul's church, 22 Aug. 1850; at Birmingham, 28 Nov. 1850; and at Exeter hall, 22 July, 1851. Many meetings and international congresses since.

Mr. Bright and Mr. Cobden were among the most conspicuous members of the society. A deputation from the Peace society, consisting of Messrs. J. Sturge, A. Pease, and another quaker friend, stated their views to the emperor of Russia at St. Petersburg, at an interview granted them in Feb. 1854

PEACHES are said to have been introduced into this country from Persia about 1562.

PEARLS, mentioned *Job* xxviii. 18. M. Réaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000l. sterling. One which was brought in 1574 to Philip II., of the size of a pigeon's egg, was valued at 14,400 ducats. A pearl named the *Incomparable*, spoken of by De Boote, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400l.

"**PECULIAR PEOPLE**," a small sect founded in London by Wm. Bridges and Jas. Ban-yard in 1838; chief seat Essex. Two members, Thomas and Maryanne Wagstaffe, were tried and acquitted of manslaughter, 29 Jan. 1868. They had neglected getting medical assistance for their sick child, and depended on the efficacy of their elders' prayers and anointing it with oil (*James* v. 14). Many cases of healing by these means are asserted. On 8 May, 1872,

a father was convicted for neglecting to get medical advice for his child who died of small pox; and the sect agreed to modify their practice. Establishments for healing diseases by prayer exist in Germany.

At another trial, Thomas Hines was acquitted, in accordance with the opinion of the court; Baron Pigott held that the case did not amount to criminal neglect because the prisoner had not called in a doctor to his sick child, 19 Aug. 1874; similar cases since; 1875-6. John Robert Downes (for neglect respecting scarlet fever) sentenced to 3 months' imprisonment 21 Sept., 1876. Thos. Senior sentenced to 4 months' imprisonment for manslaughter of his infant child, 15 Dec. 1898; similar cases since.

John Cook, carman, one of the peculiar people, committed for trial on charge of manslaughter, of two of his children by neglecting to procure medical aid, 22 May; sentenced to 9 months' hard labour, 26 June, 1906.

PEDESTRIANISM. Euchidas, a citizen of Plataea, is said to have gone from thence to Delphi to bring the sacred fire. This he obtained, and returned with it the same day before sunset, having travelled 125 English miles. No sooner had he saluted his fellow citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he cried out, "Rejoice, we are conquerors!" and immediately expired.

Foster Powell, the English pedestrian, performed many astonishing journeys on foot. His expedition from London to York and back again, in 1788, is said to have been completed in 140 hours.

Captain Barclay, for a wager (on which many thousands of pounds depended), walked 1000 miles in 1000 successive hours, each mile in each hour, in forty-two days and nights (less 8 hours). His task was accomplished on 10 July, 1869.

Thomas Standen, aged 60, of Salehurst, walked 1100 miles in 1100 hours (1 mile in 1 hour), finished, July, 1811.

Richard Manks, a native of Warwickshire, undertook (in imitation of captain Barclay) to walk 1000 miles in 1000 hours: the place chosen was the Barrack-tavern cricket ground, in Sheffield; he commenced on Monday, 17 June, 1850, and completed the 1000 miles, 29 July following, winning a considerable sum.

On 7 Oct. 1861, a 12 miles foot-race was held, when Levett, the champion of England, ran 7 miles in 37 minutes 27 seconds; Deerfoot, a Seneca Indian, ran 12 miles in 65 minutes 5 seconds; and Mills ran 10 miles in 54 minutes 10 seconds; other races followed.

On 11 May, 1863, Deerfoot was beaten by White, who ran 10 miles in 52 minutes 14 seconds.

PEDLARS, see *Hawkers*. The Pedlars act passed, Aug. 1871.

PEDOMETER AND ODOMETER, apparatus for measuring the distance traversed by a walker or carriage.

Odometers, or road-measurers, are said to have been known in the 15th century; and improvements in them were made in England by Butterfield, about 1678; and by Meynier, in France about 1724

Wm. Grayson's odometer, or road-measurer, to be attached to carriages, was patented 1 Dec. 1851

Ralph Gouts' pedometer for indicating the steps taken by a walker, was patented 4 Nov. 1799

Wm. Payne's pedometer for the waistcoat pocket, patented 15 Feb. 183

Other improvements since.

PEEL ACTS. Among the most important were the Bank acts of 1819 and 1844; the acts amending the criminal laws, 1827; dividing parishes into districts, 1843, and the act repealing the corn laws in 1846.

PEEL ADMINISTRATIONS.* The first succeeded the Melbourne administration, which was broken up on the retirement of lord Althorp, the chancellor of the exchequer, in Nov. 1834.

* Sir Robert Peel was born 5 Feb. 1788; entered parliament in 1809; became under-secretary of the colonies in 1811, chief secretary for Ireland in 1812; M.P. for Oxford in 1818 (when he resigned his office); secretary for home department in 1822; resigned office and re-appointed in 1827; resigned again in 1830; became premier in 1834 and 1841 (see above). He was thrown from his horse 29 June, and died 2 July, 1850. He greatly relaxed the severity of our criminal code in 1827 *et seq.*; established the new police, and carried the catholic emancipation bill in 1829, and the repeal of the corn laws in 1846. Statues have been erected to him—at Salford, in 1852; at Tamworth, Leeds, Bury, and Manchester, in 1853; and in London and Birmingham in 1855.

Sir R. Peel, then in Italy, was summoned home, the duke of Wellington holding the seals of office in the interim. They both resigned in April, 1835. In May, 1841, sir R. Peel carried a vote of want of confidence in the Melbourne cabinet, but did not take office; and in Sept. of that year, he became again premier. He lost the support of the conservative party by obtaining the repeal of the corn laws, and resigned 29 June, 1846.

FIRST ADMINISTRATION (Dec. 1834).

Sir Robert Peel, *first lord of the treasury and chancellor of the exchequer*.
 Lord Lyndhurst, *lord chancellor*.
 Earl of Rosslyn, *lord president*.
 Lord Wharnclyffe, *privy seal*.
 Henry Goulburn, *duke of Wellington, and earl of Aberdeen, home, foreign, and colonial secretaries of state*.
 Earl de Grey, *first lord of the admiralty*.
 Lord Ellenborough and Alexander Baring, *board of control and trade*.
 Sir Edward Knatchbull, *paymaster of the forces*.
 J. C. Herries, *secretary of war*.
 Sir George Murray, *master-general of the ordnance, &c.*

SECOND ADMINISTRATION (Sept. 1841).

Sir Robert Peel, *first minister*.
 Duke of Wellington in the cabinet without office, *aft. commander-in-chief*.
 Lord Lyndhurst, *lord chancellor*.
 Lord Wharnclyffe, *lord president*.
 Duke of Buckingham, *lord privy seal* (succeeded by duke of Buccleuch).
 Sir James Graham, *earl of Aberdeen, and lord Stanley, home, foreign, and colonial secretaries*.
 Henry Goulburn, *chancellor of the exchequer*.
 Earl of Haddington, *first lord of the admiralty*.
 Earl of Ripon, *board of trade* (succeeded by W. E. Gladstone).
 Lord Ellenborough, *India board* (succeeded by lord Fitzgerald; succeeded by earl of Ripon).
 Sir Henry Hardinge, sir Edward Knatchbull, sir George Murray, &c.
 (Terminated 29 June, 1846, by sir Robert's resignation.)

PEELITES, a name given to gentlemen, whigs and tories, who adhered to sir Robert Peel, after his defeat by the conservative party, on account of his free trade measures carried in 1846. The principal were Henry Goulburn, W. E. Gladstone, Sidney (afterwards lord) Herbert, sir James Graham, Edward Cardwell, sir George Clerk, lord Lincoln (afterwards duke of Newcastle), and lords Canning and Elgin, and others. Several of them became members of the Palmerston and Aberdeen administrations (*which see*).

PEEL PICTURES. The family collection (70) were purchased for the National gallery for 75,000*l.* 1871.

PEEP-O'-DAY-BOYS, insurgents in Ireland, who visited the houses of their antagonists at break of day, in search of arms. They first appeared 4 July, 1784, and were long the terror of the country; see *Defenders*.

PEERESSES of the United Kingdom (*in their own right*): 7 in 1885, 18 in 1910: viscountess Hambleton and baronesses Amherst of Hackney, Beaumont, Berkeley, Berners, Burton, Clifton, Cromartie (countess); Darcy de Knayth (countess of Powis), De Ros, Dorchester, Fauconberg and Conyers (countess of Yarborough), Gray, Herries (duchess of Norfolk), Kinloss, Macdonald of Earncliffe, Melfort (countess), Wentworth.

PEERS, see *Lords and Genealogy*.

PEGU, a province of the Burmese empire, discovered by the Portuguese in 1520. Pegu, the capital, was taken by major Cotton, with 300 men,

in June, 1852, without loss; and afterwards abandoned. It was again occupied by the Burmese and strongly fortified, with a garrison of 4000 men. It was recaptured by general Godwin with 1200 men and two guns, in two hours, with the loss of six killed and thirty-two wounded. The province was annexed to our Indian possessions, by proclamation, 20 Dec. 1852, and has since prospered. In Feb. 1862, it was united with Arracan and Tenasserim as British Burmah.

PEIHO, see *China*, 1859, 1860.

PEISHWA, the prime minister of the Mah-rattas, seized the sovereign power and settled at Poonah, 1749. The title was abolished in 1818.

PEIWAR PASS (Kotul), in the Khoorum valley, Afghanistan. Here general (afterwards Lord) Roberts, with the 72nd highlanders and the Ghoorkas, defeated the Afghans, 2 Dec. 1878. Major Anderson and capt. Kelso were killed, and about 80 men were killed and wounded. Enemy lost heavily.

PEKIN, the capital of China, was built by Kachilai-Khan, grandson of Genghis-Khan, about 1267. Here was held the court of the Mongol or Yuan dynasty, 1280 to 1368. In 1369, Hung-wu, of the Ming dynasty, removed to Nankin, which was the capital till Yung-lo removed his court to Peking in 1410; and by him and his successors the city was enlarged, fortified, and beautified. It was visited by lord Macartney, Sept. 1793; surrendered to the allied English and French armies, 12 Oct. 1860; and evacuated by them 5 Nov., after peace had been signed 24 Oct. It was described as being in a very desolate state, and the inhabitants scattered and indigent. English and French representatives were settled at Peking, March, 1861. Preliminary peace with France concluded here, 5 April, 1885. The famous temple or altar of heaven burnt 18 Sept. 1889. Population (estimated) 1,100,000.

SIEGE AND HEROIC DEFEAT OF THE LEGATIONS: see *China*, 20 June-14 Aug. 1900; a memorial in front of the British legation unveiled. 14 Sept. 1902

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about 400. Their doctrines were condemned by councils at Jerusalem, Carthage, and other places, 415, 530. They maintained:—

1. That Adam was by nature mortal, and whether he had sinned or not would certainly have died.
2. That the consequences of Adam's sin were confined to his own person.
3. That new-born infants are in the same condition with Adam before the fall.
4. That the law qualified men for the kingdom of heaven, and was founded upon equal promises with the gospel.
5. That the general resurrection of the dead does not follow in virtue of Christ's resurrection.

PELASGI, the primitive inhabitants of Asia Minor, Greece, and Italy, appear to have belonged to the Indo-Germanic race. They were in Greece about 1900 B.C., and in Italy about 1600 B.C. They have been termed Tyrrheni, Sicani or Siculi, Apuli, &c. From the Pelasgi came the Dorians, Æolians, and Ionians; all three being Hellenes or Greeks. The Pelasgi appear not to have had the art of writing, but have left numerous architectural remains; they were probably a wealthy, powerful and intelligent people.

PELÉE, MONT, see *Earthquakes*.

PELEW ISLANDS (N. Pacific Ocean), discovered by the Spaniards in the 17th century. The East India company's packet *Antelope*, captain Wilson, was wrecked here in 1783. The king,

Abba Thulle, allowed captain Wilson to bring prince Le Boo, his son, to England, where he arrived in 1784, and died of the small-pox soon after. The East India company erected a monument over his grave in the churchyard.

PELHAM ADMINISTRATION. Mr. H. Pelham replaced the earl of Wilmington as premier, 25 Aug. 1743; see *Wilmington*. In Nov. 1744, the following ministry was formed (termed "the broad bottom administration," because it comprehended a grand coalition of the parties). It was dissolved by the death of Mr. Pelham, 6 March, 1754.

Henry Pelham, *first lord of the treasury and chancellor of the exchequer*.

Lord Hardwicke, *lord chancellor*.

Duke of Dorset, *president of the council*.

Earl Gower, *lord privy seal*.

Duke of Newcastle and the earl of Harrington, *secretaries of state*.

Duke of Montagu, *master-general of the ordnance*.

Duke of Bedford, *first lord of the admiralty*.

Duke of Grafton, *lord chamberlain*.

Duke of Richmond, *master of the horse*.

Duke of Argyll, *keeper of the great seal of Scotland*.

Marquis of Tweeddale, *secretary of state for Scotland*.

All of the cabinet.

The duke of Devonshire and duke of Bolton were *not* of the cabinet.

PELLAGRA. A malady chiefly affecting the cultivators of the soil and, in recent times, extensively prevalent in Lombardy and other parts of northern Italy, the Asturias, Gascony, Rumania, and Corfu. The spread during recent years of this disease led to the formation, in London, of a committee for the investigation of its nature and causation. Dr. L. W. Sambon suggests that pellagra, like sleeping sickness, is dependent on the presence in the blood of a microscopic living organism, Feb. 1910.

The Pellagra field commission proved that the cause of Pellagra was not maize, but that the parasitic conveyer was *Simulium reptans*. . . . May, 1910

PELLS (from *pellis*, skin), receipts on parchment rolls deposited in the court of exchequer. By an act passed in 1834, the office of clerk of the pells was abolished, and a comptroller-general appointed. "Pell records," or "issues of the exchequer," or payments made out of his revenue by James I., were published by the government in 1836.

PELOPIUM, see *Niobium*.

PELOPONNESUS (the island of Pelops), a peninsula, S. Greece, termed Morea in the 13th century, said to have been settled by Pelops about 1283 B.C. **PELOPONNESIAN WAR** continued for twenty-seven years between the Athenians and the people of the Peloponnesus, with their respective allies, and is the most famous of the wars of Greece. It began by an attempt of the Boeotians to surprise Plataea, 431 B.C., on 7 May, and ended 404 by the taking of Athens by the Lacedæmonians.

PELOTA. The national ball game of the Basques, but, like the Basques themselves and their language, the origin is unknown. It is extensively played in Spain as well as the Basque provinces, and also in South America and Mexico. Pelota somewhat resembles racquets. Its distinctive feature is the *chistera* or basket, which takes the place of the racquet, a sickle-shaped, wickerwork instrument, 2 ft. long on the outer curve, and 4 or 5 in. wide, with a flange on each side of the inner curve, converting it into a curved scoop; the *chistera* is strapped firmly to the right wrist of the player,

enabling him to send the ball with terrific speed against the wall of the court. The qualities of pace and endurance, combined with accuracy and skill, are essential to the game. Introduced into England by the Winter Club, Olympia, London, 4 Jan. 1906.

PELUSIUM (now *Tineh*), formerly Sin, the key of Egypt. Here, in 525 B.C., Psammetichus III. was defeated by Cambyzes, the Persian, who thereby obtained possession of the kingdom. Pelusium surrendered to Alexander, 333; was taken by the Persians, 309; by Antiochus, 173; by Augustus, 30 B.C.; and after a protracted resistance by Amrou, the Saracen, A.D. 638.

PEMBROKE (S. Wales). A county palatine till 1536. The royal dockyard at Milford was moved to Pembroke in 1814. **PEMBROKE COLLEGE** and **HALL**, see under *Oxford and Cambridge*. Population, 1901, 15,853; 1909, 16,438.

PENAL LAWS, see *Criminal Laws* and *Roman Catholics*. *Penal Servitude* was substituted for transportation by acts passed in 1853 and 1857, and amended in 1864. A penal servitude commission appointed, 22 Jan. 1878.

First session of the International Penal Law union opened at Brussels 7 Aug. 1889
The Penal Servitude acts, 1853 *et seq.* combined by act passed 5 Aug. 1891

PENANCE, a sacrament in the Roman church, arose out of the practice of auricular confession (*which see*). The council of Trent, in its 14th session (1551), decreed that every one is accused who shall affirm that this sacrament was not instituted by Christ.

PENANG, or **PRINCE OF WALES'S ISLAND**, was given up to the East India company in 1786, by captain F. Light, who received it as a marriage portion with the daughter of the king of Keddah. After several changes it became one of the Straits Settlements (*which see*).

PENDULUMS. The isochronous property of the pendulum is said to have been applied to clocks by Galileo about 1639, and by Richard Harris about 1641. Christian Huyghens claimed this discovery, 1658. See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. (aft. sir) G. B. Airy (aftds. astronomer-royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton colliery 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

PENINSULAR WAR, see under *Spain*, 1808-14.

Wellington computed that he lost 36,000 men in this war—killed, prisoners, deserters, &c.

PENITENTIARIES. The London Female Penitentiary, Pentonville-road, was established in 1807; and the British Penitent Female Refuge at Cambridge heath, Hackney, in 1829. The Church Penitentiary association, founded 1851; many others since. International penitentiary congresses held, first in London, 1872, at other capitals since. See *Millbank*.

PENITENTS, see *Magdalens*. The Penitents of the name of Jesus in Spain were a congregation of persons who had led a licentious life, formed about 1550. The penitents of Orvieto were formed into an order of nuns about 1662.

PENNSYLVANIA (N. America), the first state in the Union in regard to mineral wealth. The settlement by the Swedes here in 1643, was taken by the Dutch in 1655, and acquired by the British in 1664. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1681. Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists in 1682; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1787, and established the present in 1790. Capital, Harrisburg; principal cities, Philadelphia and Pittsburg (which see). It was strongly unionist during the civil war, 1861-5; see *United States of America and Petroleum*. For strikes see *United States*, 1877, 1882. Population in 1860, 2,906,370; 1900, 6,302,115; 1909, 6,932,326.

Several days' violent storms and heavy rain in the Alleghanies swelled the rivers, and caused the overflow of the lakes, May, 1889. At 5 p.m. 31 May, the South Fork reservoir, a lake about 4 miles square, burst the huge dam, and a mass of water rushed down the South Fork, four miles, by the deep circuitous Conemaugh valley, to its junction with the Conemaugh river, driving all before it. For a distance of about 12 miles round Johnstown the flood swept out towns and villages, destroying all the bridges, railways, and factories. South Fork, Johnstown, Cambria city, Morrellville, Sheridan, and other flourishing towns were completely blotted out. A great mass of floating wreckage, which was stopped by a stone railway bridge at Johnstown, took fire; above five hundred persons, who were hurled on the burning mass, perished. Estimated death-roll 6,000.

The most energetic measures were taken by the government, by several states, and by the railway companies for the relief of the sufferers, and for averting imminent famine and pestilence. Robbers of the dead and living were lynched by a vigilance committee. Troops were sent to maintain order, liberal subscriptions were begun in London, Paris, and other places, June.

It is stated that the dam had previously given visible signs of its being in a very insecure condition, and had not been properly constructed. Several towns and villages submerged, June; many bridges swept away; above 150 deaths reported.

After heavy rains, when the rivers had become torrents, early on 5 June, a cloud burst over the Pittsburg oil regions, causing great inundations.

At Titusville the tanks of oil and distilled benzine were upset and were ignited by lightning and the city was fired. A flaming stream with floating wreckage carried all before it, destroying the bridges. Explosions followed, causing a panic, and the people fled to the hills, women and children being trampled on during the rush. The fiery river reached Oil city, 18 miles distant, and a large part of it was reduced to ashes or submerged. About 150 persons were either drowned or burnt at Titusville, and about 200 missing. The loss of property at the two cities was estimated at 3,000,000 dollars . . . 6 June *et seq.* 1892

Strike of about 50,000 colliers for an advance of 20 per cent. reported 20 April; subsidence of the strike reported . . . 10 June, 1894

PENNY. The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny until the reign of Edward I. was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt, at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency; see *Coins*, &c.—**PENNY-POST**; see *Post-office*.—**THE PENNY CYCLOPEDIA** in 1833 (supplements in 1846 and 1858). The **PENNY RECEIPT** stamp was appointed in 1853 (postage stamps authorised to be used for receipts after 1 June, 1881), and in 1858 a penny stamp was directed to be placed on bankers' cheques.—**PENNY BANKS** (in 1861 about 200) were established about 1850. They have become numerous, and in 1878 were authorised to invest their funds.—**PENNY READINGS**, for the working classes, became general in 1859. Carpenter's "Penny Readings," published in 1865-7. "Penny Poets," &c.; Mr. W. T. Stead began the series with Macaulay's "Lays of Ancient Rome," &c., price one penny, May, 1895.

The value of the Roman penny (mentioned *Matt.* xx. 2), or *denarius*, was estimated at $\frac{7}{16}$ d. of our money. Penny dinners for poor Board school children; organization proposed at Society of Arts, 6 Dec. 1884; see *Destitute Children*.

PENRUDDOCK'S REBELLION on behalf of Charles II. was suppressed, and colonel John Penruddock himself executed, 16 May, 1655.

PENSIONS. The crown's power of granting them, often much abused, was materially checked by statute I Anne, c. 1 (1702), see *Poor*, 1893-5. Perpetual pensions were granted to the dukes of Grafton, Richmond, Marlborough, and many others in the 17th and 18th centuries.

PENTAMETER VERSE (five feet), first used about the 7th century B.C.; see *Elegy*.

PENTATEUCH. The name (Greek *penta-teuchos*, whence Pentateuch) was applied by Origen, one of the greatest of the Greek fathers (185-254), to the first five books of the Old Testament, of which Moses was the traditional author; Joshua is the modern critics included among these earlier writings, the six books being styled the *Hexateuch*. The authorship of the Pentateuch by Moses, and of the book bearing the name of Joshua, was, until the 19th century, generally accepted by the Christian Church. Modern criticism, although fltering on the questions of age and structure, is unanimous in the opinion that the Pentateuch is composed from documents of various dates and authorship. Discrepancies, as in the double narrative of the Creation (Gen. i.-ii. 4, and Gen. ii. 5 seq.), the statement (Gen. xxxvi. 31) that these are the kings that reigned over the land of dom before there reigned any king over the children of Israel, passages reflecting the prophetic

mode of thought of the prophetic writings, and those indicating the interests and ideas of the priesthood, led to the inference that the Pentateuch was compiled from various sources. This found expression in the views of some mediæval Jewish scholars, as Ibn Ezra; of Roman Catholics, as Andreas du Maes (16th cent.), and by philosophers, as Spinoza (17th cent.). Jean Astruc, a Belgian physician (1753), may be regarded as the pioneer of modern criticism on the subject. He distinguished two great sources—A the Elohist, and B the Jehovist, and 10 smaller writings; the compilation of these he attributed, however, to Moses. (His hypothesis was introduced into Germany by Eichhorn). Investigations of the documents and hypotheses founded on them were carried on by Eichhorn, Ilgen, Geddes, De Wette, Bleek, Delitzsch, Ewald, Schrader, Hupfeld, Kuenen, Wellhausen, and other scholars, giving rise to the "Older Document Hypothesis," the "Fragment Hypothesis," the "Supplement Hypothesis," the "Crystallization Hypothesis," and the "Modern Document Hypothesis," which regards the Pentateuch as composed of 4 principal elements: P the Priestly Code, the older Elohist (the *Grundschrift* of Wellhausen); E the second Elohist; J the Jahvist, and D the Deuteronomist, designed by some critics A, B, C, D respectively. Scholars differ as to the relative age of the Jahvist and Elohist documents. The Deuteronomist, who composed the law-book found in the reign of Josiah, king of Judah, 621 B.C., is third in point of time; the Priestly Code is regarded as the latest of these writings, and is post-exilic. See Kuenen's "Historico-critical Inquiry into the Origin and Composition of the Hexateuch," Driver's "Literature of the Old Testament," G. A. Smith's "Modern Criticism and the Preaching of the Old Testament," Cheyne's "Founders of Old Testament Criticism," Wellhausen's "De Komposition des Hexateuchs."

PENTECOST signifies the fiftieth, and is the solemn festival of the Jews, called also "the feast of weeks," because it was celebrated fifty days, or seven weeks after the feast of the Passover, 1491 B.C. (*Lev.* xxiii. 15; *Exod.* xxxiv. 22); see *Whitsuntide*.

PENTLAND HILLS (near Edinburgh). Here the Scotch presbyterians, afterwards called Cameronians (*which see*), who had risen against the government on account of the establishment of episcopacy, were defeated by the royal troops, 28 Nov. 1666.

PENZANCE, Cornwall. The town was burnt by the Spaniards, July, 1595. It was taken by Fairfax in 1646. Here sir Humphry Davy was born, 17 Dec. 1778, and here was inaugurated his memorial statue, 17 Oct. 1872. Population, 1901, 13,123; 1909, 14,435.

PERCY FAMILY. William de Percy obtained lands in Yorkshire from William the Conqueror, and died at Antioch about 1096.

The heiress of the last baron Percy married Josceline de Louvaine, son of Godfrey, duke of Brabant, in the reign of Henry II. 1154-89

Henry de Percy, their descendant, created earl of Northumberland in 1377

Many of his descendants were slain during the wars of the Roses.

Lady Elizabeth Percy, the heiress of Josceline Percy, who died 1670, married Charles, duke of Somerset.

Lady Elizabeth Percy, heiress of their son Algernon Seymour, duke of Northumberland, married sir Hugh Smithson, created duke of Northumberland in . . . 1766

Their descendant, duke Algernon, died without issue, 12 Feb. 1865, and was succeeded by his cousin, George Percy, earl of Beverley, who died 22 Aug. 1867; succeeded by George Algernon; Henry George Percy, Sept. 1899.

PERIPLUS. The voyage of Hanno, the Carthaginian navigator, about the third century B.C. His account of his travels, written in the Punic language, was translated into Greek; an English translation, edited by Falconer, in London, 1797.

PERJURY. The early Romans threw the offender headlong from the Tarpeian precipice; the Greeks set a mark of infamy upon him. As the empire became Christian, any one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the first swearer became liable to the punishment he charged upon the innocent. In England perjury was punished with the pillory, fine, and imprisonment 1562. By the Abolition of Oaths bill, perjury making a false declaration are deemed guilty misdemeanors; Act 5 & 6 Will. IV. c. 60 and 9 Sept. 1835; a perjury bill was read a second time 2 April, 1895. Perhaps the greatest perjury in modern times was Titus Oates; see *Oates*. A woman named Alice Grey was convicted of many perjuries in 1856. See *Trials*, 1873 *et seq.*

PERMANENT COMMITTEES. One was appointed, 15 Sept. 1871, by the French national assembly to watch over the proceedings of the government during a recess. It consisted of 25 persons of various parties. A similar committee of the French cortes, appointed 22 March, 1873, was peremptorily dissolved by the government 22 April following.

PERMISSIVE PROHIBITORY BILL which would give power to two-thirds of the ratepayers of a parish to refuse licences for the sale of intoxicating liquors, advocated by the United Kingdom Alliance party, was rejected by the house of commons, 8 June, 1864; 12 May, 1869 (193-87); 17 May, 1871 (206-124); 8 May, 1872 (369-15); 7 May, 1873 (321-81); 17 June, 1874 (301-75); 16 June, 1875 (371-86); 14 June, 1876 (299-81); withdrawn, July, 1877; (278-84) 26 June, 1878. Resolutions rejected (252-164) 11 March, 1879.

Resolution to give local option (that is, power to the inhabitants of any place to stop licensing public-houses) was rejected by the commons (248-134) March, 1880; but adopted (229-203) 18-19 June, 1880; 96-154 14 June, 1881; (228-141) 27 April, 1883; rejected 29 April, 1891. Liquor traffic (local control or veto) bill introduced by Mr W. V. Harcourt, 27 Feb. 1893; much opposed; withdrawn, 18 Sept. 1893. Similar bills with similar aims failed. "Local Option" is said not to work satisfactorily in the United States. See *Liquor Traffic*.

PERNAMBUCO, a province of Brazil, with a part of the same name, comprising Recife and other towns, founded in 1530; seized by the Dutch, and retained for a month, 1594; insurrection here, 1661, 1710, 1817, 1821, and 1829. Population, 1909, 209,000.

PERONNE (N. France). Louis XI. of France, finding placed himself in the power of the duke of Burgundy, here was forced to sign a treaty, confirming those of Arras and Conflans, and recognising the duke's independence; 14 Oct. 1468. The treaty declared the treaty invalid and the duke a traitor, Nov. 1470.

PERUGIA, a city of central Italy; as Perousia, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Caesar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

PERUKE or **WIG**. The ancients used false hair, but the puke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that bishop Blomfield (of London), in 1830, obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves.

PERUVIAN BARK, see *Jesuits' Bark*.

PESCHIERA, a strong Austrian fortress, on an island in the Mincio, near the Lago di Garda,

N. Italy. It has been frequently taken by siege:—by the French, 1796; by the Austrians and Russians, 1799; by the French again, 1801; given up by them, 1814; taken by the Sardinians, May, 1848; retaken by Radetsky, March, 1849. The Sardinians were preparing to besiege it in July, 1859, when peace was made. It was given up to the Italians, 9 Oct. 1866; see *Quadrilateral*.

PESSIMISM (from *pessimus*, the worst), the opposite doctrine to *optimism* (which see).

PESTALOZZIAN SYSTEM of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruction, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

PESTH (Hungary), built about 889, on the east bank of the Danube, opposite Buda, was repeatedly taken and besieged in the wars of Hungary, particularly with the Turks. The great insurrection broke out here, and the minister, count Lamberg, was killed, 28 Sept. 1848. Budapesth was taken by the imperialists, 5 Jan. 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Budapesth formally constituted capital of Hungary, Nov. 1873.

Hungarian national exhibition opened 2 May, 1885.

PESTILENCE, see *Plague*.

PETALISM (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf (generally of an olive) instead of on a shell, about 460 B.C. If guilt were established the sentence was usually banishment.

PETARD, or **PETAR**, an invention ascribed to the Huguenots in 1579. Petards of metal, nearly in the shape of a hat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used. "Hoist with his own petar." *Shakespeare*, Hamlet iii. 4.

PETERBOROUGH, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The tower becoming dangerous, restoration resolved on, Dec. 1882. Foundation laid of new building, 7 May, 1884. Choir re-opened 11 July, 1889; Cathedral re-opened, 14 Oct. 1890; further restoration, May, 1894; completed (total cost about 80,000*l.*), July, 1902. PETER THE GREAT'S WILL, see under *Wills*.

PETER THE WILD BOY, a savage creature found in the Harzwald, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785, unchanged in his habits.

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1712. Here, in 1736, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened May, 1862. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire. PETER'S CHURCH, ST. (Rome), originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lbs. of iron were used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet; the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet. Renewal of the leaden envelope completed, July, 1884.

PETER'S PENCE, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, about 725; so called because agreed to be paid on Peter Mass, 1 Aug. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. 1534. *Camden*. A public collection (on behalf of the pope) was forbidden in France in 1860.

The Peter's pence presented at the pope's jubilee was said to amount to 263,960l.; Great Britain, 48,000l.; Ireland, 720l. Feb. 1893. See *Pope*.

PETERSWALDEN (Germany), CONVENTION OF, between Great Britain and Russia, by which a firm and decisive alliance between those powers was made against France, and the course of action against Napoleon Bonaparte was planned; signed 8 July, 1813. PETITIONS. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Petitions are extant of the date of Edward I. In the

reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1909, 1,811 petitions, signed by 1,901,867 persons, were presented to parliament. See *Abhorers*, and *Rights*.

PETO'S ACT, 13 & 14 Vict. c. 28 (1850), renders more simple and effectual the titles by which religious bodies hold property.

PETRA, the ancient Sela, in mount Seir, near mount Hoor, in the land of Edom. In the 4th century B.C. it was held by the Nabatheans, who successfully resisted Antigonous. About A.D. 70 it was the residence of the Arab princes named Aretas. It was conquered by Cornelius Palma, and annexed to the empire under Trajan, 105, to which period its remarkable monuments are ascribed. It was an important station for commercial traffic with Rome. It has been described by Burckhardt and other travellers.

PETRARCH AND LAURA; celebrated for the refined passion of the former for the latter, began in 1327, and the chief subject of his sonnets. He was born 1304, crowned with laurel, as a poet and writer, on Easter-day, 8 April, 1341; and died at Arqua, near Padua, 18 July, 1374. Laura died 6 April, 1348. PETROLEUM, rock oil or mineral oil similar to paraffin, has been found in many parts of the world, especially at Rangoon. In 1859 and since, a number of oil-springs were discovered in the bituminous coal regions of N. W. Pennsylvania, now termed "Petrolia," and others have been discovered in Ohio and other states, and also in Canada. Numerous artesian wells were sunk, manufactories erected, and an almost unlimited supply obtained; between 1859-77, 2,802,500,000 gallons; in 1863, 8,907,365 gallons. In consequence of the importation of this oil into this country, and many accidents having taken place through its inflammability at low temperature, acts for "the safe keeping of petroleum" were passed, 29 July, 1862; July, 1868, Aug. 1871, and 1879. Petroleum became an awful weapon in the hands of the insurgents in Paris, 23-27 May, 1871. The Petroleum Association test petroleum, with the view of preventing the importation of that which is dangerous. Refined petroleum imported: 1872, 5,670,674 gallons; 1877, 33,474,955 gallons; 1881, 58,371,386 gallons. Unrefined and refined: 1882, 59,695,982 gallons; 1883, 70,526,996 gallons; 1886, 71,251,736 gallons; 1888, 94,401,285 gallons; 1890, 105,080,863 gallons; 1894, 163,002,262 gallons; 1896, 189,953,945 gallons; 1898, 219,249,539 gallons; 1900, 254,978,043 gallons; 1902, 284,803,710 gallons; 1904, 302,131,743 gallons; 1906, 293,220,607 gallons; 1908, 343,613,048 gallons.

PETROLEUSES, a name given to women charged with throwing petroleum on the burning houses in Paris during the siege by the government, May, 1871.

PETROPAULOVSKI, a fortified town on the east coast of Kamtschatka, was attacked by an English and French squadron, 30 Aug. 1854. They destroyed the batteries, but failed to capture some Russian frigates, except the *Sitka*, a store-ship taken by the *President*, and a schooner taken by the *Pique*. Admiral Price was killed, it is supposed by the accidental discharge of his own pistol. A party of 700 sailors and marines landed to assault the place, but fell into an ambushade; many were killed, including captain Parker and M. Bourasset, English and French officers. The objects of the attack were not attained. After this the Russians greatly strengthened their defences, but on 30 May, 1855, the allied squadron in the Pacific arriving here found the place deserted. The fortifications were destroyed, but the town was spared. The Russian ships escaped.

PHALANX, the Greek phalanx consisted of 8000 men in a square battalion, with shields joined, and spears crossing each other. The battalion of Philip of Macedon, called the Macedonian phalanx, was formed by him about 360 B.C.

PHALSBURG (Pfalzburg, Palatine city), a strong town of Alsace, was founded in 1570, by the elector palatine George John. It was ceded to France in 1661, and its fortress erected by Vauban, 1679. It checked the progress of the victorious armies of the allies both in 1814 and 1815, and withstood the Germans from 16 Aug. to 12 Dec. 1870, when it capitulated unconditionally. It was retained at the peace in Feb. 1871.

PHARAOH, the general title of the kings of Egypt in the Old Testament, found only there and in the copyists. The Egyptian word, *pir-aa*, has been interpreted, *king* or *sun*. According to sir Erasmus Wilson, *Egypt of the Past* (1881), the hieroglyphs of *per*, a house, and *per-aa* a great house, are identical with that of Pharaoh, hence the signification, "royal ruler," "founder of a house."

PHILIPPUM, a metal of the yttrium series,
found in Samarskite earth (in Russia, North Caro-
lina, &c.) by M. Marc Delafontaine, by means of
the spectroscope; announced Oct. 1878. Also said
to have been found by Mr. Lawrence Smith, and
named Mosandrium, July, 1878.

PHILIPPOPOLIS, capital of (Eastern) Rou-
melia, *whicb see*. Population, 1888, 33,032; 1909,
(est.) 47,133.

PHILISTINES, a people of Palestine, con-
quered Israel, 1150 B.C., and ruled it forty years.
They were defeated by Samuel, 1120; and by Saul
and Jonathan, 1087. They again invaded Israel
about 1063, when David slew their champion,
Goliath. After David became king he thoroughly
subdued them, 1040. In common with Syria, their
country was subjugated by the Romans, under
Pompey, about 63.—In Germany, about 1830,
Heine and the liberal party applied the term
"Philistines" to the opponents of progress, or con-
servative party.

In England the term has been applied to the
opponents of "culture" and refinement, chiefly
among the upper middle classes by Mr. Matthew
Arnold and others . . . 1867 et seq

PHIOBIBLION SOCIETY was instituted in 1853 by Mr. R. Monckton Milnes (aft. lord Houghton), M. Sylvain Van de Weyer, the Belgian minister, and others. It published volumes of "Miscellanies," &c.

PHILOLOGY, the science of *language*, much studied during the last and present century.

Philological society of London established 18 May, 1842
Lorenz Diefenbach's "Lexicon Comparativum" 1846-51
32nd congress of German philologists met at Wiesbaden, professor Curtius president, 26-29 Sept.
1877; the 42nd met at Vienna . . . 23 May, 1893
Prince Louis Lucien Bonaparte's philological library purchased by Mr. H. S. Nichols . . . Nov. 1896

PHILOSOPHER'S STONE, see *Alchemy*.

PHILOSOPHICAL LAMP, constructed by Johann Wolfgang Döbereiner, who applied in it the property possessed by spongy platinum of causing the combination of oxygen and hydrogen, discovered by him in 1823.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things (distinguished from history, the knowledge of facts, and from mathematics, the knowledge of the quantity of things)—the hypothesis or system upon which natural effects are explained. *Locke*. Pythagoras first adopted the name of philosopher (such men having been previously called sages) about 528 B.C. Philosophers were expelled from Rome, and their schools suppressed, by Domitian, A.D. 83. Philosophy is now divided into:—1. Moral or Ethical; 2. Intellectual; 3. Natural or Physical.

MORAL AND INTELLECTUAL PHILOSOPHY.

ANCIENT SCHOOLS.—The *Vedas* (which see) contain what is now considered to be the most ancient moral philosophy; the source of later systems, about the sixth or seventh century, B.C. (professor Max Müller, March, 1894.) *Pythagorean*, about 500 B.C.; *Platonic* (the academy), by Plato, 374; *Peripatetic* (the Lyceum), by Aristotle, 334; *Sceptic*, by Pyrrho, 334; *Cynic* by Diogenes, 330; *Epicurean* by Epicurus, 306; *Stoic*, by Zeno, 290; *Middle Academy*, by Arcesilaus, 278; *New Academy*, by Carneades, 160; *New Platonists* (who attempted to combine Platonism with Christianity): Ammonius Saccas, died A.D. 243; Plotinus, died about 270; Porphyry, died about 305; Jamblichus, died about 333; Julian the emperor, died 363.

MODERN SYSTEMS.—*Nominal*, Jean Roscellin, about 1092; *Abelard*, &c.; *Rational*, Bacon, about 1624; *Cartesian*, Descartes, about 1560; *Reflective* or *Perceptive*, *Locke*, 1690; *Idealistic*, Berkeley, 1710; *Elective*, Leibnitz, 1710; *Common Sense*, Reid, 1750-70; *Transcendental*, Kant, Hamilton, &c., 1770-1860; *Scientific*, Fichte, 1800-14; *Absolute Identity*, Schelling, 1800-20; *Absolute Idealism*, Hegel, 1810-30; *Utilitarian*, Bentham, Mill, &c. 1790-1873; *Positive*, Comte, 1830; *Realism* and *Evolutionary Materialism*, prevalent, Darwin, Herbert Spencer's, &c. 1873; "System of Synthetic Philosophy," 10 vols., 1860-96 (died 8 Dec. 1903). Mr. Howard Collin's "Epitome," 4th edition, published, autumn, 1897. [Prof. Wm. Wallace, of Oxford, died 19 Feb. 1897.] See *Ethics*.

NATURAL PHILOSOPHY.

Greek and Latin.—Thales, about 600 B.C.; Pythagoras, 590; Aristotle and Plato, 350; Euclid, 300; Archimedes, 287; Hipparchus, 150; Lucretius, about 100; Julius Cæsar, 50; Ptolemy, A.D. 150.

Middle Ages.—Arabians: Ben Musa, 800; Alhazen, &c., 1100. Gerbert, Decimals, 959. Roger Bacon, *Opus Majus*, 1266.

PHIPPS' EXPEDITION. The hon. captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Sea-Horse* and *Careace* ships, to make discoveries, as near as possible to the North Pole. In August 1773, he was for nine days environed with barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48' N. lat. A brisk wind in two or three days accomplished their deliverance. They returned to England without having made any discoveries, 20 Sept. 1773. Nelson was coxswain to the second in command.

PHLOGISTON, a term employed by Stahl to designate the hypothetical matter or principle of fire; "the inflammable principle" of bishop Watson, near the close of the 17th century. The chemical theory based upon it was refuted by Lavoisier, 1790, who substituted for it the theory of oxygenation.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon in 346. By the excavations of the British school of archaeology at Abæ the remains of two ancient temples of Apollo, with relics of bronzes, inscriptions, &c., and at Hyampolis, a shrine of Artemis (Diana), &c., were discovered, reported, 30 Aug. 1894.

PHŒNICIA, on the sea coast of Syria. The natives were the most eminent navigators and traders of antiquity, their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, and Ptolemais, or Acre. From the 10th to the 13th centuries before Christ, they established colonies on the shores or isles of the Mediterranean—Carthage, Hippo, Utica, Gades, and Panormus, and they are said to have visited the British Isles. Phœnicia was conquered by Cyrus, 537 B.C.; by Alexander, 332; by the Romans, 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516. See *Sidon* and *Tyre*.

PHŒNIX CLUBS, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March, 1859, at Tralee; but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHENIX PARK. A beautiful park, 1,327 acres, in Dublin; for the murders here see *Ireland*, 1882-3, 1896.

PHONEIDOSCOPE, an instrument for observing the colour-figures of liquid films under the action of sonorous vibrations, being a visible demonstration of the vibratory and molecular motion of a telephone plate; invented by Mr. Sedley Taylor, 1877; manufactured by S. C. Tisley & Co., London, 1878.

PHONO-CINEMA, a combination of the phonograph and cinematograph, which preserves the face, voice and gestures of living beings, displayed at the Paris exhibition, June *et seq.* 1900.

PHONOGRAPH, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Fenby, 13 June, 1863. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Credd in 1847; Mr. J. F. Unger in 1774; and by Mr. Carreyre in 1827. See *Telephonograph*.

A new phonograph by Thomas Alva Edison, electrician of New Jersey, was announced . Dec. 1877. Linear indentations are made by means of a pin in a sheet of tinfoil by speaking or singing; and from these casts may be taken. When these are placed upon the diaphragm of a telephone connected with revolving apparatus, the sounds may be reproduced with a weirdlike effect. Improved by Mr. Shelford Bidwell, 1879. See *Telephone*.

A greatly improved instrument by Mr. Edison adapted for postal communication, announced, 21 Nov. 1887; successful experiments reported, 12 May, 1888. Professor Graham Bell's *graphophone*, a modification of Edison's phonograph, was announced . Nov. 1887. Mr. Emile Berliner (of Washington) announced his *gramophone*, a modification of Leon Scott's *phonautograph* Nov. "

The *phonograph* and *graphophone* were both exhibited to the British Association at Bath Sept. 1888

Exhibitions of Mr. Edison's greatly improved phonograph, considered perfect in the record, reproduction and preservation of sounds of all kinds (wax is used in place of tinfoil) Nov. 1888 *et seq.*

Mr. Edison receives phonograms from the duke of Cambridge, Mr. Gladstone, and others Jan. 1889

Mr. Edison's talking dolls, which utter about 30 words, by means of a concealed phonograph and clockwork, were exhibited at the Savoy Hotel, Westminster, 25 July; Edison's phonographic toy company announced July, 1890

Mr. Edison adapts his phonograph to a water motor as well as electricity reported Sept. "

The pope, by Mr. Moriarty, transmits a phonogram, containing a message, to the president of the United States N. A. 20 March, 1893. Many improvements made 1910

PHONOGRAPHY is the name given by sir Isaac Pitman (born 4 Jan. 1813, died 22 Jan. 1897) to the second edition of his shorthand system in 1840; see *Spelling Reform*. The system has been adapted to and published in twelve European and Oriental languages; and many periodicals are issued in character in Britain and America.

"Stenographic Sound-hand," published . 15 Nov. 1837

"Phonography, or Writing by Sound," published, 10 Jan. 1840

"Phonetic Journal" (now "Pitman's Journal"), commenced 1 Jan. 1842

Phonetic society established 1 March, 1843 (Isaac Pitman sec. till Society dissolved in 1892).

Popular class-book (afterwards "Phonographic Teacher"), first published 1843

Jubilee of Phonography celebrated in London, Sept. 1887

Incorporated Phonographic society founded, 31 Oct. 1890
National Shorthand association (incorporated) of Pitman writers founded 4 Sept. 1909

PHONOPORE, an arrangement of telegraph wires to facilitate transmission of sound, by checking the influence of adjoining wires, the invention of Mr. C. Langdon Davies, announced, May, 1886. See *Telephones*.

PHONOSCOPE, an apparatus for testing the quality of musical strings, invented by Dr. Rudolph Koenig, and exhibited at the International Exhibition in 1862. He died, aged 68, 2 Oct. 1901.

Mr. Edmunds' phonoscope, exhibited to the British Association, Aug. 1878, is an instrument for producing figures and light from the vibrations of sound.

The name phonoscope is given to apparatus used by M. M. G. Dumény in photographing the lips of a speaker and so combining the images thus produced that they may be understood by a deaf-mute, June, 1892. See *Photography*, 1891.

PHOSPHOR-BRONZE, an alloy of copper, tin, and phosphorus, invented by Messrs. Montefiore-Levi and Künzel, of Belgium, in 1867. It is very hard, ductile, and elastic, with a colour resembling gold.

PHOSPHORESCENCE. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; especially noticed by Vincenzo Cascardiolo (1602), Boyle, Canton, Wilson, and others; and specially studied by Edmond Becquerel, and Balmain. See *Luminous Paint*, *Air* (footnote).

PHOSPHORUS was discovered in 1669, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Now. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphorated hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

Mr. S. A. Rosenthal and Dr. S. J. von Komocki succeed in preparing matches without yellow phosphorus, reported Sept. 1898

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niepce in 1814, and sir J. Herschel in 1819.

Louis J. M. Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niépce, and worked with him till the death of the latter in 1833. The production of *Daguerreotype* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niépce's son Isidore.

- In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (*i. e.*, with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841.
- In 1851, collodion (*which see*) was applied to photography by Mr. F. Archer.
- Herr Franz Veress of Klausenburg, Transylvania, photographs colours on glass and paper; specimens are exhibited at the Photographic Institute at Vienna, March, 1890.
- The Photographic Society of London was established in 1852 (royal, 1894). It publishes a journal. On 22 Dec. 1852, 774 specimens of photography were exhibited at the rooms of the Society of Arts, Adelphi. 42nd annual exhibition, very successful, 25 Sept. *et seq.* 1897; congress held, New gallery, Regent-street, 19 May, 1903.
- Carte de visite* portraits (*which see*) taken by M. Ferrier at Nice, 1857.
- In 1861 Mr. Thompson, of Weymouth, photographed the bottom of the sea.
- Photography was successfully applied to the transfer of works of art to wood blocks by Mr. John Leighton, in his illustrated edition of *Lyra Germanica*, 1861.
- The tannin process introduced by major Russell about 1861.
- The *copyright* of photographs is secured by an act passed in 1862.
- The *Wothlytype* process, in which nitrate of silver and albumen are discarded and a double salt of uranium and collodion substituted, invented by Wothly, was announced in the autumn of 1864.
- The light of ignited *magnesium* was employed for photographs by Mr. Brothers, of Manchester, in the spring of 1864.
- Mr. H. Van der Weyde, an American artist, succeeded in making electric light very effectual in photography, 1876-8.
- Photographs of the first page of the *Times*, containing many French advertisements ($1\frac{1}{2}$ inch long by 1 inch wide), sent to Paris from Bordeaux by balloons, Jan. 1871.
- Criminals ordered to be photographed by the act for prevention of crime), from 2 Nov. 1871.
- Composite portraits* (in which sometimes 9 components were used) formed by Mr. Francis Galton, by means of photography, 1877.
- The *Autotype* process for transferring and printing reported successful, April, 1873.
- Mr. E. J. Muybridge photographs, instantaneously, animals in rapid motion, 1881 *et seq.* See *Zoopraxiscope*.
- Capt. Abney (K.C.B. 1900) photographs a disc in rapid motion by the electric spark, 17 March, 1882.
- Celestial Photography* began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Afterwards, Mr. Warren de la Rue, of London, produced excellent photographs of the moon, and other heavenly bodies, and on 18 July, 1860, photographed the solar eclipse. Since then the progress of photography has greatly facilitated astronomical work.
- The *Photochronograph*, an apparatus invented by father Fargis, Georgetown, U.S.A., for measuring star transits, reported Oct. 1892.
- Photography successfully applied to the heavens by MM. Paul and Prosper Henry, 1885-8.
- Decision by justice North that a photographer has no right to sell or exhibit photographs of private sitters; "Pollard and wife v. The Photographic Company, Rochester" . . . 20 Dec. 1888
- Mr. A. A. Common's excellent telescope specially adapted for photography, set up at Ealing, near London . . . spring, 1890
- M. Marey's method of photographing the motions of living animals by his chrono-photograph applied by M. G. Demyer to the movements of the lips in speech, the results being readable by deaf-mutes; reported Aug. 1891
- M. Gabriel Lippmann announced his method of photographing the spectrum in its natural colours by producing iridescence on the film, March, 1891-May, 1892
- Mr. F. E. Ives at the Royal Institution, London, 10, 17 May, 1892, exhibited his patented method of photographing colours, by which he produced colour prints.
- Mr. Van der Weyde lectures on his "photo-corrector" at the Society of Arts . . . 26 April, 1893
- Photographs of flowers, &c., exhibiting the natural colours, taken by M. Lunnier (by an improvement on the original idea of M. Lippmann) on gelatino-bromide plates, were exhibited by the Photo club, Paris . . . 10 May, "
- Mr. Arthur Burchett's new process, by the combination of green and yellow screens, exhibited at the Camera club . . . 25 Jan. 1894
- Specimens of Dr. Joly's method of photography in natural colours on glass plates exhibited at the Royal society . . . June, 1895
- The bottom of the Mediterranean photographed by M. Louis Bontan, in . . . "
- Mr. Friese-Greene's improvements in printing photographs (blocks dispensed with), exhibited at the Royal Institution . . . 28 Feb. 1896
- M. G. Lippmann at the Royal Institution described and illustrated his method of producing coloured photography, specimens included the spectrum, flowers, trees, &c. . . 17 April, "
- M. Villiedien Chassagne and dr. Adrien M. Dausac's invention of producing photographs showing the actual colours of the objects photographed, reported, *Times* . . . 30 Jan. 1897
- Mr. Benetto exhibits excellent specimens of his colour photography by the action of light on chemical substances at the Camera club, 8 March, 1897, and other places.
- The National Photographic Record association, founded by sir Benjin. Stone, M.P. . . 8 July, "
- Royal Photographic Society's international exhibition at the Crystal Palace, opened by the prince of Wales . . . 25 April, 1898
- M. Paul Boyer exhibits portraits taken by his new flash-light process, London . . . May, "
- Mr. Francis Galton's new method of analytical photography, to isolate the differences between any two pictures, reported . . . 27 Nov. 1900
- LUMIERE AUTOCHROME PLATE (for direct colour photography).—A transparent support, covered with an adhesive matter, receives a coating of grains dyed blue-violet, green and red-orange. This, after isolation with a water-proof varnish, is coated with a special panchromatic emulsion. Exposure is made as usual, but with the plate reversed, so that the light reaching the sensitive emulsion first passes through the coating of coloured grains. The plate is first developed, then, without fixing, treated with an acid permanganate reducer, rinsed and redeveloped, the result being a positive print in natural colours. Patented 1904-6.
- Photographic exhibits, numbering about 1,000, shown at the St. Louis International exhibition 1904
- Camera club of London voluntarily wound up; 270 of its members transferred by arrangement to the Blenheim club, St. James's-square, Sept. 1905
- M. Lippmann, a discoverer of one of the methods of photography in colour, announced, at a sitting of the French academy of sciences, his discovery of a method for producing photographs in relief—the result is obtained by covering both sides of the sensitive plate with a film of collodion marked with an immense number of minute crossed lines produced by a machine. 2 March, 1908
- At the Paris academy of sciences, M. Poincaré gave particulars of a discovery by M. Devaux Charbonnel of a method of photographing the sounds of the human voice with sufficient precision to enable the record to be read . . . 15 June, "
- MM. Georges and Gustave L. audet gave particulars of their success in photographing sounds; the delicate peculiarities of the voice, such as lisping were produced with distinctness. 22 June, "
- PHOTOHELIOGRAPH, an apparatus for registering the position of the sun's spots by means of clockwork and photography; erected at the suggestion of sir John Herschel at Kew observatory about 1857. It was used by Mr. Warren de la Rue to photograph the disc of the sun during the eclipse of 18 July, 1860.
- PHOTOGALVANOGRAPHY, the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niépce, and

presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niépce de St. Victor (who published a treatise on it in 1856), Vitry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photogalvanography."

PHOTOLYTHIC ENGRAVING (a process by which the light actually etches a picture on a plate that may be and has been printed from) was patented by Mr. Fox Talbot in 1853, and is described and exemplified in the *Photographic News*, 9 and 16 Sept. 1859, a specimen being given in the latter number.

PHOTOZINCGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from) was devised by Sir Henry James, chief of the Ordnance Survey, and made known in 1860. By it maps, charts, and engravings may be printed at a small cost.

PHOTO-SCULPTURE: M. Villème's employment of photographs in the formation of sculpture was announced in 1863.

Messrs. Goupil's process of *Photogravure*, rivaling mezzotint, reported highly successful; fine pictures reproduced, Feb. 1884.

See *Kinematograph* and *Kinetoscope*.

PHOTOMETER (light measurer); one was constructed by Dr. W. Ritchie in 1825. Many improvements have been made recently in photometry. See under *Stars*.

Mr. A. Vernon Harcourt's new holophotometer highly approved June, 1888.

Stellar Photometry, the measurement of the light of the stars, has been much studied by astronomers, especially by Sir John Herschel, prof. Argelander, prof. C. Pritchard and others. Mr. W. J. Dolidin, in his "Guide to the measurement of light," published in 1889, describes his application of terrestrial photometry to stellar light.

PHOTOPHONE. In this apparatus, constructed by professor Graham Bell and Mr. Sumner Tainter of Washington, in 1880, a thin plane mirror is thrown into vibration by the voice; a beam of light is reflected from this mirror and received at a distance by a cell of the metal selenium; when, by arrangement, this is connected with a telephone, the sounds are reproduced.

PHOTOSPHERE, see *Sun*, note.

PHOTOTACHOMETER, an instrument for measuring the velocity of light, invented by professor Simon Newcomb of Washington, 1879-80.

PHOTOTHERAPY, the treatment of disease by light, successfully applied by prof. Finsen, of Copenhagen, in treatment of lupus, 1893. The Finsen light was first introduced into this country in May, 1900. Queen Alexandra presented the first lamp to the London hospital, and the first patients were treated on 29 May, 1900. The Finsen light treatment is used principally for lupus. See *Tuberculosis*, 1901.

PHRENOLOGY, see *Craniology*.

PHRYGIA (now Karamania), a province in Asia Minor, became part of the Persian empire in 537 B.C., and partook of its changes. After their defeat of Antiochus the Great, king of Syria, 190 B.C., the Romans added Phrygia to the kingdom of Pergamus, which was bequeathed to them by Attalus III., the last king, 133 B.C.

PHYLLOXERA, see *Vine*.

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 529 B.C. Hippocrates, the father

of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. Dr. R. Quain's *Dictionary of Medicine*, published 1882. 3rd edition issued 1902. See *Medical*.

The dogmatic age of medicine lasted till the Reformation, when it was attacked by Paracelsus (1493-1541), and Vesalius (1514-64). Since 1800 medical practice has been completely transformed by physiological and chemical research.

The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. See *Medical and Societies*.

PHYSICIAN TO THE KING.—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), mentioned 1090.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services.—*Life of Linacre*.

Miss Garrett (afterwards Mrs. Anderson) licensed at Apothecaries' hall, London, to practise medicine, 28 Sept. 1865.

At a meeting of the Royal Medical and Chirurgical Society, 3 May, 1869, it was resolved that the "Royal Society of Medicine" (including the various sections) be founded; the resolution was affirmed, 22 Feb. 1870; but in 1871 the project dropped.

School of Medicine for Women in London (council: Professors Burdon-Sanderson and Huxley, Mrs. Garrett Anderson, M.D., Mrs. Blackwell, M.D., and others); opened, Oct. 1874.

Registration of medical women, permitted by Medical act, 39 & 40 Vict. c. 41, 11 Aug. 1876.

Queen Victoria laid the foundation of the Medical Examination hall on the Victoria embankment, 24 March, 1886.

The curriculum for medical students changed from 4 to 5 years; begins Oct. 1893.

London school of tropical medicine promoted by the liberality of Mr. Chamberlain, col. sec., Dec. 1898; established in the London Docks; good research work, reported, 3 Nov. 1902 *et seq.*

Goldsmiths' coy. make a grant of 10,000*l.* to the institute of medical science fund, university of London, March, 1906.

Death of Sir H. Pitman, late registrar of the college of physicians, who attained his 100th year in July last, 6 Nov. 1908.

Mr. Otto Beit increased the fund of 50,000*l.* left by his brother, Mr. Otto Beit, for the endowment of medical research to 215,000*l.* for the purpose of establishing Beit Memorial fellowships for medical research, Dec. 1909.

Dr. C. Graham, formerly professor of chemistry at university college, London, who died on 13th November, left the residue of his estate, about 35,000*l.*, to the senate of the university of London to found a fund to be known as the "Charles Graham Medical Research Fund," Dec. 1909.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane; was given to the Apothecaries' company in 1721 this last was very much admired by Linnaeus. The trustees of the London parochial charities agree to dedicate 800*l.* per ann. to its maintenance, March, 1899. New laboratories and plant-houses opened by lord Cadogan, 25 July, 1902.

PHYSICAL EDUCATION, British College of, started in 1893; a meeting of the council was held at the earl of Meath's house, 20 Oct. 1894. Annual meetings. Royal Commission on **PHYSICAL DETERIORATION** appointed, 1903.

One of the most tangible results of that Commission was the formation of the National League for Physical Education and Improvement, which was incorporated in 1905. The medical inspection of school children was to a great extent traceable to the findings of that Commission, although this question was also fully dealt with in the Report of the Royal Commission on Physical Training (Scotland) 1903, and in the Report of the Inter-Departmental Committee on Medical Inspection and Feeding of Children, 1905.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president. **NATIONAL PHYSICAL RECREATION SOCIETY** founded, 1885-6; in full activity. **NATIONAL PHYSICAL LABORATORY,** committee appointed respecting its establishment, lord Rayleigh chairman, 3 Aug. 1897; favourable report issued, 4 Oct. 1898; government grants 14,000*l.* for erection and 4,000*l.* per ann. for maintenance. Bushey-house, Teddington, granted by queen Victoria to the Royal society for the laboratory, Dec. 1900; opened by the prince and princess of Wales, 19 March, 1902.]

Hold fortnightly meetings at the Imperial College of Science and Technology, South Kensington, S.W. Membership, 1910, 420.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who, through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by sir R. Smirke. The college is composed of fellows and members, formerly called licenciates and extra-licenciates. The queen's bench division decided that the college was entitled by the medical act of 1836 to grant diplomas both of medicine and surgery, 8 March, 1893. The prince of Wales elected a fellow of the college, July, 1897.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PRESIDENTS OF ROYAL COLLEGE, LONDON.

PHYSICS, see under *Philosophy, Natural.*

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the 18th century the essays of Le Cat and Pernetty led to the modern system.

J. K. Lavater, who endeavoured to raise physiognomy to the rank of a science, published his celebrated work "Physiognomische Fragmente," 1775-78, of which an English translation by Holcroft was published in 1793. The subject was considered by C. R. Darwin in his work "Expression of the emotions in Man and Animals," 1873, and by Mantegazza in his "Physiognomy and Expression," 1890.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, Carpenter, Virchow, Brown-Séquard, Helmholz, Ludwig, Du Bois-Reymond, Salomon Stricker Rutherford and sir John Bucknill are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson (bart. 1899) and others, early in 1876; see *Anatomy, Biology, Morphology, Royal Institution.* International congresses of physiology have been held since 1888.

By means of the Röntgen rays the action of the heart and viscera in a living human body were made visible at a meeting in Munich . 6 Aug. 1896

PIANOFORTE.* The invention is attributed to Cristofalli (or Cristofori), an Italian, J. C. Schröter, a German, and Marius, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpsichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silberman manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpie, a German, 1766, and have been since greatly improved by Clementi, Broadwood, Collard, Kirkman, Erard, Pleyel, and others.

Bright pianos, first made in this country, were suggested by Isaac Hawkins in 1800, and Thomas Lond, in 1802. Wm. Southwell patented "cabinet pianos" in 1807; superseded, from about 1840, by the cottage, piccolo, and other pianos.

A keyed instrument at Modena was named "piano e forte," 1598.

A "stone pianoforte," formed of a series of flints and other stones of various sizes, collected in France and arranged by M. Baudre, was played on by him at the Royal Institution, on 16 March, 1866.

The transposing piano, invented by Mr. Henry Schallehn, was exhibited at the Savoy hotel, Westminster, 10 June, 1890.

The Janko pianoforte, with a new arrangement of keyboard, exhibited in the Portman rooms, London, W., 24 Nov. *et seq.* 1891, said to possess many advantages. See Grove's "Dictionary of Music," article "Pianoforte." A "double piano," a new harpsichord and harp, played on at Messrs. Pleyel's rooms, London, 12 April, 1897.

Among mechanical contrivances for pianoforte playing, or "dumb pianists," are the *Pianola*, and the *Metzler Piano-player*, 1905.

PICARDY (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1477, to whom it was ceded by the treaty of Arras, 14 Sept. 1435, and annexed to France by Louis XI., 1463.

PICCADILLY, a fine street, W. London; and the name, of uncertain origin, was Pickadilla and Pidrullo, about 1660, when a house of entertainment existed near the Haymarket, termed Pickadilly hall, after which buildings were gradually extended westwards.

PICCOLO PIANO, a small pianoforte introduced by Robert Wornum in 1829.

PICENTINES, a Sabine tribe, subdued by the Romans, and their capital, Asculum, taken, 268 B.C. They began the Social war in 90, and were conquered in 89 B.C.

PICHEGRU'S CONSPIRACY, see *Georges*.

PICKETING, see *Trials*, Aug. 1867 and 1897.

R. Read and four other cabinetmakers imprisoned for picketing May, 1875
watching dwellings, &c., declared illegal, 30 Dec. 1898

PICQUET, a game with cards, invented, it is said, by Jquemain, for the amusement of Charles VI. of France, then in feeble health, 1390. *Mézéray*.

* The nucleus of the instrument was a little box over which were stretched strings: such was the cithole, the ulcimer, and the psaltery. The clavitherium had keys; the clavichord (about 1500) had dampers; successive improvements were the virginals (on which queen Elizabeth played), the spinet (about 1700), and the harpsichord (with two rows of keys), said to have been used in the 15th century, for which Bach and Handel composed in the 17th century. A collection of harpsichords (one dated 1555) is in the South Kensington museum. A double-pianoforte (with two keyboards reversed), giving remarkable effects (patented by M. M. Mengeot), played on at Covent-garden theatre, 21 Oct. 1878.

PICTS (possibly from *Picti*, painted), the name given to the earliest known inhabitants of the east of Scotland, by the Romans, who made expeditions into the country, 296 *et seq.*; see *Roman Wall*.

PICTURES, see *Painting*.

PIEDMONT (*Pedemontium*, Latin, foot of the mountains), a region in N. Italy, formerly the seat of government of the kingdom of Sardinia, *which see*, and *Savoy*. Population, 1890, 3,234,506; 1909 (est.), 3,557,956.

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV., it had cognizance of all disputes in the precincts of the market to which it might belong, 1477.

PIETISTS, a Lutheran sect, instituted in Leipsic, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists," with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

PIEZOMETER (Greek *piezo*, I compress), an apparatus for measuring the compressibility of liquids, invented by Ersted (died 1851); improved by Despretz & Saigey.

PIGEONS were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Phillips*. At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

In a pigeon race from Dover to Plymouth, some pigeons attained the velocity of 1,233 yards, 1,218 yards and 1,008 yards per minute 22 July, 1886. About 300 pigeon-flying societies exist in France: the organization of carrier-pigeon stations ordered by the minister for war, Jan. 1888. About 350 similar societies exist in Germany, stated Jan. 1888.

National Peristeric Society (originating from the Columbarian Society, founded in 1750), has annual shows. A bill for prohibiting shooting pigeons rising from a trap attended with cruelties, passed by the commons with large majorities, in 1883 and 1884 (195-40), was rejected by the lords in 1883 (30-17), and on 9 May, 1884 (78-48).

The first time that pigeons were used in modern warfare was at the siege of Paris in 1870, when a pigeon post was established at Tours, for the purpose of carrying dispatches to Paris. A notice stating that letters for transmission by carrier pigeons was posted at the head offices of the General Post Office in the United Kingdom and the terms were 5d. per word. For a considerable period this was the only means of transmitting information into Paris during the siege.

More recently, when Ladysmith was besieged, dispatches were carried over the heads of the Boers by pigeons. There are about 2,000 pigeon clubs in the United Kingdom, 1910.

The largest race that has been flown by one organisation is a race from Nantes to Lancashire organised by the Lancashire-Nantes combine, in which annually 8,000 pigeons compete, the distance being 400 miles.

Over a million pigeons for racing purposes are bred and branded with rings each year.

His Majesty King George the Fifth offers a national cup to be flown for each year.

PILGRIMAGE OF GRACE, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition, bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was headed by Aske, and other gentlemen, and joined by priests and 40,000 men of York, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

PILGRIMAGES began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1016, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimage to Canterbury is described by Chaucer in his *Canterbury Tales* about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. This pilgrimage was very great from India, where it has been encouraged by the princes, but discouraged by the British as idolatrous. The great mortality due to want and disease compelled the government to intervene with strict sanitary regulations, with the result that the number of deaths has diminished, and the number of pilgrims increased. See *Cholera*. Pilgrimages to shrines of the Virgin Mary in France revived in 1873, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; those of La Salette discredited by Pope Leo X., 1879. See *Sacred Heart*.

100 American pilgrims received by the pope 9 June, 1874
About 100 agricultural labourers (locked out for being unionists) traversed England as pilgrims, receiving hospitality and money; beginning 30 June, *et seq.* "

Pilgrims (4 men and 36 women) killed by the partial collapse of a house in Porchov, Russia, many injured, reported 8 Oct. 1900
Among the pilgrims visiting Mecca cholera broke out. Total number of pilgrims landed at Yiddah for Mecca district was 80,000 18 Jan. 1903
[See *Boulogne*.]

PILGRIM FATHERS, the name given in North America to a party of 74 English puritans and 28 women, members of John Robinson's church, who sailed in the *May Flower* from Leyden to North America, and landed on Plymouth Rock, where they founded a colony, 25 Dec. 1620.

The rev. A. E. Dunning, D.D., of Boston, U.S., with 46 American congregational ministers and others, following the track of the pilgrim fathers, arrive at Plymouth, 11 June; the party were received at Oxford, Bedford and other places; the visitors leave, much gratified, 2 July, 1896.

Memorial congregational church in memory of the "Pilgrim Father," John Robinson, founded at Gainsborough, 29 June, 1896.

The MS. log of the *Mayflower* presented to the President and citizens of the United States by the bishop of London, in compliance with the petition of Mr. T. F. Bayard, U.S. ambassador, 25 March, 1897; given up by him to governor Wolcott, of Massachusetts, 26 May, 1897.

"**PILGRIM'S PROGRESS**," written by John Bunyan, in Bedford gaol, where he was imprisoned twelve years, 1660-72. The first part was published in 1678. A first edition (1678) realised 1,475*l.*, 9 May, 1901.

PILLORY, a scaffold for persons to stand on, to render them publicly infamous. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory, 41 Hen. III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Bossy, for perjury, 22 June, 1830.

PILNITZ (near Dresden, Saxony). The convention of Pilnitz took place between the emperor Leopold and the king of Prussia, 20 July, 1791. On 27 Aug. the treaty of Pilnitz, or, as some style it, the Partition treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give them to his serene highness the elector palatine, to be added to the palatinate; Bavaria to be added to the Austrian possessions," &c.

PILOT. The act relating to pilots, 16 & 17 Vict. c. 129 (1853), with other acts, is embodied in the Merchant Shipping act; see *Trinity-House*.

PIMLICO, S.W. suburb of London, belonging to the Grosvenor (Duke of Westminster) family, who have built largely upon it since 1830.

On 20 Dec. 1881, Georgina Moore, 7½ years old, living with her parents in Winchester-street, disappeared; her body was found by bargemen in the Medway, near Yalding, 30 Jan. 1882. Esther Pay, with whom she was last seen, accused of her murder, was acquitted, 29 April, 1882.
Pimlico poisoning case. See *Trials*, April, 1882.

PINCHBECK, an alloy of 25 per cent. of zinc and 75 copper, used for watch-cases, &c.; named after either Christopher or Thomas Pinchbeck, London mechanics; the former is said to have died in 1732, the latter in 1783.

PINDAREES, bands of freebooters, or mercenary soldiers in the central provinces of India, headquarters Malwa, who, after the fall of the Mogul empire, ravaged the native territories and the British settlements, 1804 *et seq.*, till finally crushed by two armies commanded by the marquis of Hastings in 1817.

PINE-TREES. The stone pine (*Pinus Pineæ*), brought to these countries before 1548. The cluster pine (*Pinus Prænaster*), brought from the south of Europe before 1596. The Weymouth pine (*Pinus Strobus*), from North America, 1705. Frankincense pine (*Pinus Tedda*), from North America, before 1713. There are other varieties.

PINKIE (near Edinburgh), where the English under the Earl of Hertford, protector, totally defeated the Scots under the regent Arran, 10 Sept. 1547. There fell not 200 of the English, but above 10,000 of the Scots. Above 1500 were taken prisoners.

PINS have been found in British barrows (*Foss-broke*); and are mentioned in a statute of 1483. Brass pins were brought from France in 1540, and first used in England, it is said, by Catherine Howard, queen of Henry VIII. Pins were made in England in 1543. *Stow*. They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

PIOMBINO, a principality, Italy, previously ruled by the Apenni family, was acquired by the Spaniards, 1589. It was ceded to France, 1801, and given by Napoleon to his sister Elise, wife of prince Bacciochi, who held it from 1805 to 1815, when it was restored to the Buoncampagni family, subject to Tuscany. It became part of the kingdom of Italy, 1860.

PIPE ROLL SOCIETY, founded in 1884 for printing all extant public records prior to the year A.D. 1200.

PIRACY, Greek *pirati*, was severely suppressed by the Romans. Pompey destroyed the Cilician pirates, 67 B.C.; see *Buccaneers*. Many acts of parliament were passed for the suppression of piracy; the latest in 1837.

PIRÆUS, the port of Athens, was united to the city by two long walls, one erected by Themistocles, and the other by Pericles, 456 B.C., which were destroyed by Lysander, 404 B.C. It was fortified by Conon, 393 B.C. The Piræus was able to contain 400 Greek vessels. It was occupied by the French during the Russian war in 1854.

PIRMASENS (Bavaria). Here Moreau and the French were defeated by the duke of Brunswick and the Prussians, 14 Sept. 1793.

PISA, an ancient city in Tuscany, was founded about six centuries before Christ, and was favoured by the early Roman emperors as a flourishing republic. The citizens took an active part in the Italian wars of the middle ages, but became subject to Florence, after a long siege, 1405-6. In 1494 Pisa became independent under the protection of Charles VIII. of France, but was retaken by the Florentines in 1509. The university was founded in 1343, and revived by the Medici in 1472 and 1542. The rival popes, Benedict XIII. and Gregory XII., were deposed at a council held at Pisa in 1409, and Alexander V. elected in their room. The Campanile or leaning tower was built about 1154,* and the Campo Santo about the same time. Fire panic in the cathedral, 9 persons crushed to death, 21 injured, 29 May, 1897. Attempt to burn Pisa Cathedral made by a mob as a demonstration against the execution of señor Ferrer in Spain; the door was set on fire, 17 Oct. 1909.

* The Campanile was erected to contain bells, and stands in a square close to the cathedral. It is built entirely of white marble, and is a cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular that in dropping a plummet from the top, which is 183 feet in height, it falls sixteen feet from the base. Some thought this was done purposely by the architect; others attributed it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1635).

PISCICULTURE, see *Fisheries*.

PISTOLS, the smallest fire-arms, said to have been invented at Pistoja in Italy; were first used by the cavalry of England about 1544. Subsequently they were made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm is to be found in the museum of the United Service Institution, and is supposed to date from the reign of Charles I. An eight-chambered matchlock revolver of the 16th century is placed in the Royal Artillery Museum, Woolwich. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, who invented the Colt revolving pistol, 1851. This system of manufacture induced the British government to establish the Enfield armoury, in 1855; see *Fire-Arms*.

PIT BROW WOMEN, see *Coal*, 23 June, 1887.

PITCAIRN'S ISLAND, in the Pacific Ocean, said to have been discovered by Pitcairn in 1768, seen by Cook in 1773, and since colonised by ten mutineers from the ship *Bounty*, captain Bligh, in 1789; see *Bounty*.

The mutineers remained unknown to England until discovered accidentally in 1814. A ship nearing the island was hailed by a swarthy youth in the English language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a well-conducted community under the care of Adams, the principal mutineer. He died in 1829, when George Hunn Nobbs, an Englishman, who arrived a few years before, became chief. In Aug. 1852 admiral Moresby spent a few days on the island. By his means Nobbs was sent to England and obtained ordination. His death (aged 86) announced Jan. 1885. As their numbers increased, the island proved incapable of their support. The English government removed them, with all their property, in the ship *Morayshire*, on 3 May, 1856, and landed them, after a boisterous passage, on Norfolk Island, prepared previously for their reception, 8 June. The government stocked Norfolk Island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 96 males and 102 females.

Pitcairn's island visited by H.M.S. *Peterel* was found to be prosperous, Dec. 1875. Population, 15 Aug. 1879, 93; in 1890, 126; in 1904, 141.

Harry Christian sentenced to death for murdering a woman and her children (June, 1897), reported, 8 Nov. 1898; the *Sokota* s.s. visited the island, 30 Aug. 1902.

Severe storm and floods, 17 persons drowned, reported 28 July, 1896

Mr. Andrew Carnegie gives 5,000,000 dollars to his workmen, &c., March, and 2,000,000 dols. to Pittsburgh Nov. 1901

Steel strike, 35,000 men called out, 1 July; ends in defeat of the men 14 Sept. "

Oil explosion at Sheraden in some naphtha cars, 20 deaths; the naphtha escaping caused another explosion at Esplenborough, wrecking 3 buildings, 12 May, 1902

Carnegie institute opened; the amount of the gift given by Mr. Carnegie for the institute was over 3,400,000. 10 April, 1907

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday, 6 April, 1862, a great battle was fought between the American federals under Grant and Prentiss, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federals were reinforced the next day and renewed the attack; the confederates maintained their ground; but soon after retired in good order to Corinth. This engagement is also named the battle of Shiloh.

PITURINE, a new narcotic, said to have been discovered in 1882 in Australia. It resembles a mixture of opium and tobacco, and is extracted from the dried leaves of the *Duboisia pituri*.

PIUS IV., CREED OF, see *Confessions*.

PLACENTIA (now Piacenza), N. Italy, founded by the Romans about 220 B.C. It suffered in all the convulsions attending the fall of the empire and the wars of the middle ages. In 1254 it fell under the rule of the family of the Scotti. In 1302 Alberto Scotti was overcome, and Placentia was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545 Paul III. gave it with Parma as a duchy to his son Peter Louis Farnese. The French and Spaniards were defeated by the Austrians and Sardinians near Placentia, 16 June, 1746; see *Parma*.

PLACILLA, Chili (*which see*). The site of the decisive victory of the congressists over president Balmaceda, 28 Aug. 1891.

PLAGUE. The plagues of Egypt (1491 B.C.) are described in *Exodus ix.*, &c. The first recorded general plague in all parts of the world occurred 767 B.C. *Petavius*. At Rome a desolating plague prevailed, 453 B.C. The devastating plague at Athens, which spread into Egypt and Ethiopia, 430 B.C., is admirably described by Thucydides. Another which raged in the Greek islands, Egypt, and Syria, destroyed 2000 persons every day, 187 B.C. *Pliny*. See *Cattle*.

At Rome, a most awful plague; 10,000 persons perished daily, A.D. 80.

Again ravaged the Roman empire, 167, 169, 189.

Another in the Roman empire. For some time 5000 persons died daily at Rome; many towns entirely depopulated, 250-265.

In Britain, a plague swept away such multitudes that the living were scarcely sufficient to bury the dead, 430.

A long-continued, dreadful one began in Europe in 558, extended all over Asia and Africa.

At Constantinople, when 200,000 of its inhabitants perished, and in Calabria, Sicily, and Greece, 746-749.

In London, 962.

At Chichester, in England, an epidemical disease carried off 34,000 persons, 772. *Will. Malm.*

In Scotland, 40,000 persons perished, 954.

In London, great mortality, 1094; and Ireland, 1095.

Again, in London; it extended to cattle, fowls, and other domestic animals, 1111. *Holinshed*.

In Ireland; after Christmas this year Henry II. was forced to quit the country, 1172.

Again, in Ireland, when a prodigious number perished, 1204.

The "Black Death" in Italy, 1340.

A plague raged throughout Europe, causing extensive mortality. Britain and Ireland suffered grievously. In London alone 200 persons were buried daily in the Charterhouse-yard, 1348-9. (That at Florence described by Boccaccio.)

In London and Paris a dreadful mortality prevailed in 1361-2, 1367, 1369, and in Ireland in 1370.

A great pestilence in Ireland, called the *Fourth*, destroyed a great number of the people, 1383.

30,000 persons perished of a dreadful pestilence in London, 1407

Again, in Ireland, superinduced by a famine; great numbers died, 1466; and Dublin was wasted by a plague, 1470.

An awful pestilence at Oxford, 1471; and throughout England, a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478. *Rapin: Salmon*.

The *Sudor Anglicus*, or sweating sickness, very fatal in London, 1485. *DeLaune*.

The plague in London so dreadful that Henry VII. and his court removed to Calais, 1499-1500. *Stow*.

The sweating sickness (mortal in three hours), in London, 1506; and in 1517. In most of the capital towns in England half the inhabitants died, and Oxford was depopulated, 9 Henry VIII. *Stow*.

Limerick was visited by a plague, when many thousands perished, 1522.

The sweating sickness again in England, 1528; and in North Germany in 1529; and for the fifth time in England, in 1551.

30,578 persons perished of the plague in London alone, 1603-1604. It was also fatal in Ireland.

200,000 perished of a pestilence at Constantinople in 1611.

In London a great mortality prevailed, and 35,417 persons perished, 1625.

In France a general mortality; at Lyons, 60,000 persons died, 1632.

The plague brought from Sardinia to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1656.

THE GREAT PLAGUE OF LONDON, began Dec. 1664, which carried off 68,596 persons; some say 100,000. Fires were kept up night and day to purify the air for three days; and it was thought the infection was not totally destroyed till the great conflagration of Sept. 1666.

60,000 persons perished of the plague at Marseilles and neighbourhood, brought in ship from the Levant, 1720.

One of the most awful plagues that ever raged, prevailed in Syria, 1760. *Abbé Mariti*.

In Persia, a fatal pestilence, which carried off 80,000 of the inhabitants of Bassora, 1773.

In Egypt, about 800,000 persons died of plague, 1792.

In Barbary, 3000 died daily; and at Fez 247,000 perished, 1799; in the east, 1800; 1840; 1873; many deaths in Bagdad, &c., April-May, 1876.

In Spain and at Gibraltar immense numbers were carried off by a pestilential disease in 1804 and 1805.

Again at Gibraltar, an epidemic fever much resembling the plague, caused great mortality, 1828.

The Asiatic cholera (see *Cholera*) made its first appearance in England, at Sunderland, 26 Oct. 1831; in Scotland, at Haddington, 23 Dec. same year; and in Ireland, at Belfast, 14 March, 1832.

The cholera again visited England, &c., 1848 and 1849 (see *Cholera*).

The cholera raged at Smyrna and Constantinople, and appeared in Paris, Marseilles, Naples; July-Dec. 1865.

A great cattle plague (which see) in England, resembling typhus, near London, begins June, 1865.

A new, and hitherto an incurable disease, named *black death*, on account of purple blotches coming out on the skin, appeared in Dublin; many persons of all ranks died a few hours after the seizure. March *et seq.* 1866.

Plague in Astracan, Jan.—April, 1879.

Plague in Hong-Kong (which see), June, July, 1894.

Plague in Bombay, Karachi (which see), and other parts of India, Oct. *et seq.* 1896-8.

Sanitary conference of the powers, 65 delegates, count Bonin elected president, 16 Feb. 1897; convention signed, 19 March, 1897.

The commission under prof. Koch issues a report, 20 July, 1897; official report issued, June, 1898.

Plague in Turkestan, Samarkand, great mortality, Oct.—Nov. 1898.

Plague severe in India, great mortality in Bombay (which see), 1898; estimated deaths, 600,000, Aug. 1901.

(Punjab, 530 deaths, 1899-1900; 6,399 deaths, 1900-1901; 200,000 deaths, 1901-02.)

Plague in Mauritius, 1899-1903; Oporto (which see).

Dr. Manson reports bubonic plague to be a rat-borne disease, and holds their extermination as a preventative, Oct. 1899 [disputed by Dr. Bruce Low in his report of the spread of the disease in the world, 1898-1901; *Times*, 25 Oct. 1902].

Prof. Kitasato of Japan discovers the plague bacillus saprophytic, reported, ? 1900.

Prof. Haffkine's system of anti-plague inoculation successful; encouraged by government, Feb. 1900.

Plague at Sydney, spring *et seq.* 1900; total deaths, 103; town free, 8 Sept. 1900; 33 deaths up to 14 May, 1901.

Dr. Yersin's anti-plague serum obtained from horses, proved successful in Indo-China, Aug.—Oct. 1900.

Slight outbreak at Glasgow, 7 deaths, 27 Aug.—14 Nov. 1900; 4 cases, 1 death, 26 Oct. 1901.

Plague at Cape Town, 11 Feb. 1901.

Hong-kong: 113 deaths, week ending 18 May, 1901; total deaths, 1,509 (11 Europeans); subsiding, 24 July

1903 deaths, 7-21 June, 1902; subsides, reported clear, mid Sept. 1902; increasing Feb. 915 deaths, 18 April-Aug. 1903.

Oporto: 4 deaths, reported, 26 June, 1901.

Egypt: 173 cases, 83 deaths, 7 April-7 Oct. 1901; 147 deaths, April-19 July, 1902.

Plague in Liverpool: 6 deaths, 30 Oct.; 1 death, 7 Nov. 1901.

Plague in Madagascar: 4 deaths, 19-27 May, 1902.

Plague in Odessa: slight epidemic, Sept.—early Nov. 1902.

Plague in Durban: 27 deaths, reported, 26 Jan. 1903.

Plague in India, Bombay and elsewhere, 600,000 deaths, Jan.—Aug. 1903.

Plague in the Punjab: 130,000 deaths, March-April, 1903.

Plague in China: many deaths at Niuchwang, reported Sept. 1903.

Rats proved to be a means of spreading plague; 185,982 killed in Thames docks, &c., during 1902; 249,718 killed up to 1 Nov. 1903.

Plague in Mauritius: many deaths 3 Sept.—Nov. 1903; 170 deaths, 24 Nov.—17 Dec. 1903.

Plague in India: chiefly Bombay, Bengal, the N.W. Provinces and the Punjab; weekly average early months of 1904, about 18,000, rising to 40,527 for the week ending 19 March; highest record, 47,599, for week ending 9 April; 46,812 week ending 16 April, maintaining this level, more or less, until 14 May (35,413); number drops from 20,484, 28 May, to 1,910, 9 July, rising to 9,914, 3 Sept.; 15,994, 29 Oct., declines to 15,197, 12 Nov. 1904.

Plague in India: in Bombay, N.W. Presidency, and the Punjab; in a less degree in Burma and other parts of India. Weekly mortality in Jan. about 20,000, reaching, by steady increase, to a total of 57,702, 1 April; drops to 4,000-5,000, 30 June, and to 1,050 weekly for all India, 1 Aug.; rises to 3,000, mid Oct. 1905; 356,700 deaths from plague in India in 1906; 1,316,000 in 1907; 148,700 in 1908.

Cases of plague in England in Jan. and June; a Lascar seaman, of the *s.s. Crewe Hall*, being attacked in the first instance; in the latter case, a youth, serving as cook on board ship, attacked in Manchester; at Leith a labourer admitted into hospital for supposed enteric fever, 5 May; mother and child, who recovered (the father died), also admitted, 10 May, 1905.

Plague in Chili: and some cases at Aden, Hong-kong, Queensland, and S. Africa, during 1905.

Plague in Seistan, appearing at the beginning of Dec. 1905; from 200-300 deaths were reported to 26 Jan. 1906.

Plague on the Gold Coast; 10 deaths at Accra, 6 at Niankano and 8 at Temma, reported 29 Feb. 1908.

Plague at Hong-kong; 133 cases and 109 deaths reported 30 May.

Outbreak of bubonic plague in various places in southern China; 50 deaths daily reported from Tuantsiu, 31 May, 1909.

PLAIN-SONG, see *Chanting*.

PLANE. A true plane, most successfully obtained by Sir Joseph Whitworth. Fine specimens exhibited at the Royal Institution in 1873.

PLANETARIUM, see *Orrery*.

PLANETS. Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1460 stars are accurately described; this chart is said to be in the national library at Paris. See *Jupiter, Mars, Saturn*. We now know eight primary planets, termed major; *Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune*; and secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglaia* to *Pandora* are numbered 47 to 55; *Meletè* is 56.

Uranus, formerly called *Georgium Sidus* and *Herschel*; discovered by W. Herschel (see *Georgium Sidus*) 13 March 1781

Neptune, discovered by Galle (in consequence of the calculations of Le Verrier) (see *Neptune*), 23 Sept. 1846. It had been theoretically discovered by professor J. Couch Adams of Cambridge 1845

Vulcan (between Mercury and the Sun), said to be discovered by M. Lescarbault, a physician (not seen since), 26 March, 1859, and its discovery is now generally doubted; said to have been seen by Watson during the solar eclipse (doubted by Peters) 29, 30 July, 1878

Between five and six hundred minor planets have been discovered since 1 Jan. 1801. In recent years this work has been greatly aided by photography.

During 1902 43 small planets were discovered. The minor planets are very small, being in general only a few miles in diameter. They are divided into three groups (Mars group, Chief group, and Jupiter group) according to their mean velocities.

The rapid discovery of planetoids by photography, especially by Wolf and Charlois, in recent years, has caused much confusion in records, 1892-1903.

PLANING-MACHINE. One for wood was constructed by Bramah, about 1802; and one for iron by Joseph Clement in 1825.

PLAN OF CAMPAIGN (see *Ireland*), Oct. 1886. By this plan the tenant of a farm was to pay his rent to the National League instead of to the landlord, and was to be supported if evicted. It was condemned by the pope, 20 April, 1888; given up by many tenants throughout the country, and disavowed by Mr. Parnell and others, 1890-1. The plan given up by many on the Woodford estate, Galway, Oct. 1891.

Mr. Dillon stated before the Evicted Tenants commission that the total amount received from all sources for evicted tenants was 234,431*l.* 4 Jan. 1893

PLANTAGENET,* HOUSE OF, to which belonged fourteen English kings, from Henry II., 1154, to Richard III., 1485; see *England, Kings*.

PLANTATIONS, see *Trade*.

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive and the Hindoos under Surajah Dowlah, 23 June, 1757; 68,000 men were vanquished by 1000 British and about 2000 sepoys. The victory laid the foundation of our empire in India.

PLASTER OF PARIS. Gypsum, sulphate of lime, used for moulds, statuary, &c., first found at Montmartre, near Paris, whence its name. The method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

PLATA, LA, see *Argentine Republic*.

PLATÆA (Boeotia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedæmonians and Athenians, 22 Sept. 479 B.C.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were

* Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French *genet*, in Latin *genista*, being the only tough, plant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Planta-genista*, or Plantagenet; other accounts are given. Skinner and Mézeray.

henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1696). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see *Goldsmiths' Company*. By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (PLATING), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Electrotype*.

Duty on silver plate to be reduced gradually till abolished, from 1 June, 1881; abolished 17 April, 1890.

PLATE-WAYS, on ordinary roads for waggons carrying goods, proposed at Liverpool about 1880, to supersede railways for cheapness; not adopted.

PLATFORM, see *Public Meetings*.

PLATINUM, the heaviest of all the metals, except iridium. The name originated with the Spaniards on account of its silvery colour; *Plata* signifying silver. It was found in the auriferous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. *Greig*. In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (*which see*). Platinum was rendered malleable and ductile by Dr. Wm. Hyde Wollaston, whose processes are described in the Royal Society's Bakerian lecture for 1829. He died in 1828, having, it is said, gained 30,000*l.* by his inventions. In 1859 M. H. Ste.-Claire Deville made known a new method of obtaining platinum from its ore, in great abundance and purity; and at the international exhibition of 1862 was shown a mass worth 384*ol.*, weighing 266½ lb., of a metal hitherto considered infusible, obtained by his process, employing the oxy-hydrogen flame. See *Philosophical Lamp*.

Dodé's process for coating iron with platinum to prevent rust, shown at Johnson & Matthey's, 11 Jan. 1879. *Platinotypes*, photographic reproductions of pictures, by a peculiar process by Mr. F. Hollyer, specimens exhibited in the Dudley Gallery, Oct. 1892.

PLATONIC PHILOSOPHY, the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed "Philosophy backed by example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness. The Cambridge Platonists included Whichcote, Cudworth, John Smith, Henry More.

Professor Jowett's popular translation of "Plato's Dialogues" published in 1871; 3rd edition, 1893.

PLATONIC YEAR, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the

same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or earlier requires 25,816 common years to complete; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURG. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost, but was abandoned after the naval force of England had offered a defeat in an engagement with the Americans, 11 Sept. 1814, when the British squadron in Lake Champlain was captured; see *United States*.

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

The Metropolitan Public Garden, Boulevard, and Play-ground association formed by lord Brabazon (aft. earl of Meath) and others in 1882 has done good service in the east of London.

The London Playing-fields association founded 1890. Hackney marsh (337 acres), purchased by the London county council and others as a playground for east London, opened by sir John Hutton, 21 July, 1894.

PLAYHOUSE, THE. The Avenue theatre, rebuilt and renamed, and opened with *The Drumes of Oude*, 18 Jan. 1907.

PLAYS, see *Drama and Theatres*.

PLEADINGS. In the early courts of judicature in England, pleadings were made in the Saxon language; and in Norman-French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 36 Edward III. 1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the pleadings are the mutual written statements of the plaintiff's cause of action and the defendant's ground of defence.

PLEBEIANS, Plebes, or Plebs, the commons of Rome, as distinguished from the Patricians; see *Rome*, 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the *comitia tributa*, an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been revived in France and Italy, and applied to *Universal Suffrage* (which see).

PLETHYSMOGRAPH, an apparatus for detecting the state of the mind by observing the relations of the circulation of the blood from the heart to the brain, invented by M. Mossol, of Turin, 1882.

PLEVNA, Bulgaria, 27 miles N.N.W. of Nicopolis; near the river Vid; the site of very fierce conflicts during the Russo-Turkish war, 1877.

Occupied by the Russians, 6 July, but retaken by Osman Pacha, 18 July, and held by him after severe combats, with Schildner-Schuldner, 19, 20 July; with Krudener . . . 29-31 July, 1877.

The Russians lost about 2000 killed, 4000 wounded. The Russian attack was considered rash, like that at Balaclava, and a disastrous check.

PLOTS, see *Conspiracies and Rebellions*.

PLOUGH. "Thou shalt not plough with an ox and an ass together." *Deut.* xxii. 10 (1451 B.C.). The Roman plough is minutely described by Virgil, about 31 B.C. Engines to plough grounds, whether inland or upland, were patented by David Ramsay and Thomas Wildgoose, in 1618; and many improvements in ploughs have been patented since. The application of steam power to ploughing was patented by John Upton in 1837, and by others since, more especially by lord Willoughby d'Eresby, the marquis of Tweeddale, and the earl of Caithness; see *Steam-Plough*. Petrol motor-ploughs are now in use.

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forefathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *Ashe*. On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. *Bailey*.

On Plough Monday, the lord mayor of London holds annually at Guildhall a grand court of wardmote, at which the election of the common council and other officers on St. Thomas' day, 21 Dec., is confirmed.

PLUM. We have two native plums; our finer kinds came from Italy and Flanders about 1522. The *Diospyros Lotus*, the date plum, was brought from Barbary, before 1596; the Pishamin plum, *Diospyros virginiana*, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLUMBAGO, see *Graphite*.

PLUMBERS. The company is dated 1611. A bill for their registration introduced into the commons in 1894; withdrawn, 15 Aug. 1894; passed, 10 March, 1902.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII. 1520. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850, 1855, and 1885, provisions being made for the amalgamation of neighbouring benefices. See *Electors*.

PLURAL NUMBER, see *We*.

PLUS (+) AND MINUS (—). Professor De Morgan attributes these signs to either Christopher Rudolf, who published a book on algebra about 1522, or Michael Stifelius, about 1544.

PLYMOUTH, a fortified seaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine

hotel and assembly-rooms were burnt 6 Jan. 1863; loss about 50,000*l*. The National Association for Social Science met here, Sept. 1872. See *Armada*, 1888, 1890, *Breakwater*; pop. 1909 (est.) 124,180.

PLYMOUTH BRETHREN, a body of Christians calling themselves "the Brethren," first appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as His vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

PNEUMATIC DESPATCH COMPANY, to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the N.W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. The company stopped through insufficient support, 1876. A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1871.

PNEUMATIC LOOM, in which compressed air is the motive power, invented by Mr. Harrison, was exhibited in London in Dec. 1864. A company was formed to bring it into general use. Pneumatic tyre company, see *Velocipede*, 1896.

POET-LAUREATE. Selden could not trace the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Versificator Regis* to whom an annual stipend was first paid of 100*s*.

Chaucer, on his return from abroad, assumed the title of poet-laureate; and in the twelfth year of Richard II. 1389, he obtained a grant of an annual allowance of wine.

In the reign of Edward IV., John Kay was laureate. Andrew Bernard was laureate, temp. Henry VII.; and John Skelton, temp. Henry VIII.

James I. in 1615 granted to his laureate a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l*. per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. We believe that on Southey's appointment the tierce of Canary wine was commuted for 27*l*.

Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of Pye, in 1813.

On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office when the prince is a man of virtue, and the poet just departed was a man of genius."

POICTIERS (W. France), near which was fought the battle between Edward the Black Prince and John, king of France, in which the English arms triumphed, 19 Sept. 1356. The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London; see *Tours* and *Vouglé*.

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. Additional restrictions by act passed in 1885. The *Poisoned Grain Prohibition Act* passed 28 July, 1863.

Deadly poison, freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic. Between 1666 and 1676, the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed, 16 July, 1676.

J. Palmer was executed in 1856, and Miss M. Smith tried in 1857, for poisoning; see *Trials*. Catherine Wilson, a noted poisoner, was executed on 20 Oct. 1862. Edward William Pritchard, M.D., was executed at Glasgow, 28 July, 1865, for the slow murder of his wife and her mother by antimony.

Over 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr. Hodgson, a chemist, was tried for homicide, and acquitted. Weltmann, a bookbinder at Posen, poisoned 4 wives and 2 children, about 1859.

Christiana Edmunds, of Brighton, was convicted of murdering a child by poisoned sweetmeats; other persons barely escaped (sentence remitted on the ground of insanity), 16 Jan. 1872.

Mary Ann Cotton, imprisoned Oct. 1872, suspected of poisoning 16 persons, principally children: convicted of poisoning her child, 7 March; executed at Durlham, 24 March, 1873.

About 25 wives convicted of poisoning their husbands at Gross Bedskereh in Hungary; Thekla Popav was said to be the head of the conspiracy, Aug. 1882.

Catharine Flanagan and Margaret Higgins (sisters) convicted of poisoning Thomas Higgins, to obtain insurance money, 9 Feb.; other charges not tried; they confessed, and were executed, 3 March, 1884.

Jad. Van Der Linden convicted of many poisonings at Leyden, 3 May, 1885.

Albert Pel poisoned mother, wife, mistress, and others, 1872 *et seq.*; convicted at Paris 13 June; penal servitude, 14 Aug. 1885.

* On 22 Feb. 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Galicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up, alive or dead: a general massacre of the nobility and clergy in the circle of Tarnow followed: the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorze, a suburb of Cracow; here they were attacked by general Collin, and driven into Cracow on the 27th of February. The forces of the three powers then began to concentrate on Cracow; the people in the town opened negotiations with the Austrians about a surrender, and while these were going on a Russian corps entered the town without resistance, and soon afterwards the revolution was at an end.

POLE STAR or **POLAR STAR**, a star of the second magnitude, the last in the tail of the constellation called the *Little Bear*. As its nearness to the North Pole causes it never to set to those in the northern hemisphere, it is called the seaman's guide. Two stars in the constellation *Ursa Major*, or Great Bear, are called *pointers* to the Polar star. The discovery of the Pole star is ascribed by the Chinese to their emperor, Hong-ti, the grandson (they say) of Noah, who reigned and flourished 1970 B.C. *Univ. Hist.* Spectroscopic observations at Lick observatory prove the star to be a triple system, *i.e.*, a binary, with a revolution of about 4 days, moving round a third more distant star, Sept. 1899.

POLITICAL ECONOMY, the science
h has for its object the improvement of the
ition of mankind, and the promotion of civili-
on, wealth, and happiness; was considered by
o, Xenophon, and Aristotle. Its history in
country may be dated from the publication of
Vm. Petty's "Treatise on Taxes," 1662, and
tical Arithmetic," 1691; Dr. Adam Smith's
alth of Nations," 1776. The works of J. S.

Mill, McCulloch, Malthus, Ricardo, Carey, Jevons,
Sidgwick, Marshall, and Fawcett are celebrated. A
professorship of political economy was established
at Oxford by Mr. Henry Drummond, M.P., 1825;
and at Cambridge, first by Mr. G. Pryme, in 1828;
but regularly established by the university in 1863,
Henry Fawcett (blind) being the first professor.

Archbishop Whately endowed a professorship at
Trinity college, Dublin; Isaac Butt first pro-
fessor. 1832

POLITICAL OFFICES PENSIONS
ACT passed 9 Aug. 1869.

POLITICAL UNIONS were formed in Eng-
land in 1831 to carry the Reform Bill; the most
important was that of Birmingham.

POLITICIANS. A politician is described as
a man well versed in policy, or the well regulating
and governing of a state or kingdom; a wise and
cunning man. A man of artifice; one of deep
contrivance. *South.* The term was first used in
France about 1569. A new faction appeared,
known by the name of Politicians, headed by the
duc d'Alençon and the Montmorencies, and
strengthened by the accession of the Huguenots in
1574. The duke was arrested and the Montmoren-
cies sent to the Bastille.

POLKA, a dance said to have been invented
between 1830 and 1834 in Bohemia, and to have
obtained its name in Prague in 1835. It was in-
troduced into England about 1844.

POLL ACT passed in Ireland by the Junto of
the Pale, putting a price upon the heads of certain
Irish; the earl of Desmond being then deputy,
5 Edward IV. 1465. This act long endured, see
Ireland, 1465.

POLLENTIA (Piedmont, N. Italy), the site
of a great victory of Stilicho, the Imperial general,
over Alaric the Goth, 29 March, 403.

POLL-TAX or **CAPITATION TAX**, existed
among the ancient Romans. It was first levied in
England in 1380; and occasioned the rebellion of
Wat Tyler (see *Tyler*), 1381. It was again levied
in 1513. By the 18th Charles II. every subject
was assessed by the head, viz., a duke 100l., a
marquis 80l., a baronet 30l., a knight 20l., an
esquire 10l., and every single private person 12d.,
1667. This grievous impost was abolished by
William III. 1689.

POLLUTION OF RIVERS, see *Rivers*.

POLO, the game of ball termed hockey played
on horseback, became popular in England in 1872,
having been introduced from India. Games were
played by lancers and life guards at Woolwich, 16,
19 July, 1872. A polo club was formed, and inter-
national contests held. Polo is said to have been
an old Russian game, mentioned 1492 under
the name of Chügān, as brought from Persia.
The Meadowbrook club (U.S.A.) sent a team to England
in 1909 and won the international cup for America,
beating England in two test matches by 9 goals to 5,
and by 8 goals to 2.

POLONIUM. Mme. Curie succeeded in isolating one-tenth of a milligramme of polonium. This substance possesses far greater radio-active properties than radium but disappears at a comparatively rapid rate, losing 50 per cent. of its weight in 140 days. It decomposes chemically organic bodies with extraordinary rapidity; when placed in a vase made of quartz, it cracks the vessel in a very short time. 14 Feb. 1910.

POLOTSK (Russia). The French under marshal Oudinot were here defeated by the Russians under general Wittgenstein, 30 and 31 July, 1812; the next day, the Russians were defeated. Polotsk was stormed by the Russians, and retaken Oct. 1812.

POLTOWA, see *Pultowa*.

POLYGAMY, &c., was permitted among the early nations, and now by Mahometans, and until recently by Mormons (*which see*). In Media, it was a reproach to a man to have less than seven wives. Among the Romans, Marc Antony is mentioned as the first who took two wives. The practice was forbidden by Arcadius, 394. The emperor Charles V. punished polygamy with death. In England, by stat. 1 James I. 1603, it was made felony, with benefit of clergy. It was formerly punished with transportation, but now by imprisonment or penal servitude; see *Marriages*. Abolished in the United States, 23 March, 1882.—**POLYANDRY** (where one woman has several husbands) is permitted in some eastern countries, the children having equal rights.

POLYGLOT, from two Greek words denoting "many languages," is chiefly applied to editions of the Bible in several languages.

Justinian published a polyglot psalter, 1576.

1. The Complutensian Polyglot, in six vols. folio, was printed at Alcalá (Complutensis), in Spain, 1502-14; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six hundred copies of it were printed; three on vellum. Count MacCarthy, of Toulouse, paid 483*l.* for one of these copies at the Pinelli sale.

2. The Polyglot, printed at Antwerp, by Plantanus, 8 vols. folio, in 1559-69, at the expense of Philip II. of Spain.

3. Printed at Paris, by Le Jay, in 10 vols. folio, 1628-45.

4. Edited by Bryan Walton, in 6 vols. folio, 1654-7. Copies of all four are in the library of the British and Foreign Bible Society.

5. Edited by Dr. Samuel Lee, published by S. Bagster, 1 vol. folio, 1831.

6. Hexaglot bible: begun by Henry Cohn; completed by the rev. Edwd. R. De Levante and others, 6 vols. 4to, 1874.

POLYNESIA, a name recently given to the isles in the great Pacific Ocean, see *Hawaii*, *Otaheite*, *Sandwich Islands*, *Fiji Isles*, &c. These islands have been classified as Micronesia, Melanesia, and East Polynesia. The Polynesian society, Wellington, New Zealand, was founded in 1892. The archipelago explored by Mr. Fred. W. Christian, 1890-98.

POLYOLBION, a poetical description of the tracts, rivers, mountains, forests, &c. of Great Britain, with historical details, by Michael Drayton, published 1606-22; a new edition, 3 vols., by the rev. Richard Hooper, was published 1876.

POLYPES, also named Hydræ (*many-footed animals*), on account of their property of reproducing themselves when cut in pieces, every part soon becoming a perfect animal; first discovered by Leeuwenhoek, and described by him in the *Philosophical Trans.* 1703. The polypes are of the order Zoophytes, and are partly animal and vegetable.

POLYTECHNIC INSTITUTION, ROYAL, Regent-street, London, was erected by Thompson in 1838, opened 6 Aug. 1839, and enlarged in 1848. It contained a hall of manufactures with machines worked by steam-power, lecture theatres, &c., diving-bell, electric machine, &c. *Timbs*. The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on 3 Jan. 1859, when one person was killed and many injured. The institution was closed in May, 1859, but was re-opened by a new company on 12 Nov. 1860; see *Ecole Polytechnique*. The classes were formed into a college, which was inaugurated by the earl of Shaftesbury, 7 Oct. 1872. Polytechnic institution announced to be closed on 27 Aug. 1881; affairs wound up. Plant sold for about 2000*l.* 23 March, 1882. In 1882 it was occupied by the Polytechnic young men's Christian institute, principally by the instrumentality of Mr. Quintin Hogg, for educational purposes, with about 2000 members; over 17,000 members and students, 30 June, 1910.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, 980, and by Denmark, 1210; made an independent duchy, 1479; and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark in 1814, was given up to Prussia for Lauenburg, 1815; see *Denmark*; *Wrecks*, 1878.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake in A.D. 63. It was afterwards rebuilt, but was overwhelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. The principal citizens were then assembled in an amphitheatre where public spectacles were exhibited. The ashes buried the whole city and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, found a bronze figure; and this discovery led to further search, which brought numerous other objects to light, and at length the city was uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples greatly aided in exploring Pompeii, and the Italian government resumed the work in 1863. Many discoveries since.

A commemorative meeting of antiquaries and philosophers met at Pompeii, 25 Sept. 1879.

POMPEY'S PILLAR stands about three-quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 94 feet; to others 41, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian, another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelary deity of Alexandria."

PONDICHERRY (S.E. India), on the Coromandel coast, the chief of the French possessions in India. Area 115 square miles. Population 74,456. It was first settled by the French in 1674. It was taken from them by the Dutch in 1693, restored 1697; town besieged by the English, 1748; taken by them, Jan. 1761; restored, 1763; again taken, Oct. 1778; restored in 1783; taken 23 Aug. 1793, and in 1803; restored, 1815. Colony now reported to be in a prosperous condition. Estimated population in 1909 of the town of Pondicherry, 10,141.

PONDOLAND, the coast between Cape Colony and Natal, S. Africa; the British protectorate was proclaimed and notified, 6 Jan. 1885.

Severe fighting among the natives reported, Feb.-March-April; the chief Umhlangaro surrenders to the Cape authorities April, 1891. Renewed fighting; Sigcau defeated with great loss by the Umizis, reported 15 Jan. 1894. Major Elliot's mission to the chiefs successful; they submit, and consent to annexation to Cape Colony, reported March, " Deed signed by Sigcau and Ngquliso 19 March, " Sir Henry Loch proclaims the annexation to Cape Colony 20 March, " Territory about 4000 square miles; population about 170,000. April, "

PONT-Â-CHIN, see *Espierres*.

PONT-Â-NOYELLES. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Manteuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed victory; the French general asserted that he remained master of the field.

PONTEFRAC (formerly Pomfret) (S. York). At the castle (built 1080), Richard II. was confined and murdered, 10 Feb. 1400. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hause, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.), about 26 June, 1483. The castle, which had stood four sieges, was dismantled in 1649. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly. It lost one of its two members in 1885. Population, 1901, 13,398; 1909 (est.), 14,737.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulnian law, 300 B.C. Sylla increased the number to 15 (8 *maiores*, 7 *minores*), (81), and Julius Cæsar to 16. T. Coruncanus, a plebeian, obtained this office, 254 B.C.

PONTUS, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*. Artabazus was made king of Pontus by Darius Hystaspes in the 4th century B.C. His successors were mere satraps of the kings of Persia.

Pontus afterwards became a Roman province. Alexis Comnenus founded a new empire of the Greeks at Trebizond, in this country, 1204, which continued till the Turks destroyed it in 1459.		

POONAH, a province, S.W. India, formerly the seat of the power of the peishwa of the Mahrattas, 1749. It was captured by Wellesley from Holkar, 19 April, 1803, for Bajee Rao, who

had claimed British protection. Bajee resigned his office, 3 June, 1818, for a pension. See *Bombay*, 1897.

POOR. The poor of England, till the time of Henry VIII., subsisted as the poor of Ireland until 1838, entirely upon private benevolence. By statute 23 Edw. III. 1349, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "parsons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by 15 Rich. II. impropriators were obliged to distribute a yearly sum to the poor; but no compulsory law was enacted till the 27th Hen. VIII. 1535. The origin of the present **POOR LAW** is referred to the 43rd of Elizabeth, 1601, by which overseers were appointed for parishes. See *Settlement, Act of*.

Exemption from removal by residence in a parish was now obtained by one year's residence, instead of as formerly (1846) by 5, or (1861) by 3 years. With this comes union instead of parochial chargeability, and union assessment.

POOR KNIGHTS OF WINDSOR, or ALMS KNIGHTS. Soon after his institution of the order of the Garter, Edward III. founded this charity, for the provision of 24 (afterwards 26) poor persons eminent for military services. Edward IV. discharged the college from the support of the alms-knights, but Elizabeth re-established the charity for 13 knights, 1559. King William IV. changed the name to the "Military Knights of Windsor," in consequence of their all having held commissions in the army, Sept. 1833.—The "Naval Knights of Windsor" are maintained on a distinct foundation, under the bequest of Samuel Travers, 1724. The corporation was established in 1798. Dissolved in 1892.

POPE (from the Greek *Pappas* and *Papa*, a father or grandfather), considered by Romanists to be the visible chief of the church, the vicar of Jesus Christ, and the successor of St. Peter. He styles himself "servant of the servants of God." The title pope was formerly given to all bishops. It was first adopted by Hyginus, 139; and pope Boniface III. induced Phocas, emperor of the east, to confine it to the prelates of Rome, 606. By the connivance of Phocas also, the pope's supremacy over the Christian church was established; see *Italy, Reformation*, and *Rome, Modern*.

PORPHYROGENITUS, "born in the purple," a term applied to emperors of the east, born while their fathers were reigning.

PORT ARTHUR, China. See *Corea*, Nov. 1894; *Russia*, 1898 and 1904-5, also *Russo-Japanese War*, 1904-5. Surrender of Port Arthur to the Japanese by the Russian garrison, 2 Jan. 1905.

PORT BRETON, an isle near New Caledonia, South Pacific.

In 1877 the marquis Du Breil de Rays purchased of the king Maragano a quantity of land on which to found a colony. Glowing prospectuses were issued in France, a company was formed, and, the scheme being favoured by the legitimists, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1879 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov.

1833; he was sentenced to four years' imprisonment and a fine of 3000 francs, his associates to shorter imprisonment, 2 Jan. 1884.

PORTE, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. — *Bouillet*.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736.

PORTER. Dr. Ashe says that this malt liquor obtained its appellation on account of its having been drunk by porters in the city of London, about 1730. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroying neighbouring houses. Several lives were lost.

PORTERAGE ACT, regulating the charge for portage of small parcels, passed 1799.

The Fellowship of Free Porters established in London in the 13th century, with exclusive privileges, relating to grain, &c., much reduced by the act of parliament of 1872 and the construction of docks. The fellowship disbanded by the court of common council, June, 1894. Final payment of assets, 10,379*l.* 4*s.* 7*d.*, distributed 495 members, 18 Dec. 1894.

PORT HAMILTON, see *Corea*.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by Capt. Cook in 1770; see *Sydney*. Here the duke of Edinburgh was shot by O'Farrell, a Fenian, 12 March, 1868, but soon recovered. The assassin was hanged, 21 April.

PORTLAND ADMINISTRATIONS. The first was the "coalition ministry," of which William Henry Cavendish, duke of Portland,* as first lord of the treasury, was the head. It obtained the name of the "coalition" ministry, and included Lord North with Mr. Fox, formerly inveterate opponents. Formed 5 April, 1783; dissolved by Mr. Pitt's coming into power, Dec. same year.

FIRST ADMINISTRATION.

Duke of Portland, *first lord of the treasury*.
Viscount Stormont, *president of the council*.
Earl of Carlisle, *privy seal*.
Frederick, lord North, and Charles James Fox, *home and foreign secretaries*.
Lord John Cavendish, *chancellor of the exchequer*.

Earl of Westmorland, *lord privy seal*.
Hon. Spencer Perceval, lord Hawkesbury (afterwards earl of Liverpool), Mr. Canning, and viscount Castlereagh (afterwards marquis of Londonderry), *home, foreign, and colonial secretaries*.
Earl Bathurst and Mr. Dundas, *boards of trade and control*.
Lord Mulgrave, *admiralty*.
Earl of Chatham, *ordnance*.

PORTLAND CEMENT, first mentioned in a patent granted to Joseph Aspdin, a bricklayer of Leeds, 1824. His son made the true cement at Northfleet. Its value as a building material was established by Mr. John Grant's tests, 1859-71.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600*l.* exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept. 1858, was promptly suppressed. The king visits the prison and Whitehead's torpedo works, 4 April, 1902.

PORTLAND (or BARBERINI) VASE. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (222-235), and his mother Mammæa, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, 1787; at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British museum. On 27 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it was skillfully repaired, and is now shown to the public in a special room. Josiah Wedgwood made a mould of it, and took a number of casts.

PORT MAHON, see *Minorca*.

PORTO BELLO (S. America), discovered by Columbus, 2 Nov. 1502, was taken by Morgan the buccaneer in 1668; by the British under admiral Vernon, from the Spaniards, 21 Nov. 1739, and the

fortifications destroyed. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

PORTO FERRAJO, capital of Elba (*which see*); built and fortified by Cosmo I., duke of Florence, in 1548. The fortifications were not finished till 1628; see *France*.

PORT OF LONDON ACT, 1908.

The Port of London bill set up a public authority to control the administration of the port of London, consisting of 30 members, 12 appointed and 18 elected; royal assent . . . 21 Dec. 1908

First meeting of the newly constituted authority held, Sir H. Kearley, M.P., chairman, presiding 16 March, and authority transferred from the Thames conservancy . . . 31 March, 1909

The following undertakings were transferred:—Thames conservancy in respect of the river below Teddington; London and India docks co., Surrey commercial docks co., Millwall dock co., and Waterman's co.

The rt. hon. sir Hudson E. Kearley, bt., appointed chairman.

PORTO NOVO (S. India). Here sir Eyre Coote, with about 9500 men and 55 light field-pieces, skillfully defeated Hyder Ali, ruler of the Carnatic, with 80,000 men and some heavy cannon, 1 July, 1781. Hyder lost about 10,000, the British 587 killed and wounded.—**PORTO NOVO**, W. Africa, a French settlement on the coast of Dahomey, *which see* (1890 *et seq.*).

PORTO RICO, a West India island, belonging to Spain; discovered by Columbus in 1493. Attacks on it by Drake and Hawkins repulsed, 1595. Revolt suppressed, 1823. Slavery abolished, 23 March, 1873. Ceded to United States, 10 Dec. 1898; Mr. Geo. R. Colton appointed governor Sept. 1909; see *Spanish American War*. Fearful hurricane, many deaths, 7 Aug. 1899; see *West Indies*.

PORT PHILLIP (New S. Wales), original name of the colony of Victoria (*which see*).

PORTRAIT GALLERY, &c., see *National Portrait Gallery and Composite Portraits*.

The Society of Portrait Painters held its first exhibition at the Institute of Painters in Water Colours in Piccadilly, July, 1891.

The formation of a "British Museum of Portraits" (photographs) was proposed by Mr. James Glaisher in 1864, and partly begun. The undertaking resumed mainly by the exertions of Mr. Glaisher and the Amateur Photographic association, and a collection of portraits deposited in the art department at South Kensington museum, July, 1891

PORTREEVE (derived from Saxon words signifying the governor of a port or harbour). The chief magistrate of London was originally so styled; but Richard I. appointed two bailiffs, and afterwards London had mayors. *Camden*; see *Mayors*.

PORT ROYAL (Nova Scotia), capital of the French colony, Acadie, founded in 1604; after having been taken and restored several times, it was finally acquired by the British in 1710, and named Annapolis.

PORT ROYAL (Jamaica), once a considerable town, was destroyed by earthquakes in 1602 and 1692; laid in ashes by fire in 1702; reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these calamities, the custom-house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815.

PORT ROYAL DES CHAMPS (near Paris) was a French Cistercian convent, founded by Odo, bishop of Paris, at the wish of king Philip Augustus, 1204. Having fallen into decay, it was revived and reformed in 1608 by Angelica Arnauld. In 1625 the increased community removed to Paris. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. The Port Royal at Paris was suppressed, with other monasteries, in 1790.

PORTSMOUTH (Hampshire), the most considerable haven for men-of-war, and most strongly fortified place in England. The dock, arsenal, and storehouses were established in the reign of Henry VIII. Population, 1901, 198,038; 1909 (est.), 214,726.

PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle, under Variothes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon is the capital (pop. 1900, 365,009; 1910 (est.), 401,500). The poet Camoens, called the Virgil of his country, and author of the *Lusiad* (1569), translated into English by Mickle, was a native of Lisbon. The constitution, granted in 1826, was revised in 1852. Population of the kingdom and colonies, 1900: kingdom, 5,016,267; colonies (Madeira and Azores), 406,865; 1910 (est.), 5,517,800 and 447,550 respectively; revenue (estimated), 1902-3, 12,203,000*l.*; expenditure, 12,415,000*l.*; imports, 1904, 17,812,000*l.*; exports, 10,900,000*l.*; revenue (estimated), 1909 10, 15,843,026*l.*; expenditure, 16,786,323*l.*; outstanding debt., 30 June, 1909, 161,837,430*l.*; imports, 1908, 15,198,995*l.*; exports, 6,765,347*l.*

POSITIVE PHILOSOPHY set forth by Auguste Comte, an eminent mathematician, born 19 Jan. 1798; died at Paris, 5 Sept. 1857, succeeded by M. Pierre Laffitte as director of positivism; died, aged 80, early Jan. 1903. M. P. Emile Littré, the great French philologist, ardently embraced the system.—See *Calendar*.

Comte's "Cours de Philosophie Positive," published 1830-42; "Système de Politique Positive, ou Traité de Sociologie, instituant la Religion de l'Humanité (l'amour pour principe, l'ordre pour base, et le progrès pour but)," 1851-4.

It professes to base itself wholly on positive facts or observed phenomena, and rejects all metaphysical conceptions, which it considers negatives, having nothing real or true in them; and dispenses with the science of mind. It sets aside theology and metaphysics as two merely preliminary stages in life; and abandons all search after causes and essences of things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress.

Positivism does not recognise the supernatural or the future state.

"The Church of Humanity" is a modified form of positivism, described by Mr. Richard Congreve, an ardent comtist (*Pall Mall Gazette*, 17 Jan. 1884); he died, aged 81, 5 July, 1899.

POSTAL UNION, GENERAL, was established by the Treaty of Berne, signed 9 Oct. 1874, and took effect from 1 July, 1875.

POSTING. Post-chaïses were invented by the French, and, according to Grainger, were introduced into this country by Mr. William Tell, son of the writer on husbandry. Posting was fixed by statute of Edward VI. at one penny per mile, 1548. By a statute, re-establishing the post-office, none but the postmaster or his deputies could furnish post-horses for travellers, 1660. The post-horse duty was imposed in 1779. Post-horse duty yielded, in 1852, in England, 128,501*l.*, and in Scotland, 16,933*l.*

POST-OFFICE OF ENGLAND. In England, in the reign of Edward IV. 1481, riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots.—*Gale*. Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England.—*Sadler's Letters*. Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635.—*Strype*.

The first chief postmaster of England, sir Thomas Randolph, appointed by queen Elizabeth 1581

James I. appointed Matthew de l'Equestre as foreign postmaster, 1619; and Chas. I. appointed William Frizell and Thomas Witherings 1632

A proclamation of Chas. I., "whereas to this time there hath been no certain intercourse between the kingdoms of England and Scotland, the king now commands his postmaster of England for foreign parts to settle a running post or two to run night and day between Edinburgh and London, to go thither and come back again in six days," 1631

The king commanded his "postmaster of England for foreign parts," to open a regular communication by running posts between the metropolises and Edinburgh, West Chester, Holyhead, Ireland, Plymouth, Exeter, &c. (Rates of postage.—1 letter carried under 80 miles 2*d.*; under 140 miles, 4*d.*; above that distance in England, 6*d.*; to any part of Scotland, 8*d.*.)

POST-OFFICE ACT, passed 14 June, 1875, consolidates previous acts (1840, *et seq.*), and enacts some new regulations. The Post-office (Parcels) act was passed 18 Aug. 1882.

POST-OFFICE DIRECTORY for London, published by Kelly & Co., since 1800.

POSTMAN AND TUBMAN, ancient offices in the court of exchequer held by barristers with certain privileges.

POSTS, said to have originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 550 B.C. Augustus was the first who introduced this institution among the Romans, 31 B.C. This was imitated by Charlemagne about A.D. 800.—*Ashe*. Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470.—*Hénault*.

POTASSIUM, a remarkable metal, discovered by Humphry Davy, who first succeeded in separating it from its oxide, potash, by means of a powerful voltaic battery, in the laboratory of the Royal Institution, London, about 19 Oct. 1807; and also the metals *Sodium* from soda, *Calcium* from lime, &c. The alkalis and earths had been previously regarded as simple substances. Potassium ignites on contact with moisture.

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fé, in America, by sir John Hawkins, 1565. Others ascribe their introduction to sir Francis Drake, in 1586; their general introduction, 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. The failure of the potato crop in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilential disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and other succours; see *Ireland*. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, autumn of 1872. In consequence the value of potatoes imported in 1872 was 1,654,240*l.*; in 1871, only 225,732*l.*; in 1877, 7,964,840 cwt., value, 2,348,749*l.*; in 1883, 5,149,509 cwt., value 1,585,260*l.*; in 1887, 2,763,357 cwt.; in 1890, 1,940,100 cwt.; in 1900, 8,910,932 cwt., value, 2,234,569*l.*; in 1902, 5,699,090 cwt., value, 1,589,432*l.*; in 1904, 9,993,965 cwt., value 2,437,971*l.*; in 1906, 3,819,787 cwt., value 1,332,027*l.*; in 1908, 7,039,323 cwt., value, 1,967,216*l.* Temporary alarm respecting the American Colorado beetle or bug, autumn 1876. Acres cultivated for potatoes in Great Britain in 1867, 492,217; 1871, 627,691; 1877, 512,471; 1883, 543,455; in 1887, 559,652; in 1890, 529,661; in 1902, 573,880; in 1904, 570,209; in 1906, 565,921; in 1908, 562,105. The disease known as "wart disease," "cauliflower disease," "canker," "fungus" or "Black Scab," attacks the tubers and haulm of the potatoes, giving rise to large and irregular out-growths which resemble pieces of cauliflower covered with mud. Although undoubtedly there had previously been isolated cases, it was not reported to the Board of Agriculture until 1901, and it was not until 1904 that the Board scheduled it as a notifiable disease under the Destructive Insects and Pests Acts, 1877-1907. The South African Government make it an absolute condition that all potatoes imported into South Africa should be accompanied by certificates declaring that no case of "wart disease" is known by the Board of Agriculture to exist in the district in which the potatoes were grown.

POTIDÆA, a town in Macedonia, a tributary of Athens, against which it revolted 432 B.C., but submitted in 429. It was taken from the Athenians after three years' siege, by Philip II. of Macedonia in 356 B.C.

POTOSI (Peru). Silver mines here were discovered by the Spaniards in 1545; they are in a mountain in the form of a sugar-loaf.

POTSDAM (near Berlin), the Versailles of Prussia. It was made an arsenal in 1721. Here is situated the palace of *Sans Souci* (built, 1660-73), embellished by Frederick II., and occupied by Napoleon I. in Oct. 1806; and the new palace, erected by Frederick the Great, 1763-9, was the residence of the emperor Frederick III., when prince Frederick William of Prussia and his wife the princess royal of England, married 25 Jan. 1858. Population, 1900, 59,814; 1910, (est.) 65,790.

POTTERY AND PORCELAIN. The manufacture of earthenware (the ceramic art) existed among the Jews as an honourable occupation (see 1 Chron. iv. 23), and the power of the potter over the clay as a symbol of the power of God is described by Jeremiah, 605 B.C. (ch. xviii.) Earthenware was made by the ancient Egyptians, Assyrians, Greeks, Etruscans, and Romans.

The Majolica, Raffaele, or Umbrian ware of the 15th century was probably introduced into Italy from the Moors from Majorca. Raffaele and other artists made designs for this ware.

POULTRY COMPETER (London) was one of the most noted of the old city prisons. The competer of Wood-street belonged to the sheriff of London, and was made a prison-house in 1555. This latter and Broad-street competer were re-built in 1667. The Giltspur-street prison, built to supply the place of the old city competers, was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry competer, in 1819. — *Leigh*.

POUND, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina*, or 3*l.* 4*s.* 7*d.* The pound sterling was in Saxon times, about 671, a pound troy of silver, and a shilling was its twentieth part; consequently the latter was three times as large as it is at present. — *Peacham*. Our avoirdupois pound weight came from the French, and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen; see under *Standard*.

POYNINGS' LAW, named after sir Edward Poynings, lord deputy of Ireland at the time of its passing, at Drogheda, 13 Sept. 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. The act was repealed, together with the English Declaratory act of the 6th of Geo. I. and other obnoxious Irish statutes, April, 1782.

PRÆMONSTRATENSIAN ORDER, or **WHITE CANONS**, founded in 1120 by Norbert, a

monk, at Pré Montré, near Laon. Its first house in England, was founded by Peter de Gousla or Gousel, at Newsham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St. Mary and St. Martial. — *Lewis*.

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmoneri*," or "*Præmuniri facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306. — *Coke*. The pope bestowed most of the bishoprics, abbeys, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661.

PRÆTORIAN GUARDS, instituted by the emperor Augustus (13 B.C.); their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually became their masters, actually putting up the diadem for sale (as in March, 193 A.D., when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312.

PRÆTORS, Roman magistrates, afterwards termed consuls (*which see*), were elected at the establishment of the republic, 509 B.C. In 366 the *prætor urbanus* was appointed for the city, and the *prætor peregrinus* for foreigners, 246 B.C. Two prætors were appointed for the provinces, 227, and two more, 197. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

PRAGA, a suburb of Warsaw, where a bloody battle was fought, 4 Nov. 1794; 30,000 Poles were killed by the Russian general Suwarrow. Near here, on 25 Feb. 1831, the Poles, commanded by Skrznecki, defeated the Russians, under general Giemsa, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon.

PRAGMATIC SANCTION, an ordinance relating to church and state affairs. The ordinances of the kings of France are thus called; in one the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops, by Charles VII. in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, 1439. The emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the daughters of his brother Joseph I., 19 April, 1713; and he settled his dominions on his daughter Maria Theresa, in conformity thereto, 1723. She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged, and which lasted till 1748.

PRAGUE, the capital of Bohemia (*which see*). The old city was founded about 759; the new city rebuilt in 1348 by the emperor Charles IV., who made it his capital and erected a university. Prague has suffered much by war. Population, 1900, 389,741; 1910 (est.), 428,700.

PRASLIN MURDER. The duchesse de Choiseul-Praslin was murdered by her husband, the duc de Praslin, at his own house, in Paris, 18 Aug. 1847. She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

PRAYER-BOOK, see *Common Prayer*. The Prayer-book and Homily Society, London, was founded in 1812.

Prayer-book Revision Society, established 1854, for promoting a revision of the book of common prayer, and such liturgical reforms in the church of England as in the opinion of the society would strengthen its Protestant and scriptural character.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen. iv. 26*), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian church about 190, are advocated by some ministers of the English church. Prayers addressed to

the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies*.

PREBENDARY, a clergyman attached to a cathedral or collegiate church, who receives an income termed *prebenda* for officiating at stated times. The office slightly differs from that of a canon.

PRECEDENCE was established in very early ages, and was amongst the laws of Justinian. In England the order of precedence was regulated chiefly by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

PRECEPTORS, COLLEGE OF, Bloomsbury, London, established in 1846, and incorporated by Royal Charter 28 March, 1849, for promoting sound learning and of advancing the interests of education, especially among the middle classes, by the instruction of teachers, and by the examination of pupils at stated times.

New building in Bloomsbury Square opened by the prince of Wales, 30 March, 1887.

Day training college for secondary teachers established Oct. 1895.

PREDESTINATION (*Ephes. i.*). The doctrine concerning this is defined in the seventeenth article of the Church of England (*Ephes. i.* and *Romans ix.*). It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the 5th century. In later times it has been maintained by the Augustinians, Jansenists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

PREFERENTIAL TARIFFS.

The question of preferential trade between Great Britain and the colonies had its inception in a speech delivered by Mr. Joseph Chamberlain (then secretary to the colonies) at Birmingham, 15 May, 1903 [For principal speeches, *pro* and *con*, see *Free Trade*.]

Debate in the house of commons on Mr. Chamberlain's proposals for preferential tariffs, 28 May, " On the debate on the budget, sir M. Hicks-Beach, Mr. Ritchie, and Mr. A. R. D. Elliot declare their adhesion to the principles of free trade, 9 June, "

PREHISTORIC ARCHÆOLOGY began in Sweden, and first systematised by Mr. Nilsson. An international congress for treating prehistorical subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archaeology," and published its transactions in 1869. See *Barrows, Man, Ancient Monuments and Lake Dwellings*.

Sir John Lubbock divides prehistoric archaeology into four great epochs: 1. The Drift or Paleolithic or old stone age; 2. The Neolithic or polished stone age; 3. The Bronze age; 4. The Iron age, when bronze was superseded.

PRE-RAPHAELITE SCHOOL, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching, and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their principles were much advocated by the great art-critic, John Ruskin.

PREROGATIVE COURT, in which formerly all wills were proved, and all administrations taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes.* Appeals from this court, previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

PREROGATIVE, ROYAL. In England the sovereign is the supreme magistrate, and it is a maxim that he *can do no wrong*. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was sedition to inquire what a king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament; see *Lords*.

* The records date from 1383; but the testamentary jurisdiction from that year to 1433 was exercised by the court of arches. Then abp. Stafford transferred it to a new court; president, the commissary of the prerogative court of Canterbury. There was also a prerogative court of the archbishop of York.

PRESBURG, the ancient capital of Hungary, where the diets were held and the kings crowned. On 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Würtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated. A new iron and stone railway and passenger bridge over the Danube was inaugurated by the emperor, 30 Dec. 1890. Population, 1900, 61,861; 1910 (est.), 67,050.

PRESBYTERIANS are so called from their maintaining that the government of the church appointed in the New Testament was by presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyteros*) I exhort, who am also an elder (*sympresbyteros*)."
 1 *Peter* v. i. Presbyterianism was accepted by parliament in place of episcopacy in England in 1648, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1696. Its tenets were embodied in the formulary of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

PRESIDENT OF THE COUNCIL, LORD, the fourth great officer of state, is appointed under the great seal, *durante beneplacito*, and, by his office, is to attend the sovereign's royal person, and to manage the debates in council, to propose matters from the sovereign at the council-table, and to report to his majesty the resolutions taken thereupon.

PRESS ASSOCIATION (a company "limited") was established by the newspaper proprietors of London and the provinces, at a meeting at Manchester, 29 June, 1868, to make arrangements to enable them to avail themselves of the increased facilities for the speedy transmission of news afforded by the post office, in consequence of the purchase of the rights of all the telegraph companies, authorized by the Telegraph Act of 1868. The organization of the association was completed at a meeting in London, 3 March, 1869. The Provincial Newspaper Society, out of which it sprang, was founded in 1836, and became the Newspaper Society in 1889. Foreign press association registered as a society, March, 1898.

PRESS, LIBERTY OF THE. The *imprimatur* "let it be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. John Milton published his noble work, "Areopagitica; or, a Speech for the Liberty of Unlicensed Printing," 1644. See *Fourth Estate*.

PRESTON (Lancashire). Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, 17 Aug. 1648. Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king James VII. They were defeated in a battle on 12, 13 Nov. by generals Willea and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured; some were shot as deserters, and others sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manu-

facture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston. Population, 1901, 115,055; 1909 (est.), 118,519.

"The Preston guild Merchant festival," said to have been instituted in Saxon times, recorded as beginning 1328, and to have been kept once in 20 years regularly since 1562, was duly celebrated in

Preston strikes.—In 1853, a great number of strikes took place among the workmen in the north of England. Those at Preston struck for an increase of 10 per cent. on their wages. On 15 Oct. the masters, in consequence, closed forty-nine mills, and 20,000 persons were thrown out of employment, who were mostly maintained for a long time by subscriptions from their fellows. In the week ending 17 Dec. 14,972 were relieved, at the cost of 282ol. 8s. The committee of workmen addressed Lord Palmerston, 15 Nov., who gave them his advice . . . 24 Dec. 1853

The strike closed for want of funds . . . 1 May, 1854

Another strike was closed in . . . May, 1869

PRETORIA, capital of the Transvaal colony, the neighbourhood of the goldfields of Lydenburg, situated 90 miles N.E. of Potchefstroom, and 100 miles from Cape Town. It derives its name from Andries Pretorius, who, during the Boer trek, his military skill, waged war with the Zulus and defeated them on several occasions. Formerly capital of the Transvaal or S. African republic. During the war in S. Africa 1899-1902 (which it was occupied by Lord Roberts 5 June, 1900, and now government under British authority instituted. Population (1899), 12,500; 1910 (est.), 24,125.

Chosen as the seat of government for South Africa at the passing of the South Africa act, 20 Sept. 1900. It contains the post office buildings and of the departmental headquarters of the Union government, foundation laid by Lord Selborne 2 March, 1910.

PREVENTION OF CRIME ACTS. 21 Sept. 1871, 15 Aug. 1879, 12 July, 1882 and 1 Aug. 1899. See *Ireland*, May, 1882, 1887 *et seq.*

Criminal law and procedure (Ireland) act (1887) repeals bill (repealing the Crimes act), read second time commons (222-208) 8 May, 1895.

PREVENTIVE MEDICINE. The discoveries of Pasteur, Koch, and others, relative to the propagation of disease by minute germs (see *in Theory*), led to the gradual formation of a British (aft. Jenner) institute of Preventive Medicine by a committee of eminent physiologists and medical men. The institute was incorporated, Sir Joseph Lister the first chairman, July, 1891; named Lister institute, 7 Aug. 1903. 25,000*l.*, part a legacy from Mr. Richard Berridge, awarded the institute for the endowment of a laboratory Chelsea, April, 1894. 250,000*l.* received from Lord Iveagh, Dec. 1898. The Harben gold medal given to Lord Lister, 1 Jan. 1899, and prof. Koch, 1. See *Diphtheria*.

PRIDE'S PURGE. On the 6th Dec. 1648, Colonel Pride, with two regiments, surrounded the House of Commons, and seizing in the passage 300 members of the Presbyterian party, sent them to a low room, then called *hell*. Above 160 members were excluded, and none admitted to the most furious of the Independents. The excluded members were named the *Rump parliament*, which was dismissed by Cromwell, 20 April, 1653.

PRIENE, one of the twelve cities of the Ionian region in Asia Minor. The temple of Minerva at Priene, founded here by Alexander the Great, and the work of Pythios, was excavated by Mr. R. P. Colburn, for the Dilettanti Society, in 1868-9.

PRIEST (derived from *presbyteros*, elder), in English church the minister who presides over public worship. In Gen. xiv. 18, Melchizedek king of Salem is termed "priest of the most high God." (1913 B.C.; see *Hebrews* vii.) The Greek *priest*, like the Jewish priest, had a sacrificial character, which idea of the priesthood is still maintained by the Romanists and those who favour their views. Among the Jews, the priests assumed their office at the age of thirty years. The dignity of high or chief priest was fixed in Aaron's family,

1491 B.C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamen or high priest, resembling the Christian archbishop. For "Priest in Absolution," see *Holy Cross*.

PRIMER. A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children should publicly learn or read in schools, containing prayers and portions of the scripture. Primers were printed 1535, 1539. Henry VIII. issued a prayer-book called a "primer" in 1545. The three were published by Dr. Burton in 1834.

PRIMITIVE CULTURE, see *Civilisation*.

PRIMOGENITURE, RIGHT OF. A usage brought down from the earliest times. The first-born in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In some parts of England, by the ancient customs of gavel-kind and borough-English, primogeniture was superseded. It came in with the feudal law, 3 Will. I. 1068. The rights of primogeniture abolished in France, 1790.

PRIMROSE LEAGUE, formed in 1883 in memory of the late Lord Beaconsfield (with whom the primrose is said to have been a favourite flower) and in support of conservative principles. He died 19 April, 1881, and the anniversary of that day is termed "Primrose Day," when the flower is generally worn by members of the League and others, and his statue in Parliament-square decorated by the Grand Council (the governing body of the League).

The league, which began with under a thousand members, has enrolled since its inception, 2,097,960 knights, dames, and associates, with 2,661 "habitations" 30 June, 1910. The league issues great numbers of political leaflets. "Habitations" have been established in Scotland and Ireland.

Annual meetings are held in the Albert hall, London, and addressed by Mr. Balfour (Grand Master).

PRINCE OF THE PEACE. a title conferred on Manuel Godoy by Charles IV. of Spain, for concluding the Treaty of Basle.

PRINCE EDWARD ISLAND (Dominion of Canada) was discovered by Cabot in 1497; was finally taken from the French by the British in 1758; united with Cape Breton as a colony in 1763; but separated in 1768. Population 1901, 103,259; 1910 (est.) 103,200. Capital, Charlottetown. Population, 1905, 12,080. Lt.-govs.: W. F. Robinson, Aug. 1870; Sir Robert Hodgson, 1874; Hon. Thomas Heath Haviland, 1879; Hon. A. A. Macdonald 1884; J. S. Carvell, 1889, died 14 Feb. 1894; G. W. Howland, 1894; Peter A. McIntyre, 1900; Hon. Donald A. McKinnon, 1904.

PRINCESS ALICE, an iron saloon steamer, belonging to the London steamboat company, while carrying, it is supposed, above 900 persons, princely

pally women and children, on their return from Sheerness, was immediately sunk by collision with the *Bywell Castle*, a large iron screw steamer, about 7.40 p.m. on Tuesday, 3 Sept. 1878, in the Thames, in Gallion's reach, about a mile below Woolwich arsenal. About 200 persons were saved, but of these about 16 died afterwards. About 640 bodies were recovered and buried; many at Woolwich.

The *Princess Alice* was 251 tons gross; 219 ft. 4 in. long; 20 ft. 2 in. broad; 8 ft. 4 in. deep. Engines, 140 horse power, by Caird, of Glasgow. Capt. Wm. Grinstead (lost), with 6 sailors, 2 engineers, 3 firemen, 6 stewards, and 5 boys.

The *Bywell Castle*, 1376 tons gross; 254 ft. 3 in. long; 32 ft. 1 in. broad; 19 ft. 6 in. deep. Engines, 120 horse power. Owners, Hall Brothers, London. Captain Thomas Harrison.

Mansion House Relief Fund opened, 5 Sept.; 38,246l. 2s. 6d. received; final meeting, 30 Dec. 1878.

Board of Trade Inquiry.—Result: Officers of *Bywell Castle* and *Princess Alice* not considered responsible for the accident, but some were censured for carelessness, 28 Oct. Decision: "that the cause of the casualty was the breach of Rule 29 of the Thames Conservancy Regulations, by the *Princess Alice* not porting her helm when she came end on to the *Bywell Castle*, a vessel coming in the opposite direction." Report dated 6 Nov. 1878.

An action for damage against owners of *Bywell Castle* in Admiralty division began 27 Nov.; decision that both vessels were to blame, 11 Dec. 1878; decision on appeal that the *Princess Alice* was solely to blame, 15 July, 1879.

PRINCESS'S THEATRE, see under Theatres.

PRINCETON, New Jersey, N. America. Here Washington defeated the British, 3 Jan. 1777. College of New Jersey, popularly known as Princeton college, founded at Newark, 1746; transferred here, 1756.

PRINTERS' PENSION SOCIETY (now termed "Printers' Corporation"), founded 1827; chartered, 1865; almshouses instituted, 1841; orphan schools have been set up.

PRINTING. Block printing is said to have been invented by the Chinese about 593 A.D., movable types made in the 10th century. The honour of first printing with single types in Europe has been appropriated to Mentz, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; the early history is very doubtful, and the subject of much controversy; see *Press*.

Adrian Junius awards the honour of the invention to Laurences John Koster, of Haarlem, "who printed with blocks, a book of images and letters, *Speculum Humanae Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted, about 1438."

[The leaves of this book, being printed on one side only, were afterwards pasted together.]

John Fust established a printing-office at Mentz, and printed the *Tractatus Petri Hispani* . . . 1442

John Gutenberg invented cut metal types, and used them in printing the earliest edition of the Latin bible (termed the Mazarin, from the discovery of a copy in the cardinal's library) at Mentz . . . 1450-55

[At the sale of the Perkins library, 6 June, 1873, a copy of this bible on vellum sold for 3400l., one on paper sold for 2600l.; a copy belonging to sir John Thordol, of Syston-park, sold for 3900l. 13 Dec. 1884; a copy belonging to the earl of Crawford sold for 2650l., 15 June, 1887; lord Hopetoun's copy sold for 2000l., 25 Feb. 1889.]

known in London: lectured on by Faraday in 1845; and improved by Strickland and Delamotte in 1848
A similar process was invented by Mr. Cocks of Falmouth in 1836.]

Printing-types electro-faced with copper about 1850
Engraved copper-plate electro-faced with iron and nickel 1858

Type-composing machines.—By James Young's several numbers of the "Family Herald" were set up, beginning 17 Dec. 1842; Hattersley's appeared at the Exhibition of 1862; Hart's was shown at the meeting of the British Association at Cambridge 6 Oct. 1862

H. Mitchel's composing machine was tried at Messrs. Spottiswoode's, 1861; these machines were said to be in use in America in Jan. 1863
Astenbein's composing and distributing machines (in use at the Times office) shown at the International exhibition 1872

The "Clowes" type-composing machine (Hooker's patent), in which electro-magnets are employed, was shown at the Caxton celebration exhibition, South Kensington July, 1877
[10,000 types per hour set up in page form.]

Alexander Mackie's type-composing machine in use at his office in Warrington, and at Messrs. Clay's, London, in 1871. It was said to be able to set up 4 columns of the Times in an hour.

Monotype.—An American composing and distributing machine, in which type matrices are employed instead of type. The manipulator brings letters, points, and spaces together in one line of the galley; this is passed into a casting-box, and a solid line of type is produced in stereo metal; this is repeated till the galley is full. An English company was formed in 1869. Machines improved yearly.

Miss Emily Faithfull established the Victoria printing-office in Great Coram-street, London, in which female compositors are employed, 1860; the "Englishwoman's Journal" printed there Aug. 1861; appointed printer and publisher in ordinary to her Majesty, June, 1862; died June, 1895

Mr. William Blades, learned printer, printed facsimiles of several of Caxton's works, 1858 & seq. "Life of Caxton," 1861-3, and 1877; and other valuable works connected with printing; born, 1824; died 27 April, 1890

CAXTON CELEBRATION of 400th anniversary of discovery of printing, 1877.

Exhibition (at South Kensington) of early printed books, bibles, and engravings; printing, paper-making, stereotyping, electrotyping, in operation; opened by Mr. W. E. Gladstone, 30 June; closed 1 Sept. 1877.

PRINTING-MACHINES.—William Nicholson, editor of the *Philosophical Journal*, first projected (1790-1), but Mr. König first contrived and constructed a working printing machine, which began with producing the Times of 28 Nov. 1814, a memorable day in the annals of typography.

1818, Mr. E. Cowper patented improvements.* König's machine printed 1800 an hour on one side; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which printed the Times.

De's American rotary machine, the first introduced into London 1858, prints 20,000 an hour. The largest (double octuple) in operation 1910; first laid down in 1903 (at Lloyds).

Arinon's machine at Paris said to print 36,000 an hour; Dec. 1868.

Alter press, invented for the Times by J. C. Macdonald and Mr. Calverley, between 1862-9, prints about 17,000 an hour perfected; 1872.

American Campbell press said to print 50,000 sheets perfected in an hour, Feb. 1876.

Gram web rotary machine, invented by Mr. (later sir) W. G. Ingram, M.P., for printing illustrated papers; first used to print *Illustrated London News*, 4 Oct. 1877.

* In 1817 was published Blumenbach's *Physiology* Eliottson, the first book printed by machinery. The machine employed was König's, one which printed both sides in one operation at the rate of 900 sheets an hour (186).

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Mentz Psalter of Fust, 1455, which has a letter in three colours). Imitations of chiaroscuro soon followed "Repose in Egypt," engraving on wood after Louis Cranach, in 1519, in Germany; others by Ugo da Carpi, in Italy, 1518).

J. B. Jackson (1720-54) attempted, without success, to imitate water-colour drawings and to print paper-hangings.

About 1783, John Skippe, an amateur, printed some chiaroscuros.

In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.

In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836) he employed twenty different blocks.

In 1840, Mr. G. C. Leighton produced imitations of water-colour drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates, and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability; Mr. Leighton died, 8 May, 1895.

The large coloured prints of the *Illustrated London News* were first issued in Dec. 1856.

Mr. E. Meyerstein explained his process of printing many colours at one impression (stenochromy), Society of Arts, 13 Dec. 1876.

Mr. Ivan Orloff's colour-printing machine, multi-coloured designs produced by one operation; one set up in London, July, 1899.

Printing surfaces. Vulcanised india-rubber was first employed for this purpose by Mr. John Leighton, F.S.A., about 1862, and patented in the name of Alfred Leighton, 1864. The application is much used for hand-stamps for books, &c.

The Rotary Type Casting Machine, invented 1881 by Frederick Wicks, perfected 1901. Casts one million types in 24 hours. Supplied *The Times* with new font each day (1902) and *Morning Post* (1905).

The monotype machine, a very popular machine (1910), by which copy is automatically set, and each letter afterwards cast separately, was first introduced in 1897. In 1899 an improved machine containing 225 characters was introduced. The invention was originally American.

The Stringertype type-setting and type-casting machine, invented by Mr. H. J. S. Gilbert-Stringer, perfected and put on the market, June, 1907.

Death of Mr. Urban M. Nosedá, well-known print dealer, aged 55, from gas poisoning, 5 April, 1900.

PRIORIES, at first dependent on the great abbeys, are mentioned in 722 in England; see *Abbeys, and Monasteries*. Alien priories were seized by the king (Edward I.) in 1285, and in succeeding reigns on the breaking out of war with France; but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V. 1414.—*Rymer's Fœdera*.

BORSTAL SYSTEM.—This scheme for dealing with male criminals between the ages of 16 and 21 had its

ception in the suggestion made in 1894 by the departmental committee on prisons (Mr. Herbert Gladstone, chairman) "that the most determined effort should be made to lay hold of these incipient criminals, and to prevent them by strong restraint and rational treatment from recruiting the criminal class." The scheme was tentatively tried at Bedford prison in 1900, and was thence transferred to Borstal, where it came to more active operation, Oct. 1902. In outline the scheme works on the basis of the "indeterminate" sentence; the magistrate fixing the maximum sentence, discretion being allowed the governor, chaplain, and medical officer, acting as a committee, to reconsider the term, should the conduct of the prisoner warrant such reconsideration. The probationer at the end of the first 6 months of his sentence appears before a committee, and his case is thoroughly examined, and if it appears that he is likely to really benefit by his release the prisoner is remitted a part of his sentence. Moral and religious influences are brought to bear upon each prisoner, and habits of industry and the cultivation of self-respect inculcated and encouraged. Various trades are taught, and recreations within the limits of discipline are permitted. The visiting committee in its report (1903-4) states that out of a total of 209 youths received only in three cases was it necessary to transfer a juvenile-adult back to the local prison as incorrigible. The period of 6 months' imprisonment being in the opinion of the prison commissioners too short a period for any lasting impression to be made on criminal character, they have decided to transfer to Borstal only cases of 12 months' sentence and upwards. In 1904 an association was formed to help the prisoners at Borstal on their discharge, and to pervade their future career. Borstal association report, 31 March, 1909, states that as a result of the passing of the Prevention of Crime Act, 1908, which comes into force 1 Aug., 1909, the system will take its place as a recognised part of our penal administration, and girls will be included in the Borstal system of treatment and after care. 265 boys received and cared for after release 1909. Name of the Borstal prison changed to The Borstal Institution by order of Home Secretary, and one of the disused forts on the Medway taken over to train the lads for a seafaring life, Aug., 1909. The principle of the Borstal scheme is based upon in some of the states of America, at New York, and at Concord.

PRIVATE BILLS, see Acts of Parliament.

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out: see *United States*. All the great powers forbade privateering during the American civil war (*which see*). By the treaty of Washington privateering was prohibited; and April, 1898, in relation to the Spanish-American war, a Spanish decree maintains liberty of action.

PRIVILEGED PLACES, see Asylums.

PRIVY COUNCIL. A council said to have been instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet; but it had become of unwieldy amount before 1679, in which year it was remodelled upon Sir William Temple's plan, and reduced to thirty members: Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attempt the life of a privy councillor in the execution of his office was made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.

"The Proceedings and Ordinances of the Privy Council of England from 10 Richard II. to 33 Hen. VIII., edited by Sir H. Nicolas, 7 vols.," were published by the record commissioners, 1834-7.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—In lieu of the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Stannaries, the courts of the Isle of Man, and other islands, and the Colonial courts, &c.,—fixed by statute 3 & 4 Will. IV., c. 41, 1833; amended by other acts in 1844, 1851, 1852.

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons,

signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII. previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission.—*Beaton*. See under *Liverpool*, *Canning*, *Wellington*, and succeeding Administrations.

PRIZE-FIGHTING, see *Boxing*.

PRIZE MONEY, arising from captures made from the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, 17 April, 1793. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize-money is now regulated by royal proclamation; the last, July, 1910.

PROBABILITY, THEORY OF (termed by Butler, "the guide of life"; by Laplace, "good sense reduced to calculation"), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its object is "the determination of the number of ways in which an event may happen or fail, in order that we may judge whether the chances of its happening or failing are greater."—*Jevons*.

It has been treated upon by the most eminent mathematicians, viz., the Bernouillis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quelelet.

Isaac Todhunter's copious "History of Probability," published 1865.

PROBATE COURT, established in Aug. 1857 by 20 & 21 Vict. c. 77, which abolished all powers exercised by the ecclesiastical courts in the granting of probates of wills, &c.; see *Prerogative Court*. The first judge appointed, 5 Jan. 1858, was sir Cresswell Cresswell, who took his seat on 12 Jan. On his death, sir James P. Wilde (aft. lord Penzance) was appointed judge, 28 Aug. 1863; see *Supreme Court*. The president of the probate, divorce, and admiralty division, sir James Hannen (1872), succeeded by sir Charles P. Butt, Jan. 1891 (died 25 May, 1892); sir Francis Henry Jeune, 30 May, 1892, resigns 28 Jan. 1905; lord St. Helier (died 9 March, 1905); sir Gorell Barnes, 1 Feb. 1905; sir John C. Bingham, 1909. By the Judicature Act of 1873, the probate, divorce, and admiralty courts were constituted the 5th division of the Supreme Court. A probate and matrimonial division of the high court of justice of Ireland was established by Judicature act, 1877. *Probate* is the exhibiting and proving a will before the proper authority. The probate registry is now at Somerset House.

Probate duties partly transferred to relieve local taxation by Local Government Act, 1888—amount received 1887–8, 4,596,620*l*. The duty was superseded in 1894 by the "estate duty," which see.

PROCEDURE RULES, see under *Parliament* 1882 and 1888, 1890.

PROCESSIONS ACT, 13 Vict. c. 2, passed 12 March, 1850, prohibited party processions, with banners, &c. It was repealed in 1872. Processions of workmen and others, for demonstrations in Hyde Park, prohibited in the great thoroughfares of London, by the police, 31 May, 1890, and since.

PROCLAMATIONS, ROYAL, "have only a binding force when grounded upon and to enforce the laws of the realm."—*Coke*. Henry VIII., in 1539, declared that they were as valid as acts of parliament. This was annulled, 1547.

The lord-lieutenant of Ireland has power by proclamation to place districts under the provisions of the

Criminal Law Procedure acts, 1881 and 1887, which districts are then said to be *proclaimed*.

PROCONSUL, a Roman consul, whose tenure of office was extended beyond his legal term. Q. Publilius was the first proconsul appointed during the war with Parthenope, 327 B.C. The name was afterwards given to governors of provinces.

PROCTOR (from *procurator*), an office in ecclesiastical courts, corresponding to that of attorney or solicitor in courts of common law. It was abolished by the Judicature act, 1873. The persons chosen to represent the clergy in convocation are termed proctors. The university proctors enforce discipline.

PROFILES. The first profile taken, as recorded was that of Antigonos, who, having but one eye, his likeness was so taken, 330 B.C.—*Ashe*. "Until the end of the 3rd century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner."—*Addison*.

PROGRESISTAS, a political party in Spain, headed by Espartero, duke of Victory, and latterly by general Prim. Since 1865 they adopted a policy of inaction in public affairs; by uniting with the unionists and republicans in Sept. 1868, the government were overthrown, see *Spain*.

A party in Serbia and also in Portugal are termed *Progressists*.

In England, since 1888 *et seq.*, the radical party in county councils, and similar bodies have been termed *PROGRESSIVES*, and their opponents *MODERATES*.

PROGRESSIONIST THEORY supposes that the existing species of animals and plants were not originally created, but were gradually developed from one simple form; see *Species*.

PROHIBITION OF EXPORTATION OF ARMS ACT passed 6 Aug. 1900, and became law 7 Aug. 1900.

PROMISSORY NOTES were regulated and allowed to be made assignable in 1705. First taxed by a stamp in 1782; the tax was increased in 1804, and again in 1808, and subsequently; see *Bills of Exchange*.

"**PRO NIHILO**," a pamphlet, said to be by count Henry Arnim, attacking count Bismarck; published Nov. 1875. He was prosecuted for it in 1876; see *Prussia*.

PRONUNCIAMENTO, a revolution (in Spain or South America) effected by a military leader; in France, termed a *coup d'état*. See *France and Spain*.

PROPAGANDA FIDE, CONGREGATIO DE (congregation for the propagation of the faith of the Romish church), was constituted at Rome by Gregory XV. in 1622; the college, by Urban VIII., in 1627, for the education of missionaries to various countries, a special feature of the college being the education of some 200 natives at an early age for mission work in their own lands. It has a large and valuable library consisting of about 30,000 volumes, a museum, and a polyglot printing press. The Epiphany is celebrated as the great festival of the college.

PROPAGATION OF THE GOSPEL SOCIETY received its charter, 16 June, 1701. Its sphere, to minister to British subjects beyond the seas, much extended, see "Spiritual Expansion of the Empire," pub. 1899. Bicentenary celebrations, 16 June,

000; great meeting in Exeter hall, abp. of Canterbury and lord Salisbury present, 19 June; S. London missionary and colonial exhibition opened by the lord mayor, 14 Nov. 1900. PROPHESYING. About 1570 the puritanical part of the clergy, particularly at Northampton, held meetings (termed prophesyings) for prayer and exposition of the scriptures. These were forbidden by queen Elizabeth, 7 May, 1577, and immediately ceased.

The Prophecy Investigation society, formed about 1840, held a special meeting at the Mansion-house, London, 30 April, 1891.

PROPHETS, see under *Jews*.

PROPORTIONAL REPRESENTATION. The scheme propounded by Mr. Thomas Hare in 1857, in a pamphlet on "Representation," and perfected in his "Treatise on the Election of Representatives," published in 1859, which was well received by Mr. J. Stuart Mill. A society to introduce this principle was formed in Feb. 1884.

It was proposed that "in all cases where an elector is entitled to one vote only, to enable the elector to nominate more than one candidate to whom, under certain circumstances, that vote might be transferred in the manner indicated by the elector." Negated by the commons, 134-31, 3 March, 1885.

PROROGATION OF PARLIAMENT. By an act passed 12 Aug. 1867, the crown was enabled to issue a proclamation for the prorogation of parliament during the recess.

PROSECUTOR. By the Prosecution of Offences act, 42 & 43 Vict. c. 22 (3 July, 1879), the appointment of a director of public prosecutions with assistants was enacted, somewhat resembling officers in Scotland and Ireland. It came into operation 1 Jan. 1880. John Blossett Maule appointed director of public prosecutions, Dec. 1879; succeeded by Sir Augustus Stephenson, 1884; succeeded by Sir hon. Hamilton Cuffe, now earl of Desart, Oct. 1894; succeeded by Sir Chas. W. Mathews, May, 1909.

A committee reported the plan to be a failure, and recommended changes, June; act amended, 1884. 551 prosecutions; 451 convictions in 1893; 449 in 1900; 652 in 1908.

A public prosecutor, "procureur du roi," in France, is mentioned in the 14th century; replaced by "accusateur public" (elected), 1791; by "commissaire national," 1793; "procureur" restored by Napoleon I.

PROTECTIONISTS, that section of the conservative party which opposed the repeal of the corn laws, and which separated from Sir Robert Peel in 1846. The name was derived from a "Society for the Protection of Agriculture," of which the duke of Richmond was chairman, and which had been established to counteract the efforts of the Anti-Corn Law League, 17 Feb. 1844. Lord George Bentinck was the head of the party from 1846 till his death,

21 Sept. 1848. The Derby administration not proposing the restoration of the corn-laws, the above society was dissolved, 7 Feb. 1853.—The protection of native manufactures has been maintained in the United States since 1868, and in France, Germany, Italy, and other countries. See *France*, March, 1887; *England*, 1903-5; *United States*, Oct. 1890. President Cleveland condemned protection, 4 March; 1893. See *Fair Trade, Free Trade, Tariff Reform League*, and *Preferential Tariffs*.

PROTECTION OF LIFE AND PROPERTY ACT (for part of Ireland), passed 16 June, 1871; another, 3 March, 1881. See *Ireland*.

PROTECTORATES IN ENGLAND. That of the earl of Pembroke, 19 Oct. 1216, ended by his death, 1218. Of Humphry, duke of Gloucester, began 31 Aug. 1422; he was seized 11 Feb. 1447, and found dead a few days after. Of Richard, duke of Gloucester, began May, 1483, and ended by his assuming the royal dignity, 26 June the same year. Of Somerset began 28 Jan. 1547, and ended by his resignation in 1549. Of Oliver Cromwell began 16 Dec. 1653, and ended by his death, 3 Sept. 1658. [He firmly refused to be styled king, as solicited by the parliament, Feb.-May, 1657.] Of Richard Cromwell began 3 Sept. 1658, and ended by his resignation, 25 May, 1659; see *England*.

PROTEIN, from the Greek (*prôteino*, principal); a chemical term introduced by Mulder about 1844, for the basis of albumen, fibrin, and casein.

PROTESTANT REFORMATION SOCIETY, established 1820; it employs missionaries and readers.

PROTESTANTS. The emperor Charles V. called a diet at Spires in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman catholic clergy. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, 19 April, 1529. Hence the term protestants was given to the followers of Luther; it afterwards included Calvinists, and other sects separated from the see of Rome. The six protesting princes were: John, elector of Saxony; George, margrave of Brandenburg; Ernest and Francis, the dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the citizens of Strasburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities; see *Lutheranism, Calvinism, Huguenots, Germany, Church of England*, &c.

PROTOPLASM, the material of the minute ultimate particles of all animal and vegetable tissues, formerly termed *sarcodæ*; by Von Mohl, *protoplast* (1884), "the physical basis of life," by Huxley (1868). The *protomæba*, the lowest form of life, is a structureless mass of protoplasm; the *amœba*, a similar mass, contains a nucleus. Protoplasm is composed of hydrogen, oxygen, nitrogen, carbon, and sulphur.

PROVENCE (the Roman *Provincia*), S. E. France, was made a kingdom by the emperor Lothaire for his son Charles. It afterwards became part of the kingdom of Arles as a feudal fief, and was re-united to the German empire in 1032 by Conrad II. On the fall of the Hohenstaufens it was acquired by Charles of Anjou, who married the heiress of the count in 1245, and became king of Naples, in 1268; and was held by his successors till its annexation to France by Charles VIII. in 1487.

PROVERBS. The book of Proverbs by Solomon is dated about 1000 B.C. The latter part was collected by order of Hezekiah, about 700 B.C. Ray's collection of English proverbs appeared in 1672, and Bohn's general collection in 1857. Martin

F. Tupper's "Proverbial Philosophy" first appeared in 1839. Alfred Henderson's "Latin Proverbs," 1869.

PROVISIONS—REMARKABLE STATEMENTS CONCERNING THEM. The high value of money at the time must be borne in mind.

Sale of Food and Drugs act passed 11 Aug. 1875 (see *Adulteration*).

Wheat for food for 100 men for one day worth only one shilling, and a sheep fourpence, Henry I. about 1130. The price of wine raised to sixpence per quart for red, and eightpence for white, that the sellers might be enabled to live by it, 2 John, 1200.—*Burton's Annals*.

When wheat was at 6s. per quarter, the farthing loaf was to be equal in weight to twenty-four ounces (made of the whole grain), and to sixteen the white. When wheat was at 1s. 6d. per quarter, the farthing white loaf was to weigh sixty-four ounces, and the whole grain (the same as standard now) ninety-six, by the first assize, 1202.—*Mat. Paris*.

A remarkable plenty in all Europe, 1280.—*Dufresnoy*.

Wheat 1s. per quarter, 14 Edw. I., 1286.—*Stow*.

The price of provisions fixed by the common council of London as follows: two pullets, three halfpence; a partridge, or two woodcocks, three halfpence; a fat lamb, sixpence from Christmas to Shrove-tide, the rest of the year fourpence, 20 Edw. I., 1299.—*Stow*.

Price of provisions fixed by parliament: at the rate of 2l. 8s. of our money for a fat ox, if fed with corn, 3l. 12s.; a shorn sheep, 5s.; two dozen of eggs, 3d.; other articles nearly the same as fixed by the common council above recited, 7 Edw. II., 1313.—*Rot. Parl.*

Wine the best sold for 20s. per tun, 10 Rich. II., 1387.

Wheat being at 1s. 1d. the bushel in 1390, this was deemed so high a price that it is called a dearth of corn by the historians of that era.

Beef and pork settled at a halfpenny the pound, and veal three farthings, by act of parliament, 24 Hen. VIII. 1533.—*Anderson*.

PROXIES. Voting by proxy, an ancient privilege of the house of peers, was very frequently abused. In the reign of Charles II., when the duke of Buckingham sometimes brought 20 proxies in his pocket, it was ordered that no peer should bring more than two proxies. From 1830 to 1867, both inclusive, proxies were only called 73 times. In conformity with the recommendation of a committee, a new "standing order" was adopted, 31 March, 1868, by which it was ordered "That the practice of calling for proxies on a division shall be discontinued."

PRUD'HOMMES, CONSEILS DE (from *prudens homo*, a prudent man), trade tribunals in France, composed of masters and workmen, were constituted to arbitrate on trade disputes in 1806. Similar bodies with this name existed as far back as 1452 at Marseilles, and at Lyons in 1464.

PRUSSIA. This country was anciently possessed by the Venedi. They were conquered by the Porussi, who inhabited the Riphæan mountains; and from these the country was called Borussia. The Porussi afterwards intermixed with the followers of the Teutonic knights, and latterly with the Poles. The constitution, established 31 Jan. 1850, was modified 30 April, 1851; 21 May, 5 June, 1852; 7 and 24 May, 1853; 10 June, 1854; 30 May, 1855; and 15 May, 1857. PUBLIC LOAN COMMISSIONERS were constituted by the acts passed 13 Aug. 1875. Other acts passed 1879-83.

PUBLIC MEETINGS, for political purposes, were occasionally held in England in the latter part of the 17th century, but became very frequent in the reign of George III. The meetings in Devonshire in 1763 to protest against the Cider Tax, were very effective, and set an example speedily followed, with the warm approbation of Burke, Fox, and their statesmen. These meetings were prohibited by the Gagging acts, *which see*, passed in 1795; see *edition*. In the reign of George IV., the right of public meetings was fully assured, and they were very effectual in relation to the passing the Reform acts, the Repeal of the Corn Laws, and other impor-

tant measures. See *Hyde Park*. The place on which the speakers stand is termed a "platform," corresponding to the Roman *rostrum*, and the French *tribune*. The term "platform" is also applied to a set of political or religious opinions held by a party; such as the "platform of Geneva." *Hooker*.

PUBLIC OFFICES SITE ACT (for the Admiralty and War) passed 24 July, 1882.

PUBLIC PROSECUTOR.

John Blossett Maule appointed director of public prosecutions, Dec. 1879; succeeded by sir Augustus Stephenson, 1884; the hon. Hamilton Cuffie (afterwards earl of Desart), Oct. 1894; sir Chas. W. Mathews May, 1909

PUBLIC SAFETY, COMMITTEE OF, was established at Paris during the French Revolution on 6 April, 1793, with absolute power, in consequence of the coalition against France. The severe government of this committee is termed the Reign of Terror, which ended with the execution of Robespierre and his associates, 28 July, 1794. A similar committee was established at Paris by the communists, March-May, 1871.

PUBLIC SCHOOLS ACT, 1868, amended by acts passed 1870 and 1872; see *Education*.

PUBLIC STORES. The laws relating to their protection were consolidated and amended by an act passed 29 June, 1875.

PUBLIC WORKS ACT, passed 21 July, 1863, to provide work for the unemployed persons in the manufacturing districts at the time of the cotton famine. It enabled corporate bodies to raise loans, and proved very successful. It was continued in 1864-75, 1886 and 1892-3. See under *Local Loans*. Public Works Loans act 1903, royal assent 14 Aug.

PUBLIC WORSHIP REGULATION ACT, 37 & 38 Vict. c. 85, principally for the repression of ritualism in the church of England, was introduced into the House of Lords by the archbishop of Canterbury, 21 April, and after very much discussion, received the royal assent, 7 Aug. 1874.

By it a new judge in the provincial courts of Canterbury and York was appointed: the first being lord Penzance (dies, 9 Dec. 1899) the act came into operation July, 1875

PUBLISHERS.

Publishers existed in Rome in the earliest days of the empire; between 1256-1606 326 editions or parts of editions of the English Bible were published; "stationers or text writers who wrote and sold all sorts of books" were formed into a guild, the *stationers' company*, 1403; the company had no control over printed books till 1557; the charter granted then was renewed 1588, amplified 1684, confirmed 1690, and is still virtually in existence; entry of copies at Stationers' Hall commenced 1558.
 Some notable publishers and dates established:—
 Rivington & Co. (original firm), 1711; Thos. Longman, 1724; John Murray, 1768; Archibald Constable, 1795; William Blackwood, 1804; Henry Colburn, 1807; A. & C. Black, 1809; Butterworth & Co., 1809; Jas. Nisbet & Co., 1810; Smith, Elder & Co., about 1810; Sampson Low & Co., 1810; John Arrowsmith (as a bookseller), 1820; W. & R. Chambers, 1832; Macmillan & Co., 1843; Cassell & Co., 1853; Ward, Lock & Co., including Tegg (1800), Moxon (1826), 1854.

Publishers' association inaugural meeting, Mr. C. J. Longman, president 21 April, 1896
 International congress of publishers in London, Mr. John Murray (president), 7-9 June, 1899; Amsterdam 18-22 July, 1910

PUBLISHERS' CIRCULAR, first issued twice a month 1837, weekly since Dec. 1890.

PUDDLING, making the walls of canals water-tight by means of clay, was largely adopted by Brindley in constructing the Bridgewater canals, 1761 *et seq.*; see also under *Iron Manufacture*.

PUEBLA, see *Mexico*, 1863.

PUERTO, see *Porto*.

PULLEY, vice, and other mechanical instruments, are said to have been invented by Archytas of Tarentum, about 400 B.C., or by Archimedes, 287-212. In a single movable pulley the power gained is doubled: in a continued combination the power is equal to the number of pulleys, less one, doubled.

PULLMAN CARS, see under *Railways*, 1874-.

PULTOWA (Russia), where Charles XII. of Sweden was entirely defeated by Peter the Great of Russia, 8 July, 1709. He fled to Bender, in Turkey.

PULTUSK (Russia), where a battle was fought between the Saxons, under their king Augustus, and the Swedes, under Charles XII., in which the former were signally defeated, 1 May, 1703. Here also the French under Napoleon fought the Russian and Prussian armies: both sides claimed the victory, but it inclined in favour of the French, 26 Dec. 1806.

PUMPS. Ctesibius of Alexandria is said to have invented pumps (with other hydraulic instruments), about 224 B.C., although the invention is ascribed to Danaus, at Lindus, 1485 B.C. Pumps were in general use in England, A.D. 1425. An inscription on the pump in front of the late Royal Exchange, London, stated that the well was sunk in 1282. The air-pump was invented by Otto Guericke in 1654, and improved by Boyle in 1657; see *Air and Wells*.

PUNCH, the puppet show, borrowed from the Italian Polichinello, is descended from a character well known in the theatres of ancient Rome. *Fos-broke*. The satirical weekly publication, *Punch, or the London Charivari*, was established by Henry Mayhew, Mark Lemon, Douglas Jerrold, Gilbert a' Beckett, and others: amongst its early contributors were Wm. M. Thackeray; Prof. E. Forbes, and other eminent writers; first published 17 July, 1841. Mark Lemon, the first editor, died 23 May, 1870; 2nd, Shirley Brooks, died 23 Feb. 1874; 3rd, Tom Taylor, died July, 1880; 4th, Francis Cowley Burnand, 1880-1906; 5th, Owen Seaman. Richard Doyle, who designed the wrapper, and was a frequent contributor, died 11 Dec. 1883; John Leech died 1864, and was succeeded by Mr. George Du Maurier, born in Paris, 6 March, 1834, died, 8 Oct. 1896. Mr. Percival Leigh, an early and long-continued contributor to *Punch*, died 24 Oct. 1889, aged 77. Charles Keene, artist, a contributor since 1850, died 4 Jan. 1891. Phil May, artist and clever caricaturist, died, aged 39, 5 Aug. 1903. John Tenniel, cartoonist, since 1851 (knt. 1893), resigns, Jan. 1901; succeeded by Linley Sambourne. Mr. Wm. Agnew, proprietor (bart. June, 1895). An interesting jubilee number of *Punch* was published 17 July, 1891. Mr. Wm. Hardwick Bradbury,

orn, 3 Dec. 1832, long printer of *Punch*, and of his volume, died, 13 Oct. 1892. "The history of *Punch*," by M. H. Spielmann, published autumn, 1895. Mr. Edwin James Milliken, contributor of the "Arny papers," etc., died, aged 57, 26 Aug. 1897. King Edward receives Mr. Burnand (knt. 26 June, 1902); accepts a copy of the Coronation number, 1 June, 1902. See *Caricatures* and *Charivari*.

Mr Francis Burnand retires from the editorship, succeeded by Mr. Owen Seaman . . . 14 Feb. 1906

PUNCTUATION. The Hebrew accents for punctuation are very ancient. The period (.) is the most ancient; the colon (:) was introduced about 1485; the comma (,) was first seen about 1521, and the semicolon (;) about 1570. In Sir Philip Sidney's "Arcadia" (1587), they all appear, as well as the note of interrogation (?), asterisk (*), and parentheses ().

PUNIC WARS. see *Carthage*, 264-241; 218-01; 149-146 B.C.

PUNJAUB (N. W. Hindostan) was traversed by Alexander the Great, 327 B.C.; by Tamerlane, A.D. 1398; by Mahmoud of Ghizni, about 1000. It was an independent state under Runjeet Singh, 1791-1839. Our wars with the Sikhs began here, 4 Dec. 1845, and were closed on 29 March, 1849, when the Punjab was annexed; see *India*. The Punjab has since greatly flourished, and on 1 Jan. 1859, was made a distinct presidency (to include the outlying states and the Delhi territory); see *Durbar*. The Sirhind canal (502 miles) opened by the viceroy, marquis of Ripon, 24 Nov. 1882. Local self-government bill passed 10 Oct. 1883. Area, 7,209 sq. miles; population in 1901, 22,455,769; 910 (est.) 24,700,000. Capital, Lahore; population, 901,120,058; 1910 (est.) 132,000.

[Dhuleep Singh (son of Runjeet Singh), born 1838, received a pension of 40,000*l.*; he resided in England till 1886 when he sailed for India; in consequence of an indiscreet proclamation to the Sikhs he was stopped at Aden about 3 May, 1886. After his release he wandered about Europe; in May 1889 he married a European in Paris; his manifesto to the Sikhs, inciting them to rebellion, indignantly rejected with strong censure, Nov. 1889. After severe illness, he expresses deep regret for his conduct, 27 July, and is pardoned by Queen Victoria, 1 Aug. 1890; received by her at Grasse, 31 March 1891; dies at Paris, 22 Oct. 1893.]

PUPPETS (Italian, *puppi*; French, *marionnettes*), of which the eyes, arms, &c., were moved by strings, were used by the ancients, and are mentioned by Xenophon, Horace, and others. Skilful theatrical performances with puppets have been many times exhibited in London (at the Adelaide gallery, 1852). A performance with puppets as large as life, began at St. James's-hall, July, 1872.

PURCELL CLUB, formed Aug. 1836; dissolved 1863.

PURCELL SOCIETY, founded 21 Feb. 1876, to publish and perform the works of Henry Purcell. Bi-centenary of Purcell's death celebrated in Westminster Abbey, 21 Nov. 1895. Purcell operatic society founded, 1899.

PURCHASE OF LAND, see under *Land*.

PURCHASE SYSTEM in the army. The payment of a present or gratuity for a commission was prohibited by William III., 1693; but in 1702 purchase was legally re-organised. In 1711 the sale of commissions was forbidden without the royal permission; in 1719-20 regulations were issued; and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. Commissions of inquiry were held frequently after 1858; and in 1871 the system was abolished, with compensation, by royal warrant, 20 July, 1871, the bill for the purpose having been rejected by the house of lords. For amounts paid, see under *Army*.

PURGATIVES of the mild species (aperients), particularly cassia, manna, and senna, are ascribed to Actuarius, a Greek physician, 1245

PURGATORY, where, it is believed by the Roman catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine was known about 250; was introduced into the Roman church in the 5th century, and made a religious dogma by Gregory I., 590-604. It was first set forth by a council at Florence, 1439; enforced by the council of Trent, Dec. 1563; see *Indulgences*.

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev.* xii.); see *Churching*. The feast of the purification was instituted, 542, in honour of the Virgin Mary's going to the temple. (*Luke* ii.) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day.

PURITANS, the name first given, it is said, about 1564, to persons who aimed at greater purity of doctrine, holiness of living, and stricter discipline than others. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Cathari*, *Nonconformists*, and *Presbyterianism*.

PURLEY, see *Diversions*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said that Hercules Tyrius having observed his dog's lips to be stained, after eating a shell-fish named *murex* or *purpura*, was thereby led to invent the dye. Purple was anciently used by the princes and great men for their garments. It was restricted to the emperor by Justinian I. 532, and *porphyrogenitus* attached to the names of some emperors signifies "born to the purple."

PURVEYANCE, an ancient prerogative of the sovereigns of England of purchasing provisions, &c., without the consent of the owners, led to much oppression. It was regulated by Magna Charta, 1215, and other statutes, and was only surrendered by Charles II. in 1660, for a compensation.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who proposed to restore the practice of the church of England to what they believed to be required by the language of her Liturgy and Rubrics, but which were considered by their opponents to be of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Edwd. Pusey. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, 15 March, 1841; and his celebrated sermon was condemned by the same body, 30 May, 1843; he died 16 Sept. 1882; see *Tractarians*, and *Ritualism*.

PUTNEY, anciently Putilei and Putenheath, N.E. Surrey, on the Thames, opposite Fulham. A new granite bridge, founded by the prince of Wales (to replace the wooden one completed in 1729), 12 July, 1884. Opened by the prince, 29 May, 1886.

PYDNA (Macedon), where Perseus, the last king of Macedon, was defeated and made prisoner by the Romans, commanded by Æmilius Paulus, 22 June, 168 B.C.

PYRAMIDS OF EGYPT, about 75 in number, of various sizes, constructed for the preservation of mummies of the kings and their families.

The Stepped Pyramid of Sakkara is conjecturally assigned to Ouenephes of the first dynasty, see *Egypt*. Three great pyramids are situated near Gizeh on the W. bank of the Nile. The first or greatest, is said to have been erected as the tomb of Choofoo, fourth dynasty, the Cheops of Herodotus, dated by Brugsch, 3733-3666 B.C. Its height is said to have been originally 481 feet, and its base 774 square feet. The second pyramid is ascribed to Chafra, or Chephren, 3666-3633 B.C. The third pyramid is said to have been built by Menkaura or Mycerinus, 3633 B.C.

The pyramids have been visited and described by Belzoni, 1815; Vyse, 1836; C. Piazzi Smith, and others, see *Egypt Exploration Fund*.

Some of the eleven pyramids at Sakkara explored by M. Maspero, 1880 *et seq.*

At the battles of the *Pyramids*, Napoleon Bonaparte defeated the Mamelukes, and thereby conquered Lower Egypt, 13 and 21 July, 1798.

PYRENEES. After the battle of Vittoria (fought 21 June, 1813), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro; Soult retreated into France with a loss of more than 20,000 men, having been defeated by Wellington in a series of engagements from 25 July to 2 Aug. One at the Pyrenees on 28 July. A railway through the Pyrenees (from Bilbao to Miranda) was opened 21 Aug. 1862.—**THE PEACE OF THE PYRENEES** was concluded between France and Spain, by cardinal Mazarin, for the French king, and don Louis de Haro, on the part of Spain, in the island of Pheasants, on the Bidassoa. By this treaty Spain yielded Roussillon, Artois, and her right to Alsace; and France ceded her conquests in

Catalonia, Italy, &c., and engaged not to assist Portugal, Nov. 1659.

PYROLETER, a mechanical and chemical apparatus for extinguishing fires, especially in ships, invented by Dr. Paton.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed. Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Ellicott and others. Wedgwood employed clay cylinders, 1782-6. In 1830 professor Daniell received the Rumford medal for an excellent pyrometer made in 1821. Mr. Ericson's pyrometer appeared in the Great Exhibition of 1851. (*Eng. Cyc.*) Mr. (aft. sir) C. W. Siemens' electric pyrometer and those of Becquerel, and Le Châtelier are also in use.

PYROPHONE (Greek, *pur*, fire; *phone*, voice), a musical instrument, invented by M. Frédéric Kastner, of Paris. It consists of glass tubes of various lengths; the tones being produced by what are termed "singing flames." It is based upon the "chemical harmonicon." Keys are attached for playing, as in the piano. The invention was reported to the French Academy of Sciences, 17 March, 1873; exhibited at Vienna, same year; and at the Society of Arts, 17 Feb. 1875. M. Kastner died aged 31, 6 April, 1882.

PYROXYLIN, the chemical name of *Gun Cotton* (*which see*).

PYRRHONISM, see *Sceptics*.

PYTHAGOREAN PHILOSOPHY. Pythagoras, of Samos, head of the Italic sect, flourished in the 6th century B.C. He is said to have taught the doctrine of metempsychosis, or transmigration of the soul from one body to another, forbidden his disciples to eat flesh and beans, invented the multiplication table, improved geometry, and taught the present system of astronomy.

PYTHIAN GAMES, in honour of Apollo, near the temple of Delphi; asserted to have been instituted by himself, in commemoration of his victory over the serpent, Python. Also said to have been established by Agamemnon, or Diomedes, or Amphictyon, or lastly, by the council of the Amphictyons, 1263 B.C. They lasted till 394.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "*trial of the pyx*" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx or chest by the master of the mint; this took place on 17 July, 1861, at the exchequer office, Old Palace-yard, in the presence of twelve privy councillors, twelve goldsmiths, and others, and on 15 Feb. 1870. This trial is said to have been ordered in the reign of Henry II., 1154-89; King James was present at one in 1611. The first annual trial of the pyx, appointed by the Coinage act of 1870, took place 18 July, 1871; new regulations issued, Feb. 1901.

Q.

QUACKERY, or medical imposture, is very ancient. Quack medicines were taxed in 1783 *seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, Aug. 1830; he was found guilty, and sentenced to pay a fine of 25*ol.*, 30 Oct. following. He was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted, 19 Feb. 1831. Dr. Vriès, the "black doctor," a professed cancer-curer, at Paris, was condemned to fifteen months' imprisonment as an impostor in Jan. 1860. See *Trials*, July, 1893.

QUADRAGESIMA SUNDAY, first Sunday in Lent and 40th day before Good Friday; see *Lat.*, and *Quinquagesima*.

QUADRANT, a mathematical instrument in the form of a quarter of a circle. The solar quadrant was introduced about 290 B.C. The Arabian astronomers under the caliphs, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 59 feet inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigation*.

QUADRILATERAL or **QUADRANGLE**, means applied to four strong fortresses in N. Italy, held by the Austrians, but surrendered to the French, Oct. 1866;—Peschiera, on an island in the Mincio; Mantua on the Mincio; Verona and Legnago, both on the Adige; see *Italy*, *Peschiera*, &c. The Turkish *Quadrilateral* was Shumla, Varna, Rustchuk, and Silistria, lost to the sultan by the treaty of Berlin, which established the autonomy of Bulgaria.

QUADRILLE, a dance (originally *quadrille contre danse*, introduced into French ballets about 1745), in its present form became popular in France about 1804. It was introduced into this country about 1808 (*Miss Berry*), and promoted by the duke of Devonshire and others, in 1813. *Raikes*.

QUADRIVIVIUM, see *Arts*.

QUADRUPLE ALLIANCE. That between England, France, Austria and Holland signed at London, 2 Aug. 1718, on the accession of the states of Holland, 8 Feb. 1719, guaranteed the succession of the reigning families of Great Britain and France, settled the partition of the Spanish monarchy, and led to war.

QUADRUPLE TREATY, concluded in London 22 April, 1834, by the representatives of Great Britain, France, Spain, and Portugal, guaranteed the possession of her throne to Isabella II., the young queen of Spain.

QUADRUPLEX TELEGRAPHY, see *Electricity*.

QUÆSTORS (seekers). Two *quæstores parrii*, public prosecutors, in cases of murder and other capital crimes, acted in Rome under the kings; two *quæstores classici*, who had the management of the public treasure; appointed about 400 B.C. The number of quæstors was raised from time to time, as circumstances demanded.

Plebeians were first elected in 409 B.C. There were eight quæstors in 265. Sylla raised the number to twenty; Julius Cæsar to forty.

QUAKERS or **SOCIETY OF FRIENDS**, some of whom sprang from those called Seekers, from their seeking the truth. (3 *John*, 14). Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect gathered in England about 1648, around George Fox (then aged 24), who was joined by Isaac Pennington, Edward Burroughs, William Penn, Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *thee* and *thou* for one person instead of *you*, as more consonant with truth. He issued many letters and pamphlets, and died 13 Jan. 1691. Sir H. Nicolas explains the Quaker calendar in his *Chronology of History*. The first meeting-house in London was at the Bull and Mouth, Aldersgate-street. Headquarters of the Friends in England, Devonshire-house, Bishopsgate, London, E.C. A numerous body of Friends called the *Hicksites*, from the name of its founder, Elias Hicks, exists in the United States; the *Wilburite* section in Pennsylvania is characterised by its adherence to the old-fashioned costume and mode of speech.

Their principles are contained in Christian discipline being "Extracts of minutes," &c. (from the beginning), published 1783; revised 1802, 1861, and 1883, now issued in two volumes. Vol. I. now undergoing revision; Vol. II. revised 1906.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they were cruelly scourged, and had their ears cut off; some put to death.

In 1659 it was stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate; and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659.

Fifty-five (out of 120 sentenced) were taken on board ship for transportation to America, 1665.

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America.

William Penn, with a company of Friends, colonised Philadelphia 1682

First meeting of Quakers in Ireland 1654 in Dublin a few years later; and their first meeting in Dublin was at a private house near Polegate, 1655; moved to Bride's Alley 1657. Sycamore Alley (Eustace-street) meeting-house was first built 1692

The solemn affirmation of Quakers enacted to be taken in all cases in the courts below, wherein oaths are required from other subjects (see *Affirmation*) 1696

John Archdale, a Quaker, elected M.P. for Chipping Wycombe; refused to take the oaths, and his election was declared void 1699

Quakers emancipated their negro slaves 1 Jan. 1788

A schism in the society was begun in America about 1827, by Elias Hicks publishing his opinions denying the divinity of Christ and his atonement and the authority of the Holy Scriptures. His numerous followers are styled Hicksite Friends. Joseph Pease, a Quaker, was admitted to parliament on his affirmation 15 Feb. 1833

QUALIFICATION FOR OFFICE ABOLITION ACT, passed May, 1866, rendered it unnecessary to make and subscribe certain declarations.

QUARANTINE, the custom observed at Venice as early as 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. The system was abolished in England by an act passed 1806, and the old quarantine men-of-war in the Solent were broken up. Quarantine established throughout Europe, in consequence of the bubonic plague at Bombay (*which see*), 16 Jan. 1897. By order of council, 10 Nov. 1866, foreign cattle were made subject to quarantine.

QUARRIES. An act was passed for their regulation in 1894. See *State*.

QUARTERLY REVIEW, the organ of the Tory party. The publication was proposed to Mr. George Canning, and his support solicited by Mr. John Murray, the publisher, in a letter dated 25 Sept. 1807, in opposition to the opinions of the *Edinburgh Review*. Mr. Murray was assisted by Walter Scott, Robert Southey, John Gibson Lockhart (editor 1825-53), J. W. Croker, and other eminent persons. It first appeared Feb. 1809, with William Gifford, the celebrated translator of "Juvenal" as editor. He died 31 Dec. 1826.

QUARTER SESSIONS established 25 Edw. III. 1350-1. Days of sitting appointed, 2 Hen. V. 1413. In 1830 it was enacted that quarter sessions of the peace should be held in the first whole weeks after 11 Oct., 28 Dec., 31 March, and 25 June. Further regulated, 1842, 1848, and 1858. *Brewster Sessions* are regulated by the Licensing Act 1902.

QUASI MODO, a name given to *Low Sunday* (the first Sunday after Easter) from the commencement of a hymn sung on that day.

QUATERNIONS, an important mathematical method or calculus, invented by Sir Wm. Rowan Hamilton, about 1843.

It is based upon the separation of multiplication from addition, and its fundamental idea is mental transference or motion by what he termed vectors. He attributed to addition motion from a point; to multiplication about a point. Four numbers are generally involved, hence the name quaternions.

QUATRE-BRAS (Belgium). Here on 16 June, 1815, two days before the battle of Waterloo, a battle was fought between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney. The British fought with remarkable intrepidity, notwithstanding their inferiority in number, and their fatigue through marching all the preceding night. The 42nd regiment (Royal Highlanders) suffered severely in pursuit a French division by cuirassiers posted in ambush behind growing corn. The duke of Brunswick was killed.

QUEEN'S COLLEGES, see *Cambridge* and *Oxford*. Queen's colleges, Ireland, from their unsectarian character termed the "Godless Colleges," were instituted in 1845, to afford education of the highest order to all religious denominations. They were placed at Belfast, Cork, and Galway; the last was opened on 30 Oct. 1849. —THE "QUEEN'S UNIVERSITY in Ireland," comprehending these colleges, was founded by patent, 15 Aug. 1850; the earl of Clarendon, lord lieutenant, the first chancellor. These were "condemned" by the Propaganda and the pope, and by a majority (a small one) of the Irish bishops in a synod held at Thurles, in Sept. 1850. A supplemental charter, granted in June, 1866, created much dissension when acted upon in October following, and was suffered to expire, 31 Jan. 1868; see *Colleges*.

GOVERNORS.—Sir George Fergusson Bowen, the first viceroy, 1859 (died 1899), succeeded by Mr. Blackall, 1888; the marquis of Normanby, 1871; Mr. Wm. Wellington, 1874; sir Arthur E. Kennedy, Jan. 1877; Anthony Musgrave, March, 1883 (died 9 Oct. 1888); Henry Arthur Blake, Nov. (objected to by the colony); resigns about 27 Nov.; sir Henry Wylie Norman appointed v. 1888; lord Lamington, 1895; major-gen. sir Herbert Chelmside, 1902; lord Chelmsford, 1905; sir Macgregor, 1909.

QUEENSTOWN (Upper Canada). This town, on the river Niagara, was taken in the war with the U.S.A. by the troops of the United States, 13 Oct. 1812; but was retaken by the British forces, who defeated the Americans with considerable loss in killed, wounded, and prisoners, on the same day. Queenstown suffered severely in this war.—The town of Cork, Ireland, was named QUEENSTOWN, Aug. 1849, by queen Victoria on her visit. The S. steamer *America* was burnt here, 29 Nov. 1938.

QUEEN'S UNIVERSITY (see *Queen's Colleges*), was directed to be dissolved by 42 & 43 Vict. c. 65 (1879), and was dissolved by proclamation, 31 Jan. 1882; see *University of Ireland*.

QUENTIN, ST. (N. France). The duke of Anjou, with the army of Philip II. of Spain, assisted by the English, defeated the French under constable De Montmorency, at St. Quentin, 10 Aug. 1557. In fulfilment of a vow made before the engagement, the king built the monastery, abbey, &c., the Escorial (*which see*). During the Franco-German war the army of the north, under Faidherbe, was defeated here by the Germans after seven hours' fighting, on 19 Jan. 1871.

QUERETARO (Mexico), was besieged and taken in 1867 through the treachery of Lopez) by the general general Escobedo, 15th May, 1867. The emperor Maximilian and his generals Miramon and Mejia, were taken prisoners, and after trial were shot 19 June following.

QUERN or HANDMILL, is probably the implement spoken of in Isaiah xlvii. 2, about 712 B.C. called Roman querns have been found in York-
shire.

QUESNOY (N. France), was taken by the Austrians, 11 Sept. 1793, but was recovered by the French, 16 Aug. 1794. It surrendered to prince Frederick of the Netherlands, 29 June, 1815, after the battle of Waterloo.—It was here that cannon were first used, and called bombards. *Hénault*.

QUETTAH, see *Beloochistan*.

QUIBERON BAY (W. France). A British fleet landed here, Sept. 1746, but was repulsed. In 1794 the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1799. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 1 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emi-

grants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the regiments in the pay of Great Britain, effected their embarkation on board the ships.

QUICKSILVER, in its liquid state, mercury. Its use in refining silver was discovered, 1540. There are mines of it in various parts, the chief of which are at Almaden, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797; and at New Almaden and other places in California. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel*.

QUICUNQUE VULT, see *Athanasian Creed*.

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon, archbishop of Cambray, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699. See *Jansenists*, *Quakerism* and *Pietism*.

QUILLS are said to have been first used for pens in 553; authorities say not before 635.

QUINCE, the *Pyrus Cydonia*, brought to this country from Austria, before 1573. The Japan quince, or *Pyrus japonica*, brought hither from Japan, 1796.

QUINDECIMVIRI, fifteen men, chosen to keep the Sybilline books. The number, originally two (*duumviri*), about 520 B.C., was increased to ten in 365 B.C., and afterwards (probably by Sulla) to fifteen, about 82 B.C. Julius Cæsar added one; but the precedent was not followed.

QUININE or QUINIA, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all genuine cinchona barks, especially of the yellow bark; see *Jesuits' Bark*. Artificial quinine was prepared (synthetically) by Mr. W. L. Scott, in Oct. 1865.—QUINODINE, see *Fluorescence*. John Eliot Howard, promoter of the cultivation of cinchona in India, died 22 Nov. 1883.

QUINQUAGESIMA SUNDAY. The observation is said to have been appointed by Gregory the Great (pope, 590-604). The first Sunday in Lent having been termed *Quadragesima*, and the three weeks preceding having been appropriated to the gradual introduction of the Lent fast, the three Sundays of these weeks were called by names significant of their position in the calendar: and reckoning by decades (tenths), the Sunday preceding Quadragesima received its present name, *Quinquagesima*, the second *Sexagesima*, and the third *Septuagesima*.

QUINTILIANS, heretics in the 2nd century, the disciples of Montanus, who took their name from Quintilia, a lady whom he had deceived by his pretended sanctity, and whom they regarded as

a prophetess. They made the eucharist of bread and cheese, and allowed women to be priests and bishops. *Pardon.*

QUIRINUS, a Sabine god, whose name was given to Romulus after his death. L. Papirius Cursor, general in the Roman army, first erected a sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B.C. *Aspin.* The sun-dial was sometimes called the Quirinus, from the original place in which it was set up. *Ashe.* The Sabines who became Roman citizens were termed QUIRITES.

QUITO (capital of the republic of Equator), founded in 1534, was the scene of the measurement of a degree of the meridian, by the French and Spanish mathematicians, 1736-42. Forty thousand persons perished by an earthquake which almost overwhelmed the city of Quito, 4 Feb. 1797. Since then violent shocks, but not so disastrous, occurred; till one, on 22 March, 1859, when about 5000 persons were killed; see *Earthquakes* and *Equator*.

QUIXOTE, see *Don Quixote*.

QUOITS, a game said to have originated with the Greeks, and to have been first played at the Olympic games, by the Idæi Dactyli, fifty years after the deluge of Deucalion, 1453 B.C. Perseus,

the grandson of Acrisius, by Danaë, having inadvertently slain his grandfather when throwing a quoit, exchanged the kingdom of Argos, to which he was heir, for that of Tirynthus, and founded the kingdom of Mycenæ, about 1313 B.C.

QUOTATIONS. Athenæus's "*Deipnosophistæ*" or "*Banquet of the Learned*" (compiled about 228) and Burton's "*Anatomy of Melancholy*" (1621) contain masses of extracts. Henry Ainsworth's "*Communion of Saints*" (died 1622) is a mosaic of Scripture quotations.

QUO WARRANTO ACT, passed 1280. By it a writ may be directed to any person to inquire by what authority he holds any office or franchise. Charles II. directed a writ against the corporation of London in 1683, and the court of king's bench declared their charter forfeited. The decision was reversed in 1690. The proceedings have been regulated by various acts, 1710, 1792, 1837, 1843.

R.

RABBITS, see *New South Wales*, 1887.

A rabbit pest has spread devastation over the Australian colonies. Rabbit-proof wire-netting is chiefly used for checking its progress. The ravages of the *reck-rabbits* in California and adjoining states checked by hunters, 1895-6. Rabbits destroyed in Queensland by injection with chicken cholera, reported, 22 Oct. 1898.

RABIES, see *Hydrophobia*.

RACES, one of the ancient games of Greece. Horse-races were known in England in very early times. Fitz-Stephen, in the days of Henry I., mentions the delight taken by the citizens of London in the diversion. In James I.'s reign Croydon in the south, and Gartery in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Cumden*. In the end of Charles I.'s reign, races were run at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plates (as did queen Anne), and founded an academy for riding.

RACK, an engine of torture, for extracting a confession from criminals, mentioned by Demosthenes, *de Corona*, B.C. 330, and in later times an instrument of the Inquisition. Lord Coke states from tradition that the duke of Exeter, in the reign of Henry VI., erected a rack of torture 1447 (thence called the duke of Exeter's daughter), now seen in the Tower. In the case of Feiton, who murdered the duke of Buckingham, the judges of England protested against the proposal of the privy council to put the assassin to the rack, as contrary to the laws, 1628; the use of the rack was abolished 1640. See *Ravalliac* and *Torture*.

RACQUETS (Arabic *ra'hut*, "palm of the hand"). A game played in an open (now but seldom) or close court (60 ft. long, and 30 ft. wide and 40 ft. high, with high walls surrounding it, the floor being divided into two principal areas by the "short" line) with a bat resembling that used in

tennis, and a small hard ball. 15 usually constitutes the game. Racquets first came into vogue during the early part of the 19th century, and Chas. Dickens refers to the game in "Pickwick" in connection with the Fleet prison, where insolvent debtors enlivened the monotony of their existence by playing this game against a single wall. In 1853, a racquet court was erected at Prince's Club, and since then courts have become common at the universities and public schools. On the sale of Prince's Club grounds in 1886, the Queen's Club, Kensington, became the headquarters of the game, and here the championship and the universities and public school matches take place.

Amateur championship, singles, instituted 1888, doubles, 1890; Oxford and Cambridge, singles, 188, doubles, 1855; Public Schools Challenge Cup, 1868. Amateur champion, E. M. Baerlein, 1909. E. M. Baerlein, amateur, defeated H. Brougham in the challenge round of the singles championship by 3 games to 1. Baerlein and Percy Ashworth secured the doubles championship, the holders of which, F. Dames-Longworth and Vane Pennell, retired. The Public Schools challenge cup went to Charterhouse, who beat Eton in the final. Oxford easily beat Cambridge in both doubles and singles. The professional racquet championship of England was played for by W. Hawes (Wellington) and C. Williams (Princes Club), the latter being successful. T. Jennings, of Aldershot, won the £100 professional handicap, held at Queen's Club.

RADCLIFFE LIBRARY, OXFORD, founded under the will of Dr. John Radcliffe, an eminent physician. He died 1 Nov. 1714, leaving 40,000*l.* to the university of Oxford for the founding a library, the first stone of which was laid 17 May, 1737, and the edifice was opened 13 April, 1749.—The **RADCLIFFE OBSERVATORY**, Oxford, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, was completed in 1794. The publication of the observations was commenced in 1842, by Mr. Manuel J. Johnson, the director, appointed in 1839. Radcliffe Infirmary opened in 1770; see *Oxford*, 1893.

RADICALS or "RADICAL REFORMERS," persons who professed to aim at procuring a thorough reformation in the government and policy of England, became prominent in 1816, when Hampden clubs were formed, of which sir Francis Burdett, lord Cochrane, major Cartwright, and William Cobbett were prominent members. Samuel Bamford's "Life of a Radical," published in 1842, gives much information; he died 13 April, 1872. Many radicals were severely punished, 1817-20. Wm. Harris's "History of the Radical Party," published early in 1885.—The "Radicals" in the United States were the party headed by Thaddeus Stevens, bitterly opposed to the policy of president Johnson, as too favourable to the subdued Southern States.

The *Radical Programme*, advocated by the rt. hon. Joseph Chamberlain, widely circulated, first appeared July, 1885, in the *Fortnightly Review*; it included reform of the land laws, free education, increased local government, reform in taxation and finance, improvement of condition of agricultural labourers and of the poor, and religious equality and disestablishment of national churches.

The National Radical Union, at its fourth anniversary at Birmingham, changed its name to National Liberal Union. 24 April, 1889.

RADIOGRAPHS, a name given to the photographs obtained by Röntgen rays, see *Photography*, 1896.

RADIOMETER, &c., a little instrument constructed by Mr. (knt. 1897) Wm. Crookes, F.R.S., 1873-6. Two little disk arms, mounted on a pivot and placed in an exhausted glass-bulb, revolve when placed in bright light. The motion was attributed to heat-absorption, 1877; see *Light*.

Radiophone. By this apparatus professor Bell, at Philadelphia, showed how a ray of strong light, acting on a selenium cell, conveyed sound 500 feet, Sept. 1884.

RADIOTELEGRAMS, messages sent through the post-office from land stations to ships at sea, through the medium of wireless telegraphy (*which see*).

RADIUM. This new and extremely rare metal is found in combination with chlorine and bromine, as radium chloride and radium bromide. It is obtained in very minute quantities from pitchblende after the metal uranium has been extracted. The principle of radio-activity was discovered by M. Becquerel, in Paris, in 1896, from the study of uranium, and Mme. Sklodowska Curie's investigation of this metal, when taking up the subject of radio-activity as the thesis for her doctorate degree, led to the discovery of radium. The discovery of the new metal was communicated by M. Curie to the Academy of Sciences, Paris, in March, 1903, and on 19 June of the same year M. Curie gave a demonstration of this new substance at the Royal Institution, London. Investigations of the properties and phenomena exhibited by radium have also been carried on by M. Becquerel, prof. E. Rutherford, sir William Ramsay, Mr. Soddy, prof. J. J. Thompson, sir William Crookes, and others. Radium possesses the extraordinary property of continually producing heat without combustion and spontaneously producing electricity, and maintains its own temperature, 15° Cent. above its surroundings. It gives off an emanation or gas which shines by its own light, resembling in appearance that of the glow-worm. This emanation, under the cold of liquid air, condenses and leaves behind a rare gas, helium, an element existing in the sun. It is supposed that radium is an element breaking up, and in its dissolution giving out energy. Three kinds of rays are continually in a state of radiation, and are known as the alpha, beta, and gamma rays. The *alpha* rays consist of atoms of matter, each 1 per cent. of the weight of a radium atom, projected with an enormous velocity, but these can be stopped by a thin sheet of metal; they are the proctiles which are rendered visible on a chemical screen, as the zinc sulphide in sir William Crookes' ingenious spinthariscopes. The *beta* rays consist of flying or escaped electrons, atoms of atoms, many thousand times smaller than anything else known, and possess the power of penetrating most metals. The *gamma* rays, also very penetrating, are probably a variety of the X-rays. Radium has been detected in the deposit of the hot mineral waters of Bath and Buxton, pointing to its existence in considerable, but widely diffused, quantities in the interior of the earth. It is supposed that the element uranium is the parent of radium, and that lead is the last stage in the series of transformations. As a therapeutic agent, radium rays have been used in cases of cancer, lupus and other skin diseases, but with no very definite result; it appears, however, to have a bactericidal action

in certain cases. Experiments made by M. Dany⁶², he Feb. 1903 *et seq.*, at the Pasteur Institute, on the action of radium on larvæ, demonstrated the power of the rays to suspend or modify functional developments. Experiments on various low forms of life have also been made by M. Bohn, at the biological laboratories of the Sorbonne, with remarkable results. M. and Mme. Curie, the discoverers of radium, were the recipients of various honours in recognition of their eminent services to scientific research. In 1905 prof. John B. Burke, of the Cavendish laboratory, Cambridge, by the exposure of a solution of gelatine to the action of bromide of radium, produced a thin pellicle, which gradually increased in depth; on microscopic examination it was found to be composed of corpuscles, to which the name of *radiobes* has been given. It has not, however, been proved that spontaneous generation has been produced by the action of radium. M. Curie was killed in a street accident in Paris 19th April, 1906.

Prof. Thorpe at a meeting of the royal society presents a communication on "The Atomic Weight of Radium," which he finds from his experiments to be 227 . . . 5 March, 1908

RADSTADT, Austria. Here Moreau and the French defeated the Austrians, 5 July, 1796.

RAFFAELLE WARE, see *Pottery*.

RAGGED SCHOOLS, free schools for out-cast destitute ragged children, set up in large towns. The instruction is based on the scriptures. John Pounds, a cobbler, of Portsmouth, who died in 1839, opened a school of this kind; and one was set up by Andrew Walker, in "Devil's Acre," Westminster, in 1839. *Knight*. They did not receive their name till 1844, when the "Ragged school union" was formed, principally by Mr. S. R. Starey and Mr. Wm. Locke (afterwards hon. secretary). The earl of Shaftesbury was chairman. In 1856 there were 150 Ragged school institutions. Sunday ragged schools reported in London in 1867, 226; in 1898, 231; day schools, in 1867, 204; in 1878, 58; week evening schools, in 1867, 207, in 1878, 147; 44 industrial schools in 1898. Ragged school buildings were exempted from rates, 1869. The day schools were superseded by the educational authorities; but the Sunday schools, mothers' meetings, Bible classes, lads' and girls' clubs, with a number of auxiliary agencies of benevolence and social uplift, including a register of cripples, holiday homes in country, &c., are still maintained in great efficiency (1910). Dr. Guthrie, a founder of ragged schools in Edinburgh, &c., died 24 Feb. 1873. The earl of Shaftesbury, who was an ardent supporter of the movement, died 1 Oct. 1885. Jubilee of the movement celebrated, 20 April, 1894. Queen Victoria was patron, succeeded by king Edward VII., and king George V. and queen Mary. The secretary, sir John Kirk, was knighted by king Edward VII., after 40 years' service, and a national testimonial presented at the Mansion house, 1907. Annual meetings; the union was styled Shaftesbury society in May, 1893; number of ragged schools, 1910, 140. See *Shoeblack*.

RAGMAN ROLL (said to derive its name from Ragimunde, a papal legate in Scotland) contains the records of the homage and fealty to Edward I., sworn to by the nobility and clergy of Scotland at Berwick in 1296. The original was given up to Robert Bruce, king of Scotland, in 1328, when his son David was contracted in marriage to the princess Joanna of England.

RAGUSA, a city on the Adriatic, on the south confines of Dalmatia, was taken by the Venetians, 171, but became an independent republic, 1358. It suffered much by an earthquake, 1667; was taken by the French in 1806, and given up to Austria in 1814.

RAILWAYS. Short roads, in and about Newcastle, laid down by Mr. Beaumont, so early as 602, are thus mentioned in 1676:—"The manner the carriage is by laying rails of timber from the colliery to the river, exactly straight and parallel; and bulky carts are made with four rollers fitting these rails, whereby the carriage is so easy that one horse will draw down four or five chaldron of coals, and is an immense benefit to the coal merchants." *Roger North*. They were made of iron at Whitehaven, in 1738. See *Gauges*, *Tramroads*. For electric railways see *Electricity*.

RAIN - GAUGE, an apparatus consisting primarily of a funnel-shaped receiver and a glass graduated measure of a much smaller size, measuring the amount of rain collected in tenths and hundredths of an inch. Those chiefly in use are Symons's, the improved Glaisher's, Fleming's, and Jagger's.

RAJPUTANA, an administrative territory, N.W. India, embracing 20 native states and the British district of Ajmere-Merwara (27,11 sq. mi.; population, 460,722). Total area, 132,461 sq. mi.; population in 1881, 10,268,392; 1901, 9,723,301; 1910 (est.), 10,000,000. The Rajputs, the predominant race, are a proud aristocracy. At the time of the Mahometan invasions in the 11th century, the Rajputs ruled over half-a-dozen strong states. From the end of the 16th to the middle of the 18th century, these states acknowledged the supremacy of the Mogul emperor of Delhi; they were next subjected by the Maharrattas, but became independent when these were crushed by the British, 1817 *et seq.*, with whom they eventually became allies. The Rana of Jhalawar accused of misgovernment, etc., was deprived of full powers in 1887, reinvested, 1894.
